Commission Implementing Regulation (EU) 2017/717 of 10 April 2017 laying down rules for the application of Regulation (EU) 2016/1012 of the European Parliament and of the Council with regard to the model forms of zootechnical certificates for breeding animals and their germinal products (Text with EEA relevance)

#### COMMISSION IMPLEMENTING REGULATION (EU) 2017/717

of 10 April 2017

laying down rules for the application of Regulation (EU) 2016/1012 of the European Parliament and of the Council with regard to the model forms of zootechnical certificates for breeding animals and their germinal products

(Text with EEA relevance)

#### THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) 2016/1012 of the European Parliament and of the Council of 8 June 2016 on zootechnical and genealogical conditions for the breeding, trade in and entry into the Union of purebred breeding animals, hybrid breeding pigs and the germinal products thereof and amending Regulation (EU) No 652/2014, Council Directives 89/608/EEC and 90/425/EEC and repealing certain acts in the area of animal breeding ('Animal Breeding Regulation')<sup>(1)</sup>, and in particular Article 30(10) thereof,

#### Whereas:

- (1) Regulation (EU) 2016/1012 lays down zootechnical and genealogical rules for trade in breeding animals and their germinal products, and for their entry into the Union, including rules for the issuing of zootechnical certificates for those commodities. Article 30(4) of that Regulation provides that where breeding animals that have been entered in a breeding book maintained by a breed society or registered in a breeding register maintained by a breeding operation, or their germinal products, are traded and where those breeding animals, or the offspring produced from those germinal products, are intended to be entered or registered in another breeding book or breeding register, those breeding animals, or their germinal products, are to be accompanied by a zootechnical certificate.
- (2) Article 30(5) of Regulation (EU) 2016/1012 also provides that where breeding animals that have been entered in a breeding book or registered in a breeding register maintained by a breeding body included in the list provided for in Article 34 of that Regulation, or their germinal products, enter the Union and where those breeding animals, or the offspring produced from those germinal products, are intended to be entered in a breeding book maintained by a breed society or registered in a breeding register maintained by a breeding operation, those breeding animals, or their germinal products, are to be accompanied by a zootechnical certificate.

- (3) The zootechnical certificate provided for in Article 30 of Regulation (EU) 2016/1012 shall only be issued by the breed society, breeding operation or competent authority of dispatch of the breeding animals or of the germinal products thereof, when those consignments are traded within the Union, or by the breeding body or official service of the third country of dispatch, when those consignments enter the Union.
- (4) In addition, Article 31(1) of Regulation (EU) 2016/1012 provides that the competent authority may authorise that germinal products are to be accompanied by a zootechnical certificate issued, on the basis of the information received from the breed society or breeding operation, by a semen collection or storage centre, or by an embryo collection or production team, approved for intra-Union trade in those germinal products in accordance with Union animal health legislation.
- (5) Article 30(6) of Regulation (EU) 2016/1012 specifies that zootechnical certificates are to contain the information set out in the relevant Parts and Chapters of Annex V to that Regulation and comply with the corresponding model forms of zootechnical certificates provided for in implementing acts adopted by the Commission.
- (6) Therefore, it is necessary to establish model forms for the zootechnical certificates that are to accompany consignments of breeding animals and their germinal products when those consignments are traded within the Union or when they enter the Union.
- (7) Article 31(3) of Regulation (EU) 2016/1012 provides that where the results of performance testing or genetic evaluation are publicly available on a website, a reference to that website where those results can be accessed may be provided in the zootechnical certificate instead of indicating those results in the zootechnical certificate. That possibility should be reflected in the model forms of zootechnical certificates established by this Regulation.
- (8) Article 32(1) of Regulation (EU) 2016/1012 provides that in the case of purebred breeding animals of the equine species, the information set out in Chapter I of Part 2 of Annex V to that Regulation is to be contained in a single lifetime identification document for equidae and it also provides for the Commission to adopt delegated acts concerning the content and format of such identification documents. Therefore, it is not necessary for this Regulation to establish a model form of zootechnical certificate for trade in purebred breeding animals of the equine species.
- (9) This Regulation should be applicable from 1 November 2018 in accordance with the date of application provided for in Regulation (EU) 2016/1012.
- (10) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Zootechnics,

#### HAS ADOPTED THIS REGULATION:

#### Article 1

#### Subject matter and scope

This Regulation lays down rules for zootechnical certificates for trade in and the entry into the [FIUnited Kingdom] of breeding animals and germinal products thereof as provided for in Chapter VII of Regulation (EU) 2016/1012.

