

Commission Delegated Regulation (EU) 2015/2440 of 22 October
2015 establishing a discard plan for certain demersal fisheries
in the North Sea and in Union waters of ICES Division IIa

COMMISSION DELEGATED REGULATION (EU) 2015/2440

of 22 October 2015

establishing a discard plan for certain demersal fisheries
in the North Sea and in Union waters of ICES Division IIa

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy, amending Council Regulations (EC) No 1954/2003 and (EC) No 1224/2009 and repealing Council Regulations (EC) No 2371/2002 and (EC) No 639/2004 and Council Decision 2004/585/EC⁽¹⁾, and in particular Article 15(6) and Article 18(1) and (3) thereof, and to Council Regulation (EC) No 850/98 of 30 March 1998 for the conservation of fishery resources through technical measures for the protection of juveniles of marine organisms⁽²⁾, and in particular Articles 18a and 48a thereof,

Whereas:

- (1) Regulation (EU) No 1380/2013 aims to progressively eliminate discards in all Union fisheries through the introduction of a landing obligation for catches of species subject to catch limits.
- (2) Article 15(6) of Regulation (EU) No 1380/2013 empowers the Commission to adopt discard plans by means of delegated acts for a period of no more than three years on the basis of joint recommendations developed by Member States in consultation with the relevant Advisory Councils.
- (3) Belgium, Denmark, Germany, France, the Netherlands, Sweden and the United Kingdom have a direct fisheries management interest in the North Sea. Those Member States have submitted a joint recommendation to the Commission after having consulted the North Sea Advisory Council and the Long Distance Advisory Council. Scientific contribution was obtained from relevant scientific bodies and reviewed by the Scientific, Technical and Economic Committee for Fisheries (STECF). The measures included in the joint recommendation comply with Article 18(3) of Regulation (EU) No 1380/2013.
- (4) For the purposes of Regulation (EU) No 1380/2013, the North Sea comprises ICES zones IIIa and IV. As some demersal stocks relevant to the proposed discard plan are also to be found in Union waters of ICES Division IIa, Member States recommend that this Division is covered by the discard plan.
- (5) As regards the North Sea, in accordance with Article 15(1)(c) of Regulation (EU) No 1380/2013 the landing obligation applies to the species that define the fisheries which

Status: Point in time view as at 22/10/2015.

Changes to legislation: There are currently no known outstanding effects for the Commission Delegated Regulation (EU) 2015/2440. (See end of Document for details)

are subject to catch limits at the latest from 1 January 2016 in the mixed fisheries for cod, haddock, whiting and saithe; in the fisheries for Norway lobster; in the mixed fishery for common sole and plaice; in the fisheries for hake and in the fisheries for Northern prawn. In accordance with Article 15(5) of Regulation (EU) No 1380/2013, the discard plan identifies the species which have to be landed as from 1 January 2016. These species are saithe, haddock, Norway lobster, common sole, plaice, hake and Northern prawn. This discard plan also establishes an obligation to land bycatches of Northern prawn.

- (6) The joint recommendation suggested that two exemptions from the landing obligation be applied to Norway lobster caught, respectively, with pots and with certain bottom trawls (OTB, TBN⁽⁹⁾) in ICES Division IIIa. Based on the scientific evidence provided in the joint recommendation and reviewed by STECF and taking into account the characteristics of the gear, of the fishing practices and of the ecosystem, the Commission considers that those exemptions should be included in this Regulation. Member States should submit additional data in order to enable STECF to further assess the survival rates of Norway lobster caught with the trawls concerned and the Commission to review the relevant exemption after 2016.
- (7) The joint recommendation includes five *de minimis* exemptions from the landing obligation for certain fisheries and up to certain levels. The evidence provided by the Member States was reviewed by the STECF, which in general concluded that the joint recommendation, supported in some cases with a qualitative assessment of the costs, contained reasoned arguments that further improvements in selectivity are difficult to achieve and/or imply disproportionate costs in handling unwanted catches. As such conclusion is not contradicted by differing scientific information, it is appropriate to establish the *de minimis* exemptions in accordance with the percentage level proposed in the joint recommendation, within the limits of Article 15(5)(c) of Regulation (EU) No 1380/2013.
- (8) The *de minimis* exemption suggested in the joint recommendation for common sole and haddock combined, up to a maximum of 2 % of the total annual catches of Norway lobster, sole and haddock in the fishery for Norway lobster by vessels using bottom trawls with a species selective grid in ICES Division IIIa, is based on the fact that increases in selectivity are very difficult to achieve. The STECF concluded that the supporting information is sufficient to justify the exemption claimed. Therefore, the exemption concerned should be included in this Regulation.
- (9) The *de minimis* exemption suggested in the joint recommendation for common sole, up to a maximum of 3 % of the total annual catches of this species by vessels using trammel and gill nets to catch common sole in ICES Division IIIa, Subarea IV and Union waters of ICES Division IIa, is based on the fact that increases in selectivity are very difficult to achieve.. STECF concluded that the supporting information is sufficient to justify the exemption claimed. Therefore, the exemption concerned should be included in this Regulation.
- (10) The *de minimis* exemption suggested in the joint recommendation for common sole smaller than 19 cm, up to a maximum of 3,7 % of the total annual catches of this species

