[^{F1}ANNEX I

METHOD FOR CALCULATING THE CRUDE OIL EQUIVALENT OF IMPORTS OF PETROLEUM PRODUCTS

Textual Amendments

- F1** Substituted by [Commission Implementing Directive \(EU\) 2018/1581 of 19 October 2018 amending Council Directive 2009/119/EC as regards the methods for calculating stockholding obligations.](#)

Member States shall calculate the crude oil equivalent of imports of petroleum products, as referred to in Article 3, using the following method.

- (1) The sum of net imports of crude oil, natural gas liquids (NGL), refinery feedstocks and other hydrocarbons, as defined in Annex A, Chapter 3.4 of Regulation (EC) No 1099/2008⁽¹⁾, shall be calculated and adjusted to take account of any stock changes. From the resulting figure, one of the following figures shall be deducted for naphtha yield:
 - 4 %,
 - the average naphtha yield,
 - the net actual naphtha consumption.
- (2) The sum of the net imports of all other petroleum products, as defined in Annex A, Chapter 3.4 of Regulation (EC) No 1099/2008, excluding naphtha, shall be calculated and adjusted to take account of stock changes and shall be multiplied by a factor of 1,065.

The sum of the figures resulting from (1) and (2) represents the crude oil equivalent.

International marine bunkers shall not be included in the calculation.]
