

[^{F1}ANNEX I**CONDITIONS TO BE SATISFIED BY THE CROP****Textual Amendments**

- F1** Substituted by Commission Directive 2009/74/EC of 26 June 2009 amending Council Directives 66/401/EEC, 66/402/EEC, 2002/55/EC and 2002/57/EC as regards the botanical names of plants, the scientific names of other organisms and certain Annexes to Directives 66/401/EEC, 66/402/EEC and 2002/57/EC in the light of developments of scientific and technical knowledge (Text with EEA relevance).

- The previous cropping of the field shall not have been incompatible with the production of seeds of the species and variety of the crop, and the field shall be sufficiently free from such plants which are volunteers from previous cropping.
- The crop shall conform to the following standards as regards distances from neighbouring sources of pollen which may result in undesirable foreign pollination and in particular, in the case of *Sorghum* spp., from sources of *Sorghum halepense*:

Crop	Minimum distance
<i>Phalaris canariensis</i>, <i>Secale cereale</i> other than hybrids:	
— for the production of basic seed,	300 m
— for the production of certified seed,	250 m
<i>Sorghum</i> spp.	300 m
<i>xTriticosecale</i>, self-pollinating varieties	
— for the production of basic seed,	50 m
— for the production of certified seed,	20 m
<i>Zea mays</i>	200 m

These distances can be disregarded if there is sufficient protection from any undesirable foreign pollination.

- The crop shall have sufficient varietal identity and varietal purity or, in the case of a crop of an inbred line, sufficient identity and purity as regards its characteristics. For the production of seed of hybrid varieties, the abovementioned provisions shall also apply to the characteristics of the components, including male sterility or fertility restoration

In particular, crops of *Oryza sativa*, *Phalaris canariensis*, *Secale cereale* other than hybrids, *Sorghum* spp. and *Zea mays* shall conform to the following other standards or conditions:

A. [^{F2}*Oryza sativa*:

The number of plants which are recognisable as obviously being infected by *Fusarium fujikuroi* shall not exceed:

- 2 per 200 m² for the production of basic seed,

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- 4 per 200 m² for the production of certified seed, first generation,
- 8 per 200m² for the production of certified seed, second generation.

The number of plants which are recognisable as obviously being wild or red-grain plants shall not exceed:

- 0 for the production of basic seed,
- 1 per 100 m² for the production of certified seed, first and second generation,]

B. *Phalaris canariensis*, *Secale cereale* other than hybrids:

The number of plant of the crop species, which are recognisable as obviously not being true to the variety shall not exceed:

- one per 30 m² for the production of basic seed,
- one per 10 m² for the production of certified seed,

C. *Sorghum* spp.

(a) The percentage by number of plants of a *Sorghum* species other than the crop species or plants which are recognisable as obviously not being true to the inbred line or to the component shall not exceed:

- (aa) for the production of basic seed
 - (i) at flowering: 0,1 %;
 - (ii) at maturity: 0,1 %;
- (bb) for the production of certified seed
 - (i) plants of the male component which have shed pollen when the plants of the female component have receptive stigmas: 0,1 %;
 - (ii) plants of the female component
 - at flowering: 0,3 %;
 - at maturity: 0,1 %;

(b) The following other standards or conditions shall be satisfied for the production of certified seed of hybrid varieties:

- (aa) sufficient pollen shall be shed by the plants of the male component while the plants of the female component have receptive stigmas;
- (bb) where plants of the female component have receptive stigmas, the percentage of plants of that component which have shed pollen or are shedding pollen shall not exceed 0,1 %;

(c) Crops of open pollinated varieties or synthetic varieties of *Sorghum* spp. shall conform to the following standards: the number of plants of the crop species, which are recognisable as obviously not being true to the variety shall not exceed:

- one per 30 m² for the production of basic seed,
- one per 10 m² for the production of certified seed,

