

Council Directive of 30 July 1964 concerning co-ordinated
annual surveys of investment in industry (64/475/EEC)

COUNCIL DIRECTIVE

of 30 July 1964

concerning co-ordinated annual surveys of investment in industry
(64/475/EEC)

THE COUNCIL OF THE EUROPEAN ECONOMIC COMMUNITY,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 213 thereof;

Having regard to the draft submitted by the Commission;

Whereas in order to carry out the tasks entrusted to it under the Treaty the Commission must have at its disposal annual statistics on the trend of investment in the industries of the Community;

Whereas in the industrial survey for 1962 comparable basic data on the essential characteristics of industry were collected for the first time; whereas such a census cannot be carried out frequently; whereas annual statistics concerning certain basic matters cannot however be dispensed with for the intervening years; whereas, in this respect, investment is of such importance that the statistical offices of most Member States have been collecting data of that kind for several years;

Whereas, however, it is indispensable that such annual statistics be put at the disposal of the Commission by all Member States in co-ordinated form, as regards concept and method, so that comparable results for the six Member States may be obtained following a similar breakdown by industrial sector;

HAS ADOPTED THIS DIRECTIVE:

Article 1

The Member States, in technical co-operation with the Commission, shall take all necessary steps to carry out co-ordinated annual surveys on investment in industry and to ensure that the first survey, for the year 1964, is carried out in 1965.

Article 2

For the purposes of this Directive, an industry shall be defined by reference to the 'Nomenclature of Industries in the European Communities' (NICE).⁽¹⁾ In the case of small undertakings the survey may be carried out by random sampling.

Article 3

The figures to be recorded shall be those in respect of annual investment expenditure (including plant constructed by the undertakings themselves), broken down as follows:

- (a) Machinery, plant, vehicles;

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

- (b) Construction of buildings;
- (c) Purchase of existing buildings and of land.

Investments of a social nature shall, where possible, be recorded globally in a separate return.

Article 4

Subject to any national legislation on the secrecy of statistics, the results of the surveys, broken down by industrial sector, shall be forwarded to the Commission.

Article 5

This Directive is addressed to the Member States.

Done at Brussels, 30 July 1964.

For the Council

The President

G. SCHRÖDER

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

ANNEX

NOMENCLATURE OF INDUSTRIES IN THE EUROPEAN COMMUNITIES — NICE BRANCHES, MAJOR GROUPS, GROUPS, SUBGROUPS AND SUBDIVISIONS

1. MINING AND QUARRYING			
11			Mining and preparation of solid fuels
	<i>111</i>		<i>Mining and preparation of coal</i>
		111.1	Mining and preparation of coal (coal mines proper, washing and grading)
		111.2	Manufacture of manufactured coal fuels
		111.3	Manufacture of coal coke (mines' coking plants and independent coking plants)
		111.4	Manufacture of coal semi-coke
	<i>112</i>		<i>Mining and preparation of lignite</i>
		112.1	Mining and preparation of old lignite (lignite of Provence)
		112.2	Mining and preparation of recent lignite (lignite other than lignite of Provence)
12			Mining of metalliferous ores
	<i>121</i>		<i>Mining of iron ore</i>
	<i>122</i>		<i>Mining of non-ferrous metalliferous ores</i>
		122.1	Mining of non-ferrous metalliferous ores
		122.2	Activities connected with the mining of non-ferrous metalliferous ores (milling, fritting, concentration, etc.)
13	<i>130</i>		Extraction of petroleum and natural gas
		130.1	Extraction of petroleum

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		130.2	Extraction and refining of natural gas.
		130.3	Extraction of bituminous shale
		130.4	Prospection for petroleum and natural gas
14	<i>140</i>		Mining or quarrying of building materials and fireclays
		140.1	Slate quarries
		140.2	Stone quarries (limestone, marble, sandstone for milling, sandstone, lava, hard stone, granite, basalt, porphyry, etc.)
		140.3	Extraction of chalk and limestone additives
		140.4	Extraction or dredging of sands, pebbles and gravels
		140.5	Extraction of marl or stones for the manufacture of lime and cement
		140.6	Extraction of gypsum
		140.7	Extraction of clay, brick clay and kaolin
19	<i>190</i>		Mining or quarrying of other minerals and of peat
		190.1	Salt marshes
		190.2	Mines and salt mines
		.21	Rock salt mines
		.22	Salt works
		190.3	Mining of potassium salt
		190.4	Mining of sulphur and pyrite
		190.5	Mining of asphalt and bitumen
		190.6	Mining of natural limestone phosphate
		190.7	Quarrying of dolomite, pumice stone and pozzolana
a	The manufacture of panels agglomerated with mineral binders is classified under Group 335.		
b	The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.		
c	For France and Belgium in particular.		
d	Not carried out by railway companies.		

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		190.8	Mining or quarrying of miscellaneous mineral products
		.81	Mining of talc and steatite; preparation of talc
		.82	Mining of asbestos
		.83	Mining of fossil silica and kieselguhr; preparation of bricks and proofings of these materials
		.84	Mining or quarrying of feldspar, quartz and pegmatite
		.85	Mining or quarrying of fluorspar
		.86	Mining or barium and strontium ore
		.87	Mining or quarrying of other mineral products: gemstones, mica, graphite, alum, magnesia, etc.
		190.9	Peat

2 and 3. MANUFACTURING INDUSTRIES

20 A	<i>200</i>		Industries producing animal and vegetable fats and oils
			Melting houses for animal fats (land animals) are classified under 201.5 and chemical processing—other than hydrogenation—oxidisation, vacuum treatment, hydrolysis, etc. of animal and vegetable fats under the chemical industry
		200.1	Production of fats from marine animals
		200.2	Production of olive oil
		200.3	Crushing (pressing and extraction) of oil-bearing seeds
		200.4	Refining, hydrogenation and other similar processing of animal and vegetable fats
		200.5	Production of margarine and similar food fats
20 B			Food manufacturing industries (excluding the beverage industry)

