

ANNEX V

BIOCIDAL PRODUCT-TYPES AND THEIR DESCRIPTIONS
AS REFERRED TO IN ARTICLE 2(1)(a) OF THIS DIRECTIVE

These product-types exclude products where they are covered by the Directives mentioned in Article 1(2) of this Directive for the purposes of these Directives and their subsequent modifications.

MAIN Disinfectants and general biocidal products
GROUP

1:

These product types exclude cleaning products that are not intended to have a biocidal effect, including washing liquids, powders and similar products.

Product- Human hygiene biocidal products*type 1:*

Products in this group are biocidal products used for human hygiene purposes.

Product- Private area and public health area disinfectants and other biocidal products*type 2:*

Products used for the disinfection of air, surfaces, materials, equipment and furniture which are not used for direct food or feed contact in private, public and industrial areas, including hospitals, as well as products used as algacides.

Usage areas include, *inter alia*, swimming pools, aquariums, bathing and other waters; air-conditioning systems; walls and floors in health and other institutions; chemical toilets, waste water, hospital waste, soil or other substrates (in playgrounds).

Product- Veterinary hygiene biocidal products*type 3:*

Products in this group are biocidal products used for veterinary hygiene purposes including products used in areas in which animals are housed, kept or transported.

Product- Food and feed area disinfectants*type 4:*

Products used for the disinfection of equipment, containers, consumption utensils, surfaces or pipework associated with the production, transport, storage or consumption of food, feed or drink (including drinking water) for humans and animals.

Product- Drinking water disinfectants*type 5:*

Products used for the disinfection of drinking water (for both humans and animals).

MAIN Preservatives

GROUP

2:

Product- In-can preservatives*type 6:*

Products used for the preservation of manufactured products, other than foodstuffs or feedingstuffs, in containers by the control of microbial deterioration to ensure their shelf life.

*Product- Film preservatives
type 7:*

Products used for the preservation of films or coatings by the control of microbial deterioration in order to protect the initial properties of the surface of materials or objects such as paints, plastics, sealants, wall adhesives, binders, papers, art works.

*Product- Wood preservatives
type 8:*

Products used for the preservation of wood, from and including the saw-mill stage, or wood products by the control of wood-destroying or wood-disfiguring organisms.

This product type includes both preventive and curative products.

*Product- Fibre, leather, rubber and polymerised materials preservatives
type 9:*

Products used for the preservation of fibrous or polymerised materials, such as leather, rubber or paper or textile products and rubber by the control of microbiological deterioration.

*Product- Masonry preservatives
type 10:*

Products used for preservation and remedial treatment of masonry or other construction materials other than wood by the control of microbiological and algal attack.

*Product- Preservatives for liquid-cooling and processing systems
type 11:*

Products used for the preservation of water or other liquids used in cooling and processing systems by the control of harmful organisms such as microbes, algae and mussels.

Products used for the preservation of drinking water are not included in this product type.

*Product- Slimicides
type 12:*

Products used for the prevention or control of slime growth on materials, equipment and structures, used in industrial processes, e.g. on wood and paper pulp, porous sand strata in oil extraction.

*Product- Metalworking-fluid preservatives
type 13:*

Products used for the preservation of metalworking fluids by the control of microbial deterioration.

MAIN Pest control
GROUP
3:

*Product- Rodenticides
type 14:*

Products used for the control of mice, rats or other rodents.

Product- Avicides

type 15:

Products used for the control of birds.

Product- Molluscicides

type 16:

Products used for the control of molluscs.

Product- Piscicides

type 17:

Products used for the control of fish; these products exclude products for the treatment of fish diseases.

Product- Insecticides, acaricides and products to control other arthropods
type 18: control of arthropods (e.g. insects, arachnids and crustaceans).

Product- Repellents and attractants

type 19:

Products used to control harmful organisms (invertebrates such as fleas, vertebrates such as birds), by repelling or attracting, including those that are used for human or veterinary hygiene either directly or indirectly.

MAIN Other biocidal products

GROUP

4:

Product- Preservatives for food or feedstocks

type 20:

Products used for the preservation of food or feedstocks by the control of harmful organisms.

Product- Antifouling products

type 21:

Products used to control the growth and settlement of fouling organisms (microbes and higher forms of plant or animal species) on vessels, aquaculture equipment or other structures used in water.

Product- Embalming and taxidermist fluids

type 22:

Products used for the disinfection and preservation of human or animal corpses, or parts thereof.

Product- Control of other vertebrates

type 23:

Products used for the control of vermin.
