

Directive 2006/38/EC of the European Parliament and of the Council
of 17 May 2006 amending Directive 1999/62/EC on the charging
of heavy goods vehicles for the use of certain infrastructures

Article 1

1. Article 2 of Directive 1999/62/EC shall be amended as follows:

- (a) point (a) shall be replaced by the following:
 - (a) “trans-European road network” means the road network defined in Section 2 of Annex I to Decision No 1692/96/EC of the European Parliament and of the Council of 23 July 1996 on Community guidelines for the development of the trans-European transport network⁽¹⁾ as illustrated by maps. The maps refer to the corresponding sections mentioned in the operative part of and/or in Annex II to that Decision;’
- (b) the following points shall be inserted:
 - (aa) “construction costs” means the costs related to construction, including, where appropriate, the financing costs, of:
 - new infrastructure or new infrastructure improvements (including significant structural repairs), or
 - infrastructure or infrastructure improvements (including significant structural repairs) completed no more than 30 years before 10 June 2008, where tolling arrangements are already in place on 10 June 2008, or completed no more than 30 years before the establishment of any new tolling arrangements introduced after 10 June 2008; costs regarding infrastructure or infrastructure improvements completed before these time limits may also be considered as construction costs where:
 - (i) a Member State has established a tolling system which provides for the recovery of these costs by means of a contract with a tolling system operator, or other legal acts having equivalent effect, which enter into force before 10 June 2008, or
 - (ii) a Member State can demonstrate that the case for building the infrastructure in question depended on its having a design lifetime in excess of 30 years.

In any event, the proportion of the construction costs to be taken into account shall not exceed the proportion of the current design lifetime period of infrastructure components still to run on 10 June 2008 or on the date when the new tolling arrangements are introduced, where this is a later date.

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

Costs of infrastructure or infrastructure improvements may include any specific expenditure on infrastructure designed to reduce nuisance related to noise or to improve road safety and actual payments made by the infrastructure operator corresponding to objective environmental elements such as protection against soil contamination;

- (ab) “financing costs” means interest on borrowings and/or return on any equity funding contributed by shareholders;
- (ac) “significant structural repairs” means structural repairs excluding those repairs no longer of any current benefit to road users, e.g. where the repair work has been replaced by further road resurfacing or other construction work;’;
- (c) point (b) shall be replaced by the following:
 - (b) ‘toll’ means a specified amount payable for a vehicle travelling a given distance on the infrastructures referred to in Article 7(1); the amount shall be based on the distance travelled and the type of vehicle,
- (d) the following point shall be inserted:
 - (ba) “weighted average toll” means the total revenue raised through tolls over a given period divided by the number of vehicle kilometres travelled on a given network subject to tolling during that period, both the revenue and the vehicle kilometres being calculated for the vehicles to which tolls apply;’;
- (e) points (c), (d), (e) and (f) shall be replaced by the following:
 - (c) “user charge” means a specified amount payment of which confers the right for a vehicle to use for a given period the infrastructures referred to in Article 7(1);
 - (d) “vehicle” means a motor vehicle or articulated vehicle combination intended or used exclusively for the carriage by road of goods and having a maximum permissible laden weight of over 3,5 tonnes;
 - (e) vehicle of the “EURO 0”, “EURO I”, “EURO II”, “EURO III”, “EURO IV”, “EURO V”, “EEV” category means a vehicle that complies with the emission limits set out in Annex 0;
 - (f) “type of vehicle” means a category into which a vehicle falls according to the number of its axles, its dimensions or weight, or other vehicle classification factors reflecting road damage, e.g. the road damage classification system set out in Annex IV, provided that the classification system used is based on vehicle characteristics which either appear in the vehicle documentation used in all Member States or are visually apparent.’;
- (f) the following points shall be added:

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

“concession contract” means a “public works concession” or a “service concession” as defined in Article 1 of Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts⁽²⁾;

“concession toll” means a toll levied by a concessionaire under a concession contract.’

