

Commission Directive 2004/33/EC of 22 March 2004 implementing Directive 2002/98/EC of the European Parliament and of the Council as regards certain technical requirements for blood and blood components (Text with EEA relevance)

Article 7

Autologous donations

- 1 Blood establishments shall ensure that autologous donations comply with the requirements set out in Directive 2002/98/EC and the specific requirements set out in this Directive.
- 2 Autologous donations shall be clearly identified as such and shall be kept separate from allogeneic donations.
