

## ANNEX III

### PROCEDURE FOR THE REASSESSMENT OF CONFORMITY

5. Where pressure receptacles were manufactured in series, Member States may authorise the reassessment of conformity of individual pressure receptacles, including their valves and other accessories used for transport, to be carried out by a notified body notified for periodic inspection of the relevant transportable pressure receptacles provided that conformity of the type has been assessed in accordance with paragraph 3 by a type A notified body, responsible for the reassessment of conformity, and a certificate of type reassessment issued. The Pi marking shall be followed by the identification number of the notified body responsible for the periodic inspection.
