THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 91/496/EEC of 15 July 1991 laying down the principles governing the organisation of veterinary checks on animals entering the Community from third countries and amending Directives 89/662/EEC, 90/425/EEC and 90/675/EEC⁽¹⁾, and in particular Article 4(5) thereof,

Having regard to Council Directive 97/78/EC of 18 December 1997 laying down the principles governing the organisation of veterinary checks on products entering the Community from third countries⁽²⁾, and in particular Article 3(5) thereof,

Having regard to Council Directive 2002/99/EC of 16 December 2002 laying down the animal health rules governing the production, processing, distribution and introduction of products of animal origin for human consumption⁽³⁾, and in particular Article 8(5) thereof,

Whereas:

- (1) Directive 91/496/EEC provides for veterinary checks in respect of animals from third countries entering the Community to be carried out by the Member States in accordance with that Directive.
- (2) Directive 97/78/EC provides for veterinary checks on certain products of animal origin and certain plant products introduced into the Community from third countries.
- (3) Commission Decision 2002/349/EC of 26 April 2002 laying down the list of products to be examined at border inspection posts under Council Directive 97/78/EC⁽⁴⁾ provides that the products of animal origin listed in that Decision are to be subject to veterinary checks at border inspection posts in accordance with Directive 97/78/EC.
- (4) As veterinary checks at border inspections posts are carried out in close cooperation with customs officials, it is appropriate to use a list of products that refer to the

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 17 April 2007 concerning lists of animals and products to be subject to controls at border inspection posts under Council Directives 91/496/EEC and 97/78/EC (notified under document number C(2007) 1547) (Text with EEA relevance) (2007/275/EC). (See end of Document for details)

Combined Nomenclature (CN) provided for in Council Regulation (EEC) No 2658/87 of 23 July 1987 on the tariff and statistical nomenclature and on the Common Customs Tariff⁽⁵⁾ as a first basis for selection of consignments. The lists of products in Decision 2002/349/EC should therefore be replaced by the list in Annex I to this Decision.

- (5) In the interests of rationality of Community legislation, it is appropriate that the list in Annex I to this Decision also covers animals entering the Community from third countries.
- (6) In order to facilitate controls by the competent authorities at border inspection posts, the list in Annex I to this Decision should provide as precise a description as possible of the animals and products to be subjected to veterinary checks under Directive 97/78/EC. In addition, for certain CN codes, this Decision only provides for a small part of the products falling under the relevant Chapter or heading to be subjected to veterinary checks. In such cases, Column 3 of Annex I to this Decision, should refer to the applicable CN code and give details of the products which should be subject to those veterinary checks.
- (7) Decision 2002/349/EC provides that composite food products containing only a limited percentage of products of animal origin are to continue to be subject to national rules.
- (8) However, in order to avoid differences in interpretation between Member States, leading to distortions in trade and to potential animal health risks, rules should now be laid down at Community level concerning the composite products that may be exempted from veterinary checks under Directive 97/78/EC.
- (9) Regulation (EC) No 853/2004 of the European Parliament and of the Council of 29 April 2004 laying down specific hygiene rules for food of animal origin⁽⁶⁾ contains definitions of certain products. In the interests of consistency of Community legislation, it is appropriate to have regard to those definitions in this Decision.
- (10) There are differences in the animal health risk associated with imports of different types of animal products into the Community. Accordingly, this Decision should provide that all composite products containing meat products should be subject to veterinary checks, while different criteria should be applied to composite products containing other animal products based upon the need to have harmonised rules at Community level.
- (11) Certain composite products receive treatment during manufacture which reduces the potential animal health risk present in such products. The appearance, shelf stability, and physical characteristics should therefore be used as recognisable distinguishing features for competent authorities that have to make a decision on the necessity of subjecting composite products to veterinary checks.
- (12) In the interests of consistency of veterinary checks at border inspection posts on composite products being introduced into the Community, it is appropriate to establish also a list of certain foodstuffs and composite products that may be exempted from the veterinary checks provided for in Directive 97/78/EC.
- (13) In the interests of coherence of Community legislation, it is appropriate to repeal Decision 2002/349/EC and replace it by this Decision.

Status: Point in time view as at 17/04/2007.

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 17 April 2007 concerning lists of animals and products to be subject to controls at border inspection posts under Council Directives 91/496/EEC and 97/78/EC (notified under document number C(2007) 1547) (Text with EEA relevance) (2007/275/EC). (See end of Document for details)

- (14) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

HAS ADOPTED THIS DECISION:

Article 1

Subject matter

This Decision lays down rules regarding the animals and products to be subjected to veterinary checks at border inspection posts on introduction into the Community, in accordance with Directives 91/496/EEC and 97/78/EC.