Status: Point in time view as at 22/10/2015.

Changes to legislation: There are currently no known outstanding effects for the Commission Delegated Regulation (EU) 2015/2440. (See end of Document for details)

by vessels using beam trawl with a mesh size of 80-90 mm in ICES Subarea IV South of 55/56° N, is based on the fact that increases in selectivity are very difficult to achieve and that there is supporting quantitative information on disproportionate costs of handling of unwanted catches. The Commission considers that it is appropriate to include that exemption in this Regulation. Member States should submit additional data as regards the costs concerned, in order to enable the Commission to review that exemption after 2016.

- (11) The *de minimis* exemption suggested in the joint recommendation for common sole, up to a maximum of 7 % of the total annual catches of this species by vessels using beam trawls with increased selectivity in ICES Subarea IV, is based on the fact that increases in selectivity are very difficult to achieve. The STECF concluded that the supporting information is sufficient to justify the suggested exemption. Therefore, the exemption concerned should be included in this Regulation.
- (12) The *de minimis* exemption suggested in the joint recommendation for Norway lobster smaller than minimum conservation reference size, up to a maximum of 6 % of the total annual catches of this species by vessels using certain bottom trawls in ICES Subarea IV and Union waters of ICES Division IIa, is based on the fact there is supporting quantitative information on disproportionate costs of handling and disposal of unwanted catches. The STECF concluded that the supporting information is sufficient to justify the suggested exemption. Therefore, the exemption concerned should be included in this Regulation.
- (13) Article 18a of Regulation (EC) No 850/98 empowers the Commission to establish, for the purpose of adopting discard plans and for the species subject to the landing obligation, a minimum conservation reference size (MCRS) with the aim of ensuring the protection of juveniles of marine organisms. MCRS may derogate, where appropriate, from the sizes established in Annex XII to that Regulation. Currently, for Norway lobster a MCRS of 130 mm is established in that Annex XII. Scientific evidence reviewed by the STECF supports the setting of MCRS for Norway lobster at 105 mm. In particular, STECF concluded that the proposed MCRS is above the average maturity size and that the risk to the population of reducing the MCRS in ICES Division IIIa is small.
- (14) Discard plans may also include technical measures regarding fisheries or species covered by the landing obligation. In order to increase gear selectivity and reduce unwanted catches in the Skagerrak, it is appropriate to provide for a number of technical measures, which were agreed between the Union and Norway in 2011,⁽⁴⁾ and 2012⁽⁵⁾.
- (15) In order to ensure appropriate control, specific requirements for the Member States to establish lists of vessels covered by this Regulation should be laid down.
- (16) As the measures provided for in this Regulation have a direct impact on the economic activities linked to and the planning of the fishing season of Union vessels, it should enter into force immediately after its publication. It should apply from 1 January 2016 in order to comply with the time-frame set out in Article 15 of Regulation (EU) No 1380/2013. In accordance with Article 15(6) of that Regulation, this Regulation should apply for no more than one year,

Status: Point in time view as at 22/10/2015.

Changes to legislation: There are currently no known outstanding effects for the Commission Delegated Regulation (EU) 2015/2440. (See end of Document for details)

HAS ADOPTED THIS REGULATION:

Article 1

Scope

This Regulation specifies the details for implementing the landing obligation, provided for in Article 15(1) of Regulation (EU) No 1380/2013, in the North Sea and in Union waters of ICES Division IIa that shall apply in the fisheries set out in the Annex to this Regulation.

Article 2

Survivability exemption

1 The exemption from the landing obligation provided for in Article 15(4)(b) of Regulation (EU) No 1380/2013, for species for which scientific evidence demonstrates high survival rates, shall apply to the following catches of Norway lobster:

- a catches with pots (FPO);
- b catches in ICES Division IIIa with bottom trawls (OTB, TBN) with a mesh size of at least 70 mm equipped with a species selective grid with bar spacing of maximum 35 mm; and
- c catches in ICES Division IIIa with bottom trawls (OTB, TBN) with a mesh size of at least 90 mm equipped with a top panel of at least 270 mm mesh size (diamond mesh) or at least 140 mm mesh size (square mesh).

