

Commission Directive 2008/62/EC of 20 June 2008 providing for certain derogations for acceptance of agricultural landraces and varieties which are naturally adapted to the local and regional conditions and threatened by genetic erosion and for marketing of seed and seed potatoes of those landraces and varieties (Text with EEA relevance)

### CHAPTER III

## SEED PRODUCTION AND MARKETING

#### *Article 14*

#### **Quantitative restrictions**

Each Member State shall ensure that, for each conservation variety, the quantity of seed marketed does not exceed 0,5 % of the seed of the same species used in that Member State in one growing season, or a quantity necessary to sow 100 ha, whichever is the greater quantity. For the species *Pisum sativum*, *Triticum* spp., *Hordeum vulgare*, *Zea mays*, *Solanum tuberosum*, *Brassica napus* and *Helianthus annuus*, that percentage shall not exceed 0,3 %, or a quantity necessary to sow 100 ha, whichever is the greater quantity.

However, the total quantity of seed of conservation varieties marketed in each Member State shall not exceed 10 % of the seed of the species concerned used yearly in the Member State. In cases where this leads to a quantity lower than necessary to sow 100 ha, the maximum amount of seed of the species concerned used yearly in the Member State may be increased so that to reach the quantity necessary to sow 100 ha.