Article 2

Definitions

For the purposes of this Decision, the following definitions shall apply:

- (a) composite product: a foodstuff intended for human consumption that contains both processed products of animal origin and products of plant origin and includes those where the processing of primary product is an integral part of the production of the final product;
- (b) meat products: products as defined in point 7.1 of Annex I to Regulation (EC) No 853/2004;
- (c) processed products: the processed products listed under point 7 of Annex 1 to Regulation (EC) No 853/2004;
- (d) dairy products: products as defined in point 7.2 of Annex I to Regulation (EC) No 853/2004.

Article 3

Veterinary checks of animals and products listed in Annex I

1 The animals and products listed in Annex I to this Decision shall be subjected to veterinary checks at border inspection posts in accordance with Directives 91/496/EEC and 97/78/EC.

2 This Decision applies without prejudice to the checks on composite products necessary to ensure compliance with Community public health requirements.

3 Initial selection of products for veterinary checks made on the basis of the Combined Nomenclature in Column 1 of the Annex shall be qualified by reference to the specific text or veterinary legislation cited in Column 3.

Status: Point in time view as at 17/04/2007.

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 17 April 2007 concerning lists of animals and products to be subject to controls at border inspection posts under Council Directives 91/496/EEC and 97/78/EC (notified under document number C(2007) 1547) (Text with EEA relevance) (2007/275/EC). (See end of Document for details)

Article 4

Composite products subject to veterinary checks

The following composite products shall be subject to veterinary checks:

- (a) Composite products containing processed meat product.
- (b) Composite products containing half or more of their substance of any one processed product of animal origin other than processed meat product.
- (c) Composite products containing no processed meat product and less than half of their substance of processed milk product where the final products do not meet the requirements of Article 6.

Article 5

Certification to accompany composite products subject to veterinary checks

Those composite products containing processed meat product shall be accompanied at introduction into the Community by the relevant certificate for meat products laid down in Community legislation, regardless of any other animal product content.

Those composite products referred to in Article 4(b) and 4(c), containing processed milk product, shall be accompanied at introduction into the Community by the relevant certificate laid down in Community legislation.

Composite products containing only processed fishery or egg products of animal origin shall be accompanied at introduction into the Community by the relevant certificate laid down in Community legislation or a commercial document where there is no certificate so required.

Article 6

Derogation for certain composite products and foodstuffs

1 By way of derogation from Article 3, the following composite products or foodstuffs intended for human consumption, not containing any meat products, shall not be subject to veterinary checks:

- a composite products containing less than half of their substance of any other processed product provided such products are:
 - (i) shelf-stable at ambient temperature or have clearly undergone in their manufacture a complete cooking or heat treatment process throughout their substance, so that any raw product is denatured;
 - (ii) clearly identified as intended for human consumption;
 - (iii) securely packaged or sealed in clean containers;
 - (iv) accompanied by a commercial document and labelled in an official language of a Member State, so that that document and labelling together give

information on the nature, quantity and number of packages of the composite products, the country of origin, the manufacturer, and the ingredient;

b composite products or foodstuffs listed in Annex II.

2 However, any milk product included in any composite products shall only be derived from, and treated as provided for, countries listed in Annex I to Commission Decision 2004/438/EC⁽⁷⁾.

Article 7

Repeal

Decision 2002/349/EC is repealed.

Article 8

Applicability

This Decision shall apply from one month after the date of publication in the *Official Journal of the European Union*.

ANNEX I

LIST OF ANIMALS AND PRODUCTS SUBJECT TO VETERINARY CHECKS AS REFERRED TO IN ARTICLE 3

This list sets out animals and products according to the goods nomenclature in use in the Community to assist selection of consignments that must be submitted to veterinary checks at a border inspection post

Notes:

1. Column 1:

Where a four digit code is used: unless otherwise specified all products prefixed with or covered by these four digits must be passed to the competent authority for veterinary checks.

Where only certain products under any code are required to be examined under veterinary checks and no specific subdivision under this code exists in the goods nomenclature, the code is marked **Ex** (for example **Ex3002**: veterinary check required only for animal derived material and not for the entire heading).

The digits placed within brackets in column 1 are not to be entered in the TRACES system set up by Commission Decision 2004/292/EC of 30 March 2004 on the introduction of the TRACES system and amending Decision 92/486/EEC⁽⁸⁾.

2. Column 2:

The description of the goods is as laid down in the description column of Annex 1 to Regulation (EEC) No 2658/87. For further explanation of the exact coverage of the Common Customs Tariff please refer to the latest amendment to that Annex.

NB: Further information on the products covered by the different Chapters and Headings is provided by the Harmonized System Explanatory Notes of the World Customs Organisation or can be found in the Combined Nomenclature explanatory notes as regards Combined Nomenclature (CN) codes.

