

Commission Decision of 9 July 2004 amending Annex E to Council Directive 91/68/EEC and Annex I to Council Decision 79/542/EEC as regards the updating of the model health certificates relating to ovine and caprine animals (notified under document number C(2004) 1926) (Text with EEA relevance) (2004/554/EC)

COMMISSION DECISION

of 9 July 2004

amending Annex E to Council Directive 91/68/EEC and Annex I to Council Decision 79/542/EEC as regards the updating of the model health certificates relating to ovine and caprine animals

(notified under document number C(2004) 1926)

(Text with EEA relevance)

(2004/554/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 72/462/EEC of 12 December 1972 on health and veterinary inspection problems upon importation of bovine, ovine and caprine animals and swine, fresh meat or meat products from third countries⁽¹⁾, and in particular Article 11(2) thereof,

Having regard to Council Directive 91/68/EEC of 28 January 1991 on animal health conditions governing intra-Community trade in ovine and caprine animals⁽²⁾, and in particular Article 14(2) thereof,

Whereas:

- (1) The model of veterinary certificate for intra-Community trade in ovine and caprine animals for breeding is laid down as model III of Annex E to Directive 91/68/EEC.
- (2) The model of veterinary certificate for imports of domestic ovine and caprine animals from third countries is laid down as 'OVI-X' in part 2 of Annex I to Council Decision 79/542/EEC of 21 December 1976 drawing up a list of third countries or parts of third countries, and laying down animal and public health and veterinary certification conditions, for importation into the Community of certain live animals and their fresh meat⁽³⁾.
- (3) In accordance with part I of Chapter A of Annex VIII and Chapter E of Annex IX to Regulation (EC) No 999/2001 of the European Parliament and of the Council of 22 May 2001 laying down rules for the prevention, control and eradication of certain transmissible spongiform encephalopathies⁽⁴⁾, certain requirements on trade in and imports of ovine and caprine animals for breeding have been changed in order to reflect a more vigorous approach as regards scrapie eradication.

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 9 July 2004 amending Annex E to Council Directive 91/68/EEC and Annex I to Council Decision 79/542/EEC as regards the updating of the model health certificates relating to ovine and caprine animals (notified under document number C(2004) 1926) (Text with EEA relevance) (2004/554/EC). (See end of Document for details)

- (4) It is necessary to align the animal health certificate model III in Annex E to Directive 91/68/EEC and the model certificate OVI-X in Annex I to Decision 79/542/EEC with the updated rules.
- (5) Directive 91/68/EEC and Decision 79/542/EEC should therefore be amended accordingly.
- (6) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

HAS ADOPTED THIS DECISION:

Article 1 **U.K.**

Model III in Annex E to Directive 91/68/EEC is replaced by Annex I to this Decision.

Article 2 **U.K.**

Model OVI-X in PART 2 of Annex I to Decision 79/542/EEC is replaced by Annex II to this Decision.

Article 3 **U.K.**

This Decision shall apply from 1 June 2004.

Article 4 **U.K.**

This Decision is addressed to the Member States.

Done at Brussels, 9 July 2004.

For the Commission

David BYRNE

Member of the Commission

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 9 July 2004 amending Annex E to Council Directive 91/68/EEC and Annex I to Council Decision 79/542/EEC as regards the updating of the model health certificates relating to ovine and caprine animals (notified under document number C(2004) 1926) (Text with EEA relevance) (2004/554/EC). (See end of Document for details)

ANNEX I **U.K.**

MODEL III

1. Consignor (name and address in full)	HEALTH CERTIFICATE ⁽¹⁾ for trade between Member States of the European Union in ovine and caprine animals for breeding	
	No	ORIGINAL
2. Consignee (name and address in full)	3. MEMBER STATE:	
	4. Competent authority 4.1 Ministry:..... 4.2 Department:	
5. Place of loading:		
6. Means of transport ⁽²⁾ 6.1. Type:	7. Establishment(s) of origin 7.1 Name and address of the holding ⁽⁴⁾ : 7.2 Name, address and registration number of approved assembly centre ⁽⁴⁾	
6.2. Identification:		
8. Destination of the animals 8.1. EU Member State:..... 8.2.1. Name and address of the holding ⁽⁴⁾ 8.2.2. Name, address and registration number of the approved assembly centre in the Member State of origin ⁽⁴⁾		
9. Number of animals		
10. Identification of the animals		
10.1. Animal specie(s):breed:		
10.2. Individual identification of the animals included in this consignment		
Official individual identification ⁽³⁾	Age (months) and Sex (♀ ♂ Castrated)	Number of animals
.....
.....
.....
11. Origin of the animals The animals were either: (a) born and have been reared since birth on Community territory ⁽⁴⁾ ; or (b) imported from a third country satisfying the animal health conditions laid down in Decision 79/542/EEC in accordance with Article 8 of Directive 72/462/EEC ⁽⁴⁾ .		

