# [<sup>F1</sup>ANNEX I

## CONDITIONS TO BE SATISFIED BY THE CROP

**Textual Amendments**

**F1** Substituted by Commission Directive 2009/74/EC of 26 June 2009 amending Council Directives 66/401/EEC, 66/402/EEC, 2002/55/EC and 2002/57/EC as regards the botanical names of plants, the scientific names of other organisms and certain Annexes to Directives 66/401/EEC, 66/402/EEC and 2002/57/EC in the light of developments of scientific and technical knowledge (Text with EEA relevance).

[<sup>F2</sup>5a.

Crops to produce basic and certified seed of hybrids of *Hordeum vulgare* by means of the technique of CMS:

(a) The crop shall conform to the following standards as regards distances from neighbouring sources of pollen which may result in undesirable foreign pollination:

| Crop | Minimum distance |
|---|---|
| For the production of basic seed | 100 m |
| For the production of certified seed | 50 m |

(b) The crop shall have sufficient varietal identity and purity as regards the characteristics of the components.

In particular the crop shall conform to the following standards:

(i) The percentage by number of plants which are obviously not being true to type shall not exceed:
— for the crops used to produce basic seed, 0,1 % for the maintainer and the restorer line and 0,2 % for the CMS female component,
— for the crops used to produce certified seed, 0,3 % for the restorer and the CMS female component and 0,5 % in case the CMS female component is a single hybrid.

(ii) The level of male sterility of the female component shall be at least:
— 99,7 % for crops used to produce basic seed,
— 99,5 % for crops used to produce certified seed.

(iii) The requirements of points (i) and (ii) shall be examined in official post-control test.

(c) Certified seed may be produced in mixed cultivation of a female male-sterile component with a male component which restores fertility.]]