3. Column 3: This column gives details of the products covered.

In some cases there are certain live animals (such as reptiles, amphibians, insects, worms, or other invertebrates) or animal products sent to the official veterinarian for which no harmonised animal health conditions for imports into the Community are laid down, and therefore there is no harmonised import certificate. The conditions of import for all live animals not elsewhere specified fall within the scope of Council Directive 92/65/EEC of 13 July 1992 laying down animal health requirements governing trade in and imports into the Community of animals, semen, ova and embryos not subject to animal health requirements laid down in specific Community rules referred to in Annex A (I) to Directive 90/425/EEC⁽⁹⁾, but in the case of certain animals national rules apply as regards the documentation required to accompany consignments. Official veterinarians must examine the consignments and issue a Common Veterinary Entry Document (CVED) as appropriate to indicate that a control has been carried out and that the animals may be released for free circulation.

In certain cases as regards animal by-products covered by Regulation (EC) No 1774/2002 of the European Parliament and of the Council of 3 October 2002 laying down health rules concerning animal by products not intended for human consumption⁽¹⁰⁾, the full extent of the coverage of the Community legislation in respect of derived or processed products is not precisely defined. Veterinary checks must be carried out on products that are processed but are still essentially raw bulk product that are to be further processed before being presented to the final consumer.

Status: Point in time view as at 17/04/2007.

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 17 April 2007 concerning lists of animals and products to be subject to controls at border inspection posts under Council Directives 91/496/EEC and 97/78/EC (notified under document number C(2007) 1547) (Text with EEA relevance) (2007/275/EC). (See end of Document for details)

In these cases the official veterinarian at the border inspection posts must specify whether a particular derived product is so processed that it falls outside the veterinary checks provided for in Community legislation.

TABLE

Notwithstanding the rules for the interpretation of the Combined Nomenclature, the wording for the description of the products in column 2 is to be considered as having no more than an indicative value, the scope being determined, within the context of this Annex by the scope of the CN codes as they exist at the time of adoption of the current Decision. Where ex CN codes are referred to in this table, the coverage is to be determined by application of the CN code and corresponding description taken together.

Chapter 4: Dairy produce; birds' eggs; natural honey; edible products of animal origin, not elsewhere specified or included

1. The expression 'milk' means full-cream milk or partially or completely skimmed milk.
2. For the purposes of heading 0405:
 - (a) the term 'butter' means natural butter, whey butter or recombined butter (fresh, salted or rancid, including canned butter) derived exclusively from milk, with a milkfat content of 80 % or more but not more than 95 % by weight, a maximum milk solids-not-fat content of 2 % by weight and a maximum water content of 16 % by weight. Butter does not contain added emulsifiers, but may contain sodium chloride, food colours, neutralising salts and cultures of harmless lactic-acid-producing bacteria;
 - (b) the expression 'dairy spreads' means a spreadable emulsion of the water-in-oil type, containing milkfat as the only fat in the product, with a milkfat content of 39 % or more but less than 80 % by weight.
3. Products obtained by the concentration of whey and with the addition of milk or milkfat are to be classified as cheese in heading 0406 provided that they have the three following characteristics:
 - (a) a milkfat content, by weight of the dry matter, of 5 % or more;
 - (b) a dry matter content, by weight, of at least 70 % but not exceeding 85 %; and
 - (c) they are moulded or capable of being moulded.
4. This chapter does not cover:
 - (a) products obtained from whey, containing by weight more than 95 % lactose, expressed as anhydrous lactose calculated on the dry matter (heading 1702); or
 - (b) albumins (including concentrates of two or more whey proteins, containing by weight more than 80 % whey proteins, calculated on the dry matter) (heading 3502) or globulins (heading 3504).

0401	Milk and cream, not concentrated nor containing added sugar or other sweetening matter.	All: Milk includes milk that is raw, pasteurised, or thermised. Includes fractions of milk. Milk for animal feed is included under heading 2309.

This heading covers whole eggs not in shell, and egg yolks of all birds. The products of this heading may be fresh, dried, cooked by steaming or by boiling in water, moulded (e.g. cylindrical 'long eggs'), frozen or otherwise preserved. All these fall in the heading whether or not containing added sugar or other sweetening matter and whether for use as food or for industrial purposes (e.g. in tanning).

This heading does not cover

- (a) Oil of egg yolk (heading 15.06).
- (b) Egg preparations containing seasoning, spices or other additives (heading 21.06).
- (c) Lecithin (heading 29.23).
- (d) Separate egg white (egg albumin) (heading 35.02).

0409 00 00	Natural honey	All
------------	---------------	-----

This heading covers honey produced by bees (*Apis Mellifera*) or by other insects, centrifuged or in the comb or containing comb chunks, provided that neither sugar nor other substance has been added. Such honey may be designated by floral source, origin or colour. The heading excludes artificial honey and mixtures of natural and artificial honey (heading 17.02).

0410 00 00	Edible products of animal origin, not elsewhere specified or included.	All This heading includes Royal Jelly and Propolis and also includes bones or other animal derived material for human consumption. Insects or insect eggs for human consumption are included under this heading.