#### **Textual Amendments**

Words in Art. 1 substituted (31.12.2020) by The Animal Breeding (Amendment) (EU Exit) Regulations 2019 (S.I. 2019/117), regs. 1, 25(1); 2020 c. 1, Sch. 5 para. 1(1)

#### Article 2

## Zootechnical certificates for trade in purebred breeding animals and their germinal products and in hybrid breeding pigs and their germinal products

- For trade in purebred breeding animals and their germinal products, the information set out in Parts 1 and 2 of Annex V to Regulation (EU) 2016/1012 to be included in the zootechnical certificates accompanying consignments of those commodities shall be presented in accordance with the model forms set out in the following Sections of Annex I to this Regulation:
  - a Section A for purebred breeding animals of the bovine, porcine, ovine and caprine species;
  - b Section B for semen of purebred breeding animals of the bovine, porcine, ovine, caprine and equine species;
  - c Section C for oocytes of purebred breeding animals of the bovine, porcine, ovine, caprine and equine species;
  - d Section D for embryos of purebred breeding animals of the bovine, porcine, ovine, caprine and equine species.
- 2 For trade in hybrid breeding pigs and their germinal products, the information set out in Parts 1 and 3 of Annex V to Regulation (EU) 2016/1012 to be included in the zootechnical certificates accompanying consignments of those commodities shall be presented in accordance with the model forms set out in the following Sections of Annex II to this Regulation:
  - a Section A for hybrid breeding pigs;
  - b Section B for semen of hybrid breeding pigs:
  - c Section C for oocytes of hybrid breeding pigs;
  - d Section D for embryos of hybrid breeding pigs.

#### Article 3

## Zootechnical certificates for the entry into the [F2United Kingdom] of purebred breeding animals and their germinal products and of hybrid breeding pigs and their germinal products

1 For the entry into the [F3United Kingdom] of purebred breeding animals and their germinal products, the information set out in Parts 1 and 2 of Annex V to Regulation (EU)

2016/1012 to be included in the zootechnical certificates accompanying consignments of those commodities shall be presented in accordance with the model forms set out in the following Sections of Annex III to this Regulation:

- a Section A for purebred breeding animals of the bovine, porcine, ovine, caprine and equine species;
- b Section B for semen of purebred breeding animals of the bovine, porcine, ovine, caprine and equine species;
- c Section C for oocytes of purebred breeding animals of the bovine, porcine, ovine, caprine and equine species;
- d Section D for embryos of purebred breeding animals of the bovine, porcine, ovine, caprine and equine species.
- For entry into the [F4United Kingdom] of hybrid breeding pigs and their germinal products, the information set out in Parts 1 and 3 of Annex V to Regulation (EU) 2016/1012 to be included in the zootechnical certificates accompanying consignments of those commodities shall be presented in accordance with the model forms set out in the following Sections of Annex IV to this Regulation:
  - a Section A for hybrid breeding pigs;
  - b Section B for semen of hybrid breeding pigs;
  - c Section C for oocytes of hybrid breeding pigs;
  - d Section D for embryos of hybrid breeding pigs.

#### **Textual Amendments**

- F2 Words in Art. 3 heading substituted (31.12.2020) by The Animal Breeding (Amendment) (EU Exit) Regulations 2019 (S.I. 2019/117), regs. 1, **25(2)**; 2020 c. 1, Sch. 5 para. 1(1)
- **F3** Words in Art. 3 substituted (31.12.2020) by The Animal Breeding (Amendment) (EU Exit) Regulations 2019 (S.I. 2019/117), regs. 1, **25(2)**; 2020 c. 1, Sch. 5 para. 1(1)
- **F4** Words in Art. 3 substituted (31.12.2020) by The Animal Breeding (Amendment) (EU Exit) Regulations 2019 (S.I. 2019/117), regs. 1, **25(2)**; 2020 c. 1, Sch. 5 para. 1(1)

#### Article 4

#### Entry into force and applicability

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*. It shall apply from 1 November 2018.

F5 ...

Done at Brussels, 10 April 2017.

For the Commission

The President

Jean-Claude JUNCKER

#### **Textual Amendments**

#### I<sup>F6</sup>ANNEX I

## MODEL FORMS FOR ZOOTECHNICAL CERTIFICATES FOR TRADE IN PUREBRED BREEDING ANIMALS AND THEIR GERMINAL PRODUCTS

#### **Textual Amendments**

**F6** Substituted by Commission Implementing Regulation (EU) 2020/602 of 15 April 2020 amending Implementing Regulation (EU) 2017/717 as regards the model forms of zootechnical certificates for breeding animals and their germinal products (Text with EEA relevance).

#### SECTION A

#### Zootechnical certificate for trade in purebred breeding animals of the bovine, porcine, ovine and caprine species

Zootechnical certificate, in accordance with Regulation (EU) 2016/1012, for trade in purebred breeding animals of the following species:			(a logo of the issuing breed society or competent authority may be included)			
(a)	bovine species ( Bo Bubalus bubalis ) <sup>a</sup>	s taurus, Bos indicus,		Certificate number <sup>c</sup>		
(b)	porcine species ( S	• ,				
(c)	ovine species ( Ovis	,				
(d) F10	caprine species ( C	caprine species ( Capra hircus ) <sup>a</sup>

- 14.2.2. Individual identification number(s)<sup>dj</sup>
- 14.2.3. Animal health identification number(s)<sup>e</sup>
- 14.2.4. Name(s)<sup>c</sup>
- 14.2.5. System(s) of identity verification and result(s)<sup>f</sup>
- 15. Validation

15.1. Done at :	15.2. on:
(insert place of issue)	(insert date of issue)

15.3. Name and capacity of the signatory: ...

(insert in capital letters name and capacity of the individual m signing the certificate)