2. Article 7 is hereby amended as follows:

(a) paragraphs 1, 2, 3 and 4 shall be replaced by the following:

1 ‘Member States may maintain or introduce tolls and/or user charges on the trans-European road network, or on parts of that network, only under the conditions set out in paragraphs 2 to 12. This shall be without prejudice to the right of Member States, in compliance with the Treaty, to apply tolls and/or user charges on roads not included in the trans-European road network, *inter alia* on parallel roads to which traffic may be diverted from the trans-European road network and/or which are in direct competition with certain parts of that network, or to other types of motor vehicle not covered by the definition of “vehicle” on the trans-European road network, provided that the imposition of tolls and/or user charges on such roads does not discriminate against international traffic and does not result in distortions of competition between operators.

1a Where a Member State decides to maintain or introduce tolls and/or user charges on only parts of the trans-European road network, the resulting exemptions for the other parts (for reasons such as their isolation or low levels of congestion or pollution or where essential for the introduction of a new tolling arrangement) shall not result in any discrimination against international traffic.

2

- a A Member State may choose to maintain or introduce tolls and/or user charges applicable only to vehicles having a maximum permissible laden weight of not less than 12 tonnes. Where a Member State chooses to apply tolls and/or user charges to vehicles below this weight limit, the provisions of this Directive shall apply.
- b Tolls and/or user charges shall be applied to all vehicles from 2012.
- c A Member State may derogate from the requirement set out in point (b) where it considers that the extension of tolling to vehicles of less than 12 tonnes would:
 - create significant adverse effects on the free flow of traffic, the environment, noise levels, congestion or health, or
 - involve administrative costs which would be more than 30 % of additional revenue generated.

3 Tolls and user charges may not both be imposed at the same time on any given category of vehicle for the use of a single road section. However, Member States may also impose tolls on networks where user charges are levied for the use of bridges, tunnels and mountain passes.

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

4 Tolls and user charges may not discriminate, directly or indirectly, on the grounds of nationality of the haulier, the country or place of establishment of the haulier or of registration of the vehicle, or the origin or destination of the transport operation.’;

(b) the following paragraphs shall be inserted:

4a. Member States may provide for reduced toll rates or user charges or exemptions from the obligation to pay tolls or user charges for vehicles exempted from the requirement to install and use recording equipment under Council Regulation (EEC) No 3821/85 of 20 December 1985 on recording equipment in road transport⁽³⁾, and in the cases covered by, and subject to the conditions contained in, Article 6(2)(a) and (b) of this Directive.

4b As charging structures involving discounts or reductions in tolls for frequent users may lead to actual savings in administrative costs for the infrastructure operator, Member States may provide for such discounts or reductions on condition that:

- they fulfil the conditions set out in paragraph 10(a),
- they comply with the Treaty, in particular Articles 12, 49, 86 and 87 thereof,
- they do not distort competition in the internal market,
- the resulting charging structure is linear, proportionate, available to all users on equal terms and does not lead to additional costs being passed on to other users in the form of higher tolls.

Such discounts or reductions shall in no case exceed 13 % of the toll paid by equivalent vehicles not eligible for the discount or reduction.

4c All discount and reduction schemes shall be communicated to the Commission, which shall verify compliance with the conditions set out in paragraphs 4a and 4b and shall approve them in accordance with the procedure referred to in Article 9c(2).

(c) paragraph 6 shall be replaced by the following:

6 ‘The arrangements for the collection of tolls and/or user charges shall not, financially or otherwise, place non-regular users of the road network at an unjustified disadvantage. In particular, where a Member State collects tolls and/or user charges exclusively by means of a system that requires the use of a vehicle on-board unit, it shall make available the appropriate on-board units under reasonable administrative and economic arrangements.’;

(d) the second and third subparagraphs of paragraph 7 shall be deleted;

(e) paragraphs 9 and 10 shall be replaced by the following:

9 ‘Tolls shall be based on the principle of the recovery of infrastructure costs only. Specifically the weighted average tolls shall be related to the construction costs and the costs of operating, maintaining and developing the infrastructure network concerned. The weighted average tolls may also include a return on capital or profit margin based on market conditions.

