The RTDCSG must be consulted further as required during the approval process. The RTDIMP must be based on the strategy for red-throated diver compensation set out in the red-throated diver compensation plan and include—

- (b) an implementation timetable for delivery of the vessel route diversion and/or exclusion compensation measures [^{F2}that] ensures that the measures are in place prior to the installation of any tower comprised within a wind turbine generator forming part of the authorised development;

Changes to legislation: There are currently no known outstanding effects for the The East Anglia ONE North Offshore Wind Farm Order 2022, PART 3. (See end of Document for details)

- (c) details in relation to the monitoring of red-throated diver abundance and distribution using aerial digital surveys in the Outer Thames Estuary SPA and a 10km buffer over two winters. Three surveys should take place each winter (between 1st November and 31st March) with one batch to take place before the installation of the turbines forming part of the authorised development and the other batch to take place after;