#### 15.4. Signature: ...

#### Footnotes:

- a Delete where not applicable.
- **b** A single zootechnical certificate may be issued for a group of purebred breeding animals of the porcine species provided that those purebred breeding animals have the same age and the same genetic dam and sire and that individual information is provided in points 5, 6, 7.2, 13 and, as appropriate, 14 of this zootechnical certificate.
- c Keep empty if not applicable.
- d For animals of the bovine, ovine and caprine species, individual identification in accordance with [F7United Kingdom] animal health legislation on the identification and registration of animals. For animals of the porcine species, individual identification in accordance with the rules of the breeding programme approved in accordance with Article 8(3), and, where applicable, Article 12 of Regulation (EU) 2016/1012, and identification number in accordance with [F7United Kingdom] animal health legislation on the identification and registration of animals.
- e Only required for animals of the porcine species: Identification number in accordance with [F8United Kingdom] animal health legislation on the identification and registration of animals of the porcine species.
- f Required in accordance with Article 22(1) of Regulation (EU) 2016/1012 for purebred breeding animals of the bovine, ovine and caprine species used for the collection of semen for artificial insemination. This may be required by breed societies in accordance with Article 22(2) of Regulation (EU) 2016/1012 for purebred breeding animals of the porcine species used for the collection of semen for artificial insemination or for purebred breeding animals of the bovine, ovine, caprine and porcine species used for the collection of oocytes and embryos.
- g If necessary attach additional sheets of paper.
- h For animals of the ovine and caprine species kept in extensive farming conditions, instead of the date of birth, the year of birth (yyyy) and date of identification (dd.mm.yyyy or ISO 8601) may be provided.
- i Insert 'main section' or 'supplementary section' as appropriate. Information on additional generations may be provided.
- j Add individual identification number if different from breeding book number.
- k If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- 1 Required in the case of pregnant females. Information may be indicated in a separate document.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2017/717. (See end of Document for details)

m That individual shall be a representative of the breed society, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.

#### Notes:

- The zootechnical certificate shall be issued in [F9English, and other languages may also appear.]
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

For animals of the porcine species, individual identification in accordance with the rules of the breeding programme approved in accordance with Article

Add individual identification number if different from breeding book number. In the case of purebred breeding animals of the equine species, indicate the individual identification number in accordance with point 3 of Chapter I of Part 1 of Annex II to Regulation (EU) 2016/1012, referred to as 'unique code' in Article 114(1)(a) of Regulation (EU) 2016/429. If individual identification number is either not available or different from the number under which the animal is entered in

identification number.

the breeding book, enter breeding book number.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2017/717. (See end of Document for details)

- 8(3), and, where applicable, Article 12 of Regulation (EU) 2016/1012, and identification number in accordance with [FII United Kingdom] animal health legislation on the identification and registration of animals.
- h Only required for animals of the porcine species: Identification number in accordance with [F12United Kingdom] animal health legislation on the identification and registration of animals of the porcine species.
- i Required in accordance with Article 22(1) of Regulation (EU) 2016/1012 for purebred breeding animals of the bovine, ovine, caprine and equine species used for the collection of semen for artificial insemination. This may be required by breed societies in accordance with Article 22(2) of Regulation (EU) 2016/1012 for purebred breeding animals of the porcine species used for the collection of semen for artificial insemination.
- i If necessary attach additional sheets of paper.
- k For animals of the ovine and caprine species kept in extensive farming conditions, instead of the date of birth, the year of birth (yyyy) and date of identification (dd.mm.yyyy or ISO 8601) may be provided.
- Insert 'main section' or 'supplementary section' as appropriate. Information on additional generations may be provided.
- m If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- n Only required if Part A of the zootechnical certificate is issued by the breed society, or by a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, and Part B of the zootechnical certificate is issued by a semen collection or storage centre authorised in accordance with Article 31(1) of that Regulation.
- That individual shall be a representative of the breed society, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.
- In case only Part B of the zootechnical certificate is issued by a semen collection or storage centre authorised in accordance with Article 31(1) of Regulation (EU) 2016/1012 and Part A of the zootechnical certificate is kept empty or removed from the zootechnical certificate, point 1 of Part B must be completed and a copy of the zootechnical certificate for donor males must be attached as follows:
  - in case of purebred breeding animals of the bovine, ovine, caprine or porcine species, in accordance with the model laid down in Section A of Annex I to Regulation (EU) 2017/717;
  - (ii) in case of purebred breeding animals of the equine species, in accordance with the model laid down in the Annex to Delegated Regulation (EU) 2017/1940, of which at least Part I is incorporated in the single lifetime identification document issued in accordance with Article 118(2)(b) of Regulation (EU) 2016/429.
- q Optional.
- r A straw or another package may contain semen collected from more than one purebred breeding animal, provided information on all contributing donor male purebred breeding animals is provided in point 1.4. of Part B.
- **s** Where applicable, information on sexed semen may be provided.
- t For semen intended for the testing of purebred breeding animals of the bovine, porcine, ovine or caprine species which have not undergone performance testing or genetic evaluation, in accordance with the quantity limits referred to in Article 21(1)(g) of Regulation (EU) 2016/1012.
- u That individual shall be a representative of the breed society, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, or of a semen collection or storage centre authorised in accordance with Article 31(1) of that Regulation, who is authorised to sign the zootechnical certificate.