2 Norway lobster caught in cases referred to in paragraph 1(a), (b) and (c) shall be released immediately and in the area where it has been caught.

3 By 30 April 2016, Member States having a direct management interest in the North Sea shall submit to the Commission additional scientific information supporting the exemption laid down in paragraph 1(b).

Article 3

De minimis exemptions

1 By way of derogation from Article 15(1) of Regulation (EU) No 1380/2013, the following quantities may be discarded:

- a for common sole and haddock combined, up to a maximum of 2 % of the total annual catches of Norway lobster, common sole and haddock in the fishery for Norway lobster by vessels using bottom trawls (OTB, TBN) of mesh size equal to or larger than 70 mm equipped with a species selective grid with bar spacing of maximum 35 mm in ICES Division IIIa;
- b for common sole, up to a maximum of 3 % of the total annual catches of this species by vessels using trammel nets and gill nets (GN, GNS, GND, GNC, GTN, GTR, GEN, GNF) in the ICES Division IIIa, Subarea IV and Union waters of ICES Division IIa;
- c for common sole smaller than 19 cm, up to a maximum of 3,7 % of the total annual catches of this species by vessels using beam trawls (TBB) of mesh size 80-90 mm in the southern part of the North Sea (ICES Subarea IV South of 55/56° N);

Status: Point in time view as at 22/10/2015.

Changes to legislation: There are currently no known outstanding effects for the Commission Delegated Regulation (EU) 2015/2440. (See end of Document for details)

- d for common sole below minimum conservation reference size, up to a maximum of 7 % of the total annual catches of this species by vessels using beam trawl (TBB) of mesh size 80-119 mm with increased mesh size in the extension of the beam trawl in ICES Subarea IV;
- e for Norway lobster below minimum conservation reference size, up to a maximum of 6 % of the total annual catches of this species by vessels using bottom trawls (OTB, TBN, OTT, TB) of mesh size 80-99 mm in ICES Subarea IV and Union waters of ICES Division IIa.

2 By 30 April 2016, Member States having a direct management interest in the North Sea shall submit to the Commission additional scientific information supporting the exemption laid down in paragraph 1(c).

Article 4

Minimum conservation reference size

By way of derogation from the minimum conservation reference size established in Annex XII to Regulation (EC) No 850/98 and for the purposes of this Regulation, the minimum conservation reference size of Norway lobster in ICES Division IIIa shall be as follows:

- (a) total length of 105 mm;
- (b) carapace length of 32 mm.

Article 5

Specific technical measures in the Skagerrak

1 The carrying on board or the use of any trawl, Danish seine, beam trawl or similar towed net having a mesh size of less than 120 mm shall be prohibited.

2 By way of derogation from paragraph 1, trawls with at least 90 mm cod end may be used, provided they are equipped with:

- a a square mesh panel of at least 140 mm;
- b a diamond mesh panel of at least 270 mm placed in a four panel section and mounted with a joining ration of three meshes of 90 mm to one mesh of 270 mm; or
- c a sorting grid with no more than 35 mm bar spacing.

The derogation provided for in points (a) and (b) of the first subparagraph shall apply provided the panel of the trawl is:

- at least 3 metres long,
- positioned no more than 4 metres from the cod line, and
- the full width of the top sheet of the trawl (i.e. from selvedge to selvedge).

3 By way of derogation from paragraph 1, the following trawls also may be used:

- a trawls with at least 70 mm square mesh cod end equipped with a sorting grid with no more than 35 mm bar spacing;
- b trawls with minimum mesh sizes of less than 70 mm when fishing for pelagic or industrial species, provided the catch contains more than 80 % of one or more pelagic or industrial species;

Status: Point in time view as at 22/10/2015.

Changes to legislation: There are currently no known outstanding effects for the Commission Delegated Regulation (EU) 2015/2440. (See end of Document for details)

c trawls with at least 35 mm cod end when fishing for *Pandalus*, provided the trawl is equipped with a sorting grid with a maximum bar spacing of 19 mm.

4 A fish retention device may be used when fishing for *Pandalus* in accordance with paragraph 3(c), provided there are adequate fishing opportunities to cover by-catch and that the retention device is

- constructed with a top panel of a minimum mesh size of 120 mm square mesh,
- at least 3 metres long, and
- at least as wide as the width of the sorting grid.

Article 6

List of vessels

Member States shall determine, in accordance with the criteria laid down in the Annex to this Regulation, the vessels subject to the landing obligation for each particular fishery.