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

	201		<i>Slaughtering preparation and preserving of meat</i>
			Communal slaughterhouses which are lent or rented by local authorities to the trade and private industries for the purpose of slaughtering, and non-processing butcheries or pork butcheries (sale of meat), are classified elsewhere and not in NICE
	201.1		Slaughterhouses (except communal slaughterhouses)
		201.2	Processing of meat, except poultry
			Production of salt meats, sausages and dried hams, cooked pork butchers' meat and canned pork butchers' meat and other meat
		201.3	Processing butcheries and pork butcheries
		201.4	Slaughtering, preparation and canning of poultry
		201.5	Melting houses for animal fats (land animals)
	202		<i>Milk and milk products industry</i>
		202.1	Production of milk for human consumption; butter and cheese factories
		.11	Production of milk for human consumption
		.12	Butter manufacturing
		.13	Cheese manufacturing
		202.2	Manufacture of canned milk
		.21	Manufacture of milk concentrates
		.22	Manufacture of powdered milk
	203		<i>Canning and preserving of fruit and vegetables</i>

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		203.1	Quick freezing of vegetables and fruits
		203.2	Production of vegetable or fruit preserves in vinegar, brine or oil
		203.3	Production of vegetable and fruit juices
		203.4	Production of pulps not in airtight containers
		203.5	Production of other vegetable or fruit preserves
		.51	Production of vegetable preserves
		.52	Production of fruit preserves
		.53	Production of dried vegetables
		.54	Production of jams, marmalades and jellies
	204		<i>Canning and preserving of fish and other sea foods</i>
	205		<i>Grain mill products manufacture</i>
		205.1	Milling/meal manufacturing
		205.2	Husking and grading of grain and seeds
	206		<i>Manufacture of bakery products, cakes, rusks and biscuits</i>
			Breadshops are classified elsewhere and not in the NICE
		206.1	Making of bakery products, cakes, rusks and biscuits Industrial manufacture of bakery products (delivering to breadshops and other bodies)
			Other manufacture of bakery products, rusks, cakes and biscuits
		206.2	Baking of cakes and pastries
		206.3	Making of rusks
		206.4	Biscuitworks
	207		<i>Sugar industry</i>

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		207.1	Manufacture of sugar
		207.2	Manufacture and refining of sugar
		207.3	Refining of sugar and manufacture of sugar candy
	208		<i>Manufacture of cocoa, chocolate and sugar confectionery</i>
		208.1	Manufacture of cocoa and chocolate
		208.2	Manufacture of sugar confectionery
		208.3	Manufacture of ice cream
	209		<i>Manufacture of miscellaneous food products</i>
		209.1	Manufacture of macaroni, spaghetti and similar products
		209.2	Processing of coffee and tea
		209.3	Manufacture of coffee substitutes; manufacture of chicory
		209.4.	Manufacture of condiments
		209.5	Manufacture of animal foods
		209.6	Manufacture of water ice
		209.7	Manufacture of other food products
		.71	Manufacture of broths and soups
		.72	Manufacture of dietetic foods
		.73	Manufacture of dessert dishes
		.74	Manufacture of food products not elsewhere specified
21			Beverage industry
	211		<i>Production of ethyl alcohol for fermentation, production of yeast and spirits</i>
		211.1	Distillation of crude ethyl alcohol for fermentation of agricultural products

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		211.2	Manufacture of yeast for breadmaking (with or without allied production of alcohol)
		211.3	Rectification and dilution of ethyl alcohols; production of spirits (including aperitifs with a base other than wine)
	212		<i>Manufacture of wine and other unmalted alcoholic beverages</i>
		212.1	Wine-making; storing and handling of wines
		212.2	Preparation of special wines; champagne, sparkling wines, wine-based aperitifs, etc.
		212.3	Cider making and manufacture of wines from fruit
	213		<i>Brewing and malting</i>
THE MANUFACTURE OF MALT EXTRACT IS CLASSIFIED UNDER 209.74			
		213.1	Brewing
		213.2	Malting
	214		<i>Production of health beverages and spa waters</i>
		214.1	Bottling, and any preparation required, of natural spa waters
		214.2	Soft drinks and carbonated water industries
22	220		Tobacco manufactures
23			Manufacture of textiles
	232		<i>Manufacture and processing of textile materials on wool machinery</i>
		232.1	Stripping
		232.2	Preparation of woollen fibres
		.21	Washing, carding, carbonising of wool, treatment of wool waste
		.22	Wool combing
		232.3	Spinning of wool

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		.31	Spinning of combed wool
		.32	Spinning of carded wool
		.33	Spinning of hair, angora hair, fine and coarse hair
		232.4	Twisting and winding of wool
		232.5	Weaving of wool (except carpet weaving)
		.51	Mechanical weaving of woollen blankets
		.52	Other processing of wool yarn into fabric Mechanical weaving of wool fabrics for clothing and furnishing; mechanical weaving of woollen velvet and plush not elsewhere specified, except carpets; hand-weaving of wool; preparation for weaving of wool
		232.6	Spinning—weaving of wool
		.61	Spinning—weaving; combed cycle
			Spinning—weaving; carded cycle
	233		<i>Manufacturing and processing of textile materials on cotton machinery</i>
		233.3	Cotton spinning
		.31	Three- or four-cylinder spinning non-integrated in weaving
		.32	Spinning on spinning or schlaucops card non-integrated in weaving
		233.4	Twisting and making of sewing thread
		233.5	Cotton weaving (except carpet weaving)
		233.6	Spinning—weaving of cotton
	234		<i>Manufacturing and processing of textile materials on silk machinery</i>
		234.2	Production of silk fibres

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

			Maceration, scouring, washing of waste; combing of silk waste (schappe); cardage of noil silk (bourrette)
		234.3	Spinning of silk and schappe
		.31	Unwinding of cocoons (silk spinning)
		.32	Spinning of chappe, noil silk and discontinuous man-made fibres on chappe
		234.4	Operations on silk yarn and man-made fibres, except finishing
		.41	Throwing of silk and continuous man-made fibre yarn
		.42	Manufacture of sewing thread (including man-made fibres)
		234.5	Silk weaving (except carpet weaving)
			Preparing and threading of cards, preparation for weaving (dressing, winding, twisting, welt winding); weaving of silk fabrics (including man-made fibres)
	235		<i>Manufacturing and processing of textile materials on flax and hemp machinery</i>
		235.1	Retting and scutching of flax and hemp fibres
		235.3	Spinning of flax, hemp or ramie
		.31	Spinning of flax, hemp for weaving and for sewing thread; spinning of ramie. Wet or dry spinning of flax or flaxton and hemp or hemp tow for weaving and making of thread; spinning of other pure and mixed fibres on flax and hemp machines, except spinning of flax for cords
		.32	Dry spinning of hemp and hemp tow for cords

