Commission Implementing Decision (EU) 2018/1522 of 11 October 2018 laying down a common format for national air pollution control programmes under Directive (EU) 2016/2284 of the European Parliament and of the Council on the reduction of national emissions of certain atmospheric pollutants (Text with EEA relevance)

[^{X1}COMMISSION IMPLEMENTING DECISION (EU) 2018/1522

of 11 October 2018

laying down a common format for national air pollution control programmes under Directive (EU) 2016/2284 of the European Parliament and of the Council on the reduction of national emissions of certain atmospheric pollutants]

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Directive (EU) 2016/2284 of the European Parliament and of the Council of 14 December 2016 on the reduction of national emissions of certain atmospheric pollutants, amending Directive 2003/35/EC and repealing Directive 2001/81/EC⁽¹⁾, and in particular Article 6(10) thereof,

Whereas:

- (1) The national air pollution control programme is the principal governance tool under Directive (EU) 2016/2284 supporting Member States to plan their national policies and measures with a view to complying with the national emission reduction commitments laid down in that Directive for 2020 and 2030, thereby enhancing predictability for stakeholders while also supporting a shift of investments to clean and efficient technologies. It contributes to achieving the air quality objectives pursuant to Article 1(2) of that Directive, as well as to ensuring coherence with plans and programmes set in other relevant policy areas, including climate, energy, agriculture, industry and transport.
- (2) Pursuant to Article 6(5) of Directive (EU) 2016/2284 the public, in accordance with Article 2(2) of Directive 2003/35/EC of the European Parliament and of the Council⁽²⁾, and the competent authorities with responsibilities in the field of air pollution, quality and management are to be consulted on the draft national air pollution control programmes and on any significant updates prior to their finalisation.
- (3) The national air pollution control programmes should also contribute to the successful implementation of air quality plans established under Article 23 of Directive 2008/50/ EC of the European Parliament and of the Council.⁽³⁾ To that effect, Member States should take account of the need to reduce emissions, in particular of nitrogen oxides and fine particulate matter, in zones and agglomerations affected by excessive air pollutant concentrations and/or in those zones and agglomerations that contribute significantly to air pollution in other zones and agglomerations, including in neighbouring countries.

- (4) As pointed out in the Commission's 'Second Report on the State of the Energy Union'⁽⁴⁾, Member States should develop their national energy and climate plans, whenever possible, in parallel with their national air pollution control programmes to ensure synergies and reduce implementation costs, since these plans rely to a large extent on similar measures and actions.
- (5) To increase consistency with the reporting of policies and measures under Union climate and energy policies, the common format for the national air pollution control programme should be aligned where there are commonalities with reporting obligations under Regulation (EU) No 525/2013 of the European Parliament and of the Council⁽⁵⁾ and Commission Implementing Regulation No (EU) 749/2014⁽⁶⁾.
- (6) In order to achieve the ammonia reduction commitments provided for in Directive (EU) 2016/2284 additional national policies and measures should be set out. Therefore national air pollution control programmes should also include proportionate measures applicable to the agricultural sector.
- (7) Laying down a common format for the national air pollution programme should facilitate the examination of the programmes that the Commission should carry out according to the third subparagraph of Article 10(1) of Directive (EU) 2016/2284, and should provide for better comparability of the programmes among Member States.
- (8) Member States may provide, in their national air pollution control programme, beyond the mandatory content, additional relevant information on their envisaged policies and measures aimed at addressing the most harmful pollutants with respect to sensitive human population groups. They may also, in accordance with Article 1(2) of Directive (EU) 2016/2284 provide for measures aimed at further reducing emissions in order to achieve levels of air quality in line with the air quality guidelines published by the World Health Organization and the Union's biodiversity and ecosystem objectives.
- (9) Although, pursuant to Article 4(3) of Directive (EU) 2016/2284, emissions from international maritime traffic or aircraft emissions beyond the landing and take-off cycle are not taken into account for the purpose of complying with the emission reduction commitments, Member States may also outline in their national air pollution control programmes envisaged policies and measures aimed at reducing emissions of those sources.
- (10) Member States discussed and commented on a draft common format in the meetings of the Ambient Air Quality Expert Group on 4 April 2017, on 28 November 2017 and on 9 April 2018⁽⁷⁾.
- (11) The measures provided for in this Decision are in accordance with the opinion of the Ambient Air Quality Committee established by Article 29 of Directive 2008/50/EC,

HAS ADOPTED THIS DECISION:

Editorial Information

X1 Substituted by Corrigendum to Commission Implementing Decision (EU) 2018/1522 of 11 October 2018 laying down a common format for national air pollution control programmes under Directive

(EU) 2016/2284 of the European Parliament and of the Council on the reduction of national emissions of certain atmospheric pollutants (Official Journal of the European Union L 256 of 12 October 2018).