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 9 July 2004 amending Annex E to Council Directive 91/68/EEC and Annex I to Council Decision 79/542/EEC as regards the updating of the model health certificates relating to ovine and caprine animals (notified under document number C(2004) 1926) (Text with EEA relevance) (2004/554/EC). (See end of Document for details)

12. Health information

I, the undersigned official veterinarian, hereby certify, that the animals described above meet the following requirements:

- 12.1. they have been inspected today (within 24 hours prior to loading) and show no clinical sign of disease;
- 12.2. they are not animals which are to be destroyed under a scheme to eradicate a contagious or infectious disease;
- 12.3. they were not obtained from a holding which is the subject of a prohibition on animal health grounds and they have not been in contact with animals from such a holding, it being understood that:
- 12.3.1. such prohibition is connected with the outbreak of one of the following diseases to which the animals are susceptible:
- brucellosis,
 - rabies,
 - anthrax;
- 12.3.2. after slaughter and/or destruction of the last animal suffering from or susceptible to one of the above diseases, the duration of the prohibition must be at least:
- 42 days in a case of brucellosis,
 - 30 days in a case of rabies,
 - 15 days in a case of anthrax;
- 12.3.3. they do not come from a holding nor have been in contact with animals from a holding in a protection zone which has been set up under Community legislation and which animals are prohibited to leave;
- 12.3.4. they are not the subject of animal health measures pursuant to Community legislation on foot-and-mouth disease nor have they been vaccinated against foot-and-mouth disease;
- 12.4. they have remained on a single holding of origin for a period of at least 30 days prior to loading, or since birth in the holding of origin where the animals are less than 30 days old, and no animal of the ovine or caprine species has been introduced into the holding of origin during the last 21 days prior to loading and no biungulate animal imported from a third country has been introduced into the holding of origin during the 30 days prior to dispatch from the holding of origin, unless those animals were introduced in accordance with Article 4a(2) of Directive 91/68/EEC;
- 12.5. they comply with the additional guarantees provided for in Articles 7 or 8 of Directive 91/68/EEC and laid down for the Member State of destination or part of its territory [insert Member State or part of its territory] in Commission Decision/...../EC⁽⁴⁾.
- 12.6. they comply with at least one of the following conditions in 12.6.1, 12.6.2 or 12.6.3 and therefore qualify for admission to an ovine or caprine holding which is officially brucellosis-free, (*B. melitensis*)⁽⁴⁾:
- 12.6.1. the holding of origin is situated in a Member State or part of its territory [insert name of Member State or part of its territory] which is recognised as being officially brucellosis-free in accordance with Commission Decision...../...../EC⁽⁴⁾; or
- 12.6.2. they come from an officially brucellosis-free (*B. melitensis*) holding⁽⁴⁾; or
- 12.6.3. they come from a brucellosis-free (*B. melitensis*) holding and
- (i) they are identified individually, and
 - (ii) they have never been vaccinated against brucellosis or if they have been vaccinated were so vaccinated more than two years previously or they are females over two years old which were vaccinated before the age of seven months, and
 - (iii) they were isolated under official supervision on the holding of origin and, during such isolation, underwent, with negative results, two tests for brucellosis in accordance with Annex C to Directive 91/68/EEC, separated by an interval of at least six weeks⁽⁴⁾;

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 9 July 2004 amending Annex E to Council Directive 91/68/EEC and Annex I to Council Decision 79/542/EEC as regards the updating of the model health certificates relating to ovine and caprine animals (notified under document number C(2004) 1926) (Text with EEA relevance) (2004/554/EC). (See end of Document for details)

