

COMMISSION IMPLEMENTING DECISION (EU) 2015/2250**of 26 November 2015****confirming or amending the average specific emissions of CO₂ and specific emissions targets for manufacturers of new light commercial vehicles for the calendar year 2014 pursuant to Regulation (EU) No 510/2011 of the European Parliament and of the Council***(notified under document C(2015) 8346)***(Only the Dutch, English, Estonian, French, German, Italian, Polish, Portuguese, and Swedish texts are authentic)**

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) No 510/2011 of the European Parliament and of the Council of 11 May 2011 setting emission performance standards for new light commercial vehicles as part of the Union's integrated approach to reduce CO₂ emissions from light-duty vehicles ⁽¹⁾, and in particular Article 8(6) and Article 10(1) thereof,

Whereas:

- (1) The Commission is required, pursuant to Article 8(6) of Regulation (EU) No 510/2011, to confirm or amend each year the average specific emissions of CO₂ and the specific emissions target for each manufacturer of light commercial vehicles in the Union. On that basis, the Commission is to determine whether manufacturers and pools of manufacturers formed in accordance with Article 7(1) of that Regulation have complied with their specific emissions targets in accordance with Article 4 of that Regulation.
- (2) Pursuant to Article 4 of Regulation (EU) No 510/2011 the average specific emissions of manufacturers for 2014 are calculated in accordance with the third paragraph of that Article and take into account 70 % of the manufacturer's new light commercial vehicles registered in that year.
- (3) The detailed data to be used for the calculation of the average specific emissions and the specific emissions targets is set out in point 1 of Part A and Part C of Annex II to Regulation (EU) No 510/2011 and is based on Member States' registrations of new light commercial vehicles during the preceding calendar year.
- (4) Where light commercial vehicles are type-approved in a multi-stage process, point 7 of Part B of Annex II to Regulation (EU) No 510/2011 requires that the manufacturer of the base vehicle take responsibility for the CO₂ emissions of the completed vehicle.
- (5) The 2014 data were submitted to the Commission by the time-limit of 28 February 2015 in accordance with Article 8(2) of Regulation (EU) No 510/2011 by a majority of the Member States. Where, as a result of the verification of the data by the Commission, it was evident that certain data were missing or manifestly incorrect, the Commission contacted the Member States concerned and, subject to the agreement of those Member States, adjusted or completed the data accordingly. Where no agreement could be reached with a Member State, the provisional data of that Member State were not adjusted.
- (6) On 13 May 2015, the Commission published the provisional data and notified 64 manufacturers of the provisional calculations of their average specific emissions of CO₂ in 2014 and their specific emissions targets in accordance with Article 8(4) of Regulation (EU) No 510/2011. Manufacturers were asked to verify the data and to notify the Commission of any errors within 3 months of receipt of the notification in accordance with the Article 8(5) of that Regulation. 23 manufacturers submitted notifications of errors.
- (7) For the remaining 41 manufacturers that did not notify any errors in the datasets or respond otherwise, the provisional data and provisional calculations of the average specific emissions and the specific emissions targets should be confirmed without adjustments.
- (8) The Commission has verified the corrections notified by the manufacturers and the respective justifications and the datasets have been adjusted as appropriate.

⁽¹⁾ OJ L 145, 31.5.2011, p. 1.

- (9) In the case of records without matching vehicle identification numbers and with missing or incorrect identification parameters, such as type, variant, version code or type-approval number, the fact that manufacturers cannot verify or correct those records should be taken into account. As a consequence, it is appropriate to apply an error margin to the CO₂ emissions and mass values in those records.
- (10) The error margin should be calculated as the difference between the distances to the specific emissions target expressed as the specific emissions targets subtracted from the average emissions calculated including and excluding those registrations that cannot be verified by the manufacturers. Regardless of whether that difference is positive or negative, the error margin should always improve the manufacturer's position with regard to its specific emission target.
- (11) In accordance with Article 10(2) of Regulation (EU) No 510/2011, a manufacturer should be considered as compliant with its specific emission target referred to in Article 4 of that Regulation where the average emissions indicated in this Decision are lower than the specific emissions target, expressed as a negative distance to target. Where the average emissions exceed the specific emissions target, an excess emission premium are to be imposed in accordance with Article 9 of Regulation (EU) No 510/2011, unless the manufacturer concerned benefits from an exemption from that target in accordance with Article 2(4) or Article 11 of that Regulation or is a member of a pool in accordance with Article 7 of that Regulation and the pool complies with its specific emissions target.
- (12) Following a statement by the Volkswagen Group on 3 November 2015 that irregularities were found when determining type approval CO₂ levels of some of their vehicles, the average specific emissions of CO₂ and the specific emissions targets should not be confirmed for the Volkswagen pool and its members until further clarification is provided by the Volkswagen Group. As a consequence the Volkswagen pool and its members (Audi AG, Dr Ing. h.c.F. Porsche AG, Quattro GmbH, Seat S.A., Skoda Auto A.S., and Volkswagen AG) should not be subject to this Decision.
- (13) The average specific emissions of CO₂ from new light commercial vehicles registered in 2014, the specific emissions targets and the difference between those two values should be confirmed or amended accordingly,

HAS ADOPTED THIS DECISION:

Article 1

The values relating to the performance of manufacturers, as confirmed or amended for each manufacturer of light commercial vehicles and for each pool of manufacturers of light commercial vehicles in respect of the 2014 calendar year in accordance with Article 8(6) of Regulation (EU) No 510/2011, are specified in the Annex to this Decision.