#### Notes:

- The zootechnical certificate shall be issued in [F13English, and other languages may also appear.]
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

Footnotes:

- Delete where not applicable.
- Keep empty if not applicable. h
- In case Part A of the zootechnical certificate is kept empty or removed from the zootechnical certificate and a copy of the zootechnical certificate issued for the donor female purebred breeding animal is attached, a reference (certificate number) to that zootechnical certificate of the donor female purebred breeding animal must be provided.
- Part A of the zootechnical certificate may be kept empty or removed from the zootechnical certificate following the
- In the case of purebred breeding animals of the equine species, leave blank if breeding book number is equal to individual identification number.
- Add individual identification number if different from breeding book number. In the case of purebred breeding animals of the equine species, indicate the individual identification number in accordance with point 3 of Chapter I of Part 1 of Annex II to Regulation (EU) 2016/1012, referred to as 'unique code' in Article 114(1)(a) of Regulation (EU) 2016/429. If individual identification number is either not available or different from the number under which the animal is entered in the breeding book, enter breeding book number.
- For animals of the bovine, ovine, caprine and equine species, individual identification in accordance with [F15United Kingdom] animal health legislation on the identification and registration of animals. For animals of the porcine species, individual identification in accordance with the rules of the breeding programme approved in accordance with Article 8(3), and, where applicable, Article 12 of Regulation (EU) 2016/1012, and identification number in accordance with [F15United Kingdom] animal health legislation on the identification and registration of animals.
- Only required for animals of the porcine species: Identification number in accordance with [F16United Kingdom] animal health legislation on the identification and registration of animals of the porcine species.
- i This may be required by breed societies in accordance with Article 22(2) of Regulation (EU) 2016/1012 for purebred breeding animals of the bovine, ovine, caprine, porcine and equine species used for the collection of oocytes.
- If necessary attach additional sheets of paper.
- For animals of the ovine and caprine species kept in extensive farming conditions, instead of the date of birth, the year of birth (yyyy) and date of identification (dd.mm.yyyy or ISO 8601) may be provided.
- Insert 'main section' or 'supplementary section' as appropriate. Information on additional generations may be provided.
- If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- Only required if Part A of the zootechnical certificate is issued by the breed society, or by a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, and Part B of the zootechnical certificate is issued by an embryo production team authorised in accordance with Article 31(1) of that Regulation.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2017/717. (See end of Document for details)

- That individual shall be a representative of the breed society, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.
- p In case only Part B of the zootechnical certificate is issued by an embryo production team authorised in accordance with Article 31(1) of Regulation (EU) 2016/1012 and Part A of the zootechnical certificate is kept empty or removed from the zootechnical certificate, point 1 of Part B must be completed and a copy of the zootechnical certificate for the donor female must be attached as follows:
  - in case of purebred breeding animals of the bovine, ovine, caprine or porcine species, in accordance with the model laid down in Section A of Annex I to Regulation (EU) 2017/717;
  - (ii) in case of purebred breeding animals of the equine species, in accordance with the model laid down in the Annex to Delegated Regulation (EU) 2017/1940, of which at least Part I is incorporated in the single lifetime identification document issued in accordance with Article 118(2)(b) of Regulation (EU) 2016/429.
- q Optional.
- r Where there is more than one oocyte in a straw or another package, a clear indication of the number of oocytes is required. A straw or another package shall contain only oocytes collected from one purebred breeding animal.
- s That individual shall be a representative of the breed society, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, or of an embryo production team authorised in accordance with Article 31(1) of that Regulation, who is authorised to sign the zootechnical certificate.

#### Notes:

- The zootechnical certificate shall be issued in [F17English, and other languages may also appear.]
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

- a Delete where not applicable.
- **b** Keep empty if not applicable.
- c In case Part A or B of the zootechnical certificate is kept empty or removed from the zootechnical certificate and a copy of the zootechnical certificate issued for the donor female or male purebred breeding animal(s), or for the semen of those male purebred breeding animal(s), is attached, a reference (certificate number) to that zootechnical certificate of the donor female or male purebred breeding animal(s), or of the semen of those male purebred breeding animal(s), must be provided.
- **d** Part A or B of the zootechnical certificate may be kept empty or removed from the zootechnical certificate following the instructions in footnote 16.
- e In the case of purebred breeding animals of the equine species, leave blank if breeding book number is equal to individual identification number.
- f Add individual identification number if different from breeding book number. In the case of purebred breeding animals of the equine species, indicate the individual identification number in accordance with point 3 of Chapter I of Part 1 of Annex II to Regulation (EU) 2016/1012, referred to as 'unique code' in Article 114(1)(a) of Regulation (EU) 2016/429. If individual identification number is either not available or different from the number under which the animal is entered in the breeding book, enter breeding book number.
- g For animals of the bovine, ovine, caprine and equine species, individual identification in accordance with [F19]United Kingdom] animal health legislation on the identification and registration of animals. For animals of the porcine species, individual identification in accordance with the rules of the breeding programme approved in accordance with Article 8(3), and, where applicable, Article 12 of Regulation (EU) 2016/1012, and identification number in accordance with [F19]United Kingdom] animal health legislation on the identification and registration of animals.
- h Only required for animals of the porcine species: Identification number in accordance with [F20 United Kingdom] animal health legislation on the identification and registration of animals of the porcine species.
- Required in accordance with Article 22(1) of Regulation (EU) 2016/1012 for purebred breeding animals of the bovine, ovine, caprine and equine species used for the collection of semen for artificial insemination. This may be required by breed societies in accordance with Article 22(2) of Regulation (EU) 2016/1012 for purebred breeding animals of the porcine species used for the collection of semen for artificial insemination or for purebred breeding animals of the bovine, ovine, caprine, porcine and equine species used for the collection of oocytes and embryos.
- j If necessary attach additional sheets of paper.
- k For animals of the ovine and caprine species kept in extensive farming conditions, instead of the date of birth, the year of birth (yyyy) and date of identification (dd.mm.yyyy or ISO 8601) may be provided.
- 1 Insert 'main section' or 'supplementary section' as appropriate. Information on additional generations may be provided.
- m If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- n Only required if Part A or B of the zootechnical certificate is issued by the breed society, or by a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, and Parts C and D of the zootechnical certificate are issued by an embryo collection or production team authorised in accordance with Article 31(1) of that Regulation.
- That individual shall be a representative of the breed society, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.
- In case only Part C and, where applicable, Part D of the zootechnical certificate are issued by an embryo collection or production team authorised in accordance with Article 31(1) of Regulation (EU) 2016/1012, and Part(s) A and/or B of the zootechnical certificate is/are kept empty or removed from the zootechnical certificate, points 1 and 2 of Part C must be completed and copies of zootechnical certificate attached as follows:
  - (a) for donor females:
    - in case of purebred breeding animals of the bovine, ovine, caprine or porcine species, in accordance with the model laid down in Section A of Annex I to Regulation (EU) 2017/717;
    - (ii) in case of purebred breeding animals of the equine species, in accordance with the model laid down in the Annex to Delegated Regulation (EU) 2017/1940, of which at least Part I is a dedicated Section of the single lifetime identification document issued in accordance with Article 118(2)(b) of Regulation (EU) 2016/429;
  - (b) for the fertilising semen:
    - (i) as described in point (a), with the necessary adaptations for donor males, or
    - (ii) in accordance with the model laid down in Section B of Annex I to Regulation (EU) 2017/717.
- q Optional.
- r Where there is more than one embryo in a straw or another package, a clear indication of the number of embryos is required.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2017/717. (See end of Document for details)

- s A straw or another package may contain embryos collected, or produced from oocytes collected, from a single female purebred breeding animal fertilised with semen collected from more than one donor male purebred breeding animal, provided information on all contributing donor male purebred breeding animals is provided in point 2.4. of Part C.
- t Where applicable, information on sexed embryos or on the stage of development of the embryo may be provided.
- u That individual shall be a representative of the breed society, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, or of an embryo collection or production team authorised in accordance with Article 31(1) of that Regulation, who is authorised to sign the zootechnical certificate.

#### Notes:

- The zootechnical certificate shall be issued in [F21English, and other languages may also appear.]
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

(insert p	lace of issue)	(insert date of issue)		

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2017/717. (See end of Document for details)

#### 15.3. Name and capacity of the signatory: ...

(insert in capital letters name and capacity of the individual i signing the certificate)

#### 15.4. Signature: ...

#### Footnotes:

- a A single zootechnical certificate may be issued for a group of hybrid breeding pigs provided that those hybrid breeding pigs have the same age and the same genetic dam and sire and that individual information is provided in points 4, 5, 6.2, 12 and, as appropriate, 13 of this zootechnical certificate.
- **b** Keep empty if not applicable.
- c Delete where not applicable.
- d Individual identification in accordance with the rules of the breeding programme approved in accordance with Article 8(3), and, where applicable, Article 12 of Regulation (EU) 2016/1012, and identification number in accordance with [F23United Kingdom] animal health legislation on the identification and registration of animals.
- e This may be required by breeding operations in accordance with Article 22(2) of Regulation (EU) 2016/1012 for hybrid breeding pigs used for the collection of semen for artificial insemination or used for the collection of oocytes and embryos.
- f If necessary attach additional sheets of paper.
- ${\bf g} \qquad \text{Add individual identification number if different from breeding book number}.$
- h If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- i Required in the case of pregnant females. Information may be indicated in a separate document.
- j That individual shall be a representative of the breeding operation, or of a competent authority referred to in Article 30(2) (b) of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.

#### Notes:

- The zootechnical certificate shall be issued in [F24English, and other languages may also appear.]
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

#### **Textual Amendments**

- F23 Words in Annex 2 Section A table footnote substituted (31.12.2020) by S.I. 2019/117, reg. 27(2)(b) (as substituted by The Animals, Aquatic Animal Health, Invasive Alien Species, Plant Propagating Material and Seeds (Amendment) (EU Exit) Regulations 2020 (S.I. 2020/1388), regs. 1(2)(a), 28(20)); 2020 c. 1, Sch. 5 para. 1(1)

a Keep empty if not applicable.								

