

## ANNEX

### 2.

A notifier can submit in a single notification information on several releases of genetically modified crop plants, to be released on several different sites, on the following conditions:

- the taxonomic status and biology of the recipient plants species is well known,
- information is available on the interactions of the recipient plant species in the ecosystems in which the experimental and/or agricultural releases are scheduled,
- scientific data is available on the safety to human health and the environment of experimental releases involving genetically modified plants of the same recipient plant species,
- the inserted sequences and their expression products should be safe for human health and the environment under the conditions of the experimental release,
- the inserted sequences have been well characterized,
- all the inserted sequences are integrated into the plant nuclear genome,
- all the releases are for an a priori specified programme of work,
- all the releases take place within an a priori specified time period.
