laying down rules for the application of Regulations (EU) No 1306/2013,  
(EU) No 1308/2013 and (EU) No 510/2014 of the European Parliament and of  
the Council as regards the management system of tariff quotas with licences

COMMISSION IMPLEMENTING REGULATION (EU) 2020/761

of 17 December 2019

laying down rules for the application of Regulations (EU) No 1306/2013,  
(EU) No 1308/2013 and (EU) No 510/2014 of the European Parliament and of  
the Council as regards the management system of tariff quotas with licences

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) No 1308/2013 of the European Parliament and of the Council of 17 December 2013 establishing a common organisation of the markets in agricultural products and repealing Council Regulations (EEC) No 922/72, (EEC) No 234/79, (EC) No 1037/2001 and (EC) No 1234/2007<sup>(1)</sup>, and in particular Article 187 and Article 223(3) thereof,

Having regard to Regulation (EU) No 1306/2013 of the European Parliament and of the Council of 17 December 2013 on the financing, management and monitoring of the common agricultural policy and repealing Council Regulations (EEC) No 352/78, (EC) No 165/94, (EC) No 2799/98, (EC) No 814/2000, (EC) No 1290/2005 and (EC) No 485/2008<sup>(2)</sup>, and in particular Article 66(4) thereof,

Having regard to Regulation (EU) No 510/2014 of the European Parliament and of the Council of 16 April 2014 laying down the trade arrangements applicable to certain goods resulting from the processing of agricultural products and repealing Council Regulations (EC) No 1216/2009 and (EC) No 614/2009<sup>(3)</sup> and in particular points (a) to (d) of Article 9 and point (a) of Article 16(1) thereof,

Whereas:

- (1) Regulation (EU) No 1308/2013 lays down rules regarding tariff quota management and special treatment of imports by third countries. It also empowers the Commission to adopt delegated and implementing acts in that respect. In order to ensure the smooth functioning of the management of tariff quotas in the new legal framework, certain rules have to be adopted by means of such acts. Those acts should replace a certain number of acts laying down common rules or specific sectoral rules, based on acts adopted pursuant to Article 43(2) or Article 207 of the Treaty on the Functioning of the European Union ('TFEU'), which are repealed by Commission Delegated Regulation (EU) 2020/760<sup>(4)</sup>
- (2) The Union has undertaken in international agreements and in acts adopted pursuant to Article 43(2) and Article 207 TFEU to open tariff quotas for certain agricultural products and in some cases to administer those quotas. In some cases imports

of products under such tariff quotas are subject to an import licence obligation. Commission Regulations and Commission Implementing Regulations which have opened those quotas and provide for specific rules are repealed by Delegated Regulation (EU) 2020/760. It is appropriate to maintain those rules in this Regulation.

