

Corporation Tax Act 2009

2009 CHAPTER 4

PART 8

INTANGIBLE FIXED ASSETS

CHAPTER 15

ADJUSTMENTS ON CHANGE OF ACCOUNTING POLICY

Introductory

871 Introduction to Chapter

- (1) This Chapter applies if—
 - (a) there is a change of accounting policy in drawing up a company's accounts from one period of account to the next, and
 - (b) the approach in each of those periods accords with the law and practice applicable in relation to that period.
- (2) In this Chapter—
 - (a) the first of those periods of account is referred to as “the earlier period”, and
 - (b) the next is referred to as “the later period”.
- (3) This Chapter applies, in particular, if—
 - (a) the company prepares accounts for the earlier period in accordance with UK generally accepted accounting practice and for the later period in accordance with international accounting standards, or
 - (b) the company prepares accounts for the earlier period in accordance with international accounting standards and for the later period in accordance with UK generally accepted accounting practice.

Status: This is the original version (as it was originally enacted).

Change of policy involving change of value

872 Adjustments in respect of change

- (1) This section and section 873 apply if—
- (a) as a result of the change of accounting policy there is a difference (“the accounting difference”) between—
 - (i) the accounting value of an intangible fixed asset of the company at the end of the earlier period, and
 - (ii) the accounting value of that asset at the beginning of the later period, and
 - (b) no election has been made in respect of the asset under section 730 (writing down at fixed rate: election for fixed-rate basis).
- (2) If there is an increase in that value, a corresponding credit must be brought into account for tax purposes in the later period.
- (3) If there is a decrease in that value, a corresponding debit must be brought into account for tax purposes in the later period.
- (4) The amount of the credit or debit is—

$$D \times \frac{WDVE}{AVE}$$

where—

D is the accounting difference,
 WDVE is the tax written-down value of the asset at the end of the earlier period,
 and
 AVE is the accounting value of the asset at the end of the earlier period.

- (5) But if subsection (2) applies, the credit must not exceed—
- (a) the sum of debits brought into account for tax purposes in respect of the asset before the later period, less
 - (b) the sum of the credits so brought into account.
- (6) This section is subject to section 878 (exclusion of credits or debits brought into account under other provisions).

873 Effect of application of section 872 in later period and subsequently

- (1) A credit or debit that is required to be brought into account under section 872 is treated as arising at the beginning of the later period (“the relevant time”).
- (2) If a credit is to be brought into account, the tax written-down value of the asset at the relevant time is the sum of—
- (a) the tax written-down value of the asset at the end of the earlier period, and
 - (b) the credit.
- (3) If a debit is to be brought into account, the tax written-down value of the asset at the relevant time is—
- (a) the tax written-down value of the asset at the end of the earlier period, less
 - (b) the debit.

Status: This is the original version (as it was originally enacted).

- (4) After the relevant time the cost recognised for tax purposes is the sum of—
 - (a) the tax written-down value given by subsection (2) or (3), and
 - (b) the cost recognised for tax purposes of any subsequent expenditure on the asset that is capitalised for accounting purposes.
- (5) After the relevant time the tax written-down value is determined taking account only of subsequent credits and debits.

Change of policy involving disaggregation

874 Original asset not subject to fixed-rate writing down

- (1) This section and section 875 apply if—
 - (a) the change of accounting policy results in an intangible fixed asset of the company that was treated as one asset (“the original asset”) in the earlier period being treated as two or more assets (“the resulting assets”) in the later period,
 - (b) there is a difference (“the accounting difference”) between—
 - (i) the accounting value of the original asset at the end of the earlier period, and
 - (ii) the sum of the accounting values of the resulting assets at the beginning of the later period,
 - (c) no election under section 730 (writing down at fixed rate: election for fixed-rate basis) has been or is subsequently made in respect of the original asset, and
 - (d) no such election is subsequently made in respect of any of the resulting assets.
- (2) If the accounting difference is an increase, a corresponding credit must be brought into account for tax purposes in the later period.
- (3) If the accounting difference is a decrease, a corresponding debit must be brought into account for tax purposes in the later period.

- (4) The credit or debit is—

$$D \times \frac{WDVE}{AVE}$$

where—

D is the accounting difference,
WDVE is the tax written-down value of the original asset at the end of the earlier period, and
AVE is the accounting value of that asset at the end of that period.

- (5) But if subsection (2) applies the credit must not exceed—
 - (a) the sum of the debits brought into account for tax purposes in respect of the original asset before the later period, less
 - (b) the sum of the credits so brought into account.
- (6) This section is subject to section 878 (exclusion of credits or debits brought into account under other provisions).

Status: This is the original version (as it was originally enacted).

875 Effect of application of section 874 in later period and subsequently

- (1) A credit or debit that is required to be brought into account under section 874 is treated as arising at the beginning of the later period (“the relevant time”).
- (2) If section 874(2) applies, the tax written-down value of each resulting asset at the relevant time is—

$$(\text{WDVE} + \text{C}) \times \frac{\text{AV}}{\text{TAV}}$$

where—

WDVE is the tax written-down value of the original asset at the end of the earlier period,

C is the credit,

AV is the accounting value of the resulting asset in question at the relevant time, and

TAV is the sum of the accounting values of all the resulting assets at the relevant time.

- (3) If section 874(3) applies, the tax written-down value of each resulting asset at the relevant time is—

$$(\text{WDVE} - \text{D}) \times \frac{\text{AV}}{\text{TAV}}$$

where—

WDVE, AV and TAV have the same meaning as in subsection (2), and

D is the debit.

- (4) After the relevant time the cost recognised for tax purposes for each resulting asset is taken to be the sum of—
 - (a) the tax written-down value given by subsection (2) or, as the case may be, subsection (3), and
 - (b) the cost recognised for tax purposes of any subsequent expenditure on the asset that is capitalised for accounting purposes.
- (5) After the relevant time the tax written-down value for each resulting asset is determined taking account only of subsequent credits and debits.

876 Original asset subject to fixed-rate writing down

- (1) This section applies if—
 - (a) the change of accounting policy results in an intangible fixed asset of the company that was treated as one asset (“the original asset”) in the earlier period being treated as two or more assets (“the resulting assets”) in the later period, and
 - (b) an election under section 730 (writing down at fixed rate: election for fixed-rate basis) has been or is subsequently made in respect of the original asset.
- (2) That election has effect—
 - (a) in relation to the original asset, for periods up to and including the earlier period, and

Status: This is the original version (as it was originally enacted).

- (b) in relation to each of the resulting assets, for the later period and subsequent periods.
- (3) The tax written-down value of each resulting asset at the beginning of the later period (“the relevant time”) is—

$$\text{WDVE} \times \frac{\text{AVL}}{\text{TAVL}}$$

where—

WDVE is the tax written-down value of the original asset at the end of the earlier period,

AVL is the accounting value of the asset in question at the beginning of the later period, and

TAVL is the sum of the accounting values of all the resulting assets at the beginning of that period.

- (4) After the relevant time the cost recognised for tax purposes for each resulting asset is the sum of—
- (a) the tax written-down value given by subsection (3), and
 - (b) the cost recognised for tax purposes of any subsequent expenditure on the asset that is capitalised for accounting purposes.
- (5) After the relevant time the tax written-down value for each resulting asset is determined taking account only of subsequent credits and debits.

877 Election for fixed-rate writing down in relation to resulting asset

- (1) This section applies if—
- (a) the change of accounting policy results in an intangible fixed asset of the company that was treated as one asset (“the original undivided asset”) in the earlier period being treated as two or more assets (“the resulting assets”) in the later period, and
 - (b) no election under section 730 (writing down at fixed rate: election for fixed-rate basis) has been or is subsequently made in respect of the original undivided asset.
- (2) An election under that section may be made in respect of any of the resulting assets.
- (3) But such an election may be made only within the period during which such an election could have been made in relation to the original undivided asset.
- (4) The effect of the election is that—
- (a) the original undivided asset is treated as if it had at all material times consisted of as many assets (“notional original assets”) as there are resulting assets,
 - (b) each notional original asset is taken to be the same asset as one of the resulting assets (its “corresponding resulting asset”),
 - (c) the appropriate proportion of every amount falling to be taken into account in relation to the original undivided asset is attributed to each of the notional original assets, and
 - (d) this Part applies in relation to each of the notional original assets and its corresponding resulting asset accordingly.

Status: This is the original version (as it was originally enacted).

- (5) For the purposes of subsection (4)(c) the appropriate proportion of every amount falling to be taken into account in relation to the original undivided asset that is to be attributed to each notional original asset is found by reference to the notional original asset's corresponding resulting asset.
- (6) The appropriate proportion in relation to each resulting asset is—

$$\frac{AVL}{TAVL}$$

where—

AVL is the accounting value of that resulting asset at the beginning of the later period, and

TAVL is the sum of the accounting values of all the resulting assets at the beginning of that period.

Supplementary

878 Exclusion of credits or debits brought into account under other provisions

- (1) A credit or debit is not required to be brought into account under this Chapter so far as a credit or debit representing the accounting difference in question is brought into account for tax purposes under a provision specified in subsection (2).
- (2) Those provisions are—
- (a) section 723 (revaluation),
 - (b) section 725 (reversal of previous accounting loss), or
 - (c) section 732 (reversal of previous accounting gain).

879 Subsequent events affecting asset subject to adjustment under this Chapter

- (1) On a further change of accounting policy affecting an intangible fixed asset in relation to which this Chapter has applied, the previous provisions of this Chapter apply again.
- (2) On a subsequent part realisation affecting the asset in question, section 744 (effect of part realisation of asset) applies.
