

Directive 2014/24/EU of the European Parliament and of the Council of 26 February 2014 on public procurement and repealing Directive 2004/18/EC (Text with EEA relevance)

TITLE II

RULES ON PUBLIC CONTRACTS

CHAPTER II

Techniques and instruments for electronic and aggregated procurement

Article 35

Electronic auctions

1 Contracting authorities may use electronic auctions, in which new prices, revised downwards, and/or new values concerning certain elements of tenders are presented.

For this purpose, contracting authorities shall structure the electronic auction as a repetitive electronic process, which occurs after an initial full evaluation of the tenders, enabling them to be ranked using automatic evaluation methods.

Certain public service contracts and certain public works contracts having as their subject-matter intellectual performances, such as the design of works, which cannot be ranked using automatic evaluation methods, shall not be the object of electronic auctions.

2 In open or restricted procedures or competitive procedures with negotiation, the contracting authorities may decide that the award of a public contract shall be preceded by an electronic auction when the content of the procurement documents, in particular the technical specifications, can be established with precision.

In the same circumstances, an electronic auction may be held on the reopening of competition among the parties to a framework agreement as provided for in points (b) or (c) of Article 33(4) and on the opening for competition of contracts to be awarded under the dynamic purchasing system referred to in Article 34.

3 The electronic auction shall be based on one of the following elements of the tenders:

- a solely on prices where the contract is awarded on the basis of price only;
- b on prices and/or on the new values of the features of the tenders indicated in the procurement documents where the contract is awarded on the basis of the best price-quality ratio or to the tender with the lowest cost using a cost-effectiveness approach.

4 Contracting authorities which decide to hold an electronic auction shall state that fact in the contract notice or in the invitation to confirm interest. The procurement documents shall include at least the information set out in Annex VI.

Status: EU Directives are published on this site to aid cross referencing from UK legislation. Since IP completion day (31 December 2020 11.00 p.m.) no amendments have been applied to this version.

5 Before proceeding with an electronic auction, contracting authorities shall make a full initial evaluation of the tenders in accordance with the award criterion or criteria and with the weighting fixed for them.

A tender shall be considered admissible where it has been submitted by a tenderer, who has not been excluded pursuant to Article 57 and who meets the selection criteria, and whose tender is in conformity with the technical specifications without being irregular or unacceptable or unsuitable.

In particular, tenders which do not comply with the procurement documents, which were received late, where there is evidence of collusion or corruption, or which have been found by the contracting authority to be abnormally low, shall be considered as being irregular. In particular tenders submitted by tenderers that do not have the required qualifications, and tenders whose price exceeds the contracting authority's budget as determined and documented prior to the launching of the procurement procedure shall be considered as unacceptable.

A tender shall be considered not to be suitable where it is irrelevant to the contract, being manifestly incapable, without substantial changes, of meeting the contracting authority's needs and requirements as specified in the procurement documents. A request for participation shall be considered not to be suitable where the economic operator concerned is to be or may be excluded pursuant to Article 57 or does not meet the selection criteria set out by the contracting authority pursuant to Article 58

All tenderers that have submitted admissible tenders shall be invited simultaneously to participate in the electronic auction using, as of the specified date and time, the connections in accordance with the instructions set out in the invitation. The electronic auction may take place in a number of successive phases. The electronic auction shall not start sooner than two working days after the date on which invitations are sent out.

6 The invitation shall be accompanied by the outcome of a full evaluation of the relevant tender, carried out in accordance with the weighting provided for in the first subparagraph of Article 67(5).

The invitation shall also state the mathematical formula to be used in the electronic auction to determine the automatic re-rankings on the basis of the new prices and/or new values submitted. Except where the most economically advantageous offer is identified on the basis of price alone, that formula shall incorporate the weighting of all the criteria established to determine the most economically advantageous tender, as indicated in the notice used as a means of calling for competition or in other procurement documents. For that purpose, any ranges shall, however, be reduced beforehand to a specified value.

Where variants are authorised, a separate formula shall be provided for each variant.

7 Throughout each phase of an electronic auction the contracting authorities shall instantaneously communicate to all tenderers at least sufficient information to enable them to ascertain their relative rankings at any moment. They may, where this has been previously indicated, communicate other information concerning other prices or values submitted. They may also at any time announce the number of participants in that phase of the auction. In no case, however, may they disclose the identities of the tenderers during any phase of an electronic auction.

8 Contracting authorities shall close an electronic auction in one or more of the following manners:

- a at the previously indicated date and time;

- b when they receive no more new prices or new values which meet the requirements concerning minimum differences, provided that they have previously stated the time which they will allow to elapse after receiving the last submission before they close the electronic auction; or
- c when the previously indicated number of phases in the auction has been completed.

Where the contracting authorities intend to close an electronic auction in accordance with point (c) of the first subparagraph, possibly in combination with the arrangements laid down in point (b) thereof, the invitation to take part in the auction shall indicate the timetable for each phase of the auction.

9 After closing an electronic auction contracting authorities shall award the contract in accordance with Article 67 on the basis of the results of the electronic auction.