The values referred to in points (a) to (e) of Article 10(1) of Regulation (EU) No 510/2011 for each manufacturer of light commercial vehicles and for each pool of manufacturers of light commercial vehicles in respect of the 2014 calendar year are also specified in the Annex to this Decision, with the exception provided for in Article 2(4) of that Regulation for the manufacturers concerned.

Article 2

This Decision is addressed to the following individual manufacturers and pools formed in accordance with Article 7 of Regulation (EU) No 510/2011:

- (1) Alke S.r.l.

Table 2

Values relating to the performance of pools confirmed in accordance with Article 10 of Regulation (EU) No 510/2011

A	B	C	D	E	F	G	H	I
Pool name	Pool	Number of registrations	Average CO ₂ (70 %) corrected	Specific emissions target	Distance to target	Distance to target adjusted	Average mass	Average CO ₂ (100 %)
DAIMLER	P1	126 090	187,577	217,704	- 30,127	- 30,160	2 165,18	199,926
FIAT GROUP AUTOMOBILES SPA	P2	126 114	141,520	172,730	- 31,210	- 31,253	1 681,59	158,184
FORD-WERKE GMBH	P3	192 687	160,689	191,129	- 30,440	- 30,467	1 879,43	178,734
GENERAL MOTORS	P4	77 351	156,966	177,174	- 20,208	- 20,208	1 729,38	172,510
KIA	P5	1 781	120,066	146,738	- 26,672	- 26,672	1 402,11	131,958
MITSUBISHI MOTORS	P6/D	12 509	200,650	210,000	- 9,350	- 9,350	1 962,48	205,817
POOL RENAULT	P7	226 915	113,870	163,493	- 49,623	- 49,771	1 582,27	147,444

Explanatory notes to Tables 1 and 2:

Column A:

Table 1: 'Manufacturer name' means the name of the manufacturer as notified to the Commission by the manufacturer concerned or, where no such notification has taken place, the name registered by the registration authority of the Member State.

Table 2: 'Pool name' means the name of the pool declared by the pool manager.

Column B:

'D' means that a derogation relating to a small volume manufacturer has been granted in accordance with Article 11(3) of Regulation (EU) No 510/2011 with effect for the calendar year 2014.

'DMD' means that a *de minimis* derogation applies, i.e. a manufacturer which together with all its connected undertakings was responsible for fewer than 1 000 new registered vehicles in 2014 does not have to meet a specific emissions target.

'P' means that the manufacturer is a member of a pool (listed in Table 2) formed in accordance with Article 7 of Regulation (EU) No 510/2011 and the pooling agreement is valid for the calendar year 2014.

Column C:

'Number of registrations' means the total number of new cars registered by Member States in a calendar year, not counting those registrations that relate to records where the values for mass or CO₂ are missing and those records which the manufacturer does not recognise. The number of registrations reported by Member States may otherwise not be changed.

Column D:

'Average CO₂ (70 %) corrected' means the average specific emissions of CO₂ that have been calculated on the basis of the 70 % lowest emitting vehicles in the manufacturer's fleet in accordance with the third paragraph of Article 4 of Regulation (EU) No 510/2011. Where appropriate, the average specific emissions of CO₂ have been adjusted to take into account the corrections notified to the Commission by the manufacturer concerned. The records used for the calculation include those that contain a valid value for mass and CO₂ emissions.

Column E:

'Specific emissions target' means the emissions target calculated on the basis of the average mass of all vehicles attributed to a manufacturer applying the formula set out in Annex I to Regulation (EU) No 510/2011.

Column F:

'Distance to target' means the difference between the average specific emissions of CO₂ specified in column D and the specific emissions target in column E. Where the value in column F is positive, the average specific emissions of CO₂ exceed the specific emissions target.

Column G:

'Distance to target adjusted' means that where the values in this column are different from those in column F, the values in that column have been adjusted to take into account an error margin. The error margin is calculated in accordance with the following formula:

Error = absolute value of [(AC1 – TG1) – (AC2 – TG2)]

AC1 = the average specific emissions of CO₂ including the unidentifiable vehicles (as set out in column D);

TG1 = the specific emissions target including the unidentifiable vehicles (as set out in column E);

AC2 = the average specific emissions of CO₂ excluding the unidentifiable vehicles;

TG2 = the specific emissions target excluding the unidentifiable vehicles.

Column I:

'Average CO₂ (100 %)' means the average specific emissions of CO₂ that have been calculated on the basis of 100 % of the vehicles attributed to the manufacturer. Where appropriate, the average specific emissions of CO₂ have been adjusted to take into account the corrections notified to the Commission by the manufacturer concerned. The records used for the calculation include those that contain a valid value for mass and CO₂ emissions but do not take into account the super-credits referred to in Article 5 of Regulation (EU) No 510/2011.
