

[^{F1}ANNEX I**CONDITIONS TO BE SATISFIED BY THE CROP****Textual Amendments**

- F1** Substituted by Commission Directive 2009/74/EC of 26 June 2009 amending Council Directives 66/401/EEC, 66/402/EEC, 2002/55/EC and 2002/57/EC as regards the botanical names of plants, the scientific names of other organisms and certain Annexes to Directives 66/401/EEC, 66/402/EEC and 2002/57/EC in the light of developments of scientific and technical knowledge (Text with EEA relevance).

3. The crop shall have sufficient varietal identity and varietal purity or, in the case of a crop of an inbred line, sufficient identity and purity as regards its characteristics. For the production of seed of hybrid varieties, the abovementioned provisions shall also apply to the characteristics of the components, including male sterility or fertility restoration

In particular, crops of *Oryza sativa*, *Phalaris canariensis*, *Secale cereale* other than hybrids, *Sorghum* spp. and *Zea mays* shall conform to the following other standards or conditions:

A. [^{F2}*Oryza sativa*:

The number of plants which are recognisable as obviously being wild or red-grain plants shall not exceed:

- 0 for the production of basic seed,
- 1 per 100 m² for the production of certified seed, first and second generation.]

B. *Phalaris canariensis*, *Secale cereale* other than hybrids:

The number of plant of the crop species, which are recognisable as obviously not being true to the variety shall not exceed:

- one per 30 m² for the production of basic seed,
- one per 10 m² for the production of certified seed,

C. *Sorghum* spp.

- (a) The percentage by number of plants of a *Sorghum* species other than the crop species or plants which are recognisable as obviously not being true to the inbred line or to the component shall not exceed:

(aa) for the production of basic seed

- (i) at flowering: 0,1 %;
- (ii) at maturity: 0,1 %;

(bb) for the production of certified seed

- (i) plants of the male component which have shed pollen when the plants of the female component have receptive stigmas: 0,1 %;
- (ii) plants of the female component
 - at flowering: 0,3 %;
 - at maturity: 0,1 %;

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- (b) The following other standards or conditions shall be satisfied for the production of certified seed of hybrid varieties:
 - (aa) sufficient pollen shall be shed by the plants of the male component while the plants of the female component have receptive stigmas;
 - (bb) where plants of the female component have receptive stigmas, the percentage of plants of that component which have shed pollen or are shedding pollen shall not exceed 0,1 %;
- (c) Crops of open pollinated varieties or synthetic varieties of *Sorghum* spp. shall conform to the following standards: the number of plants of the crop species, which are recognisable as obviously not being true to the variety shall not exceed:
 - one per 30 m² for the production of basic seed,
 - one per 10 m² for the production of certified seed,

D. ***Zea mays*:**

- (a) The percentage by number of plants which are recognisable as obviously not being true to the variety, to the inbred line, or to the component shall not exceed:
 - (aa) for the production of basic seed:
 - (i) inbred lines, 0,1 %;
 - (ii) simple hybrid, each component, 0,1 %;
 - (iii) open-pollinated varieties, 0,5 %;
 - (bb) for the production of certified seed:
 - (i) hybrid varieties component:
 - inbred lines, 0,2 %;
 - simple hybrid, 0,2 %;
 - open-pollinated variety, 1,0 %;
 - (ii) open-pollinated varieties, 1,0 %;
- (b) The following other standards or conditions shall be satisfied for the production of seed of hybrid varieties:
 - (aa) a sufficient pollen shall be shed by the plants of the male component while the plants of the female component are in flower;
 - (bb) where appropriate, emasculation shall be carried out;
 - (cc) where 5 % or more of the female component plants have receptive stigmas, the percentage of female component which have shed pollen or are shedding pollen shall not exceed:
 - 1 % at any official field inspection, and,
 - 2 % at the total of the official field inspections,

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

.....

Textual Amendments

- F2** Substituted by [Commission Implementing Directive \(EU\) 2020/177](#) of 11 February 2020 amending [Council Directives 66/401/EEC](#), [66/402/EEC](#), [68/193/EEC](#), [2002/55/EC](#), [2002/56/EC](#) and [2002/57/EC](#), [Commission Directives 93/49/EEC](#) and [93/61/EEC](#) and [Implementing Directives 2014/21/EU](#) and [2014/98/EU](#) as regards pests of plants on seeds and other plant reproductive material (Text with EEA relevance).

Plants are considered as having shed pollen or shedding pollen where, on 50 mm or more of the central axis or laterals of a panicle, the anthers have emerged from their glumes and have shed or are shedding pollen.]