- b In case Part A of the zootechnical certificate is kept empty or removed from the zootechnical certificate and a copy of the zootechnical certificate issued for the donor male hybrid breeding pig(s) is attached, a reference (certificate number) to that zootechnical certificate of the donor male hybrid breeding pig(s) must be provided.
- c Part A of the zootechnical certificate may be kept empty or removed from the zootechnical certificate following instructions in footnote 12.
- **d** Delete where not applicable.
- e Individual identification in accordance with the rules of the breeding programme approved in accordance with Article 8(3), and, where applicable, Article 12 of Regulation (EU) 2016/1012, and identification number in accordance with [F26United Kingdom] animal health legislation on the identification and registration of animals.
- f This may be required by breeding operations in accordance with Article 22(2) of Regulation (EU) 2016/1012 for hybrid breeding pigs used for the collection of semen for artificial insemination.
- g If necessary attach additional sheets of paper.
- h Add individual identification number if different from breeding book number.
- i If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- j Only required if Part A of the zootechnical certificate is issued by the breeding operation, or by a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012 and Part B of the zootechnical certificate is issued by a semen collection or storage centre authorised in accordance with Article 31(1) of that Regulation.
- k That individual shall be a representative of the breeding operation, or of a competent authority referred to in Article 30(2) (b) of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.
- In case only Part B of the zootechnical certificate is issued by a semen collection or storage centre authorised in accordance with Article 31(1) of Regulation (EU) 2016/1012 and Part A of the zootechnical certificate is kept empty or removed from the zootechnical certificate, point 1 of Part B must be completed and copies of the zootechnical certificates for the donor male hybrid breeding pigs, issued in accordance with the model laid down in Section A of Annex II to Regulation (EU) 2017/717, must be attached.
- m Optional.
- **n** A straw or another package may contain semen collected from more than one hybrid breeding pig, provided information on all contributing donor male hybrid breeding pigs is provided in point 1.3. of Part B.
- Where applicable, information on sexed semen may be provided.
- p For semen intended for the performance testing or genetic evaluation of hybrid breeding pigs which have not undergone such testing or evaluation, in accordance with the quantity limits referred to in Article 24(1)(d) of Regulation (EU) 2016/1012.
- q That individual shall be a representative of the breeding operation, or of a competent authority referred to in Article 30(2) (b) of Regulation (EU) 2016/1012, or of a semen collection or storage centre authorised in accordance with Article 31(1) of that Regulation, who is authorised to sign the zootechnical certificate.

#### Notes.

- $\bullet$  The zootechnical certificate shall be issued in [F27English, and other languages may also appear.]
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

#### Footnotes:

- a Keep empty if not applicable.
- b In case Part(s) A and/or B of the zootechnical certificate is/are kept empty or removed from the zootechnical certificate and a copy of the zootechnical certificate issued for the donor female or male hybrid breeding pig(s), or for the semen of those male hybrid breeding pig(s), is attached, a reference (certificate number) to that zootechnical certificate of the donor female or male hybrid breeding pig(s), or of the semen of those male hybrid breeding pig(s), must be provided.
- c Part(s) A and/or B of the zootechnical certificate may be kept empty or removed from the zootechnical certificate following instructions in footnote 12.
- **d** Delete where not applicable.
- e Individual identification in accordance with the rules of the breeding programme approved in accordance with Article 8(3), and, where applicable, Article 12 of Regulation (EU) 2016/1012, and identification number in accordance with [F32United Kingdom] animal health legislation on the identification and registration of animals.
- f This may be required by breeding operations in accordance with Article 22(2) of Regulation (EU) 2016/1012 for hybrid breeding pigs used for the collection of semen for artificial insemination or used for the collection of oocytes or embryos.
- g If necessary attach additional sheets of paper.
- $\boldsymbol{h} \qquad \text{Add individual identification number if different from breeding book number.} \\$
- i If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- j Only required if Part A or B of the zootechnical certificate is issued by the breeding operation, or by a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012 and Parts C and D of the zootechnical certificate are issued by an embryo collection or production team authorised in accordance with Article 31(1) of that Regulation.
- k That individual shall be a representative of the breeding operation, or of a competent authority referred to in Article 30(2) (b) of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.
- 1 In case only Part C and, where applicable, Part D of the zootechnical certificate are issued by an embryo collection or production team authorised in accordance with Article 31(1) of Regulation (EU) 2016/1012, and Part(s) A and/or B of the zootechnical certificate is/are kept empty or removed from the zootechnical certificate, points 1 and 2 of Part C must be completed and copies of zootechnical certificates attached as follows:
  - (a) for donor females, in accordance with the model laid down in Section A of Annex II to Regulation (EU) 2017/717;
  - (b) for the fertilising semen:
    - (i) as described in point (a), with the necessary adaptations for donor males, or
    - (ii) in accordance with the model laid down in Section B of Annex II to Regulation (EU) 2017/717.

#### m Optional

- n Where there is more than one embryo in a straw or another package, a clear indication of the number of embryos is required.
- A straw or another package may contain embryos collected, or produced from oocytes collected, from a single female hybrid breeding pig fertilised with semen collected from more than one donor male hybrid breeding pig, provided information on all contributing donor male hybrid breeding pigs is provided in point 2.3. of Part C.
- p Where applicable, information on sexed embryos or on the stage of development of the embryo may be provided.
- q That individual shall be a representative of the breeding operation, or of a competent authority referred to in Article 30(2) (b) of Regulation (EU) 2016/1012, or of an embryo collection or production team authorised in accordance with Article 31(1) of that Regulation, who is authorised to sign the zootechnical certificate.