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

10

- a Without prejudice to the weighted average tolls referred to in paragraph 9, Member States may vary the toll rates for purposes such as combating environmental damage, tackling congestion, minimising infrastructure damage, optimising the use of the infrastructure concerned or promoting road safety, provided that such variation:
- is proportionate to the objective pursued;
 - is transparent and non-discriminatory particularly regarding the nationality of the haulier, the country or place of establishment of the haulier or of registration of the vehicle, and the origin or destination of the transport operation;
 - is not designed to generate additional tolling revenue, any unintended increase in revenue (leading to weighted average tolls which are not in accordance with paragraph 9) being counterbalanced through changes to the structure of the variation which must be implemented within two years of the end of the accounting year in which the additional revenue is generated;
 - respects the maximum flexibility thresholds set out in point (b).
- b Subject to the conditions of point (a), toll rates may be varied according to:
- EURO emission class as set out in Annex 0, including the level of PM and NO_x, provided that no toll is more than 100 % above the toll charged for equivalent vehicles meeting the strictest emission standards; and/or
 - the time of day, type of day or season, provided that:
 - (i) no toll is more than 100 % above the toll charged during the cheapest period of the day, type of day or season; or
 - (ii) where the cheapest period is zero-rated, the penalty for the most expensive time of day, type of day or season is no more than 50 % of the level of toll that would otherwise be applicable to the vehicle in question.

Member States shall be required to vary the rates at which tolls are charged in conformity with the first indent no later than 2010, or in the case of concession contracts, when that concession contract is renewed.

A Member State may nevertheless derogate from this requirement if:

- (i) this would seriously undermine the coherence of the tolling systems in its territory;

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- (ii) for the tolling system concerned, it would not be technically practicable to introduce such differentiation; or
- (iii) this would lead to diversion of the most polluting vehicles away from the trans-European road network with consequential impacts on road safety and public health.

Any such derogations shall be notified to the Commission.

- c Subject to the conditions of point (a), toll rates may in exceptional cases for specific projects of high European interest be subject to other forms of variation in order to secure the commercial viability of such projects, when they are exposed to direct competition with other modes of transport for vehicles. The resulting charging structure shall be linear, proportionate, openly published, available to all users on equal terms and shall not lead to additional costs being passed on to other users in the form of higher tolls. The Commission shall verify compliance with the conditions of this point prior to the implementation of the charging structure in question.’;
- (f) the following paragraphs shall be added:

11 ‘Without prejudice to Article 9(1) and (1a), in exceptional cases concerning infrastructure in mountainous regions and after informing the Commission, a mark-up may be added to the tolls of specific road sections:

- (a) which are the subject of acute congestion affecting the free movement of vehicles; or
- (b) the use of which by vehicles is the cause of significant environmental damage,

on condition that:

- the revenue generated from the mark-up is invested in priority projects of European interest identified in Annex III to Decision No 884/2004/EC, which contribute directly to the alleviation of the congestion or environmental damage in question and which are located in the same corridor as the road section on which the mark-up is applied,
- the mark-up, which may be applied to tolls varied in accordance with paragraph 10, does not exceed 15 % of the weighted average toll calculated in accordance with paragraph 9 except where the revenue generated is invested in cross-border sections of priority projects of European interest involving infrastructure in mountainous regions, in which case the mark-up may not exceed 25 %,
- the application of the mark-up does not result in unfair treatment of commercial traffic compared to other road users,
- financial plans for the infrastructure on which the mark-up is applied and a cost/benefit analysis for the new infrastructure project are submitted to the Commission in advance of the mark-up's application,

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- the period for which the mark-up is to apply is defined and limited in advance and is consistent in terms of the expected revenue to be raised with the financial plans and cost/benefit analysis submitted.

Application of this provision to new cross-border projects shall be subject to the agreement of the Member States concerned.

When the Commission receives the financial plans from a Member State intending to apply a mark-up, it shall make this information available to the members of the Committee referred to in Article 9c(1). Should the Commission consider that the planned mark-up does not meet the conditions set out in this paragraph, or if it considers that the planned mark-up will have significant adverse effects on the economic development of peripheral regions, it may reject or request modification of the plans for charges submitted by the Member State concerned, in accordance with the procedure referred to in Article 9c(2).

