PART D

Measures to prevent the presence of RNQPs on forest reproductive material, other than seeds

1. Visual inspections

1 The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements in point (2) are satisfied in respect of forest reproductive material, other than seeds, of *Pinus* spp.

2 The requirements are that the forest reproductive material is found free from *Dothistroma septosporum* upon visual inspection at the production site or place.

3 The visual inspections must take place once a year, in the most appropriate period to detect those pests, taking into account the climatic conditions and the growing conditions of the plant, and the biology of the pest.

2. Other requirements

1 The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that, the requirements in point (2) are satisfied in respect of forest reproductive material of *Pinus* spp.

2 The requirements are that:
