

Directive 2005/32/EC of the European Parliament and of the Council of 6 July 2005 establishing a framework for the setting of ecodesign requirements for energy-using products and amending Council Directive 92/42/EEC and Directives 96/57/EC and 2000/55/EC of the European Parliament and of the Council (repealed)

Article 1	Subject matter and scope
Article 2	Definitions
Article 3	Placing on the market and/or putting into service
Article 4	Responsibilities of the importer
Article 5	Marking and declaration of conformity
Article 6	Free movement
Article 7	Safeguard clause
Article 8	Conformity assessment
Article 9	Presumption of conformity
Article 10	Harmonised standards
Article 11	Requirements for components and sub-assemblies
Article 12	Administrative cooperation and exchange of information
Article 13	Small and medium-sized enterprises
Article 14	Consumer information
Article 15	Implementing measures
Article 16	Working plan
Article 17	Self-regulation
Article 18	Consultation Forum
Article 19	Committee procedure
Article 20	Penalties
Article 21	Amendments
Article 22	Repeals
Article 23	Review
Article 24	Confidentiality
Article 25	Implementation
Article 26	Entry into force
Article 27	Addressees
	Signature

ANNEX I

Method for setting generic Eco-design requirements

Generic ecodesign requirements aim at improving the environmental performance of...
In preparing implementing measures laying down generic ecodesign requirements pursuant...

Part 1. Ecodesign parameters for EuPs

1.1. In so far as they relate to product design, significant...

- 1.2. For each phase, the following environmental aspects are to be...
- 1.3. In particular, the following parameters will be used, as appropriate,...

Part 2. Requirements relating to the supply of information

Part 3. Requirements for the manufacturer

1. Addressing the environmental aspects identified in the implementing measure as...
2. Manufacturers will make use of this assessment to evaluate alternative...

ANNEX II

Method for setting specific ecodesign requirements

Specific ecodesign requirements aim at improving a selected environmental aspect...

In preparing implementing measures laying down specific ecodesign requirements pursuant...

A technical, environmental and economic analysis will select a number...

ANNEX III

CE marking

The CE marking must have a height of at least...

The CE marking must be affixed to the EuP. Where...

ANNEX IV

Internal design control

1. This Annex describes the procedure whereby the manufacturer or its...
2. A technical documentation file making possible an assessment of the...
3. The manufacturer must take all measures necessary to ensure that...

ANNEX V

Management system for assessing conformity

1. This Annex describes the procedure whereby the manufacturer who satisfies...
2. A management system may be used for the conformity assessment...
3. Environmental elements of the management system

- 3.1. The environmental product performance policy
- 3.2. Planning
- 3.3. Implementation and documentation
 - 3.3.1. The documentation concerning the management system should cover the following,...
 - 3.3.2. The documentation concerning the EuP will specify, in particular:
- 3.4. Checking and corrective action

ANNEX VI

Declaration of conformity

The EC declaration of conformity must contain the following elements:...
the name and address of the manufacturer or of its...

ANNEX VII

Contents of the implementing measures

The implementing measure will specify, in particular:
the exact definition of the type(s) of EuP(s) covered; the...

ANNEX VIII

In addition to the basic legal requirement that self-regulatory initiatives...

1. Openness of participation
2. Added value
3. Representativeness
4. Quantified and staged objectives
5. Involvement of civil society
6. Monitoring and reporting
7. Cost-effectiveness of administering a self-regulatory initiative
8. Sustainability
9. Incentive compatibility

Status: This is the original version (as it was originally adopted).