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		235.4	Manufacture of sewing thread from flax, hemp and ramie; simple yarn, twists, cabled or plaited
		235.5	Weaving of flax, hemp and ramie
			Preparation for the weaving of fabric, dressing, preparing and reading of cards; weighing of fabric with or without complementary activities (dyeing, dressing, production of ready-made clothing, etc.); weaving of heavy fabrics (tarpaulins, sails, awnings, blinds, tents and camping equipment) with or without complementary activities (dyeing, dressing, making-up, etc.)
		235.6	Spinning-weaving of flax and hemp
	236		<i>Other textile fibre industries (jute, hard fibres, etc.), cordage</i>
		236.3	Spinning of jute, hard fibres, etc.
		.31	Jute spinning (non-integrated)
		.32	Hard fibre spinning (non-integrated)
		236.4	Cordage, rope and twine, of all materials
		.41	Cordage, rope and twine without integrated spinning
		.42	Cordage, rope and twine with integrated spinning
		236.5	Weaving of jute, hard fibres, etc.
		.51	Weaving of jute (including integrated making up of jute bags)
		.52	Weaving of coco and other hard fibres
		236.6	Spinning-weaving of jute, hard fibres, etc.
		.61	Spinning-weaving of jute
		.62	Spinning-weaving of coir and other hard fibres

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

	237		<i>Manufacture of knitted and crocheted goods</i>
			Only those establishments in which knitwear is manufactured from yarn are considered 'knitting mills'. The making of articles which does not involve the manufacture of knitted or crocheted fabric is classified under manufacture of wearing apparel (Group 243)
		237.1	Manufacture of stockings, understockings, sockettes, socks, half-socks, ankle socks and similar articles
		237.2	Manufacture of other knitted or crocheted articles
		.21	Manufacture of non-elastic and non-rubberised knitted or crocheted fabrics for sale
		.22	Manufacture of berets and other knitted headgear
		.23	Manufacture of knitted and crocheted articles not elsewhere specified (gloves, layettes, underclothes, outer garments, knitted swim suits)
	238		<i>Textile finishing</i>
		238.1	Bleaching and dyeing
		238.2	Printing
	239		<i>Other textile industries</i>
		239.1	Manufacture of carpets, except carpets of hard fibres and coir
		239.2	Manufacture of linoleum, paper felts and oilcloth
		239.3	Manufacture of felt
		.31	Manufacture of woven felt
		.32	Manufacture of knitted felt

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		239.4	Manufacture of ribbons, straps, laces, plaits, passementerie and piping of textile material
		239.5	Manufacture of elastic textiles
		239.6	Manufacture of tulle, lace and similar articles
		239.7	Manufacture of miscellaneous textiles
		.71	Ravelling
		.72	Manufacture of nets
		.73	Manufacture of cotton wool
		.74	Manufacture of textiles not elsewhere specified (bleaching of linters, manufacture of non-woven fabrics, tarpaulins, sails, flags, tents and bags not preceded by weaving, of machine embroidery and scouring cloth)
24			Manufacture of footwear and other wearing apparel and bedding
	241		<i>Machine manufacture of footwear (except from rubber or wood)</i>
		241.1	Manufacture of footwear (except articles coming under 241.2 and 241.3)
		241.2	Manufacture of slippers
		241.3	Manufacture of other special footwear (in particular gymnastic and ballet shoes, galoshes, rope shoes etc.)
		241.4	Manufacture of parts of shoes and accessories
	242		<i>Manufacture by hand and repair of footwear</i>
		242.1	Manufacture by hand; manufacture of orthopaedic shoes; boot making
		242.2	Shoe repair

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

	243		<i>Manufacture of wearing apparel (except furs)</i>
		243.1	Production of outer garments for women, girls and infants
		243.2	Production of outer garments for men and boys
		243.3	Production of special outer garments
		.31	Production of working clothes and uniforms
		.32	Production of rainwear, sewn or in sealed plastic
		.33	Production of leather and similar clothing
		.34	Production of outer clothing not elsewhere specified (vestments and theatrical costumes)
		243.4	Production of shirts and underwear
		.41	Production of corsets, girdles and brassieres
		.42	Production of other items of underwear for women and children
		.43	Production of men's shirts
		243.5	Making to measure of clothing and underwear
		.51	Making to measure of clothing for women and children
		.52	Making to measure of clothing for men
		.53	Making to measure of underwear, corsets, girdles and shirts
		243.6	Hatmaking
		.61	Manufacture of hats and headgear for women; millinery
		.62	Manufacture of hats and headgear for men

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		243.7	Manufacture of clothing accessories
			Manufacture of umbrellas, sunshades, ties, scarves, silk squares, braces, belts and gloves of fabric, buttons, flowers, fashion feathers, shoulder pads and other articles for the interior of garments, etc.
		243.8	Manufacture of household linen (except weaving)
		243.9	Other activities connected with the manufacture of wearing apparel
			Darning, mending, quilting, openwork and pleating
	244		<i>Manufacture of mattresses and bedding</i>
		244.1	Preparation of kapok, horsehair and other fillings
		244.2	Manufacture of all types of mattresses, quilts, eiderdowns, bed spreads and similar articles
		244.3	Manufacturing of made-up textile articles for furnishing (blinds, curtains, etc.)
	245		<i>Skin and fur industries</i>
		245.1	Dressing and lustering of skins
		245.2	Cutting and processing of rabbit skins for hatmaking and spinning
		245.3	Making up of furs; manufacture of skin by-products (scraps and waste of skins, paws, heads, tails, etc.)
		.31	Wholesale making up of furs (manufacture of fur coats, wearing apparel, carpets, rugs, etc. for sale to retailers, furriers, fashion stores, etc.)
		.32	Making up of fashion furs and bespoke garments (manufacture of

