THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 91/496/EEC of 15 July 1991 laying down the principles governing the organisation of veterinary checks on animals entering the Community from third countries and amending Directives 89/662/EEC, 90/425/EEC and 90/675/EEC <sup>(1)</sup>, and in particular Article 4(5) thereof,

Having regard to Council Directive 97/78/EC of 18 December 1997 laying down the principles governing the organisation of veterinary checks on products entering the Community from third countries <sup>(2)</sup>, and in particular Article 3(5) thereof,

Having regard to Council Directive 2002/99/EC of 16 December 2002 laying down the animal health rules governing the production, processing, distribution and introduction of products of animal origin for human consumption <sup>(3)</sup>, and in particular Article 8(5) thereof,

Whereas:

- (1) Directive 91/496/EEC provides for veterinary checks in respect of animals from third countries entering the Community to be carried out by the Member States in accordance with that Directive.
- (2) Directive 97/78/EC provides for veterinary checks on certain products of animal origin and certain plant products introduced into the Community from third countries.
- (3) Commission Decision 2002/349/EC of 26 April 2002 laying down the list of products to be examined at border inspection posts under Council Directive 97/78/EC <sup>(4)</sup> provides that the products of animal origin listed in that Decision are to be subject to veterinary checks at border inspection posts in accordance with Directive 97/78/EC.
- (4) As veterinary checks at border inspections posts are carried out in close cooperation with customs officials, it is appropriate to use a list of products that refer to the Combined Nomenclature (CN)

<sup>(1)</sup> OJ L 268, 24.9.1991, p. 56. Directive as last amended by Directive 2006/104/EC (OJ L 363, 20.12.2006, p. 352).

<sup>(2)</sup> OJ L 24, 30.1.1998, p. 9. Directive as last amended by Directive 2006/104/EC.

provided for in Council Regulation (EEC) No 2658/87 of 23 July 1987 on the tariff and statistical nomenclature and on the Common Customs Tariff<sup>(1)</sup> as a first basis for selection of consignments. The lists of products in Decision 2002/349/EC should therefore be replaced by the list in Annex I to this Decision.

- (5) In the interests of rationality of Community legislation, it is appropriate that the list in Annex I to this Decision also covers animals entering the Community from third countries.
- (6) In order to facilitate controls by the competent authorities at border inspection posts, the list in Annex I to this Decision should provide as precise a description as possible of the animals and products to be subjected to veterinary checks under Directive 97/78/EC. In addition, for certain CN codes, this Decision only provides for a small part of the products falling under the relevant Chapter or heading to be subjected to veterinary checks. In such cases, Column 3 of Annex I to this Decision, should refer to the applicable CN code and give details of the products which should be subject to those veterinary checks.
- (7) Decision 2002/349/EC provides that composite food products containing only a limited percentage of products of animal origin are to continue to be subject to national rules.
- (8) However, in order to avoid differences in interpretation between Member States, leading to distortions in trade and to potential animal health risks, rules should now be laid down at Community level concerning the composite products that may be exempted from veterinary checks under Directive 97/78/EC.
- (9) Regulation (EC) No 853/2004 of the European Parliament and of the Council of 29 April 2004 laying down specific hygiene rules for food of animal origin<sup>(2)</sup> contains definitions of certain products. In the interests of consistency of Community legislation, it is appropriate to have regard to those definitions in this Decision.
- (10) There are differences in the animal health risk associated with imports of different types of animal products into the Community. Accordingly, this Decision should provide that all composite products containing meat products should be subject to veterinary checks, while different criteria should be applied to composite products containing other animal products based upon the need to have harmonised rules at Community level.
- (11) Certain composite products receive treatment during manufacture which reduces the potential animal health risk present in such products. The appearance, shelf stability, and physical characteristics should therefore be used as recognisable distinguishing features for competent authorities that have to make a decision on the necessity of subjecting composite products to veterinary checks.

- (12) In the interests of consistency of veterinary checks at border inspection posts on composite products being introduced into the Community, it is appropriate to establish also a list of certain foodstuffs and composite products that may be exempted from the veterinary checks provided for in Directive 97/78/EC.
- (13) In the interests of coherence of Community legislation, it is appropriate to repeal Decision 2002/349/EC and replace it by this Decision.
- (14) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

HAS ADOPTED THIS DECISION:

*Article 1***Subject matter**

This Decision lays down rules regarding the animals and products to be subjected to veterinary checks at border inspection posts on introduction into the Community, in accordance with Directives 91/496/EEC and 97/78/EC.

