

TRANSPPOSITION NOTE FOR THE IMPLEMENTATION OF THE OCCUPATIONAL ASPECTS OF THE BASIC SAFETY STANDARDS DIRECTIVE 2013/59/EURATOM (BSSD)

The Department for Business, Energy and Industrial Strategy (BEIS) has overall responsibility for UK transposition of the BSSD. A number of government departments are implementing regulations to transpose various aspects of the BSSD and each will complete a Transposition Note relating to the regulations they are implementing.

The Health and Safety Executive (HSE) is implementing the occupational aspects of the BSSD in **The Ionising Radiations Regulations 2017 (IRR17)**. Some of these occupational aspects are already implemented by the **Health and Safety at Work, etc. Act 1974 (HSWA)** and the **Management of Health and Safety at Work Regulations 1999 (MHSWR)**. Other occupational elements of the BSSD relate to the **Requirements for the Approval of Dosimetry Services (RADS)** and the **Radiation Protection Adviser Statement of core competencies (RPA Statement)** (both published by HSE).

- Unless otherwise stated, references in the ‘Implementation’ column are to regulations in IRR17.
