(94/432/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 93/23/EEC of 1 June 1993 on the statistical surveys to be carried out on pig production ⁽¹⁾, and in particular Articles 1 (3), 2 (2), 3 (2), 6 (1) and (2), 8 (1) and (2) and 10 (3) thereof,

Whereas precise definitions are required in order to carry out the surveys provided for in Directive 93/23/EEC; whereas this requires the definition of the agricultural holdings covered by the survey; whereas the herd size classes and regions according to which the Member States draw up the survey results at regular intervals must also be determined; whereas a single definition of carcass weight is necessary for the drawing-up of slaughtering statistics;

Whereas, according to Directive 93/23/EEC, the Member States may, at their request, be authorized to carry out the April and August surveys in selected regions, on the understanding that these surveys cover at least 70 % of the pig population; whereas Member States whose pig population makes up only a small percentage of the overall population of the Community may, at their request, also be authorized to dispense altogether with the April and August surveys, or to use the regional breakdown for the final results of the April or August survey; whereas, finally, the Member States may, at their request, be authorized to use administrative sources instead of statistical surveys to determine the pig population and the prescribed breakdown by herd size classes for the final results of even-numbered years and/or for those of a given month of the year;

Whereas applications have been made by the Member States for the abovementioned types of authorization;

Whereas Commission Decision 76/805/EEC ⁽²⁾, as last amended by Decision 91/268/EEC ⁽³⁾, should be replaced;

Whereas, since Directive 93/23/EEC is applicable as from 1 January 1994, it is appropriate to apply the provisions of this Decision with effect from the same date;

Whereas this Decision is in accordance with the opinion of the Standing Committee on Agricultural Statistics,
