Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 12 December 2008 implementing Council Directive 2006/88/EC as regards requirements for quarantine of aquaculture animals (notified under document number C(2008) 7905) (Text with EEA relevance) (2008/946/EC), ANNEX I. (See end of Document for details)

ANNEX I

Minimum conditions for quarantine facilities

PART A

Construction and equipment conditions

- 1. The quarantine facility must be a premise which is separated from other quarantine facilities, other farms or other mollusc farming areas, by a distance specified by the competent authority on the basis of a risk assessment which takes into account the epidemiology of the relevant listed disease(s). However, a quarantine facility may be located within a farm or mollusc farming area.
- 2. The quarantine units must be constructed in such a way that water exchanges amongst them are not possible. In addition, the water outlet system of each quarantine unit must be designed to prevent any possible cross-contamination amongst quarantine units or other units of the same farm or mollusc farming area.
- 3. The water supply of the quarantine units must be free of the relevant listed disease(s).
- 4. When the draining system of the quarantine units is located in [^{F1}a constituent GB territory] zone, compartment or third country or part thereof declared free of a listed disease(s) or subject to a surveillance or eradication programme with regard to a listed disease(s), it must have an effluent treatment system approved by the competent authority. The effluent treatment system must:
- (a) treat all effluents and wastes generated within the quarantine unit in a manner that effectively inactivates the infectious agent responsible for the relevant listed disease(s);
- (b) be equipped with fail-safe backup mechanisms to ensure continous operation and complete containment.

Textual Amendments

- F1 Words in Annex 1 Pt. A para. 4 substituted (E.W.S.) (31.12.2020) by The Animals, Aquatic Animal Health, Invasive Alien Species, Plant Propagating Material and Seeds (Amendment) (EU Exit) Regulations 2020 (S.I. 2020/1388), regs. 1(2)(c), 8(16)(a)
- 5. The quarantine units must be constructed in such a way that the contact with other animals likely to spread the relevant listed disease(s) is prevented.
- 6. All equipment must be constructed in such a way that it can be cleansed and disinfected and appropriate equipment must be available for cleansing and disinfection.
- 7. Hygiene barriers have to be installed at all entrances/exits to the quarantine facility and to its different units.
- 8. Each quarantine unit of the quarantine facility must have its own equipment in order to avoid cross contamination amongst the different quarantine units.

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 12 December 2008 implementing Council Directive 2006/88/EC as regards requirements for quarantine of aquaculture animals (notified under document number C(2008) 7905) (Text with EEA relevance) (2008/946/EC), ANNEX I. (See end of Document for details)

PART B

Management conditions

- 1. The aquaculture production business operator of the quarantine facility must secure, by contract or legal instrument, the services of an approved qualified aquatic animal health professional.
- 2. For each consignment of aquaculture animals quarantined:
- (a) the quarantine unit must be cleansed and disinfected and then kept free from aquaculture animals for at least seven days before the introduction of a new consignment;
- (b) the quarantine period shall only start when the last aquaculture animals of the consignment are introduced.
- 3. Appropriate measures shall be taken to prevent cross-contamination between incoming and outgoing consignments.
- 4. No unauthorised persons may enter the quarantine facility.
- 5. Persons entering the quarantine facility must wear protective clothing including footwear.
- 6. No contacts between personnel or equipment, which may cause contamination between quarantine facilities or quarantine units or between quarantine facilities and farms or mollusc farming areas, shall take place.
- 7. Upon receipt, transport vehicles and equipment, including tanks, containers and water must be treated in a manner that effectively inactivates the infectious agent responsible for the relevant listed disease(s).
- 8. Dead aquaculture animals and aquaculture animals showing clinical signs of disease must be clinically inspected by an approved qualified aquatic animal health professional and a representative selection of dead aquaculture animals and aquaculture animals showing clinical signs of disease must be examined in a laboratory designated by the competent authority.
- 9. The necessary examination, sampling and diagnostic methods must be carried out in consultation with and under the control of the competent authority.
- 10. In addition to the recording obligations provided for in [^{F2}regulation 6 of the Aquatic Animal Health Regulations], the quarantine facility must keep a record of:
- (a) entry/exit time of personnel;
- (b) treatment of incoming water and of effluent water as appropriate;
- (c) any abnormal conditions affecting quarantine operation (power cuts, building damage or serious weather conditions);
- (d) dates and results of samples submitted for testing.

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 12 December 2008 implementing Council Directive 2006/88/EC as regards requirements for quarantine of aquaculture animals (notified under document number C(2008) 7905) (Text with EEA relevance) (2008/946/EC), ANNEX I. (See end of Document for details)