- (3) An annual tariff quota period of 12 consecutive months should be established for all the tariff quotas for agricultural and other products falling within the scope of this Regulation. In some cases, it is appropriate to provide for tariff quota sub-periods within the annual tariff quota period, particularly where this is provided for in an international agreement.
- (4) In order to guarantee a sound administration of tariff quotas, minimum or maximum quantities to be applied for under tariff quotas should be set out.
- (5) In order to simplify and improve the effectiveness and efficacy of the administration and control mechanisms, common conditions should be laid down for the administration of import tariff quotas subject to import licences. Those tariff quotas should be administered by allocation of licences in proportion to the overall quantities requested (hereinafter the ‘simultaneous examination method’). Rules should also be laid down on the submission of applications and issue of licences, which should apply in addition to those of Commission Delegated Regulation (EU) 2016/1237<sup>(5)</sup> and Commission Implementing Regulation (EU) 2016/1239<sup>(6)</sup>.
- (6) Some international agreements require that tariff quotas are administered through a method based on documents issued by third countries. This method requires that the allocation of licences corresponds to the quantities set out in the documents issued by third countries. It is therefore necessary to lay down specific rules for that method of administration. The documents should be issued by an authority recognised by the third country and should comply with certain conditions.
- (7) In order to ensure transparency when administering tariff quotas subject to import licences, the competent authorities should provide relevant information, upon request, to any operator having an interest in the trade in the product concerned. To enable operators to apply for the available quantities under a tariff quota, the Commission should publish the overall tariff quota quantity available for application, and the opening and closing dates of application. Any derogations from or changes to the rules concerning licensing procedures or the list of products subject to import licensing should also be published in accordance with the principles of the World Trade Organization Import Licence Agreement<sup>(7)</sup> and the Bali Ministerial Decision<sup>(8)</sup>.
- (8) It is necessary to establish an appropriate amount of security for the licences to be issued under tariff quotas, to guarantee that the products will be released for free circulation in the Union or exported from the Union during the period of validity of the licence.
- (9) In order to ease the management of certain sensitive and highly demanded tariff quotas, and certain tariff quotas where there has been circumvention in the past, a dedicated electronic system is established by Delegated Regulation (EU) 2020/760. Rules concerning procedures and time limits for submission of documents and declarations through this electronic system should be laid down.

---

*Status: This is the original version as it was originally adopted in the EU. This legislation may since have been updated - see the latest available (revised) version*

---

- (10) Rules concerning the issuing of licences should be laid down. In particular, it is appropriate to provide for the application of an allocation coefficient where the quantities covered by the licence applications exceed the quantities available for the import tariff quota period concerned.
- (11) It is necessary to lay down the periods of validity of licences issued under the tariff quotas in order to define when the obligation to import or export is fulfilled.
- (12) In the interest of existing garlic importers, who normally import substantial quantities of garlic, and to ensure that new importers can enter the market, a distinction should be drawn between traditional and new garlic importers for garlic originated in Argentina. A definition of those two categories of importers should be provided and certain criteria relating to the applicants and the use of the import licences should be laid down. As a part of the simplification of the management of the import tariff quotas for garlic, the quota order numbers for import tariff quotas for garlic originating in China and in other third countries (except China and Argentina) have been replaced by new numbers. The modification of order numbers should not affect the continuity of these tariff quotas as regards among others the calculation of the reference quantity, where applicable, in particular for the purposes of the transitional provisions referred to in Article 26 of Delegated Regulation (EU) 2020/760. The same is the case for the import tariff quotas for mushrooms originating in China and in other third countries (except China) to which new order numbers have been assigned.
- (13) The quantities to be allocated to those categories of importers should be determined on the basis of the quantities actually imported rather than on the basis of the import licences issued. Applications for import licences to import garlic from Argentina submitted by both categories of importers should be subjected to certain restrictions, such as a reference quantity for traditional importers. Such restrictions are necessary to ensure not only that competition between importers is safeguarded but also that importers genuinely engaged in commercial activity in the fruit and vegetable market are given the opportunity to defend their legitimate trading positions vis-à-vis other importers and that no single importer is able to control the market.
- (14) To improve controls and to prevent the risk of aberration of trade based on inaccurate certificates of origin and other documents, the existing system of certificates of origin for garlic and the requirement for garlic to be transported directly from the third country of origin to the Union should be maintained. The list of third countries should be extended in light of the additional information. Such certificates of origin should be issued by the competent national authorities in accordance with Articles 57, 58 and 59 of Commission Implementing Regulation (EU) 2015/2447.<sup>(9)</sup>
- (15) In order to verify the compliance with the tariff quota conditions, imports under the tariff quotas of ‘baby beef’, high-quality fresh, chilled and frozen beef and for frozen buffalo meat and frozen thin skirt of bovine animals should be subject to the presentation of a certificate of authenticity certifying that the goods originate from the issuing country and that they correspond exactly to the definition established in the international agreement. A template for the certificates of authenticity should be established and

---

detailed rules should be laid down for the use of certificates of authenticity issued based on this template.

