COMMISSION DECISION

of 29 April 2004

amending Commission Decision 2000/572/EC as regards the animal health conditions and veterinary certification for meat preparations transiting or being temporarily stored in the Community

(notified under document number C(2004) 1672)

(Text with EEA relevance)

(2004/437/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 2002/99/EC of 16 December, 2002 laying down the animal health rules governing the production, processing, distribution and introduction of products of animal origin for human consumption<sup>(1)</sup>, in particular Article 8 (5), third indent, and Article 9 (2)(b)and(4)(c),

Whereas:

- (1) Council Directive 94/65/EC lays down the the requirements for the production and placing on the market of minced meat and meat preparations<sup>(2)</sup> including conditions for imports into the Community.
- (2) Commission Decision 2000/572/EC lays down animal and public health conditions and veterinary certification for imports of meat preparations from third countries<sup>(3)</sup>.
- (3) Commission Decision 94/984/EC lays down animal health conditions and veterinary certificates for the importation of fresh poultry meat from certain third countries<sup>(4)</sup>.
- (4) Commission Decision 2000/585/EC lays down animal and public health conditions and veterinary certifications for import of wild and farmed game meat and rabbit meat from third countries<sup>(5)</sup>.
- (5) Council Directive 97/78/EC lays down the principles governing the organisation of veterinary checks on products entering the Community from third countries<sup>(6)</sup> and certain provisions for transit are already provided for in Article 11 such as the use of ANIMO messages and of the common veterinary entry document.
- (6) However, it is necessary in order to safeguard the disease situation in the Community to further ensure that consignments of meat preparations transiting through the

Community, comply with the animal health import conditions applicable for authorised countries in regard to the relevant species concerned.

- (7) Council Decision 79/542/EEC drawing up a list of third countries or parts of third countries, and laying down animal and public health, and veterinary certification conditions for the importation into the Community of certain live animals and their fresh meat<sup>(7)</sup>, has recently been amended to include transit conditions and a derogation for transit between Russia with a reference to the specific border inspection posts designated for this latter purpose.
- (8) In the light of experience, it appears that the presentation to the border inspection post, pursuant to Article 7 of Directive 97/78/EC, of the original veterinary documents established in the exporting third country to fulfil the regulatory requirement of the third country of destination, is not sufficient to ensure that the animal health conditions required for the safe introduction into the territory of the Community of the products concerned are effectively satisfied; it is therefore appropriate to establish a specific model of animal health certificate to be used in transit situations for the products concerned.
- (9) It is further appropriate to clarify the implementation of the condition laid down in Article 11 of Directive 97/78/EC, that transit is only allowed from third countries which products are not prohibited for introduction in the territory of the Community, by making reference to the list of third countries annexed to Decisions 79/542/EEC, 94/984/EC and 2000/585/EC respectively.
- (10) However specific conditions for transits via the Community of consignments to and from Russia should be foreseen due to the geographical situation of Kaliningrad and taking into account climatic problems impeding the use of some ports at certain times of the year.
- (11) Commission Decision 2001/881/EC draws up a list of border inspection posts agreed for veterinary checks on animals and animal products from third countries<sup>(8)</sup> and it is appropriate to specify the border inspection posts designated for the control of such transits taking into account this Decision.
- (12) Commission Decision 2000/572/EC should be amended accordingly.
- (13) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health.