*Article 2***Definitions**

For the purposes of this Decision, the following definitions shall apply:

- (a) composite product: a foodstuff intended for human consumption that contains both processed products of animal origin and products of plant origin and includes those where the processing of primary product is an integral part of the production of the final product;
- (b) meat products: products as defined in point 7.1 of Annex I to Regulation (EC) No 853/2004;
- (c) processed products: the processed products listed under point 7 of Annex 1 to Regulation (EC) No 853/2004;
- (d) dairy products: products as defined in point 7.2 of Annex I to Regulation (EC) No 853/2004.

*Article 3***Veterinary checks of animals and products listed in Annex I**

1. The animals and products listed in Annex I to this Decision shall be subjected to veterinary checks at border inspection posts in accordance with Directives 91/496/EEC and 97/78/EC.
2. This Decision applies without prejudice to the checks on composite products necessary to ensure compliance with Community public health requirements.

**▼B**

3. Initial selection of products for veterinary checks made on the basis of the Combined Nomenclature in Column 1 of the Annex shall be qualified by reference to the specific text or veterinary legislation cited in Column 3.

*Article 4***Composite products subject to veterinary checks**

The following composite products shall be subject to veterinary checks:

- (a) Composite products containing processed meat product.
- (b) Composite products containing half or more of their substance of any one processed product of animal origin other than processed meat product.
- (c) Composite products containing no processed meat product and less than half of their substance of processed milk product where the final products do not meet the requirements of Article 6.

**▼M1****▼B***Article 6***Derogation for certain composite products and foodstuffs**

1. By way of derogation from Article 3, the following composite products or foodstuffs intended for human consumption, not containing any meat products, shall not be subject to veterinary checks:

- (a) composite products containing less than half of their substance of any other processed product provided such products are:
  - (i) shelf-stable at ambient temperature or have clearly undergone in their manufacture a complete cooking or heat treatment process throughout their substance, so that any raw product is denatured;
  - (ii) clearly identified as intended for human consumption;
  - (iii) securely packaged or sealed in clean containers;
  - (iv) accompanied by a commercial document and labelled in an official language of a Member State, so that that document and labelling together give information on the nature, quantity and number of packages of the composite products, the country of origin, the manufacturer, and the ingredient;
- (b) composite products or foodstuffs listed in Annex II.

2. However, any milk product included in any composite products shall only be derived from, and treated as provided for, countries listed in Annex I to Commission Decision 2004/438/EC <sup>(1)</sup>.

*Article 7***Repeal**

Decision 2002/349/EC is repealed.

## ANNEX I

**LIST OF ANIMALS AND PRODUCTS SUBJECT TO VETERINARY CHECKS AS REFERRED TO IN ARTICLE 3**

**This list sets out animals and products according to the goods nomenclature in use in the Union to determine the selection of consignments that must be submitted to veterinary checks at a border inspection post.**

*Notes to the table:*

**1. General remarks**

These general remarks are added to certain chapters to clarify, which animals or products would be covered with the relevant chapter. In addition, where necessary, reference is made to the specific requirements laid down in the fourth column 'import and transit conditions' of various tables set out in Annexes XIII and XIV to Regulation (EU) No 142/2011, similar as in Column (3) of this list.

**2. Note to Chapter**

These chapter notes are explanations, where necessary extracted, from the Notes to the individual Chapters of the Combined Nomenclature (CN) as laid down in Annex I to Regulation (EEC) No 2658/87.

**3. Extract from the Harmonised System Explanatory Notes**

Additional information on the different Chapters has been extracted, where necessary, from the Harmonised System Explanatory Notes of the World Customs Organisation from 2007.

**4. Column (1) — CN code**

This column indicates the CN code. The CN, established by Regulation (EEC) No 2658/87, is based on the international Harmonised Commodity Description and Coding System (HS) drawn up by the Customs Cooperation Council, now the World Customs Organisation (WCO), adopted by the International Convention, concluded in Brussels on 14 June 1983 and approved on behalf of the European Economic Community by Council Decision 87/369/EEC<sup>(1)</sup> ('the HS Convention'). The CN reproduces the headings and subheadings of the HS to six digits, with only the seventh and eighth figures creating further subheadings which are specific to it.

Where a four digit code is used: unless otherwise specified, all products prefixed with or covered by these four digits must be submitted to veterinary checks at a border inspection post. In most of these cases, the relevant CN codes included in the Traces system set up by Decision 2004/292/EC are broken down to the six or eight digit code.

Where only certain specified products under any four, six or eight digit code are required to be submitted to veterinary checks and no specific subdivision under this code exists in the CN, the code is marked **Ex** (for example, **Ex 3002**: veterinary checks required only for animal derived material, including hay and straw, and not for the entire heading, subheading or CN code). The relevant codes are also included in the Traces system.