- (16) The Union has the option of designating which importers may import cheese originating in the European Union into the United States of America under specific quota. To allow the Union to maximise the value of the quota, a procedure should therefore be laid down for designating importers on the basis of the allocation of export licences for the products concerned.
- (17) Taking into account the particularities of the duty free import period for maize applicable for Spain and Portugal as well as for sorghum for Spain, specific provisions should be laid down as regards the licence application period, the submission of the licence applications and licences for maize and sorghum for the Member States concerned.
- (18) In order to ensure a smooth transition to the rules provided for in this Regulation and to fulfil the obligation to notify the new rules to the World Trade Organisation prior to their application and to grant operators sufficient time to adapt to the obligation to register in a dedicated electronic system and to submit a declaration of independence through that electronic system for certain over-demanded tariff quotas, it is appropriate to provide for deferred entry into application of this Regulation.
- (19) The measures provided for in this Regulation are in accordance with the opinion of the Committee for the Common Organisation of the Agricultural Markets,

HAS ADOPTED THIS REGULATION:

## Article 10

### Allocation coefficient and suspension of the submission of licence applications

1 Except for import tariff quotas managed with documents issued by third countries and export tariff quotas managed by third countries, the Commission shall calculate an allocation coefficient for each tariff quota. Member States shall apply the coefficient to the quantities covered by each licence application notified to the Commission. The allocation coefficient shall be calculated on the basis of the information notified by the Member States and using the method set out in paragraph 3.

2 The Commission shall make public the allocation coefficient for each tariff quota by appropriate web-publication no later than on the 22nd day of the month in which the Member States notified the quantities applied for to the Commission. Where the application was lodged between 23 and 30 November, the allocation coefficient shall be made public no later than on 14 December.

3 Unless provided otherwise in Title III, the allocation coefficient for licences shall not exceed 100 %, and shall be calculated as follows:  $[(\text{available quantity}/\text{requested quantity}) \times 100]$  %. The allocation coefficient shall be rounded to six digits. The Commission shall adjust the allocation coefficient in order to ensure that the quantities available for the import or export tariff quota period or sub-period are not exceeded.

4 If the quota quantity for a sub-period or under the system of monthly application is exhausted, the Commission shall suspend the submission of further applications until the end of the tariff quota period or sub-period. The suspension shall be lifted when quantities become available within the same tariff quota period following notification of unused quantities. The Commission shall notify to licence issuing authorities of Member States the suspension, the lifting of it and the available quantity within a tariff quota by appropriate web-publication.

5 Import and export licences shall be issued for the quantities calculated multiplying the quantities in import or export licence applications by the allocation coefficient. The quantity resulting from the application of the allocation coefficient shall be rounded down to the nearest unit.

6 Quantities not allocated or not used during a sub-period shall be determined on the basis of the information notified by Member States to the Commission. Such quantities shall be added to the quantities available for redistribution within the same import or export tariff quota period.

7 Before calculating the allocation coefficient for tariff quotas for which prior compulsory registration of operators pursuant to Article 11 of Delegated Regulation (EU) 2020/760 is required, the Commission may request the competent licence issuing authority to verify the LORI record of the applicants. Such request shall be made by the 15th day, 13.00 Brussels time, of the month in which the Member States notified the quantities applied for. However, for quantities notified by 6 December, such request shall be made by 8 December, 13.00 Brussels time. Licence issuing authorities shall provide the Commission with an email address to which the requests should be addressed.

8 Licence issuing authorities shall reply to Commission requests referred to in paragraph 7 before the 21st day, 13.00 Brussels time, of the month following the request.

9 For requests submitted by 8 December, the licence issuing authority shall reply before 7 January, 13.00 Brussels time.

10 Where the licence issuing authority does not reply to the Commission within the time limits set out in paragraphs 8 and 9, the licence issuing authority shall not accept any further licence application submitted by the operator concerned.