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

			fur coats, wearing apparel etc. sold directly to private clients).
25			Wood and cork industry (except manufacture of furniture)
	251		<i>Sawing and industrial preparation of wood</i>
		251.1	Sawmills
		251.2	Planing mills
		251.3	Drying and seasoning of wood
	252		<i>Manufacture of semi-finished wood products</i>
		252.1	Manufacture of veneers and plywoods
		.11	Manufacture of veneers
		.12	Manufacture of plywoods
		252.2	Manufacture of fibre panels and chip boards
		.21	Manufacture of hard or porous fibre panels
		.22	Manufacture of chip boards; manufacture of board, of wood flax or other materials agglomerated with non-mineral binders ^a
		252.3	Manufacture of improved woods
		252.4	Manufacture of wood treated against fungus, insects or fire Treatment of railway sleepers and line posts; treatment under pressure; soaking, pulverising, whitewashing, etc.
	253		<i>Series production of wooden building components including flooring</i>
		253.1	Manufacture, or manufacture and installation, of items of structural woodwork

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		253.2	Manufacture, or manufacture and installation, of manufactured joinery articles for buildings
			Manufacture of doors, windows, French windows, facade panels, sliding doors, partitions, shutters, roller blinds, staircases, built-in kitchen furniture, etc.
		253.3	Manufacture, or manufacture and laying, of flooring
	254		<i>Manufacture of wooden containers</i>
		254.1	Manufacture of cases, containers and pallets
			The manufacture of cases, crates, cylinders and containers in sawn, cut or flattened wood, veneered or layered, in fibre or chip board panels, or including sections in cut, flattened, veneered or layered wood, or sections in fibre or chip board. Manufacture of cases and containers in reinforced wood. Manufacture of sections of cases and containers, pallet cases, pallets and accessories.
		254.2	Manufacture of wood and cooperage
			Manufacture of cooperage stock, staves, watertight vats for liquids, and other cooperage articles
	255		<i>Manufacture of other wooden products (except furniture)</i>
		255.1	Manufacture of miscellaneous wooden products
			Manufacture of moulding and gilded, decorated or plastered rods; picture and mirror frames; round, turned and shafted sticks; wooden tools and-parts of tools, wood for brooms, brushes and paint; brushes; articles for shoes and shoe-

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

			trees; household utensils; wooden equipment for the textile industry and other wooden products
		255.2	Manufacture of sawdust
		255.3	Manufacture of wood wool or fibres
		255.4	Clogmaking
	259		<i>Manufacture of straw, cork, basketware, wickerwork and rattan products; brush-making</i>
		259.1	Manufacture of cork products
			Manufacture of stoppers of natural cork or agglomerates (corks, washers, etc.); miscellaneous articles in natural cork (floats, sheets, soles, etc.); cork agglomerates for insulation (panels, casings, etc.) and miscellaneous articles in cork agglomerates
		259.2	Manufacture of rattan and wickerwork articles, except rattan furniture
			Manufacture of canework for chairs; articles made of reeds or wood chips wicker-work; wickerwork articles in willow or other plaited materials; other plaited articles
		259.3	Manufacture of rattan furniture
		259.4	Manufacture of brushes, brooms and paint brushes
			Manufacture of besoms and other brooms; coarse and fine brushes, tooth brushes and industrial brushes; shaving brushes; artists' and other paint brushes
26	260		Manufacture of wooden furniture
		260.1	Manufacture of household furniture
			Manufacture of bedroom and dining-room suites, kitchen

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

			furniture and shelving, sectional furniture, adaptable and other furniture, decorative partitions
		260.2	Manufacture of office and school furniture
			Manufacture of office and school furniture, and other furniture for industry and public institutions
		260.3	Manufacture of unupholstered seats
			Manufacture of seats made entirely of wood and of curved wood; cane or straw seats and wood seats to be upholstered
		260.4	Manufacture of upholstered seats and other furniture
		260.5	Manufacture of miscellaneous furniture
			Manufacture of furniture not elsewhere specified and manufacture without any special characteristics
		260.6	Activities connected with the furnishing industry; finishing, varnishing, upholstering, and gilding of furniture
		260.7	Manufacture of coffins
27			Paper industry and manufacture of paper products
	271		<i>Manufacture of pulp, paper and paperboard</i>
		271.1	Manufacture of chemical pulps
		.11	Manufacture of pulps for use in connection with textiles
		.12	Manufacture of other chemical wood pulps
		.13	Manufacture of pulps of annual vegetable and other miscellaneous materials, e.g. chemical straw pulps

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		271.2	Manufacture of mechanical, semi-chemical and straw pulps (whether or not connected with the manufacture of paper and paperboard)
		.21	Manufacture of mechanical and semi-chemical pulps
		.22	Manufacture of mechanical and semi-chemical pulp connected with the manufacture of paper and paperboard
		.23	Manufacture of macerated straw pulps, whether or not connected with the manufacture of paper and paperboard
		271.3	Manufacture of paper and paperboard not elsewhere specified
		.31	Manufacture of printing and writing paper
		.32	Manufacture of kraft paper and paperboard, wrapping paper
		.33	Manufacture of thin and miscellaneous paper
		.34	Manufacture of paperboards
	272		<i>Processing of paper and paperboard and manufacture of articles of pulp</i>
		272.1	Manufacture of furnishing articles
		.11	Manufacture of wallpaper
		.12	Manufacture of other paper furnishing articles
		272.2	Manufacture of household, toilet, hygienic and other articles of paper and paper-board
			Manufacture of tablecloths and doilies, tea serviettes towels, handkerchiefs, toilet paper, diapers, dressings and hygienic articles