D. *Zea mays*:

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- (a) The percentage by number of plants which are recognisable as obviously not being true to the variety, to the inbred line, or to the component shall not exceed:
- (aa) for the production of basic seed:
- (i) inbred lines, 0,1 %;
- (ii) simple hybrid, each component, 0,1 %;
- (iii) open-pollinated varieties, 0,5 %;
- (bb) for the production of certified seed:
- (i) hybrid varieties component:
- inbred lines, 0,2 %;
- simple hybrid, 0,2 %;
- open-pollinated variety, 1,0 %;
- (ii) open-pollinated varieties, 1,0 %;
- (b) The following other standards or conditions shall be satisfied for the production of seed of hybrid varieties:
- (aa) a sufficient pollen shall be shed by the plants of the male component while the plants of the female component are in flower;
- (bb) where appropriate, emasculation shall be carried out;
- (cc) where 5 % or more of the female component plants have receptive stigmas, the percentage of female component which have shed pollen or are shedding pollen shall not exceed:
- 1 % at any official field inspection, and,
- 2 % at the total of the official field inspections,

Textual Amendments

- F2** Substituted by [Commission Implementing Directive 2012/1/EU of 6 January 2012 amending Annex I to Council Directive 66/402/EEC as regards the conditions to be satisfied by the crop *Oryza sativa* \(Text with EEA relevance\)](#).

Plants are considered as having shed pollen or shedding pollen where, on 50 mm or more of the central axis or laterals of a panicle, the anthers have emerged from their glumes and have shed or are shedding pollen.

4. Hybrids of *Secale cereale*

- (a) The crop shall conform to the following standards as regards distances from neighbouring sources of pollen which may result in undesirable foreign pollination.

Crop	Minimum distance
— for the production of basic seed,	
— where male sterility is used,	1 000 m

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

—	where male sterility is not used,	600 m
—	for the production of certified seed,	500 m

- (b) The crop shall have sufficient identity and purity as regards the characteristics of the components, including male sterility.

In particular, the crop shall conform to the following other standards or conditions:

- (i) the number of plants of the crop species, which are recognisable as obviously not being true to the component shall not exceed,
- one per 30 m² for the production of basic seed,
 - one per 10 m² for the production of certified seed, this standard to apply in official field inspections to the female component only;
- (ii) in the case of basic seed, where male sterility is used, the level of sterility of the male-sterile component shall be at least 98 %.
- (c) Where appropriate, certified seed shall be produced in mixed cultivation of a female male-sterile component with a male component which restores male fertility.
5. [^{F3}Crops to produce certified seed of hybrids of *Avena nuda*, *Avena sativa*, *Avena strigosa*, *Oryza sativa*, *Triticum aestivum*, *Triticum durum*, *Triticum spelta* and self-pollinating *xTriticosecale* and crops to produce certified seed of hybrids of *Hordeum vulgare* by means of a technique other than Cytoplasmic Male Sterility (CMS)]

Textual Amendments

F3 Substituted by [Commission Implementing Directive \(EU\) 2015/1955 of 29 October 2015 amending Annexes I and II to Council Directive 66/402/EEC on the marketing of cereal seed \(Text with EEA relevance\).](#)

- (a) The crop shall conform to the following standards as regards distances from neighbouring sources of pollen which may result in undesirable foreign pollination:
- the minimum distance of the female component shall be 25 m from any other variety of the same species except from a crop of the male component,
 - this distance can be disregarded if there is sufficient protection from any undesirable foreign pollination;
- (b) The crop shall have sufficient identity and purity as regards the characteristics of the components.

Where seed is produced by use of a chemical hybridisation agent, the crop shall conform to the following other standards or conditions:

- (i) the minimum varietal purity of each component shall be:
- *Avena nuda*, *Avena sativa*, *Avena strigosa*, *Hordeum vulgare*, *Oryza sativa*, *Triticum aestivum*, *Triticum durum* and *Triticum spelta*: 99,7 %,
 - self-pollinating *xTriticosecale*: 99,0 %;
- (ii) the minimum hybridity must be 95 %. The percentage hybridity shall be assessed in accordance with current international methods, in so far as such methods exist. In

cases where the hybridity is determined during seed testing prior to certification, the determination of the hybridity during field inspection need not be done.

[^{F4}5a. Crops to produce basic and certified seed of hybrids of *Hordeum vulgare* by means of the technique of CMS:

(a) The crop shall conform to the following standards as regards distances from neighbouring sources of pollen which may result in undesirable foreign pollination:

Crop	Minimum distance
For the production of basic seed	100 m
For the production of certified seed	50 m

(b) The crop shall have sufficient varietal identity and purity as regards the characteristics of the components.