### Article 11

#### Issue of import and export licences

1 This Article shall not apply to licences issued for import tariff quotas managed with documents issued by third countries and for export tariff quotas managed by third countries.

2 Licences shall be issued only for applications notified to the Commission.

3 Licences shall be issued after the Commission makes public the allocation coefficient and before the end of the month.

If, due to unforeseen circumstances, the Commission fails to publish the allocation coefficient in the period referred to in Article 10(2), licences shall be issued at the latest by the seventh calendar day following the day in which the Commission published the allocation coefficient.

4 Licences that are valid from 1 January shall be issued in the period between 15 and 31 December of the preceding year.

If, due to unforeseen circumstances, the Commission fails to publish the allocation coefficient in the period referred to in Article 10(2), licences shall be issued at the latest by the 14th calendar day following the day in which the Commission published the allocation coefficient. If their issue date is after 1 January, licences shall be valid from their date of issue, without change on the last day of validity.

4 Unless otherwise provided for in Title III, licences issued for import tariff quotas managed with documents issued by third countries shall be valid from their date of issue until 23.59 (Brussels time) of the 30th calendar day after the last day of validity of the IMA 1 certificates or CA for which they have been issued. That period of validity shall not exceed the end of the tariff quota period.

5 Licences for export tariff quotas managed by third countries shall be valid from their date of issue until 31 December of the year of their issue date, except for licences issued from 20 December to 31 December, which shall be valid from 1 January until 31 December of the following year.

The documents required for the proof of origin are listed for each tariff quota in those Annexes.

2 In specific cases, laid down in Annexes II to XIII, the proof of origin shall be presented upon application for an import licence.

3 If necessary, customs authorities may additionally require the declarant or importer to prove the origin of the products in accordance with Article 61 of Regulation (EU) No 952/2013.

The applicants shall also undertake, in writing, to provide, at the request of the competent authorities, evidence that those conditions are met, and to accept, where applicable, any checks by those authorities of the accounts and of the conditions under which the products concerned are manufactured. If the applicant is not the manufacturer of the products, it shall present a similar statement and undertaking by the manufacturer in support of his application.

3 By way of derogation from Article 71(1), the AGREX export licence may be replaced by an invoice or any other commercial document that describes the originating product in sufficient detail to enable its identification.

#### *Article 72*

#### **Specific rules applicable to import tariff quotas managed with documents issued by the exporting countries**

1 Where an import tariff quota is managed in accordance with point (iii) of Article 187(b) of Regulation (EU) No 1308/2013, the document issued by an exporting country shall be:

- a a certificate of authenticity (CA) for the sector of beef and veal;
- b an Inward Monitoring Arrangement form (IMA 1) for the sector of milk and milk products.

2 By way of derogation from Article 6(1) and (2), operators may lodge more than one licence application per month and licence applications may be submitted at any day, taking account of Article 3 of Regulation (EU) 2016/1239.

3 With the exception of tariff quotas referred to in Articles 49 and 50, operators shall present to the licence issuing authority of the Member State of import the original of the certificate of authenticity or of the IMA 1 certificate together with their application for import licence. The operator shall also provide a copy of the certificate of authenticity or of the IMA 1 certificate if so required by the licence issuing authority. The application shall be made within the period of validity of the certificate of authenticity or of the IMA 1 certificate and no later than the last day of the tariff quota period concerned.

4 The licence issuing authority shall verify that information on the certificate of authenticity corresponds to the information it received from the Commission. If that is the case and unless instructed otherwise by the Commission, the licence issuing authority shall issue import licences without delay, no later than six calendar days after receiving the application submitted with a certificate of authenticity or IMA 1 certificate.