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		272.3	Manufacture of office and school articles and writing materials (stationery and office supplies)
			Manufacture of writing paper, envelopes, exercise books, registers and account books, diaries, computer cards, files and paperboard box files
		272.4	Manufacture of packing, wrapping and presentation articles
		.41	Manufacture of sacks
		.42	Manufacture of corrugated paperboard and articles thereof
		.43	Manufacture of heavy paperboard boxes, folding boxes, miscellaneous packagings, and paperboard wrapping and display materials
		.44	Manufacture of moulded packaging products, bags, cups, plates and containers, and other packing, wrapping and display material
		272.5	Manufacture of bituminised paper and paperboard for building
		272.6	Manufacture of impregnated, paraffined, self-sealing, gummed and transparent papers
		272.7	Manufacture of coated paper (other than on a paper machine) and novelty paper
		272.8	Manufacture of other articles of paper and paperboard
			Manufacture of tubes and cones for weaving and spinning; tubes and mandrels for other industries; punched cards for looms; playing cards, games and toys; paper caps; cigarette papers, labels, rolls for tape and other machines; other articles of paper and paperboard not elsewhere specified

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

28	280		Printing, publishing and allied industries
		280.1	Printing of newspapers
		280.2	Other printing
		.21	Relief printing (typographical)
		.22	Planographic printing (offset, lithographical, serigraphical, etc.)
		.23	Gravure printing (heliographical)
		280.3	Case binding, unsawn binding and gilding
		280.4	Industries connected with printing
		.41	Engraving, photo-engraving, electrotype, tool engraving, copper plate engraving, chemical engraving
		.42	Manufacture of stamps and seals
		.43	Type foundry
		280.5	Publishing
29			Leather industry
	291		<i>Tanning and rawing</i>
		291.1	Tanning (hides, sold by weight)
		291.2	Rawing (fine leather, sold by size)
		.21	Manufacture of glove skins
		.22	Other rawing
		291.3	Manufacture of agglomerates of leather and composition leather
		291.4	Independent workshops for dressing, dyeing and finishing of leathers
	292		<i>Manufacture of products of leather</i>
		292.1	Manufacture of morocco leather goods, travel goods saddlery and padding, military equipment, sheaths and cases, belts

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		292.2	Manufacture of leather gloves
		292.3	Manufacture of technical leather products
30			Manufacture of rubber, plastic material, man-made fibres and starch products
	<i>301</i>		<i>Processing of rubber and asbestos</i>
		301.1	Manufacture of tyres
		301.2	Retreading and repair of tyres
		301.3	Manufacture of industrial rubber
		.31	Manufacture of straps and pipes
		.32	Manufacture of glues and solutions
		.33	Manufacture of other industrial rubber articles for technical use (including carpets and floor coverings); manufacture of rubber by-products (ebonite)
		.34	Manufacture of rubber footwear
		.35	Manufacture of hygienic and surgical articles
		.36	Manufacture of rubberised textile fabrics, clothing and other articles made thereof (sealed or vulcanised but not sewn)
		.37	Manufacture of sports and camping equipment and toys of rubber
		301.9	Processing of asbestos
			Manufacture of articles in asbestos-rubber, e.g. spinning and weaving articles, protective clothing, asbestos friction linings or filter plates; not including the manufacture of articles in asbestos-cement
	<i>302</i>		<i>Processing of plastic material</i>

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		302.1	Processing of plastic material by moulding (compression, injection or transfer, etc.)
		302.2	Processing of plastic material by any other process
	303		<i>Production of man-made fibres</i>
		303.1	Production of regenerated cellulosic fibres
			Production of discontinuous fibres and continuous yarn based on cellulose, cellulose acetate or other derivatives
		303.2	Production of synthetic fibres
			Production of discontinuous fibres and continuous yarn based on polyamides, polyesters, polyolefins, polyvinyl derivatives, acrylics and others
	304		<i>Manufacture of starch products</i>
		304.1	Manufacture of starch from maize, corn and rice
		304.2	Manufacture of dextrine, cereal and non-cereal starches, soluble or roasted
		304.3	Glucose manufacture
		304.4	Manufacture of other starch products (potato flour and potato starch; sago and menier starch; starch by-products not elsewhere specified)
31			Chemical industry
	311		<i>Manufacture of chemical base materials and further processing of such materials</i>
			Mineral chemical industry, including the manufacture of fertilisers; electrochemistry; organic chemical industry, including carbochemistry and petrochemistry;

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

			the manufacture of synthetic rubber and plastic materials; the manufacture of mineral pigments and organic dyes; distillation of tar, benzol, etc.
	312		<i>Specialised manufacture of chemical products principally for industrial and agricultural purposes</i>
		312.1	Manufacture of coatings, paints, varnishes and lacquers, and printing inks
		312.2	Manufacture of compressed gases
		312.3	Manufacture of miscellaneous glues, gelatin and seaweed extracts
		312.4	Chemical treatment of fats, in particular manufacture of stearin and glycerine
		312.5	Manufacture of essential oils and natural and synthetic perfumes
		312.6	Manufacture of explosives, fireworks and matches
		312.7	Manufacture of auxiliary products for textiles and leather; tannery products
		312.8	Manufacture of miscellaneous products for industrial use
			Manufacture of activated carbon, activated earth; applied abrasives (artificial grindstones; abrasive pastes), of auxiliary products for engineering and metallurgy, and of natural resinous products and their derivatives, etc.
		312.9	Manufacture of products for agriculture
			Manufacture of mixed fertilisers, phytosanitary products, wine-making products, etc.

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

	313		<i>Specialised manufacture of chemical products principally for personal or office use</i>
		313.1	Specialised manufacture of pharmaceutical products in bulk or put up in wrapping
		.11	Manufacture of pharmaceutical products in bulk or put up in wrapping
		.12	Wrapping of pharmaceutical products
		313.2	Manufacture of photographic products (sensitive surfaces and auxiliary products)
		313.3	Manufacture of soap and artificial detergents
		313.4	Manufacture of other products for bodily hygiene, and of perfumery products
		313.5	Manufacture of cleaning and maintenance products (waxes, polishes, metal-polishes, etc.)
		313.6	Manufacture of chemical products for office articles
		.61	Manufacture of pencils
		.62	Manufacture of inks and glues for office use
		.63	Manufacture of stencils and carbon paper
		313.7	Manufacture of other chemical consumer products not elsewhere specified
32	320		Petroleum industry
		320.1	Refining of petroleum
		.11	Refining of petroleum products (excluding distribution)
		.12	Refining and distribution of petroleum products

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		320.2	Production or mixture of non-energy producing petroleum products (paraffin, lubricants)
33			Manufacture of non-metallic mineral products
	331		<i>Manufacture of structural clay products</i>
			Manufacture of bricks, tiles and accessories, floor tiles, pavement setts or floor coverings of clay; manufacture of other clay products for building purposes (including building pottery)
	332		<i>Manufacture of glass and glass products</i>
		332.1	Manufacture of flat glass (and allied products)
		332.2	Manufacture of hollow glass (and allied products) by automatic processes
		332.3	Manufacture of domestic and ornamental glass and glass containers (and allied products) by manual or semi-automatic processes
		332.4	Manufacture of industrial and scientific glassware
		332.5	Manufacture of glass fibres
		332.6	Shaping and processing of flat glass
		332.7	Shaping and processing of domestic and ornamental glass and glass containers
	333		<i>Manufacture of pottery, china and earthenware and refractory products</i>
		333.1	Manufacture of refractory products
		333.2	Manufacture of household and horticultural pottery

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		333.3	Manufacture of paving tiles and floor coverings in pottery and earthenware
		333.4	Manufacture of other ceramic pottery (pipes and articles for the chemical industry, of pottery)
		333.5	Manufacture of ceramic sanitary equipment
		333.6	Earthenware (manufacture of earthenware—household articles—and ornamental earthenware)
		333.7	Manufacture of household articles and industrial articles of china
		333.8	Manufacture of art ceramics and non-industrial finished enamels
	334		<i>Manufacture of cement, lime and plaster</i>
		334.1	Manufacture of cement
		334.2	Manufacture of lime
		334.3	Manufacture of plaster
	335		<i>Manufacture of structural materials in concrete, cement and plaster</i>
		335.1	Manufacture of products of asbestos-cement (cover plates, pipes, etc.)
		335.2	Manufacture of building sections of cement, concrete, reinforced or otherwise (blocks, cement flags, poles, supports, etc.)
		335.3	Manufacture of plaster tiles, plaster and plaster-based prefabricated sections
		335.4	Manufacture of silico-limestone products not elsewhere specified (bricks, castings, etc.)
		335.5	Manufacture of products of pumice-cement

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		335.6	Manufacture of ready-mixed concrete
	339		<i>Stone working and manufacture of other non-metallic mineral products</i>
		339.1	Crushing of minerals and miscellaneous materials
		339.2	Slate cutting outside slate quarries
		339.3	Stone-cutting
			Cutting, turning, polishing, preparation of road building materials; cutting of millstones and of whetstones in natural abrasives; building marble
		339.4	Funeral marble work
		339.5	Manufacture of abrasive papers and cloths
		339.6	Manufacture of non-metallic mineral products not elsewhere specified
34			Production and primary transformation of ferrous and non-ferrous metals
	341		<i>Iron and steel industry (as defined in the ECSC Treaty, including integrated steelworks-owned coking plants)</i>
	342		<i>Manufacture of steel tubes</i>
		342.1	Manufacture of welded and non-welded tubes
		342.2	Tube drawing
		342.3	Manufacture of steel tubes, connections, boxes, joints, etc. for electric conductors ^b
	343		<i>Wiredrawing, cold drawing, cold-rolling of strips, cold-forming</i>
		343.1	Cold drawing of steel
		343.2	Cold-rolling of steel strip

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		343.3	Cold-forming of steel sheet or strip
		343.4	Steel wire-drawing and manufacture of articles from steel wire
		343.41	Steel wire-drawing
		.42	Manufacture of articles from steel wire (including manufacture of wire electrodes for arc welding)
	344		<i>Production and primary transformation of non-ferrous metals</i>
		344.1	Production of non-ferrous metals from minerals (or from waste, debris, ashes and residues) by any process resulting in refined metals
		344.2	Production of non-ferrous metals and their alloys by fusion or other refining processes from waste, debris, ashes and residues
		344.3	First treatment of non-ferrous metals; rolling, drawing, wiredrawing, extrusion
	345		<i>Ferrous and non-ferrous metals foundries</i>
		345.1	Ferrous metals foundries (except those under 345.2) Hydraulic iron foundry (standard or custom-made), cast steel and malleable iron foundry
		345.2	Manufacture of castings for kitchen and domestic heating equipment
		345.3	Non-ferrous metal foundries
			Copper foundry, copper alloy foundry, miscellaneous alloys foundry, light or ultra-light alloys, pressure foundry
35			Manufacture of metal products except machinery and transport equipment

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

	351		<i>Forging, heavy stamping and heavy pressing</i>
	352		<i>Heavy forging, drop forging and stamping; heavy pressing and drawing, secondary transformation and surface treatment</i>
		352.1	Light stamping, pressing and hammering
		352.2	Manufacture of screws, nuts, bolts etc.
		.21	Manufacture of screws including turned metal screws etc.
		.22	Manufacture of nuts and bolts etc.
		353.3	Manufacture of springs (except furniture and watch springs)
		352.4	Sintering
		352.5	Manufacture of chains (except machine and bicycle chains)
		352.6	Surface treatment and case hardening
		352.7	General mechanical engineering ^c
	353		<i>Manufacture and assembly of metal structures</i>
		353.1	Metal structures (bridges and structural work)
		353.2	Metal joinery articles (doors, windows, etc. of rolled or formed metal)
		353.3	Manufacture of pit props
		353.4	Manufacture of fixed railway equipment, normal gauge
	354		<i>Boiler making, manufacture of industrial hollow ware</i>
		354.1	Manufacture of large boilerhouse plant

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		354.2	Manufacture of industrial hollow-ware
			Manufacture of large containers for liquid and gas conduit piping, apparatus, parts and accessories for conduits and tanks
	355		<i>Manufacture of tools and implements and finished articles of metal (except electrical equipment)</i>
		355.1	Manufacture of hand and agricultural tools and equipment
		.11	Manufacture of hand tools
		.12	Manufacture of agricultural tools and equipment
		355.2	Cutlery and manufacture of table cutlery
		355.3	Ironmongery (locks and ironwork)
		355.4	Manufacture of metal packaging
		.41	Manufacture of heavy metal packaging
		.42	Manufacture of light metal packaging
		355.5	Manufacture of domestic and kitchen heaters of sheet metal
		355.6	Manufacture of metal furniture (including safes)
		355.7	Manufacture of household and similar articles
		355.8	Manufacture of small metal articles
		355.9	Manufacture of small arms and ammunition
	359		<i>Ancillary mechanical engineering activities</i>
		359.1	Blacksmiths', smiths' and welding workshops
		359.2	Rural workshops for the repair of agricultural machinery