Article 1

Subject matter

The common format for the national air pollution control programme as referred to in Article 6(10) of Directive (EU) 2016/2284 is laid down in the Annex to this Decision.

Article 2

Format

Member States shall use the common format laid down in the Annex when reporting their national air pollution control programme to the Commission in accordance with Article 10(1) of Directive (EU) 2016/2284.

Article 3

Entry into force

This Decision shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

ANNEX

Common format for the national air pollution control programme pursuant to Article 6 of Directive (EU) 2016/2284

1. FIELD DESCRIPTIONS

All fields in this common format that are marked (M) are mandatory and those marked (O) are optional.

2. COMMON FORMAT

2.1. Title of the programme, contact information and websites

2.1.1.

TITLE OF THE PROGRAMME, CONTACT INFORMATION AND WEBSITES (M)

Title of the programme	
Date	
Member State	
Name of competent authority responsible for drawing up the programme	
Telephone number of responsible service	
Email address of responsible service	
Link to website where the programme is published	
Link(s) to website(s) on the consultation(s) on the programme	

2.2. Executive summary (O)

The executive summary can also be a standalone document (ideally of no more than 10 pages). It should be a concise summary of sections 2.3 to 2.8. Where possible, consider the use of graphics to illustrate the executive summary.

2.2.1.

THE NATIONAL AIR QUALITY AND POLLUTION POLICY FRAMEWORK

Policy priorities and their relationship to priorities set in other relevant policy areas	
Responsibilities attributed to national, regional and local authorities	

2.2.2.

PROGRESS MADE SINCE 2005 BY CURRENT POLICIES AND MEASURES IN REDUCING EMISSIONS AND IMPROVING AIR QUALITY

Achieved emission reductions	
Progress against air quality objectives	
Current transboundary impact of domestic emission sources	

2.2.3.

PROJECTED FURTHER EVOLUTION TO 2030 ASSUMING NO CHANGE TO ALREADY ADOPTED POLICIES AND MEASURES (PAMS)

Projected emissions and emission reductions (With Measures (WM) scenario)	
Projected impact on improving air quality (WM scenario)	
Uncertainties	

2.2.4.

POLICY OPTIONS CONSIDERED IN ORDER TO COMPLY WITH THE EMISSION REDUCTION COMMITMENTS FOR 2020 AND 2030, INTERMEDIATE EMISSION LEVELS FOR 2025

Main sets of policy options considered

2.2.5.

SUMMARY OF POLICIES AND MEASURES SELECTED FOR ADOPTION BY SECTOR, INCLUDING A TIMETABLE FOR THEIR ADOPTION, IMPLEMENTATION AND REVIEW AND THE COMPETENT AUTHORITIES RESPONSIBLE

Sector affected	Policies and Measures (PaMs)					
	Selected PaMs	Timetable for implementation of the selected PaMs	Responsible competent authorit(y) (ies) for implementation and enforcement of the selected PaMs (type and name)	Timetable for review of the selected PaMs		
Energy supply						

Energy consumption		
Transport		
Industrial processes		
Agriculture		
Waste management/ waste		
Cross-cutting		
Other (to be specified)		

2.2.6.

COHERENCE

An assessment of how the selected PaMs
ensure coherence with plans and programmes
set up in other relevant policy areas

2.2.7.

PROJECTED COMBINED IMPACTS OF THE POLICIES AND MEASURES ('WITH ADDITIONAL MEASURES' — WAM) ON EMISSION REDUCTIONS, AIR QUALITY IN OWN TERRITORIES AND NEIGHBOURING MEMBER STATES AND THE ENVIRONMENT, AND THE ASSOCIATED UNCERTAINTIES

Projected attainment of emission reduction commitments (WAM)	
Use of flexibilities (where relevant)	
Projected improvement in air quality (WAM)	
Projected impacts on the environment (WAM)	
Methodologies and uncertainties	

2.3. The national air quality and pollution policy framework

2.3.1.