5 One certificate of authenticity or IMA 1 certificate shall be used for issuing one import licence only.

6 The licence issuing authority shall note on the certificate of authenticity or IMA 1 certificate and on their copy the licence issue number and the quantity for which that document was used. The quantity shall be expressed in whole units, rounded up. The certificate of authenticity or IMA 1 certificate shall be kept by the licence issuing authority. The copy shall be returned to the applicant to be used for customs procedures where so indicated in Title III of this Regulation.

7 The Commission may request a third country to authorise representatives of the Commission to carry out, where required, on-the-spot checks in that third country. Those checks shall be performed jointly with the competent authorities of the third country concerned.

8 Once the exporting country has issued one or more certificates of authenticity or IMA 1 certificates, it shall immediately communicate the issue of these documents to the Commission. Exchange of documents and information between the Commission and an exporting country shall take place by means of an information system set up by the Commission in accordance with Implementing Regulation (EU) 2017/1185. If required by a third country, the exchange of documents may continue to take place by conventional means, in which case the import licence shall be made available to the titular holder only when the original of the exporting country document is presented.

9 The Commission shall make available to the licence issuing and customs authorities of the Member States the specimens of the stamp imprints used by the issuing authority in the exporting country for issuing the certificate of authenticity. Names and signatures of the persons authorised to sign the certificate of authenticity, communicated to the Commission by the authorities of exporting countries, shall also be made available to the licence issuing and customs authorities of the Member States. The access to the Specimen Management System (SMS) database containing this information shall be restricted to authorised persons and shall be made available to Member States by means of an information system set up in accordance with Articles 57 and 58 of Implementing Regulation (EU) 2015/2447.

**Definitions**

For the purpose of Annex XIV.5 Part A the definitions set out below apply:

- (a) ‘producer’ means a single production plant or factory in which butter is produced for export to the European Union under the tariff quotas with order numbers 09.4182 and 09.4195;
- (b) ‘cypher’ means the quantity of butter produced according to one product-purchasing specification in one production plant during a single manufacturing run;

---

*Status: This is the original version as it was originally adopted in the EU. This legislation may since have been updated - see the latest available (revised) version*

---

- (c) 'lot' means a quantity of butter covered by an IMA 1 certificate presented to the competent customs authority for entry for free circulation under the tariff quotas with order numbers 09.4182 and 09.4195;
- (d) 'competent authorities' means the authorities in the Member States responsible for controls on imported products;
- (e) 'product identification list' means a list which identifies, for each lot, the quota number of its corresponding IMA 1 certificate, the production plant or factory and the cypher or cyphers, and which provides a description of the butter. It may also identify the specification to which the butter was manufactured, the production season, the number of boxes corresponding to each cypher, the total number of boxes, the nominal weight of the boxes, the exporter's serial number, the means of transport from New Zealand to the European Union and the voyage number.

#### **Completion and verification of the IMA 1 certificate**

An IMA 1 certificate shall cover butter manufactured according to one product-purchasing specification in one plant. It may cover more than one cypher of the same product-purchasing specification from the same plant.

The IMA 1 certificate shall be considered to be duly completed and authenticated by an issuing body listed in Part A6, only if it contains all the following information:

### **Checking the weight**

#### *European Union controls*

Controls by the competent authorities shall be carried out on one lot.

The competent authorities shall take a random sample from the lot. The sample size shall be determined according to the following formula:

$$n = \sqrt[3]{(N)}$$

where n is the sample size; and

N is the number of boxes in the lot.

However, the minimum sample size, n, shall be 10.

The competent authorities shall calculate the arithmetic mean and standard deviation of the net weights obtained from the sample.

The competent authorities shall make appropriate checks to verify the information on tare weight given on the IMA 1 certificate, which may include a comparison with the weight of plastic wrappers used in the European Union or examination of a certificate from the manufacturer of the plastic wrappers used on the lot.

#### *Interpretation of control results – standard deviation*

The standard deviation of the net weight of the boxes specified in the IMA 1 certificate shall be checked according to the following procedure.