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

36			Manufacture of machinery other than electric machines
	361		<i>Manufacture of agricultural machinery and tractors</i>
		361.1	Manufacture of agricultural machinery
		361.2	Manufacture of agricultural tractors
	362		<i>Manufacture of office machinery</i>
	363		<i>Manufacture of metal-working and other machine-tools and fixtures and attachments for these and for other powered tools</i>
		363.1	Manufacture of metal-working machine-tools
		.11	Manufacture of metal-cutting machine-tools
		.12	Manufacture of metal-forming machine-tools
		363.2	Manufacture of tools and fixtures and attachments for machinery
			Manufacture of small diamanté tools and small portable tools for all purposes, motor-driven or driven by air pressure, the electric motors not being manufactured but merely assembled; manufacture of interchangeable spare parts with the character of tools for machinery of all types
	364		<i>Manufacture of textile machinery and accessories; manufacture of sewing machines</i>
		364.1	Manufacture of textile machinery and accessories
		.11	Manufacture of textile machinery
		.12	Manufacture of accessories for textile machinery
		364.2	Manufacture of sewing machines

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

	365		<i>Manufacture of machinery and equipment for the food manufacturing industries and for chemical and allied industries</i>
		365.1	Manufacture of machinery and equipment for the food industries, the preparation of beverages, the tobacco industry, and the chemical, pharmaceutical and allied industries
		365.2	Manufacture of machinery for wrapping, putting up and packing
		365.3	Manufacture of machinery for working rubber and plastic materials
	366		<i>Manufacture of plant and equipment for mines, iron and steel works and foundries, and for the construction industry</i>
		366.1	Manufacture of mining machinery
		366.2	Manufacture of machinery and plant for the iron and steel industry and foundries
		366.3	Manufacture of machinery for the mechanical working of building materials
		366.4	Manufacture of equipment for civil engineering and industrial narrow-gauge railroad equipment
		366.5	Manufacture of hoisting and handling equipment
	367		<i>Manufacture of transmission equipment</i>
		367.1	Manufacture of gears, transmission chains (including bicycle chains), gear-changes and other transmission articles
		367.2	Manufacture of ball-bearings
	368		<i>Manufacture of machinery for other specific industrial purposes</i>

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		368.1	Manufacture of machinery for the working of wood and similar materials
		368.2	Manufacture of machinery for the paperboard and printing and allied industries
		368.3	Manufacture of laundry and dry-cleaning plant
		368.4	Manufacture of machinery and equipment for the leather and footwear industry
	369		<i>Manufacture of other non-electrical machinery and equipment</i>
		369.1	Manufacture of internal combustion engines (other than those intended for road transport and aviation)
		369.2	Manufacture of hydraulic and thermal turbines and other machines producing mechanical energy
		369.3	Manufacture of compressors, pumps, and hydraulic and pneumatic transmission equipment
		369.4	Manufacture of heating, ventilation and drying plant
		369.5	Manufacture of non-domestic freezing plant
		369.6	Manufacture of non-electrical industrial ovens
		369.7	Manufacture of non-electrical soldering equipment
		369.8	Manufacture of cocks and valves
		369.9	Manufacture of other general machinery and equipment
			Manufacture of automatic distributing and vending machines, weighing machines (except precision balances and household

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

			weighing machines), fire-extinguishing equipment, etc.
37			Electrical engineering
	371		<i>Manufacture of electric wiring and cables</i>
	372		<i>Manufacture of motors, generators, transformers, switch gears and other similar equipment for the provision of electric power</i>
	373		<i>Manufacture of electrical equipment for direct utilisation in industry</i>
		373.1	Manufacture of electrical accessories for motor vehicles
		373.2	Manufacture of other electrical equipment
			Manufacture of electric furnaces and storing ovens, tools, industrial electric vehicles, appliances for electric welding, galvanising equipment, etc.
	374		<i>Manufacture of telecommunications equipment, meters, other measuring appliances and electromedical equipment</i>
	375		<i>Manufacture of electronic equipment, audio equipment, radio and television receivers</i>
	376		<i>Manufacture of electrical appliances for domestic use</i>
	377		<i>Manufacture of lamps and lighting equipment</i>
			Manufacture of lamps; manufacture of lighting equipment
	378		<i>Manufacture of batteries and accumulators</i>
	379		<i>Repair, assembly, specialist installation of electrical equipment</i>

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

			The installation of electricity in buildings is classified under Group No 403
38			Manufacture of transport equipment
	381		<i>Shipbuilding, repairing and maintenance</i>
		381.1	Building and repair of seagoing vessels
		381.2	Building and repair of inland waterway vessels
		381.3	Building and repair of boats and yachts
		381.4	Painting of ships
		381.5	Breakers' yards
	382		<i>Manufacture of standard- and narrow-gauge railway rolling stock for public transport</i>
		382.1	Building of locomotives of train carriages, tramcars and other railway vehicles
		382.2	Repair of railway rolling stock ^d
	383		<i>Manufacture of motor vehicles and spare parts thereof</i>
		383.1	Manufacture and assembly of motor vehicles (including road tractors) and of engines
		383.2	Manufacture of coach work, trailers and skips
		383.3	Manufacture of equipment, accessories and spare parts for motor vehicles
	384		<i>Repair of motor vehicles, motorcycles or cycles</i>
		384.1	Servicing of engines; repair and painting of motor vehicles and motorcycles