In particular the crop shall conform to the following standards:

(i) The percentage by number of plants which are obviously not being true to type shall not exceed:

- for the crops used to produce basic seed, 0,1 % for the maintainer and the restorer line and 0,2 % for the CMS female component,
- for the crops used to produce certified seed, 0,3 % for the restorer and the CMS female component and 0,5 % in case the CMS female component is a single hybrid.

(ii) The level of male sterility of the female component shall be at least:

- 99,7 % for crops used to produce basic seed,
- 99,5 % for crops used to produce certified seed.

(iii) The requirements of points (i) and (ii) shall be examined in official post-control test.

(c) Certified seed may be produced in mixed cultivation of a female male-sterile component with a male component which restores fertility.]

Textual Amendments

F4 Inserted by [Commission Implementing Directive \(EU\) 2015/1955 of 29 October 2015 amending Annexes I and II to Council Directive 66/402/EEC on the marketing of cereal seed \(Text with EEA relevance\)](#).

6. Harmful organisms which reduce the usefulness of the seed, in particular *Ustilaginaceae*, shall be at the lowest possible level.

7. The satisfaction of the abovementioned other standards or conditions shall, in the case of basic seed, be examined in official field inspections and, in the case of certified seed, be examined either in official field inspections or in inspections carried out under official supervision.

These field inspections shall be carried out in accordance with the following conditions:

A. The condition and the stage of development of the crop shall permit an adequate examination.

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- B. The number of field inspections shall be at least:
- (a) for *Avena nuda*, *Avena sativa*, *Avena strigosa*, *Hordeum vulgare*, *Oryza sativa*, *Phalaris canariensis*, *xTriticosecale*, *Triticum aestivum*, *Triticum durum*, *Triticum spelta*, *Secale cereale*: one;
 - (b) for *Sorghum* spp. and *Zea mays* during the flowering season:
 - (aa) open-pollinated varieties: one,
 - (bb) inbred lines or hybrids: three.

When the crop follows a *Sorghum* spp. and *Zea mays* crop in either the preceding year or current year, at least one special field inspection shall be made to check the satisfaction of the provisions laid down in point 1 of this Annex.
- C. The size, the number and the distribution of the portions of the field to be inspected in order to examine the satisfaction of the provisions of this Annex shall be determined in accordance with appropriate methods.

ANNEX II

CONDITIONS TO BE SATISFIED BY THE SEED

1. The seed shall have sufficient varietal identity and varietal purity or, in the case of seed of an inbred line, sufficient identity and purity as regards its characteristics. For the seed of hybrid varieties, the abovementioned provisions shall also apply to the characteristics of the components.

In particular, the seed of the species listed below shall conform to the following other standards or conditions:

- A. *Avena nuda*, *Avena sativa*, *Avena strigosa*, *Hordeum vulgare*, *Oryza sativa*, *Triticum aestivum*, *Triticum durum*, *Triticum spelta* other than hybrids in each case:

Category	Minimum varietal purity(%)
Basic seed	99,9
Certified seed, 1st generation	99,7
Certified seed, 2nd generation	99,0

The minimum varietal purity shall be examined mainly in field inspections carried out in accordance with the conditions laid down in Annex I.

- B. **Self-pollinating varieties of *xTriticosecale* other than hybrids**

Category	Minimum varietal purity(%)
Basic seed	99,7
Certified seed, 1st generation	99,0
Certified seed, 2nd generation	98,0

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

<i>Avena sativa, Avena strigosa, Hordeum vulgare, Triticum aestivum, Triticum durum, Triticum spelta:</i>									
—	85 basic seed,	99	4		1 (b)	3	0 (c)	1	
—	85 (d) certified seed, 1st and 2nd generation,	98	10		7	7	0 (c)	3	
<i>Avena nuda:</i>									
—	75 basic seed,	99	4		1 (b)	3	0 (c)	1	
—	75 (d) certified seed, 1st and 2nd generation,	98	10		7	7	0 (c)	3	
<i>Oryza sativa:</i>									
—	80 basic seed,	98	4	1					1
—	80 certified seed, 1st generation,	98	10	3					3
—	80 certified seed, 2nd generation,	98	15	5					3

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

<i>Secale cereale:</i>									
—	85 basic seed,	98	4		1 (b)	3	0 (c)	1	
—	85 certified seed,	98	10		7	7	0 (c)	3	
<i>Phalaris canariensis:</i>									
—	75 basic seed,	98	4		1 (b)		0 (c)		
—	75 certified seed,	98	10		5		0 (c)		
<i>Sorghum</i> spp.	80	98	0						
<i>xTriticosecale:</i>									
—	80 basic seed,	98	4		1 (b)	3	0 (c)	1	
—	80 certified seed, 1st and 2nd generation,	98	10		7	7	0 (c)	3	
<i>Zea mays</i>	90	98	0						

B. Other standards or conditions applicable where reference is made to them in the table under Section 2 (A) of this Annex:

- (a) the maximum contents of seeds laid down in column 4 include also the seeds of the species in columns 5 to 10;
- (b) a second seed shall not be regarded as an impurity if a second sample of same weight is free from any seeds of other cereals species;
- (c) the presence of one seed of *Avena fatua*, *Avena sterilis* or *Lolium temulentum* in a sample of the prescribed weight shall not be regarded as an impurity where a second sample of the same weight is free from any seeds of these species;
- (d) in the case of varieties of *Hordeum vulgare* (naked barley) the required minimum germination capacity is reduced to 75 % of pure seed. The official label shall include the words 'Minimum germination capacity 75 %'.

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

3. Harmful organisms which reduce the usefulness of the seed shall be at the lowest possible level.

In particular, the seed shall conform to the following standards in respect of *Claviceps purpurea* (maximum number of sclerotia or fragments of sclerotia in a sample of the weight specified in column 3 of Annex III).

Category	<i>Claviceps purpurea</i>
Cereals other than hybrids of <i>Secale cereale</i> :	
— basic seed,	1
— certified seed,	3
Hybrids of <i>Secale cereale</i> :	
— basic seed,	1
— certified seed,	4 ^a

a The presence of five sclerotia or fragments of sclerotia in a sample of the prescribed weight shall be deemed to be in conformity with the standards, where a second sample of the same weight contains not more than four sclerotia or fragments of sclerotia.

ANNEX III

LOT AND SAMPLE WEIGHTS

Species	Maximum weight of a lot (tonnes)	Minimum weight of a sample to be drawn from a lot (grams)	Weight of the sample for determinations by number provided for in columns 4 to 10 of Annex II (2) (A) and Annex II (3) (grams)
1	2	3	4
<i>Avena nuda</i> , <i>Avena sativa</i> , <i>Avena strigosa</i> , <i>Hordeum vulgare</i> , <i>Triticum aestivum</i> , <i>Triticum durum</i> , <i>Triticum spelta</i> , <i>Secale cereale</i> , <i>xTriticosecale</i>	30	1 000	500
<i>Phalaris canariensis</i>	10	400	200
<i>Oryza sativa</i>	30	500	500

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

^{F5} <i>Sorghum bicolor</i> (L.) Moench	30	900	900
<i>Sorghum sudanense</i> (Piper) Stapf	10	250	250]
^{F6} Hybrids of <i>Sorghum bicolor</i> (L.) Moench x <i>Sorghum sudanense</i> (Piper) Stapf	30	300	300]
<i>Zea mays</i> , basic seed of inbred lines	40	250	250
<i>Zea mays</i> , basic seed other than of inbred lines; certified seed	40	1 000	1 000

Textual Amendments

- F5** Substituted by Commission Implementing Directive 2012/37/EU of 22 November 2012 amending certain Annexes of Council Directives 66/401/EEC and 66/402/EEC as regards the conditions to be satisfied by the seed of *Galega orientalis* Lam., the maximum weight of a seed lot of certain fodder plant species and the sample size of *Sorghum* spp. (Text with EEA relevance).
- F6** Inserted by Commission Implementing Directive 2012/37/EU of 22 November 2012 amending certain Annexes of Council Directives 66/401/EEC and 66/402/EEC as regards the conditions to be satisfied by the seed of *Galega orientalis* Lam., the maximum weight of a seed lot of certain fodder plant species and the sample size of *Sorghum* spp. (Text with EEA relevance).

The maximum lot weight shall not be exceeded by more than 5 %.]

ANNEX IV

Label

A. Required information

- (a) For basic seed and certified seed:
1. ^{F7}[^{F8}EC] rules and standards.
 2. Certification authority and Member State or their initials.]
 3. Reference number of lot.
 - 3a. ^{F9}Month and year of sealing expressed thus: ‘sealed ...’ (month and year),
or
month and year of the last official sampling for the purposes of certification expressed thus: ‘sampled ...’ (month and year).]

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

4. Species, [^{F10}indicated at least under its botanical name, which may be given in abridged form and without the authorities' names, in roman characters].
5. [^{F10}Variety, indicated at least in roman characters].
6. Category.
7. Country of production.
8. [^{F11}Declared net or gross weight or declared number of [^{X1}seeds].]
- 8a. [^{F12}Where weight is indicated and granulated pesticides, pelleting substances, or other solid additives are used the nature of the additive and also the approximate ratio between the weight of pure seeds and the total weight.]
9. [^{F10}In the case of varieties which are hybrids or inbred lines:
 - for basic seed where the hybrid or inbred line to which the seed belongs has been officially accepted under Directive 70/457/EEC:

the name of this component, under which it has been officially accepted, with or without reference to the final variety, accompanied, in the case of hybrids or inbred lines which are intended solely as components for final varieties, by the word 'component';
 - for basic seed in other cases:

the name of the component to which the basic seed belongs, which may be given in code form, accompanied by a reference to the final variety, with or without reference to its function (male or female), and accompanied by the word 'component';
 - for certified seed:

the name of the variety to which the seed belongs, accompanied by the word 'hybrid'.]
10. [^{F13}Where at least germination has been retested, the words 'retested ... (month and year)' and the service responsible for such retesting may be indicated. Such information may be given on an official sticker attached to the official label.]

[^{F10}In accordance with the procedure laid down in Article 21, Member States may be released from the requirement to indicate the botanical name in respect of individual species and, where appropriate, for limited periods where it has been established that the disadvantages of its implementation outweigh the advantages expected for the marketing of seed.]

- (b) [^{X2}For seed mixtures:]
1. ' [^{X2}Mixture ...' (species) [^{F10}or varieties].]
 2. Authority responsible for sealing and Member State.
 3. Reference number of lot.
 - 3a. [^{F9}Month and year of sealing expressed thus: 'sealed ...' (year and month).]

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

4. Species, category, variety, country of production and proportion by weight of each of the components; [^{F10}the names of the species and of the varieties shall be indicted at least in roman characters].
5. [^{F11}Declared net or gross weight or declared number of [^{X1}seeds].]
6. [^{F12}Where weight is indicated and granulated pesticides, pelleting substances, or other solid additives are used the nature of the additive and also the approximate ratio between the weight of pure seeds and the total weight.]
7. [^{F13}Where at least germination of all the components of the mixture has been retested, the words ‘retested ... (month and year)’ and the service responsible for such retesting may be indicated. Such information may be given on an official sticker attached to the official label.]
8. [^{F14}‘Marketing permitted exclusively in ...’ (Member State concerned).]

Editorial Information

- X1** Substituted by Council Directive No 72/418/EEC of 6 December 1972 amending the Directives of 14 June 1966 on the marketing of beet seed, of fodder-plant seed, of cereal seed, of seed potatoes, the Directive of 30 June 1969 on the marketing of seed of oil and fibre plants, and the Directives of 29 September 1970 on the marketing of vegetable seed and on the Common Catalogue of Varieties of Agricultural Plant Species (Official Journal of the European Communities, No L 287, p. 22).
- X2** Substituted by Directive No 66/402/EEC of 14 June 1966 on the marketing of cereal seed (Official Journal of the European Communities, No 125, p. 2309/66).

Textual Amendments

- F7** Inserted by Council Directive of 18 February 1969 amending the Council Directive of 14 June 1966 on the marketing of cereal seed (69/60/EEC).
- F8** Substituted by Council Directive 96/72/EC of 18 November 1996 amending Directives 66/400/EEC, 66/401/EEC, 66/402/EEC, 66/403/EEC, 69/208/EEC and 70/458/EEC on the marketing of beet seed, fodder plant seed, cereal seed, seed potatoes, seed of oil and fibre plants and vegetable seed.
- F9** Inserted by Council Directive of 25 July 1978 amending Directives 66/400/EEC, 66/401/EEC, 66/402/EEC, 66/403/EEC, 68/193/EEC, 69/208/EEC and 70/458/EEC on the marketing of beet seed, fodder plant seed, cereal seed, seed potatoes, material for the vegetative propagation of the vine, seed of oil and fibre plants and vegetable seed (78/692/EEC).
- F10** Inserted by Council Directive of 13 June 1988 amending Directives 66/400/EEC, 66/401/EEC, 66/402/EEC, 66/403/EEC, 69/208/EEC, 70/457/EEC and 70/458/EEC on the marketing of beet seed, fodder plant seed, cereal seed, seed potatoes, seed of oil and fibre plants and vegetable seed and on the common catalogue of varieties of agricultural plant species (88/380/EEC).
- F11** Inserted by Council Directive of 6 December 1972 amending the Directives of 14 June 1966 on the marketing of beet seed, of fodder-crop plant, of cereal seed, of seed potatoes, the Directive of 30 June 1969 on the marketing of seed of oil and fibre plants, and the Directives of 29 September 1970 on the marketing of vegetable seed and on the Common Catalogue of Varieties of Agricultural Plant Species (72/418/EEC).
- F12** Inserted by Council Directive of 26 June 1975 amending Directives No 66/400/EEC, No 66/401/EEC, No 66/402/EEC, No 66/403/EEC and No 69/208/EEC on the marketing of beet seed, fodder plant seed, cereal seed, seed potatoes, and seed of oil and fibre plants (75/444/EEC).
- F13** Inserted by Council Directive of 19 December 1977 amending Directives 66/400/EEC, 66/401/EEC, 66/402/EEC, 68/193/EEC, 69/208/EEC, 70/458/EEC and 70/457/EEC on the marketing of beet seed,

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

fodder plant seed, cereal seed, material for the vegetative propagation of the vine, seed of oil and fibre plants, vegetable seed and on the common catalogue of varieties of agricultural plant species (78/55/EEC).

F14 Inserted by Council Directive of 24 July 1979 amending Directives 66/401/EEC, 66/402/EEC, 70/458/EEC and 70/457/EEC on the marketing of fodder plant seed, cereal seed and vegetable seed and on the common catalogue of varieties of agricultural plant species (79/692/EEC).

B. *Minimum dimensions*

110 mm × 67 mm.

[^{F10}ANNEX V

Label and document provided in the case of seed not finally certified, harvested in another Member State

A. Information required for the label

- authority responsible for field inspection and Member State or their initials,
- species, indicated at least under its botanical name, which may be given in abridged form and without the authorities' names, in roman characters,
- variety, indicated at least in roman characters; in the case of varieties (inbred lines, hybrids), which are intended solely as components for hybrid varieties, the word 'component' shall be added,
- category,
- in the case of hybrid varieties the word 'hybrid',
- declared net or gross weight,
- the words 'seed not finally certified'.

In accordance with the procedure laid down in Article 21, Member States may be released from the requirement to indicate the botanical name in respect of individual species and, where appropriate, for limited periods where it has been established that the disadvantages of its implementation outweigh the advantages expected for the marketing of seed.

B. Colour of the label

The label shall be grey.

C. Information required for the document

- authority issuing the document,
- species, indicated at least under its botanical name, which may be given in abridged form and without the authorities' names, in roman characters,
- variety, indicated at least in roman characters,
- category,
- reference number of the seed used to sow the field and name of the country or countries which certified that seed,
- field or lot reference number,
- area cultivated for the production of the lot covered by the document,
- quantity of seed harvested and number of packages,
- number of generations after basic seed, in the case of certified seed,

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- attestation that the conditions to be satisfied by the crop from which the seed comes have been fulfilled,
- where appropriate, results of a preliminary seed analysis.]