- 12.7. they comply with at least one of the conditions in 12.7.1, 12.7.2, or 12.7.3 and therefore qualify for admission to an ovine or caprine holding which is brucellosis-free, (*B. melitensis*)⁽⁴⁾:
- 12.7.1. they come from an officially brucellosis -free (*B. melitensis*) holding⁽⁴⁾; or
- 12.7.2. they come from a brucellosis-free (*B. melitensis*) holding⁽⁴⁾; or
- 12.7.3. until the qualifying date under eradication plans approved pursuant to Decision 90/242/EEC, they originate from a holding other than that referred to in 12.7.1 and 12.7.2 and satisfy the following conditions:
- (i) they are identified individually;
- (ii) they originate from a holding in which all the animals of species susceptible to brucellosis (*B. melitensis*) have been free of clinical symptoms or any other symptoms of brucellosis for at least 12 months; and
- (iii) either:
- they have not been vaccinated against brucellosis (*B. melitensis*) in the last two years, and
 - they were isolated under veterinary supervision on the holding of origin and, during such isolation, underwent, with negative results, two tests for brucellosis in accordance with Annex C to Directive 91/68/EEC, separated by an interval of at least six weeks⁽⁴⁾;
- or
- they were vaccinated with Rev. 1 vaccine before the age of seven months, and
 - they were not vaccinated in the 15 days before the date of emission of this health certificate⁽⁴⁾;
- 12.8. as regards contagious epididymitis of rams (*B. ovis*), where uncastrated breeding rams are concerned, they must:
- (i) come from a holding on which no case of contagious epididymitis of rams (*B. ovis*) has been recorded in the past 12 months, and
- (ii) have been kept permanently on that holding for the 60 days preceding consignment, and
- (iii) have undergone, within 30 days prior to consignment, with a negative result, a test to detect contagious epididymitis of rams (*B. ovis*) in accordance with Annex D to Directive 91/68/EEC;
- 12.9. to the best of the knowledge of the undersigned and according to the written declaration made by the owner, they were not obtained from a holding nor have been in contact with animals from a holding in which the following diseases have been clinically detected:
- (i) within the last six months, contagious agalactia of sheep (*Mycoplasma agalactiae*) and contagious agalactia of goats (*Mycoplasma agalactiae*, *M. capricolum*, *M. mycoides subsp. mycoides* large colony);
- (ii) within the last 12 months, paratuberculosis or caseous lymphadenitis;
- (iii) within the last three years, pulmonary adenomatosis, maedi/visna or caprine viral arthritis/encephalitis. However, this time limit is reduced to 12 months if animals affected by maedi/visna or caprine viral arthritis/encephalitis have been slaughtered and the remaining animals have reacted negatively to two tests;
- 12.10. as regards scrapie, the animals fulfil the requirements provided for in point (a) of part I of Chapter A of Annex VIII to Regulation (EC) No 999/2001;
- 12.10.1. if they are destined for a Member State which benefits, for all or part of its territory, from the provisions laid down in point (b) or (c) of Part I in Chapter A in Annex VIII to Regulation (EC) No 999/2001 they comply with the additional guarantees laid down for the Member State of destination or part of its territory [insert Member State or part of its territory] in Commission Regulation (EC) No/...../.....⁽⁴⁾.

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 9 July 2004 amending Annex E to Council Directive 91/68/EEC and Annex I to Council Decision 79/542/EEC as regards the updating of the model health certificates relating to ovine and caprine animals (notified under document number C(2004) 1926) (Text with EEA relevance) (2004/554/EC). (See end of Document for details)

13.1. The animals were transported using means of transport and containment which had, beforehand, been cleaned and disinfected using an officially approved disinfectant, and in such a way as to provide effective protection of the animals' health status.	
13.2. Based on the official documentation accompanying the animals, the consignment covered by this health certificate started the journey on [insert date] ⁽⁵⁾ .	
13.3. At the time of inspection the animals were fit to be transported on the intended journey in accordance with the provisions of Council Directive 91/628/EEC ⁽⁶⁾ .	
14. This certificate is valid for 10 days from the date of inspection.	
14.1. Official stamp and signature 	14.2. Done at: [insert place of inspection]
	14.3. Done on: [insert date of inspection]
	14.4. Signature of official veterinarian [insert name and capacity in block capitals]

Indicative notes

- (1) Health certificates may be drawn up only for animals which are to be transported in the same railway wagon, truck/lorry, aircraft or boat/ship, which originate from the same holding and which are being sent to the same consignee.
- (2) Give the registration number in the case of railway wagons and lorries/trucks, the flight number in the case of aircraft and the name in case of boats and ships.
- (3) State number and location.
- (4) Delete where not applicable.
- (5) In the case where a consignment is grouped in an assembly centre and comprises animals that were loaded on different dates, the date at which the journey commenced for the whole consignment is considered to be the earliest date when any part of the consignment left the holding of origin.
- (6) This statement does not exempt transporters from their obligations in accordance with Community provisions in force in particular regarding the fitness of animals to be transported.⁷

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 9 July 2004 amending Annex E to Council Directive 91/68/EEC and Annex I to Council Decision 79/542/EEC as regards the updating of the model health certificates relating to ovine and caprine animals (notified under document number C(2004) 1926) (Text with EEA relevance) (2004/554/EC). (See end of Document for details)

