ANNEX II

Requirements for monitoring of antimicrobial resistance pursuant to Article 7 A.General requirements

Member States must ensure that the monitoring system for antimicrobial resistance provided for in Article 7 provides at least the following information:

- 1. animal species included in monitoring;
- 2. bacterial species and/or strains included in monitoring;
- 3. sampling strategy used in monitoring;
- 4. antimicrobials included in monitoring;
- 5. laboratory methodology used for the detection of resistance;
- 6. laboratory methodology used for the identification of microbial isolates;
- 7. methods used for the collection of the data.
- B. Specific requirements

Member States must ensure that the monitoring system provides relevant information at least with regard to a representative number of isolates of Salmonella spp., Campylobacter jejuni and Campylobacter coli from cattle, pigs and poultry and food of animal origin derived from those species.