POLICY PRIORITIES AND THEIR RELATIONSHIP TO PRIORITIES SET IN OTHER RELEVANT POLICY AREAS

The	SO ₂	NO _x	NMVOC	NH ₃	PM _{2,5}
national					

emission reduction commitments compared with 2005 base year (in %) (M) 2020-2029			
(M) From 2030 (M)			
The air quality priorities: national policy priorities related to EU or national air quality objectives (incl. limit values and target values, and exposure concentration obligations) (M) <i>Reference</i> <i>can also</i> <i>be made to</i> <i>recommended</i> <i>air quality</i> <i>objectives by</i> <i>the WHO</i> .			
Relevant climate change and energy policy priorities (M)			
Relevant policy priorities in relevant policy areas, incl. agriculture, industry and transport (M)			

2.3.2.

RESPONSIBILITIES ATTRIBUTED TO NATIONAL, REGIONAL AND LOCAL AUTHORITIES

List the relevant authorities(M)	Describe the type of authority (e.g. environmental inspectorate, regional environment agency, municipality) (M)Where appropriate, name of authority (e.g. Ministry of XXX, National Agency for XXX, Regional office for XXX)	Describe the attributed responsibilities in the areas of air quality and air pollution (M)Select from the following as appropriate:Policy making rolesImplementation rolesEnforcement roles (including where relevant inspections and permitting)Reporting and monitoring rolesCoordinating rolesOther roles, please specify:	Source sectors under the responsibility of the authority (O)
National authorities (M)			
Regional authorities (M)

^{2.4.} Progress made by current policies and measures (PaMs) in reducing emissions and improving air quality, and the degree of compliance with national and Union obligations, compared to 2005

2.4.1.

PROGRESS MADE BY CURRENT PAMS IN REDUCING EMISSIONS, AND THE DEGREE OF COMPLIANCE WITH NATIONAL AND UNION EMISSION REDUCTION OBLIGATIONS

Describe progress made by current PaMs in reducing emissions, and the degree of compliance with national and Union emission reduction legislation (M)	
Provide complete references (chapter and page) to publically available supporting datasets (e.g. historic emission inventory reporting) (M)	
Include graphics illustrating the emission reductions per pollutant and/or per main sectors (O)	

2.4.2.

PROGRESS MADE BY CURRENT PAMS IN IMPROVING AIR QUALITY, AND THE DEGREE OF COMPLIANCE WITH NATIONAL AND UNION AIR QUALITY OBLIGATIONS

Describe progress made by current PaMs in improving air quality, and the degree of compliance with national and Union air quality obligations by, as a minimum, specifying the number of air quality zones, out of the total air quality zones, that are (non)compliant with EU air quality objectives for NO ₂ , PM ₁₀ , PM _{2,5} and O ₃ , and any other pollutant(s) for which there are exceedances (M)	
Provide complete references (chapter and page) to publically available supporting datasets (e.g. air quality plans, source apportionment) (M)	
Maps or histograms illustrating the current ambient air concentrations (for at least NO_2 , PM_{10} , $PM_{2,5}$ and O_3 , and any other pollutant(s) that present(s) a problem) and which show, for instance, the number of zones, out of the total air quality zones, that are (non)compliant in the base year and in the reporting year (O)	
Where problems are identified in (an) air quality zone(s), describe how progress	

was made in reducing the maximum concentrations reported (O)

2.4.3.

CURRENT TRANSBOUNDARY IMPACT OF NATIONAL EMISSION SOURCES

Where relevant, describe the current transboundary impact of domestic emission sources (M) <i>Progress can be reported in quantitative or</i> <i>qualitative terms.</i> <i>If no issues were identified, then state that</i> <i>conclusion.</i>	
In case quantitative data is used to describe the results of the assessment, specify data and methodologies used to conduct the above assessment (O)	

2.5. Projected further evolution assuming no change to already adopted policies and measures

2.5.1.

PROJECTED EMISSIONS AND EMISSION REDUCTIONS (WM SCENARIO)

Add more rows as appropriate

The responses to the field indicated with (*), (^) and (†) shall be filled in by using predefined reply options which are consistent with the reporting obligations under Regulation (EU) No 525/2013 on a mechanism for monitoring and reporting greenhouse gas emissions and Implementing Regulation (EU) No 749/2014.