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		384.2	Repair of bicycles and power-assisted cycles
	385		<i>Manufacture of cycles, motorcycles and parts thereof</i>
		385.1	Manufacture of motorcycles, cycles and power-assisted cycles
		385.2	Manufacture of accessories and spare parts for motorcycles and cycles
	386		<i>Manufacture and repair of aircraft</i>
		386.1	Construction of aeroplanes (including engines)
		386.2	Repair of aeroplanes
	389		<i>Manufacture of transport equipment not elsewhere classified</i>
		389.1	Manufacture of baby carriages
		389.2	Manufacture of animal-drawn vehicles
		389.3	Manufacture of other transport equipment
39			Miscellaneous manufacturing industries
	391		<i>Manufacture of precision instruments and measuring and controlling instruments</i>
		391.1	Manufacture of meters for gas, water and other liquids (including petrol pump meters)
		391.2	Manufacture of measuring, controlling and regulating instruments
		391.3	Manufacture of navigational, hydrological and meteorological instruments
		391.4	Manufacture of drawing and mathematical instruments

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		391.5	Manufacture of precision dimensional measuring instruments
		391.6	Manufacture of precision weighing machinery, laboratory apparatus and teaching equipment
		391.9	Manufacture of other precision instruments
	392		<i>Manufacture of medico-surgical instruments, and equipment and orthopaedic appliances (except orthopaedic footwear)</i>
		392.1	Manufacture of physician's diagnostic apparatus
		392.2	Manufacture of medico-surgical articles
		392.3	Manufacture of dental instruments and appliances
		392.4	Manufacture of prosthetic and orthopaedic appliances
	393		<i>Manufacture of photographic and optical equipment</i>
		393.1	Manufacture of lenses and frames for eye glasses, glasses and equipment for opticians
		393.2	Manufacture of precision optical equipment
		393.3	Manufacture of photographic and cinematographic equipment
	394		<i>Manufacture and repair of watches and clocks</i>
		394.1	Manufacture of watches, clocks and spare parts thereof
		394.2	Repair of watches and clocks
	395		<i>Jewellery and precious metal manufacturing</i>
		395.1	Jewellery
		395.2	Diamond cutting

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		395.3	Lapidary work
		395.4	Manufacture of costume jewellery
		395.5	Striking of coins and medals
	396		<i>Manufacture and repair of musical instruments</i>
		396.1	Manufacture and repair of keyboard instruments (organs, harpsichords, pianos); piano tuning
		396.2	Manufacture and repair of other musical instruments
			Accordions; wind instruments; percussion instruments; stringed instruments
	397		<i>Manufacture of games, toys and sporting and athletic goods</i>
	399		<i>Other manufacturing industries</i>
		399.1	Manufacture of fountain pens and ball-point pens
		399.2	Manufacturing industries not elsewhere specified
			Art industries; manufacture of articles of ivory, meerschaum, bone, horn, etc.; manufacture of fancy goods and smokers' requisites; stuffed animal manufacturing (taxidermy); other manufacturing industries

4. BUILDING AND CIVIL ENGINEERING

40			Construction
	400		<i>Construction (non-specialised); demolition</i>
			Undertakings whose principal activity varies or is insufficiently distinguishable to be attributed to one or other type of construction
		400.1	Non-specialised construction
			The manufacture and assembly, or the assembly only, of metal

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

			structures is classified under Group 353
		400.2	Demolition
	401		<i>Construction of buildings' (dwellings or other)</i>
		401.1	General building work
		401.2	Roofing
		401.3	Construction of chimneys and furnaces
		401.4	Weatherproofing
		401.5	Re-dressing and maintenance of facades
		401.6	Scaffolding
		401.7	Other building activities (including structural work)
	402		<i>Civil engineering; building of roads, bridges, railways, etc.</i>
		402.1	General civil engineering
		402.2	Earth-moving work above ground
		402.3	Building of engineering structures on land (above or below ground)
		402.4	Building of inland waterway and maritime engineering structures
		402.5	Highway construction (including airport and runway construction)
		402.6	Specialist activities in other fields of civil engineering (including installation of road-signs and signals and seamarks, installation of mains and pipelines for gas, water and oil, and installation of electric power transmission and telecommunication lines)
	403		<i>Installation work</i>
		403.1	General installation

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		403.2	Services (gas, water and sanitary equipment installation)
		403.3	Heating and ventilation installation (installation of central-heating, air-conditioning and ventilation plant)
		403.4	Heat, sound and vibration insulation
		403.5	Installation of electricity
		403.6	Installation of aerials, lightning conductors, telephones, etc.
	404		<i>Decorating and finishing</i>
		404.1	General decorating and finishing
		404.2	Plastering
		404.3	Woodwork, with particular reference to installation of wooden fittings (including laying of wooden floors)
		404.4	Painting and. glazing, wallpapering
		404.5	Application of facings and coverings for floors and walls (fixing of tiles, other floor coverings and adhesive finishings)
		404.6	Miscellaneous finishing work (including installation of stoves and fireplaces, etc.)

5. ELECTRICITY, GAS AND WATER

50	500		Combined generation and distribution of various types of power and water	
51			Electricity, gas and steam	
	511		<i>Generation and distribution of electricity</i>	
			Subgroups 511.1 to 511.3 cover the distribution of electric power when combined with generation	
		511.1	Generation of thermal electricity	for the grid

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

		511.2	Generation of hydraulic electricity
		511.3	Generation of nuclear electricity
		511.4	Distribution of electric power
		511.5	Independent generation of electricity by individual power stations in the mining industry
		511.6	Independent generation of electricity by individual power stations in the iron and steel industry
		511.7	Independent generation of electricity by individual power stations in the chemical industry
		511.8	Independent generation of electricity by individual power stations for one or more other branches of industry
	512		<i>Manufacture and distribution of gas</i>
			Subgroup 512.1 covers the distribution of gas when combined with production
		512.1	Gas works
		512.2	Distribution of gaseous fuels
		513	Production and distribution of steam and compressed air; heat production plants
52	520		Water supply

a The manufacture of panels agglomerated with mineral binders is classified under Group 335.

b The insulating tubes (mainly in non-ferrous metals and lined with proofed material) are classified under electrical construction.

c For France and Belgium in particular.

d Not carried out by railway companies.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

- (1) The current edition of the Nomenclature was published in 1963 in the Bulletin of Industrial Statistics (Statistical Office of the European Communities). It is reproduced in the Annex for information.
