

Commission Implementing Decision (EU) 2016/1196 of 20 July 2016 amending the Annexes to Decision 2007/275/EC concerning the lists of animals and products to be subject to controls at border inspection posts under Council Directives 91/496/EEC and 97/78/EC (notified under document C(2016) 4494) (Text with EEA relevance)

COMMISSION IMPLEMENTING DECISION (EU) 2016/1196

of 20 July 2016

amending the Annexes to Decision 2007/275/EC concerning the lists of animals and products to be subject to controls at border inspection posts under Council Directives 91/496/EEC and 97/78/EC

(notified under document C(2016) 4494)

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Directive 91/496/EEC of 15 July 1991 laying down the principles governing the organisation of veterinary checks on animals entering the Community from third countries and amending Directives 89/662/EEC, 90/425/EEC and 90/675/EEC⁽¹⁾, and in particular Article 4(5) thereof,

Having regard to Council Directive 97/78/EC of 18 December 1997 laying down the principles governing the organisation of veterinary checks on products entering the Community from third countries⁽²⁾, and in particular Article 3(5) thereof,

Whereas:

- (1) Commission Decision 2007/275/EC⁽³⁾ provides that the animals and products listed in Annex I thereto are to be subjected to veterinary checks at border inspection posts in accordance with Directives 91/496/EEC and 97/78/EC ('the veterinary checks'). Decision 2007/275/EC also provides for a derogation from such veterinary checks for certain composite products and for the foodstuffs listed in Annex II thereto.
- (2) The list set out in Annex I to Decision 2007/275/EC lists the animals and products in accordance with the Combined Nomenclature ('CN'), as provided for in Council Regulation (EEC) No 2658/87⁽⁴⁾. This list is used by the competent authorities of the Member States as a first step in the selection of consignments that are to be submitted to the veterinary checks.
- (3) Since the date of adoption of Decision 2007/275/EC, the CN codes laid down in Regulation (EEC) No 2658/87 have been updated several times, with the most recent amendments laid down in Commission Implementing Regulation (EU) 2015/1754⁽⁵⁾. As several amendments have been made to the CN codes for products of animal origin, the list set out in Annex I to Decision 2007/275/EC should be updated to take account of those amendments.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Decision (EU) 2016/1196. (See end of Document for details)

- (4) In several CN headings and CN codes listed in Annex I to Decision 2007/275/EC products of animal origin represent only a small part of the goods included in the relevant CN heading or CN code. In such cases, column 3 of the above list refers to the applicable Union veterinary legislation and provides details of the animals and products which are to be subjected to veterinary checks. Taking into account the terminology and references in other Union veterinary legislation, those references in Decision 2007/275/EC should be updated in order to be aligned with current Union veterinary legislation.
- (5) In the interest of consistency of Union legislation, the list set out in Annex I to Decision 2007/275/EC should be updated to take account of amendments made to the CN codes and to Union veterinary legislation. Annex I to Decision 2007/275/EC should therefore be amended accordingly.
- (6) The composite products and foodstuffs listed in Annex II to Decision 2007/275/EC are not to be submitted to veterinary checks. Therefore, they should be clearly identifiable and need to be linked to their CN codes. In addition, certain composite products and foodstuffs should be deleted from the list set out in Annex II to Decision 2007/275/EC. That list should therefore be amended accordingly.
- (7) Decision 2007/275/EC should therefore be amended accordingly.
- (8) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

Article 1 **U.K.**

The Annexes to Decision 2007/275/EC are amended in accordance with the Annex to this Decision.

Article 2 **U.K.**

This Decision shall apply from 1 January 2017.

Article 3 **U.K.**

This Decision is addressed to the Member States.

Done at Brussels, 20 July 2016.

CHAPTER 6

Live trees and other plants; bulbs, roots and the like; cut flowers and ornamental foliage

General remarks

This chapter covers mushroom spawn in a compost of sterilised manure of animal origin.

Extract from the Harmonised System Explanatory Notes

0602 90 10 Mushroom spawn:

Mushroom spawn is the term given to a net of fragile threads (Thallus or Mycelium), often found underground, which lives and grows on the surface of decomposing animal or vegetable matter and develops in the tissues themselves and produces mushrooms.

This subheading also includes a product consisting of mushroom spawn, not fully developed, placed in microscopic amounts on a layer of cereal grains enclosed in a compost of sterilized horse manure (a mixture of straw and horse dung).

General remarks

This chapter covers animals, food of animal origin, composite products and animal by-products originating from third countries and delivered to vessels and aircraft within the European Union under customs transit procedure (T1). A derogation from European Union public health import conditions is applicable for food of animal origin and composite products, which are delivered to vessels in accordance with Article 13(3) of Directive 97/78/EC,

with or without temporary storage in approved free zones, free or customs warehouses.

CN code	Description	Qualification and explanation
(1)	(2)	(3)
ex 9930 24 00	Goods of CN Chapters 1 to 24 delivered to vessels and aircraft.	Food of animal origin including composite products destined for ship supply as provided for in Articles 12 and 13 of Directive 97/78/EC.
ex 9930 99 00	Goods classified elsewhere delivered to vessels and aircraft.	Food of animal origin including composite products destined for ship supply as provided for in Articles 12 and 13 of Directive 97/78/EC.

(2) Annex II is replaced by the following text:

ANNEX II **U.K.**

List of composite products and foodstuffs not subject to veterinary checks as referred to in Article 6(1)(b) of this Decision

This list sets out composite products and foodstuffs according to the goods nomenclature in use in the Union which do not need to be submitted to veterinary checks at a border inspection post.

Notes relating to the table:

Column (1) — CN code

This column indicates the CN code. The CN, established by Regulation (EEC) No 2658/87, is based on the international Harmonised Commodity Description and Coding System (HS) drawn up by the Customs Cooperation Council, now the World Customs Organisation (WCO), adopted by the International Convention, concluded in Brussels on 14 June 1983 and approved on behalf of the European Economic Community by Decision 87/369/EEC ('the HS Convention'). The CN reproduces the headings and subheadings of the HS to six digits, with only the seventh and eighth figures creating further subheadings which are specific to it.

Where a four digit code is used: unless otherwise specified, all composite products and foodstuffs prefixed with or covered by these four digits are not required to be submitted to veterinary checks at a border inspection post.

Where only certain specified products under any four, six or eight digit code contain animal products and no specific subdivision under this code exists in the CN, the code is marked **ex** (for example, **ex 2001 90 65**: veterinary checks not required for the products outlined in Column (2)).

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Decision (EU) 2016/1196. (See end of Document for details)

Column (2) — Explanation

This column gives details of the composite products and foodstuffs covered by the derogation from veterinary checks at border inspection posts. When necessary, official veterinarians at border inspection posts must assess the ingredients of a composite product and foodstuff and specify, if the animal product contained in the composite product and foodstuffs is sufficiently processed so as to not require the veterinary checks provided for in Union legislation.
