## **SCHEDULE 2**

## REQUIREMENTS FOR WATER FITTINGS

## Water for outside use

- **30.** Every pipe which conveys water to a drinking vessel for animals or poultry shall be fitted with—
  - (a) a float-operated valve, or some other no less effective device to control the inflow of water, which is—
    - (i) protected from damage and contamination; and
    - (ii) prevents contamination of the water supply; and
  - (b) a stopvalve or servicing valve as appropriate.