12 Where a driver is unable to produce the vehicle documents necessary to ascertain the information referred to in the first indent of paragraph 10(b), and the type of vehicle in the event of a check, Member States may apply tolls up to the highest level chargeable.’;

3. the following Article shall be inserted:

Article 7a

- 1 In determining the levels of weighted average tolls to be charged on the infrastructure network concerned or a clearly defined part of such a network, Member States shall take into account the various costs set out in Article 7(9). The costs taken into account shall relate to the network or part of the network on which tolls are levied and to the vehicles that are subject to the tolling. Member States may choose not to recover these costs through toll revenue or to recover only a percentage of the costs.

- 2 Toll tolls shall be determined in accordance with Article 7 and paragraph 1 of this Article.

- 3 For new tolling arrangements other than those involving concession tolls put in place by Member States after 10 June 2008, Member States shall calculate costs using a methodology based on the core calculation principles set out in Annex III.

For new concession tolls put in place after 10 June 2008, the maximum level of tolls shall be equivalent to, or less than, the level that would have resulted from the use of a methodology based on the core calculation principles set out in Annex III. The assessment of such equivalence shall be made on the basis of a reasonably long reference period appropriate to the nature of a concession contract.

Tolling arrangements already in place on 10 June 2008 or for which tenders or responses to invitations to negotiate under the negotiated procedure have been received pursuant to a public procurement process before 10 June 2008 shall not be subject to the obligations set out in this paragraph, for as long as these arrangements remain in force and provided that they are not substantially modified.

- 4 Member States shall communicate to the Commission at least four months before the implementation of a new tolling arrangement:

- a for tolling arrangements other than those involving concession tolls:
 - the unit values and other parameters they use in calculating the various cost elements, and

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- clear information on the vehicles covered by their tolling regime and the geographic extent of the network, or part of the network, used for each cost calculation and the percentage of costs that they are seeking to recover;
- b for tolling arrangements involving concession tolls:
 - the concession contracts or significant changes to such contracts,
 - the base case on which the grantor has founded the notice of concession, as referred to in Annex VII B to Directive 2004/18/EC; this base case shall include the estimated costs as defined in Article 7(9) envisaged under the concession, the forecasted traffic divided into types of vehicle, the levels of tolls envisaged and the geographic extent of the network covered by the concession contract.

5 Member States shall also inform the Commission at least four months before their implementation of new tolling arrangements applicable to parallel roads to which traffic may be diverted from the trans-European road network and/or which are in direct competition with certain parts of that network on which tolls are levied. This information shall include at least an explanation of the geographic extent of the network covered by the toll, the vehicles covered and the levels of toll envisaged, together with an explanation of how the level of toll was determined.

6 For the cases subject to the obligations in paragraph 3 the Commission shall, within four months of receiving the information in accordance with paragraph 4, give an opinion as to whether these obligations appear to have been fulfilled.

For the tolling arrangements referred to in paragraph 5, the Commission may also give an opinion, in particular regarding the proportionality and the transparency of the proposed arrangements and their likely impact on competition in the context of the internal market and the free movement of goods.

The opinions of the Commission shall be made available to the Committee referred to in Article 9c(1).

7 Where a Member State wishes to apply the provisions contained in Article 7(11) in respect of tolling arrangements already in place on 10 June 2008, it shall provide information that demonstrates that the weighted average toll being applied to the infrastructure concerned complies with Articles 2(aa), 7(9) and 7(10).;

4. the following Article shall be inserted:

Article 7b

This Directive does not affect the freedom of Member States which introduce a system of tolls and/or user charges for infrastructure to provide, without prejudice to Articles 87 and 88 of the Treaty, appropriate compensation for these charges.;

5. Article 8(2)(b) shall be replaced by the following:

- (b) ‘payment of the common user charge shall give access to the network as defined by the participating Member States in accordance with Article 7(1);’;

6. the following Article shall be inserted:

Article 8a

Each Member State shall monitor the system of tolls and/or user charges to ensure that it functions in a transparent and non-discriminatory manner.;

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

7. Article 9 shall be amended as follows:

(a) paragraph 1 shall be replaced by the following:

1 ‘This Directive shall not prevent the non-discriminatory application by Member States of:

- a specific taxes or charges:
 - levied upon registration of the vehicle, or
 - imposed on vehicles or loads of abnormal weights or dimensions;
- b parking fees and specific urban traffic charges.