9.	<p>Public Health attestation</p> <p>I, the undersigned official veterinarian, hereby certify, that the animals described in this certificate:</p> <p>9.1. come from holdings which have been free from any official prohibition on health grounds, for the last 42 days in the case of brucellosis, for the last 30 days in the case of anthrax, for the last six months in the case of rabies, and, have not been in contact with animals from holdings which did not satisfy these conditions;</p> <p>9.2. have not received:</p> <ul style="list-style-type: none"> - any stilbene or thyrostatic substances, - oestrogenic, androgenic, gestagenic or β- agonist substances for purposes other than therapeutic or zootechnic treatment (as defined in Council Directive 96/22/EC).
10.	<p>Animal Health attestation</p> <p>I, the undersigned official veterinarian, hereby certify, that the animals described above meet the following requirements:</p> <p>10.1. they come from the territory with code:.....⁽³⁾ which, at the date of issuing this certificate:</p> <p>^{(5) either} [(a) has been free for 24 months from foot-and-mouth disease, for 12 months from rinderpest, bluetongue, Rift valley fever, peste des petits ruminants, sheep pox and goat pox, contagious caprine pleuropneumonia and epizootic haemorrhagic disease and for six months from vesicular stomatitis; and]</p> <p>^{(5) or} [(a) (i) has been free for 12 months from rinderpest, bluetongue, Rift valley fever, pest of small ruminants, sheep pox and goat pox, contagious caprine pleuro-pneumonia and epizootic haemorrhagic disease, and for six months from vesicular stomatiti; and</p> <p style="padding-left: 40px;">(ii) has been considered free from foot-and-mouth disease, since (date), without having had cases/outbreaks afterwards, and authorised to export these animals by Commission Decision ----/----/EC, of (date); and]</p> <p style="padding-left: 40px;">(b) where during the last 12 months, no vaccination against these diseases has been carried out and imports of domestic cloven-hoofed animals vaccinated against these diseases are not permitted;</p> <p>10.2. they have remained in the territory described under point 10.1 since birth, or for at least the last six months before dispatch to the European Community and without contact with imported cloven-hoofed animals for the last 30 days;</p> <p>10.3. they have remained since birth or at least 40 days in the holding(s) described under point 6.1 before dispatch:</p> <ul style="list-style-type: none"> (a) in and around which, in an area with a 150 km radius, there has been no case/outbreak of bluetongue and epizootic haemorrhagic disease during the previous 100 days, and (b) in and around which, in an area with a 20 km radius, there has been no case/outbreak of the other diseases mentioned under point 10.1 during the previous 40 days; <p>10.4. according to my knowledge and to the written declaration made by the owner, the animals:</p> <ul style="list-style-type: none"> (a) do not come from holdings, and have not been in contact with animals of a holding, in which the following diseases have been clinically detected: <ul style="list-style-type: none"> (i) contagious agalactia of sheep or goats (<i>Mycoplasma agalactiae</i>, <i>Mycoplasma capricolum</i>, <i>Mycoplasma mycoides var. mycoides</i> large colony), within the last six months; (ii) paratuberculosis and caseous lymphadenitis, within the last 12 months; (iii) pulmonary adenomatosis, within the last three years; and (iv) Maedi/Visna or caprine viral arthritis/encephalitis: <ul style="list-style-type: none"> ^{(5) either} [within the last three years,] ^{(5) or} [within the last 12 months, and all the infected animals were slaughtered and the remaining animals subsequently reacted negatively to two tests carried out at least six months apart;] (b) are included in an official system for notification of these diseases; and (c) have been free from clinical or other evidence of tuberculosis and brucellosis during the three years prior to export; <p>10.5. they are not animals to be killed under a national programme for the eradication of diseases, nor have they been vaccinated against the diseases mentioned under point 10.1;</p> <p>10.6. A. they originate:</p> <ul style="list-style-type: none"> ^{(5) (11) either} [from the territory described under point 3.2, which has been recognised as officially brucellosis-free;] ^{(5) or} [from the holding(s) described under point 6.1, where, in respect of brucellosis (<i>Brucella melitensis</i>): <ul style="list-style-type: none"> (a) all susceptible animals have been free from clinical or any signs of this disease for the last 12 months; (b) a representative number of the ovine and caprine animals over an age of six months are submitted each year to a serological test⁽¹²⁾;

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 9 July 2004 amending Annex E to Council Directive 91/68/EEC and Annex I to Council Decision 79/542/EEC as regards the updating of the model health certificates relating to ovine and caprine animals (notified under document number C(2004) 1926) (Text with EEA relevance) (2004/554/EC).