The ratio  $s/\sigma$  shall be compared with the minimum ratio specified for a given sample size in the following table, where s is the sample standard deviation and  $\sigma$  is the standard deviation of the net weight of the boxes specified in the IMA1 certificate.

Where the ratio  $s/\sigma$  is lower than the appropriate minimum ratio in the reference data table then s shall be used when the control results are interpreted in accordance with the next section rather than  $\sigma$ .

#### **Minimum ratio<sup>a</sup> $s/\sigma$ for a given sample size (n)**

<b>n</b>	<b><math>s/\sigma</math></b>	<b>n</b>	<b><math>s/\sigma</math></b>	<b>n</b>	<b><math>s/\sigma</math></b>
10 <sup>b</sup>	0,608	21	0,737	32	0,789

**a** The minimum ratios have been calculated using tabulated Chi2-values (5 % quantile; n-1 degrees of freedom).

**b** The minimum sample size, n, shall be 10.

20	0,730	31	0,785	42	0,816
				43	0,819

**a** The minimum ratios have been calculated using tabulated Chi2-values (5 % quantile; n-1 degrees of freedom).

**b** The minimum sample size, n, shall be 10.

#### *Interpretation of control results – arithmetic mean*

The competent authorities shall compare the results of sampling with the information on the IMA 1 certificate using the following formula:

$$w \leq W + ((2,326\sigma)/\sqrt{n})$$

Where:

- w is the arithmetic mean of the net weight of the sample boxes,
- W is the mean net weight per box specified on the IMA 1 certificate,
- $\sigma$  is the standard deviation of the net weight per box specified on the IMA 1 certificate. However, the sample standard deviation of the net weight per boxes shall be used instead of  $\sigma$  where required under the previous section on interpretation of control results - standard deviation, and
- n is the sample size.

Where w satisfies the above formula, the mean net weight specified on the IMA 1 certificate (W) shall be used to determine the net weight of the lot imported into the Union.

Where w does not satisfy the above formula, w shall be used to determine the net weight of the lot imported into the Union.

The declared weight shall be attributed in part 2 of column 29 of the import licence and the excess over the declared weight shall be released for free circulation at rate of duty applicable to third countries (*erga omnes*).

#### **Checking the fat content**

##### *European Union controls*

The competent authorities shall check the percentage fat content on half of the boxes which are sampled under the previous sections. However, the minimum sample size, n, shall be 5.

The sampling method to be used shall be International Dairy Federation (IDF) Standard 50C/1995.

---

*Status: This is the original version as it was originally adopted in the EU. This legislation may since have been updated - see the latest available (revised) version*

---

The method for determining the fat content to be used shall be the ISO 17189 method or a method established by the latest versions of the relevant European or international standards, as the case may be.

The competent authorities shall draw duplicate samples, one of which shall be held in secure custody in case of dispute.

The laboratory undertaking the tests shall be authorised by a Member State to carry out official analyses and be recognised by that Member State as having competence in applying the method referred to in Part A3 of this Annex XIV.5, as demonstrated by meeting the repeatability criterion when analysing blind duplicates and by successful participation in proficiency tests.

*Interpretation of control results – arithmetic mean*

- (a) Compliance with the fat content requirements shall be assumed if the arithmetic mean of the sample results does not exceed 84,4 %.

The competent authorities shall notify the Commission without delay of each case of non-compliance.

- (b) In case the compliance requirement under (a) is not met, the lot covered by the relevant import declaration and IMA 1 certificate shall be imported in accordance with Article 51(1), except where the results of the analysis of the duplicate samples as referred to under the next section do comply with the requirements.

*Disputed results*

The importer concerned may challenge the results of the analysis obtained by a competent authorities' laboratory within ten calendar days of receiving these results, undertaking to pay for the costs of testing the duplicate samples. In this case the competent authorities shall send sealed duplicates of the samples analysed by its laboratory to a second laboratory. This second laboratory shall be authorised by a Member State to carry out official analyses and be recognised by that Member State as having competence in applying the method described in Part A3 of this Annex XIV.5, as demonstrated by meeting the repeatability criterion when analysing blind duplicates and by successful participation in proficiency tests.