The responses to the field indicated with (*) shall be filled in by using the following predefined reply options, to be selected as appropriate (more than one objective can be selected, additional objectives could be added and specified under 'other') (M):

1. Energy supply:

increase in renewable energy;

— switch to less carbon-intensive fuels;

Document Generated: 2024-06-11

Changes to legislation: There are outstanding changes not yet made to Commission Implementing

Decision (EU) 2018/1522. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

- enhanced non-renewable low carbon generation (nuclear);
- reduction of losses;
- efficiency improvement in the energy and transformation sector;
- installation of abatement technologies;
- other energy supply.
- 2. Energy consumption:
 - efficiency improvements of buildings;
 - efficiency improvement of appliances;
 - efficiency improvement in services/tertiary sector;
 - efficiency improvement in industrial end-use sectors;
 - demand management/reduction;
 - other energy consumption.
- 3. Transport:
 - deployment of pollution abatement technologies on vehicles, vessels and aircraft;
 - efficiency improvements of vehicles, vessels and aircraft;
 - modal shift to public transport or non-motorised transport;
 - alternative fuels for vehicles, vessels and aircraft (including electric);
 - demand management/reduction;
 - improved behaviour;
 - improved transport infrastructure;
 - other transport.
- 4. Industrial processes:
 - installation of abatement technologies;
 - improved control of fugitive emissions from industrial processes;
 - other industrial processes.
- 5. Waste management/waste:
 - demand management/reduction;
 - enhanced recycling;
 - improved treatment technologies;
 - improved landfill management;
 - waste incineration with energy use;
 - improved wastewater management systems;
 - reduced landfilling;
 - other waste.
- 6. Agriculture:
 - low-emission application of fertilizer/manure on cropland and grassland;
 - other activities improving cropland management;
 - improved livestock management and rearing installations;
 - improved animal waste management systems;
 - other agriculture.
- 7. Cross-cutting:
 - framework policy;
 - multi-sectoral policy;
 - other cross-cutting.
- 8. Other:
- Member States must provide a brief description of the objective.

The responses to the field indicated with (^) shall be filled in by using the following predefined reply options, to be selected as appropriate (more than one type of PaMs can be selected, additional types of PaMs could be added and specified under 'other') (M):

- Source-based pollution control;
- Economic instruments;

	exemptions to such a ban shall be limited to preventive programmes to avoid uncontrolled wildfires, to control pest or to protect biodiversity.		
2.	Member States may establish a national advisory code of good agricultural practices for the proper management of harvest residue, on the basis of the following		
(a)	approaches: improvement of soil structure through incorporation of harvest residue;		
(b)	improved techniques for incorporation of harvest residue;		
(c)	alternative use of harvest residue;		
(d)	improvement of the		

content and are refer	renced with annotations. (See en	a of Document for details) View	outstanaing changes

C. Preventing impacts	on small farms (M)	I	1
In taking the			
measures outlined			
in Sections A and			
B, Member States			
shall ensure that			
impacts on small and			
micro farms are fully			
taken into account.			
Member States			
may, for instance,			
exempt small and			
micro farms from			
those measures			
where possible			
and appropriate			
in view of the			
applicable reduction			
commitments (M)			
a Regulation (EU) No 1306	2013 of the European Parliame	nt and of the Council of 17 Dece	mber 2013 on the financing,

Changes to legislation: There are outstanding changes not yet made to Commission Implementing Decision (EU) 2018/1522. Any changes that have already been made to the legislation appear in the

Regulation (EU) No 1306/2013 of the European Parliament and of the Council of 17 December 2013 on the financing, management and monitoring of the common agricultural policy and repealing Council Regulations (EEC) No 352/78, (EC) No 165/94, (EC) No 2799/98, (EC) No 814/2000, (EC) No 1290/2005 and (EC) No 485/2008 (OJ L 347, 20.12.2013, p. 549).

2.7. The policies selected for adoption by sector, including a timetable for their adoption, implementation and review and the competent authorities responsible

2.7.1.

INDIVIDUAL PAMS OR PACKAGE OF PAMS SELECTED FOR ADOPTION AND THE COMPETENT AUTHORITIES RESPONSIBLE

Name and brief descripti of individu PaM or	planned year ionf adoption al(M)	commen arising from consulta in relation to the	t Currently tsplanned timetable for implementation ti(M(\$)		Interim targets and indicators selected to monitor progress in implementation of the selected PaMs (O)		review ind (in Pan case or	authorities e responsible for the individual PaM or package