#### Notes.

- The zootechnical certificate shall be issued in [F33English, and other languages may also appear.]
- The colour of the signature must be different from that of the printing.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2017/717. (See end of Document for details)

- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title. ]

Signature: ...

- **b** A single zootechnical certificate may be issued for a group of purebred breeding animals of the porcine species provided that those purebred breeding animals have the same age and the same genetic dam and sire and that individual information is provided in points 5, 6, 7.2, 13 and, as appropriate, 14 of this zootechnical certificate.
- c Keep empty if not applicable.

ANNEX III SECTION A Document Generated: 2024-07-10

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2017/717. (See end of Document for details)

- d In accordance with the legislation on the identification and registration of animals of the country of dispatch.
- e Required in accordance with Article 22(1) of Regulation (EU) 2016/1012 for purebred breeding animals of the bovine, ovine, caprine and equine species used for the collection of semen for artificial insemination. This may be required for purebred breeding animals of the porcine species used for the collection of semen for artificial insemination or for purebred breeding animals of the bovine, ovine, caprine, porcine and equine species used for the collection of oocytes and embryos in accordance with Article 22(2) of Regulation (EU) 2016/1012 by breed societies maintaining the breeding book where the animal is to be entered.
- f If necessary attach additional sheets of paper.
- g For animals of the ovine and caprine species kept in extensive farming conditions, instead of the date of birth, the year of birth (yyyy) and date of identification (dd.mm.yyyy or ISO 8601) may be provided.
- h As regards section of the breeding book, insert 'main section' or 'supplementary section'. Information on additional generations may be provided.
- i Add individual identification number if different from breeding book number.
- j If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- k Required in the case of pregnant females. Information may be indicated in a separate document.
- 1 That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.

#### Notes:

- The zootechnical certificate shall be issued in at least one of the official languages of the country of dispatch.
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

Required in accordance with Article 22(1) of Regulation (EU) 2016/1012 for purebred breeding animals of the bovine, ovine, caprine and equine species used for the collection of semen for artificial insemination. This may be required in accordance with Article 22(2) of Regulation (EU) 2016/1012 for purebred breeding animals of the porcine species used for the collection of semen for artificial insemination by breed society maintaining the breeding book where the offspring

g If necessary attach additional sheets of paper.

of the donor animal is to be entered.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2017/717. (See end of Document for details)

- h For animals of the ovine and caprine species kept in extensive farming conditions, instead of the date of birth, the year of birth (yyyy) and date of identification (dd.mm.yyyy or ISO 8601) may be provided.
- i Insert 'main section' or 'supplementary section' as appropriate. Information on additional generations may be provided.
- j Add individual identification number if different from breeding book number.
- k If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- Only required if Part A of the zootechnical certificate is issued by the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012 and Part B of the zootechnical certificate is issued by a semen collection or storage centre acting on behalf of the breeding body in accordance with Article 33(1) of that Regulation.
- m That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate
- In case only Part B of the zootechnical certificate is issued by a semen collection or storage centre acting on behalf of the breeding body in accordance with Article 33(1) of Regulation (EU) 2016/1012 and Part A of the zootechnical certificate is kept empty or removed from the zootechnical certificate, point 1 of Part B must be completed and copies of the zootechnical certificates for the donor males, issued in accordance with the model laid down in Section A of Annex III to Regulation (EU) 2017/717, must be attached.
- o Optional.
- **p** A straw or another package may contain semen collected from more than one purebred breeding animal, provided information on all contributing donor male purebred breeding animals is provided in point 1.2. of Part B.
- **q** Where applicable, information on sexed semen may be provided.
- r For semen intended for the testing of purebred breeding animals of the bovine, porcine, ovine or caprine species which have not undergone performance testing or genetic evaluation, in accordance with the quantity limits referred to in Article 21(1)(g) of Regulation (EU) 2016/1012.
- s That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, or of a semen collection or storage centre acting on behalf of the breeding body in accordance with Article 33(1) of that Regulation, who is authorised to sign the zootechnical certificate.

## Notes:

- The zootechnical certificate shall be issued in at least one of the official languages of the country of dispatch.
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

- a Delete where not applicable.
- **b** Keep empty if not applicable.
- c In case Part A of the zootechnical certificate is kept empty or removed from the zootechnical certificate and a copy of the zootechnical certificate issued for the donor female purebred breeding animal is attached, a reference (certificate number) to that zootechnical certificate of the donor female purebred breeding animal must be provided.
- **d** Part A of the zootechnical certificate may be kept empty or removed from the zootechnical certificate following the instructions in footnote 14.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2017/717. (See end of Document for details)