This second laboratory shall communicate the results of its analysis to the competent authorities promptly.

The findings of the second laboratory are final.

**A4 – Circumstances under which an IMA 1 certificate or part thereof may be cancelled, amended, replaced or corrected**

**Cancellation of the IMA 1 certificate when full duty is due and paid for non-compliance with compositional requirements.**

Where full duty is paid on a lot because the maximum fat content requirement is not complied with, the corresponding IMA 1 certificate may be cancelled and the IMA 1 issuing body may add the quantities concerned to those for which IMA 1 certificates may be issued for the same quota year.

**Product destroyed or rendered unfit for sale.**

IMA 1 issuing bodies may cancel an IMA 1 certificate or part thereof for a quantity covered by it which is destroyed or rendered unfit for sale in circumstances beyond the control of the exporter. Where part of the quantity covered by an IMA 1 certificate is destroyed or rendered unfit for sale, a replacement certificate may be issued for the remaining quantity. The replacement certificate shall be valid only up to the same date as the original. In this case, box 17 of the replacement IMA 1 certificate shall contain the words 'valid up to 00.00.0000'.

---

*Status: This is the original version as it was originally adopted in the EU. This legislation may since have been updated - see the latest available (revised) version*

---

Where all or part of the quantity covered by an IMA 1 certificate is destroyed or rendered unfit for sale due to circumstances beyond the exporters' control, the IMA 1 issuing body may add these quantities to those for which IMA 1 certificates may be issued for the same quota year.

#### **Change of Member State of destination**

When the exporter is obliged to change the Member State of destination indicated on an IMA 1 certificate before a corresponding import licence is issued, the original IMA 1 certificate may be amended by the IMA 1 issuing body. Such an amended original IMA 1 certificate, duly authenticated and appropriately identified by the issuing body, may be presented to the licensing authority and to the customs authorities.

#### **Clerical or technical error**

When a clerical or technical error is discovered on an IMA 1 certificate before a corresponding import licence is issued, the original certificate may be corrected by the issuing body. Such a corrected original IMA 1 certificate may be presented to the licensing authority and to the customs authorities.

#### **Exceptional circumstances when a product intended for import in a given year becomes unavailable**

When, in exceptional circumstances beyond the control of the exporter, a product intended for import in a given year becomes unavailable and the only means of filling the quota, in the light of normal shipping time from the country of origin, is to replace it with a product originally intended for import the following year, the issuing body may issue a new IMA 1 certificate for the replacement quantity, between the sixth and the tenth calendar day after giving due notification to the Commission of the details of the IMA 1 certificate or part thereof to be cancelled for the year concerned and of the first IMA 1 certificate or part thereof issued for the following year to be cancelled.

If the Commission considers that this provision does not apply to the circumstances of the case concerned, it may object within seven calendar days, stating the reason for its objection. Where the quantity to be replaced is greater than that covered by the first IMA 1 certificate issued for the following year, the required quantity may be obtained by cancelling additional IMA 1 certificates, in sequence, or part thereof as necessary.

All quantities in respect of which IMA 1 certificates or part thereof have been cancelled for the year concerned shall be added to the quantities for which IMA 1 certificates may be issued for that quota year.

All quantities brought forward from the following quota year for which an IMA 1 certificate or certificates have been cancelled shall be added back to the quantities for which IMA 1 certificates may be issued for that quota year.

#### **A5 – Rules for completing IMA 1 certificates**

In addition to boxes 1, 2, 4, 5, 9, 17 and 18 of the IMA 1 certificate, the following must be completed:

- a) As regards Cheddar cheeses falling within CN code ex 0406 90 21 and listed under tariff quotas with order numbers 09.4514 and 09.4521:
