**2016 No. 507**

The Tobacco and Related Products Regulations 2016

PART 3

Emissions, additives and other prohibited ingredients and products

**Measurement and verification of emission levels**

**14.**—(1) The tar, nicotine and carbon monoxide emissions from cigarettes must be measured in accordance with standards ISO 4387 for tar, ISO 10315 for nicotine, and ISO 8454 for carbon monoxide.

(2) The accuracy of tar, nicotine and carbon monoxide measurements must be determined in accordance with standard ISO 8243.

(3) The Secretary of State must—

- (a) approve and monitor one or more laboratories (“approved laboratories”) which must not be owned or controlled directly or indirectly by the tobacco industry; and
- (b) arrange for an approved laboratory to verify the measurements referred to in paragraphs (1) and (2).

(4) For the purpose of enabling the Secretary of State to perform functions under paragraph (3) (b), a person who produces cigarettes, or manufactures cigarettes for export must provide to the Secretary of State (or to such person as the Secretary of State may specify) such samples, at such times and intervals and from such sources, as the Secretary of State may reasonably require.