<sup>(1)</sup> OJ L 198, 20.7.1987, p. 1.

▼ **M2****5. Column (2) — Description**

The description of the goods is as laid down in the description column of the CN in Annex I to Regulation (EEC) No 2658/87. For further explanation of the exact coverage of the Common Customs Tariff, please refer to the latest amendment to that Annex.

**6. Column (3) — Qualification and explanation**

This column gives details of the animals or products covered. Further information on the animals or products covered in the different Chapters of the CN can be found in the latest version of the Explanatory Notes to the Combined Nomenclature of the European Union <sup>(1)</sup>. For updated information, please refer to the latest amendment or consolidated version of these Explanatory Notes.

For certain live animals (such as reptiles, amphibians, insects, worms, or other invertebrates) and certain animal products, no specific Union import conditions have currently been agreed; therefore, no harmonised import certificates currently exist.

However, conditions for imports of live animals, not specified in other Union legislation, fall within the scope of Directive 92/65/EC <sup>(2)</sup>. In addition, for such animals, national rules on the documentation accompanying such consignments apply. Official veterinarians must examine the consignments and issue a Common Veterinary Entry Document (CVED) as appropriate to indicate that the veterinary checks have been carried out and that the animals may be released for free circulation.

Products derived from animal by-products covered by Regulation (EC) No 1069/2009 and (EU) No 142/2011 are not specifically identified in Union law. Veterinary checks must be carried out on products that are partly processed but remain raw products to be further processed in an approved or registered establishment at destination.

Official veterinarians at border inspection posts must assess and specify, when necessary, if a derived product is sufficiently processed to not require further the veterinary checks provided for in Union legislation.

## TABLE

Without prejudice to the rules for the interpretation of the CN, the wording for the description of goods in column 2 is considered to be of indicative value only, since the goods covered by this Decision are determined, within this Annex, by CN codes.

Where there is an 'Ex' symbol in front of a CN code, the goods covered by this Decision are determined by the scope of the CN code and by that of the corresponding description in column (2) and the qualification and explanation in column (3).

## Notes to Chapter 4

1. The expression 'milk' means full-cream milk or partially or completely skimmed milk.
2. For the purposes of heading 0405:
  - (a) the term 'butter' means natural butter, whey butter or recombined butter (fresh, salted or rancid, including canned butter) derived exclusively from milk, with a milkfat content of 80 % or more but not more than 95 % by weight, a maximum milk solids-not-fat content of 2 % by weight and a maximum water content of 16 % by weight. Butter does not contain

added emulsifiers, but may contain sodium chloride, food colours, neutralising salts and cultures of harmless lactic-acid-producing bacteria;

- (b) the expression ‘dairy spreads’ means a spreadable emulsion of the water-in-oil type, containing milkfat as the only fat in the product, with a milkfat content of 39 % or more but less than 80 % by weight.
3. Products obtained by the concentration of whey and with the addition of milk or milkfat are to be classified as cheese in heading 0406 provided that they have the three following characteristics:
- (a) a milkfat content, by weight of the dry matter, of 5 % or more;
  - (b) a dry matter content, by weight, of at least 70 % but not exceeding 85 %; and
  - (c) they are moulded or capable of being moulded.
4. This chapter does not cover:
- (a) products obtained from whey, containing by weight more than 95 % lactose, expressed as anhydrous lactose calculated on the dry matter (heading 1702); or
  - (b) albumins (including concentrates of two or more whey proteins, containing by weight more than 80 % whey proteins, calculated on the dry matter) (heading 3502) or globulins (heading 3504).

**Extract from the Harmonised System Explanatory Notes**

Heading **0408** covers whole eggs not in shell, and egg yolks of all birds. The products of this heading may be fresh, dried, cooked by steaming or by boiling in water, moulded (e.g. cylindrical ‘long eggs’), frozen or otherwise preserved. All these fall in the heading whether or not containing added sugar or other sweetening matter and whether for use as food or for industrial purposes (e.g., in tanning).

Heading 0409 **excludes** artificial honey and mixtures of natural and artificial honey (heading 1702).

Heading **1516** covers animal and vegetable fats and oils, which have undergone a specific chemical transformation of a kind mentioned below, but have not been further prepared.

Hydrogenation, which is affected by bringing the products into contact with pure hydrogen at a suitable temperature and pressure in the presence of a catalyst (usually finely divided nickel), raises the melting points of fats and increases the consistency of oils by transforming unsaturated glycerides into saturated glycerides of higher melting points.