1a This Directive shall not prevent the non-discriminatory application by Member States of:

- a regulatory charges specifically designed to combat time and place-related traffic congestion;
- b regulatory charges designed to combat environmental impacts, including poor air quality

on any road, notably in urban areas, including trans-European road network roads crossing an urban area.’;

(b) paragraph 2 shall be replaced by the following:

2 ‘Member States shall determine the use to be made of revenue from charges for the use of road infrastructure. To enable the transport network to be developed as a whole, revenue from charges should be used to benefit the transport sector and optimise the entire transport system.’;

8. the following Articles shall be inserted:

Article 9a

Member States shall establish appropriate controls and determine the system of penalties applicable to infringements of the national provisions adopted under this Directive. They shall take all necessary measures to ensure that they are implemented. The penalties established shall be effective, proportionate and dissuasive.

Article 9b

The Commission shall facilitate dialogue and the exchange of technical know-how between Member States in relation to the implementation of this Directive and in particular Annex III. The Commission shall update and clarify Annexes 0, III and IV in the light of technical progress and Annexes I and II in the light of inflation, in accordance with the procedure referred to in Article 9c(3).

Article 9c

1 The Commission shall be assisted by a Committee.

2 Where reference is made to this paragraph, Articles 3 and 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

3 Where reference is made to this paragraph, Article 5 and 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

The period laid down in Article 5(6) of Decision 1999/468/EC shall be set at three months.

4 The Committee shall adopt its rules of procedure.;

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

9. Article 11 shall be replaced by the following:

Article 11

No later than 10 June 2011, the Commission shall present a report to the European Parliament and the Council on the implementation and effects of this Directive, taking account of developments in technology and the trend in traffic density, including the use of vehicles of more than 3,5 and less than 12 tonnes, and evaluating its impact on the internal market, including on island, landlocked and peripheral regions of the Community, levels of investment in the sector and its contribution to the objectives of a sustainable transport policy.

Member States shall forward the necessary information for the report to the Commission no later than 10 December 2010.

No later than 10 June 2008, the Commission shall present, after examining all options including environment, noise, congestion and health-related costs, a generally applicable, transparent and comprehensible model for the assessment of all external costs to serve as the basis for future calculations of infrastructure charges. This model shall be accompanied by an impact analysis of the internalisation of external costs for all modes of transport and a strategy for a stepwise implementation of the model for all modes of transport.

The report and the model shall be accompanied, if appropriate, by proposals to the European Parliament and the Council for further revision of this Directive.;

10. the table in Annex II indicating the amount of annual charges shall be replaced by the following:

	maximum three axles	minimum four axles
EURO 0	1 332	2 233
EURO I	1 158	1 933
EURO II	1 008	1 681
EURO III	876	1 461
EURO IV and less polluting	797	1 329

11. the last sentence of Annex II shall be replaced by the following:

The daily user charge is equal for all vehicle categories and amounts to EUR 11.;

12. Annex 0, the text of which appears in Annex I to this Directive, shall be inserted;
13. Annex III, the text of which appears in Annex II to this Directive, shall be added;
14. Annex IV, the text of which appears in Annex III to this Directive, shall be added.

Article 2

1 Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive not later than 10 June 2008. They shall forthwith inform the Commission thereof.

When Member States adopt such measures, they shall contain a reference to this Directive or shall be accompanied by such reference on the occasion of their official

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

publication. The methods of making such reference shall be laid down by Member States.

2 Member States shall communicate to the Commission the text of the provisions of domestic law which they adopt in the field covered by this Directive, together with a table showing how the provisions of this Directive correspond to the national provisions adopted.

Article 3

This Directive shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

Article 4

This Directive is addressed to the Member States.
