

ANNEX XII

FUNCTIONALITIES OF THE INSPECTION DATABASE (referred to in Article 24(1))

1. The inspection database shall include at least the following functionalities:
 - incorporate inspection data of Member States and all signatories to the Paris MOU,
 - provide data on the ship risk profile and on ships due for inspections,
 - calculate the inspection commitments for each Member State,
 - produce the white as well as the grey and black list of flag States, referred to in Article 16(1),
 - produce data on the performance of companies,
 - identify the items in risk areas to be checked at each inspection.
2. The inspection database shall have the capability to adapt to future developments and to interface with other Community maritime safety databases, including SafeSeaNet, which shall provide data on ships' actual calls to ports of Member States and, where appropriate, to relevant national information systems.
3. A deep hyperlink shall be provided from the inspection database to the Equasis information system. Member States shall encourage that the public and private databases relating to ship inspection accessible through Equasis are consulted by the inspectors.