- e In accordance with the legislation on the identification and registration of animals of the country of dispatch.
- f This may be required for purebred breeding animals of the bovine, porcine, ovine, caprine and equine species used for the collection of oocytes in accordance with Article 22(2) of Regulation (EU) 2016/1012 by breed societies maintaining the breeding book where the offspring of the donor animal is to be entered.
- g If necessary attach additional sheets of paper.
- h For animals of the ovine and caprine species kept in extensive farming conditions, instead of the date of birth, the year of birth (yyyy) and date of identification (dd.mm.yyyy or ISO 8601) may be provided.
- i Insert 'main section' or 'supplementary section' as appropriate. Information on additional generations may be provided.
- j Add individual identification number if different from breeding book number.
- k If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- Only required if Part A of the zootechnical certificate is issued by the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012 and Part B of the zootechnical certificate is issued by an embryo production team acting on behalf of the breeding body in accordance with Article 33(1) of that Regulation.
- m That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.
- In case only Part B of the zootechnical certificate is issued by an embryo production team acting on behalf of the breeding body in accordance with Article 33(1) of Regulation (EU) 2016/1012 and Part A of the zootechnical certificate is kept empty or removed from the zootechnical certificate, point 1 of Part B must be completed and copies of the zootechnical certificates for the donor female, issued in accordance with the model laid down in Section A of Annex III to Regulation (EU) 2017/717, must be attached.
- o Optional.
- Where there is more than one oocyte in a straw or another package, a clear indication of the number of oocytes is required. A straw or another package shall contain only oocytes collected from one purebred breeding animal.
- That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, or of an embryo production team acting on behalf of the breeding body in accordance with Article 33(1) of that Regulation, who is authorised to sign the zootechnical certificate.

#### Notes:

- The zootechnical certificate shall be issued in at least one of the official languages of the country of dispatch.
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

d			of the zootechnica in footnote 14.	l certificate may be	e kept empty	or remo	oved from the zo	ootechnical certifica	ate following the
e	In acc	ordan	ce with the legislat	ion on the identific	cation and reg	istratio	on of animals of	the country of dispa	atch.
f	Requi	ed in	accordance with A	article 22(1) of Reg	gulation (EU)	2016/1	1012 for purebre	ed breeding animals	of the bovine,

ovine, caprine and equine species used for the collection of semen for artificial insemination. This may be required for purebred breeding animals of the bovine, porcine, ovine, caprine and equine species used for the collection of oocytes and embryos in accordance with Article 22(2) of Regulation (EU) 2016/1012 by breed societies maintaining the breeding book where the offspring obtained from those embryos is to be entered.

If necessary attach additional sheets of paper.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2017/717. (See end of Document for details)

- h For animals of the ovine and caprine species kept in extensive farming conditions, instead of the date of birth, the year of birth (yyyy) and date of identification (dd.mm.yyyy or ISO 8601) may be provided.
- i Insert 'main section' or 'supplementary section' as appropriate. Information on additional generations may be provided.
- j Add individual identification number if different from breeding book number.
- k If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- Only required if Part A or B of the zootechnical certificate is issued by the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012 and Parts C and D of the zootechnical certificate are issued by an embryo collection or production team acting on behalf of the breeding body in accordance with Article 33(1) of that Regulation.
- m That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.
- In case only Part C and, where applicable, Part D of the zootechnical certificate are issued by an embryo collection or production team acting on behalf of the breeding body in accordance with Article 33(1) of Regulation (EU) 2016/1012, and Part(s) A and/or B of the zootechnical certificate is/are kept empty or removed from the zootechnical certificate, points 1 and 2 of Part C must be completed and copies of zootechnical certificates attached as follows:
  - (a) for donor females, in accordance with the model laid down in Section A of Annex III to Regulation (EU) 2017/717;
    - o) for the fertilising semen:
      - (i) as described in point (a), with the necessary adaptations for donor males, or
      - (ii) in accordance with the model laid down in Section B of Annex III to Regulation (EU) 2017/717.
- Optional.
- **p** Where there is more than one embryo in a straw or another package, a clear indication of the number of embryos is required.
- q A straw or another package may contain embryos collected, or produced from oocytes collected, from a single female purebred breeding animal fertilised with semen collected from more than one donor male purebred breeding animal, provided information on all contributing donor male purebred breeding animals is provided in point 2.2. of Part C.
- r Where applicable, information on sexed embryos or on the stage of development of the embryo may be provided.
- s That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, or of an embryo collection or production team acting on behalf of the breeding body in accordance with Article 33(1) of that Regulation, who is authorised to sign the zootechnical certificate.

## Notes:

- The zootechnical certificate shall be issued in at least one of the official languages of the country of dispatch.
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title. ]

15.3. Name and capacity of the signatory: ...

(insert in capital letters name and capacity of the individual k signing that certificate)

# 15.4. Signature: ...

## Footnotes:

- A single zootechnical certificate may be issued for a group of hybrid breeding pigs provided that those hybrid breeding pigs have the same age and the same genetic dam and sire and that individual information is provided in points 4, 5, 6.2, 12 and, as appropriate, 13 of this zootechnical certificate.
- **b** Keep empty if not applicable.
- c Delete where not applicable.
- d In accordance with the legislation on the identification and registration of animals of the country of dispatch.
- e This may be required in accordance with Article 22(2) of Regulation (EU) 2016/1012 for hybrid breeding pigs used for the collection of semen for artificial insemination or for the collection of oocytes and embryos by breeding operations maintaining the breeding register where the animal is to be registered.
- f If necessary attach additional sheets of paper.
- **g** Add individual identification number if different from breeding book number.
- h If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- i Required in the case of pregnant females. Information may be indicated in a separate document.
- j Applicable only for purebred breeding pigs of different breeds or lines registered in a breeding register for hybrid breeding pigs.
- k That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.

Notes:

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2017/717. (See end of Document for details)

- The zootechnical certificate shall be issued in at least one of the official languages of the country of dispatch.
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.
