
Status: Point in time view as at 15/06/1979.

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 15 June 1979 laying down detailed rules for the implementation of Council Decision 77/706/EEC (79/639/EEC) (repealed), ANNEX. (See end of Document for details)

ANNEX

MONTHLY QUESTIONNAIRE ON THE OIL SUPPLY SITUATION IN THE COMMUNITY

I. EXPLANATORY NOTES

A. Units and conversion factors

(a) Units

All data should be expressed in thousands of tonnes rounded up or down to the nearest thousand tonnes.

(b) Oil products and 'crude oil equivalent'

All oil products should be converted into their crude oil equivalent by multiplying the quantities expressed in tonnes by the conversion factor 1 065.

(c) Converting barrels into tonnes

To obtain tonnes the number of barrels should be divided by the conversion factor corresponding to actual density. Where the conversion was based on barrels/day, the units obtained are multiplied by the number of days in the month in question.

(d) Converting cubic metres (kilolitres) into tonnes

For converting cubic metres into tonnes use the conversion factors corresponding to actual densities.

B. Geographical notes

- Faroe Islands' production should be included in Denmark's production,
- the production of Surinam and the Dutch Antilles should not be included in the production of the Netherlands,
- the production of the Canary Islands should be included in Spain's production,
- the production of the Caribbean refineries in Table III C includes imports from the Dutch Antilles, the Bahamas, Trinidad and Tobago.

II. DEFINITIONS AND EXPLANATORY NOTES RELATING TO THE VARIOUS TABLES

1. National production of crude oil and natural gas condensates (Table I)

Give the amounts of crude oil and natural gas condensates (i.e. all liquids separated from the gas in natural gas processing plants⁽¹⁾ produced on national territory including the Continental shelf (offshore). These amounts should include the condensates recovered from gaseous hydrocarbons.

2. Imports and exports of crude oil, natural gas condensates and feedstocks (originating in/exported to Community and non-Community countries) (Tables I, II and IV)

Imports and exports should be regarded as having been effected on the date on which they physically arrive, whether the consignment was customs cleared or not. However, any quantities in transit via an ocean terminal or crossing national territory in any manner whatever (e.g. pipelines) should not be included (this also applies to imports and exports of oil products). On the other hand, imports must include oil imported into customs bonded areas for treatment and

Status: Point in time view as at 15/06/1979.

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 15 June 1979 laying down detailed rules for the implementation of Council Decision 77/706/EEC (79/639/EEC) (repealed), ANNEX. (See end of Document for details)

re-export. Re-exports of oil imported for processing within bonded areas must be included in the export figures.

‘Feedstocks’ should be taken to mean any product or combination of products other than blending, derived from crude oil and destined for further processing. It is transferred into one or more components and/or finished products.

3. Imports/exports of oil products (originating in/for export to Community and non-Community countries) (Tables I, HI and V)

— See point 2.

— The following are the oil products concerned:

liquefied petroleum gas (LPG), naphthas, motor spirit, jet fuels, kerosenes, gas/diesel oil, residual fuel oil, lubricants and bitumen⁽²⁾.

Maritime bunkers should not be shown in Table I, point 5, but be given separately under point 9.

4. Level of stocks (Table I)

The level of stocks means all oil stored within the frontiers of the declaring country, with the exception of oil in pipelines, oil held by retailers and in filling stations, stocks held by end-consumers and not subject to administrative supervision, and stocks held for military consumption.

5. Variations in stocks (Table I)

These variations correspond to the difference between the level of stocks at the beginning and at the end of a period.

The variation in stocks for the month before last (Table I) is the difference between the final data (month before last) of the present communication and the final data (month before last) of the preceding communication.

MONTHLY QUESTIONNAIRE ON THE PETROLEUM SUPPLY SITUATION OF THE COMMUNITY

TABLE I

CONSUMPTION OF CRUDE OIL⁰ AND EQUIVALENT⁰

Country:					
Current month:					
(1 000 tonnes)					
	Month before last (M-2)	Last month (M-1)	Current month (M)	Next month (M+1)	Month after next (M+2)
	Realization	Provisional	Estimated	Scheduled	Scheduled
a	Including natural gas liquids and feedstocks.				
b	Oil products are converted in crude oil equivalent by the factor 1 065.				
c	End of month.				
d	Difference between stocks level at the end of the month and the level at the end of the month before.				
e	$8 = 1 + 2 + 3 - 4 - 5 - 7.$				
f	Marine bunkers.				

Status: Point in time view as at 15/06/1979.

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 15 June 1979 laying down detailed rules for the implementation of Council Decision 77/706/EEC (79/639/EEC) (repealed), ANNEX. (See end of Document for details)

Country:

Current month:

1.	Indigenous production ^a				
2.	Imports of crude ^a				
3.	Imports of oil products ^b				
4.	Exports of crude ^a				
5.	Exports of oil products ^b				
6.	Stocks levels ^c				
	of which:				
(a)	Crude oil ^a				
(b)	Oil products ^b				
7.	Stocks changes ^d				
	of which:				
(a)	Crude oil ^a				

a Including natural gas liquids and feedstocks.

b Oil products are converted in crude oil equivalent by the factor 1 065.

c End of month.

d Difference between stocks level at the end of the month and the level at the end of the month before.

e $8 = 1 + 2 + 3 - 4 - 5 - 7$.

f Marine bunkers.

Status: Point in time view as at 15/06/1979.

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 15 June 1979 laying down detailed rules for the implementation of Council Decision 77/706/EEC (79/639/EEC) (repealed), ANNEX. (See end of Document for details)

Country:

Current month:

(b)	Oil products ^b				
8.	Total ^c				
9.	Bunkers ^{fb}				
a	Including natural gas liquids and feedstocks.				
b	Oil products are converted in crude oil equivalent by the factor 1 065.				
c	End of month.				
d	Difference between stocks level at the end of the month and the level at the end of the month before.				
e	$8 = 1 + 2 + 3 - 4 - 5 - 7.$				
f	Marine bunkers.				

TABLE II

IMPORTS OF CRUDE OIL⁰

Country:

Current month:

(1 000 tonnes)

Country of origin	Month before last (M-2)	Last month (M-1)	Current month (M)	Next month (M+1)	Month after next (M+2)