By 31 December 2015 they shall submit to the Commission and other Member States, using the secure Union control website, the lists of all saithe targeting vessels, as defined in the Annex, established pursuant to the first paragraph. They should keep those lists updated.

Article 7

Entry into force

This Regulation shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 1 January 2016 until 31 December 2016.

However, Article 6 shall apply as from the date of entry into force of this Regulation.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 22 October 2015.

For the Commission

The President

Jean-Claude JUNCKER

Status: Point in time view as at 22/10/2015.

Changes to legislation: There are currently no known outstanding effects for the Commission Delegated Regulation (EU) 2015/2440. (See end of Document for details)

ANNEX

Fisheries subject to the landing obligation

Fishing gear^{ab}	Mesh size	Species concerned
Trawls: OTB, OTT, OT, PTB, PT, TBN, TBS, OTM, PTM, TMS, TM, TX, SDN, SSC, SPR, TB, SX, SV	> 100 mm	All catches of saithe (if caught by a saithe targeting vessel ^c), plaice and haddock. All by-catches of Northern prawn.
Trawls: OTB, OTT, OT, PTB, PT, TBN, TBS, OTM, PTM, TMS, TM, TX, SDN, SSC, SPR, TB, SX, SV	In ICES Subarea IV and in Union waters of ICES Division IIa: 80-99 mm	In all areas, all catches of Norway lobster and common sole ^d . All by-catches of Northern prawn.
	In ICES Division IIIa: 70-99 mm	In ICES Division IIIa: all catches of haddock.
Trawls: OTB, OTT, OT, PTB, PT, TBN, TBS, OTM, PTM, TMS, TM, TX, SDN, SSC, SPR, TB, SX, SV	32-69 mm	All catches of Northern prawn.
Beam trawls: TBB	> 120 mm	All catches of plaice. All by-catches of Northern prawn.
Beam trawls: TBB	80-119 mm	All catches of common sole. Any by-catches of Northern prawn.
Gillnets, trammel nets and entangling nets: GN, GNS, GND, GNC, GTN, GTR, GEN, GNF		All catches of common sole. All by-catches of Northern prawn.
Hooks and lines: LLS, LLD, LL, LTL, LX, LHP, LHM		All catches of hake. All by-catches of Northern prawn.
Traps: FPO, FIX, FYK, FPN		All catches of Norway lobster. All by-catches of Northern prawn.

a Gear codes used in this Table refer to those codes in Annex XI to Commission Implementing Regulation (EU) No 404/2011 laying down detailed rules for the implementation of Council Regulation (EC) No 1224/2009 establishing a Community control system for ensuring compliance with the rules of the Common fisheries policy.

b For the vessels whose LOA is less than 10 metres gear codes used in this table refer to the codes from the FAO gear classification.

c Vessels are considered as saithe targeting if, when using trawls with mesh size ≥ 100 mm, they have had annual average landings of saithe of ≥ 50 % of all landings by the vessel taken in both EU and third country zone of the North Sea over the period of x-4 to x-2 where x is the year of application; i.e. 2012-2014 for 2016 and 2013-2015 for 2017.

Status: Point in time view as at 22/10/2015.

Changes to legislation: There are currently no known outstanding effects for the
Commission Delegated Regulation (EU) 2015/2440. (See end of Document for details)

-
- d** Except in ICES division IIIa when fishing with trawls with a mesh size of at least 90 mm equipped with a top panel of at least 270 mm mesh size (diamond mesh) or at least 140 mm mesh size (square mesh) or 120 mm square mesh panel placed 6 to 9 meters from the cod-end.
-

Status: Point in time view as at 22/10/2015.

Changes to legislation: There are currently no known outstanding effects for the
Commission Delegated Regulation (EU) 2015/2440. (See end of Document for details)

- (1) [OJ L 354, 28.12.2013, p. 22.](#)
- (2) [OJ L 125, 27.4.1998, p. 1.](#)
- (3) Gear codes used in this Regulation refer to those codes in Annex XI to Commission Implementing Regulation (EU) No 404/2011 laying down detailed rules for the implementation of Council Regulation (EC) No 1224/2009 establishing a Community control system for ensuring compliance with the rules of the Common fisheries policy. For the vessels whose LOA is less than 10 metres gear codes used in this table refer to the codes from the FAO gear classification.
- (4) Agreed record of fisheries consultations between Norway and the European Union on the regulation of fisheries in the Skagerrak and the Kattegat for 2012.
- (5) Agreed record of fisheries consultations between the European Union and Norway on measures for the implementation of a discard ban and control measures in the Skagerrak area, 4 July 2012.
