

REGULATION (EEC) No 3595/73 OF THE COUNCIL

of 28 December 1973

on the opening, allocation and administration of a Community tariff quota for certain hand-made products

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 113 thereof;

Having regard to the proposal from the Commission;

Whereas, as regards certain hand-made products, the European Economic Community must open an annual duty-free Community tariff quota for a value of 5 000 000 units of account with a maximum of 500 000 units of account for each tariff heading and subheading affected; whereas in the context of putting into effect the Declaration of Intent concerning commercial relations with certain Asiatic countries, it is necessary to take the total quota amount and the maximum limit admissible for each tariff heading or subheading to the levels of 10 000 000 units of account and 1 000 000 units of account respectively; whereas products may be admitted under the Community tariff quota only on production to the Community customs authorities of a certificate issued by the recognized authorities of the country of origin certifying that the goods in question are hand-made;

Whereas, under Article 39 of the Act of Accession, the new Member States must on 1 January 1974 make the first move towards alignment of their national tariffs on the Common Customs Tariff as regards the said goods; whereas, therefore, the needs of those States for imports from third countries should from that date onwards be covered by the tariff quota in question during the period thereof; whereas the duties to be applied by those Member States under the said tariff quota must be in conformity with the relevant provisions of the Act of Accession;

Whereas equal and continuous access to the quota should be ensured for all Community importers and the rate of levy for the tariff quota should be applied consistently to all imports until the quota is used up; whereas, in the light of the principles outlined above, a Community tariff arrangement based on an allocation between the Member States would seem to preserve the Community nature of the quota;

whereas to represent as closely as possible the actual development of the market in the said goods the allocation should follow proportionately the requirements of the Member States calculated both from statistics of imports from third countries during a representative reference period and from the economic outlook for the tariff year in question;

Whereas, however, there is no specific classification of the said goods in the statistical nomenclatures; whereas it has thus been impossible to collect sufficiently precise and representative statistics; whereas the extent to which the current Community tariff quota has been used is not such that the real requirements of each of the Member States can be firmly ascertained; whereas the only possibility is therefore to divide the tariff quota volume into eight parts, of which one would be allocated each to Benelux, Denmark, Germany, France, Ireland, Italy and the United Kingdom, the last part being held in reserve to cover the later requirements of Member States which use up their initial shares;

Whereas the initial shares may be used up fairly quickly; whereas, therefore, to avoid disruption of supplies any Member State which has almost used up its initial share, shall draw a supplementary share from the Community reserve; whereas this must be done by each Member State as each one of its supplementary shares is almost used up, and as many times as the reserve allows; whereas the initial and supplementary shares must be valid until the end of the quota period; whereas this form of administration requires close collaboration between the Member States and the Commission, and the Commission must be in a position to follow the extent to which the tariff quota has been used up and inform the Member States thereof; whereas this collaboration must be all the closer since it does not seem necessary, at present, to provide for special measures in this Regulation to avoid exceeding the maximum allocation of 1 000 000 units of account per tariff heading or subheading;

Whereas if, at a given date in the quota period, a Member State has a considerable quantity left over, it

is essential that it should return a significant percentage thereof to the reserve, to prevent a part of the Community quota from remaining unused in one Member State while it could be used in others;

Whereas since the Kingdom of Belgium, the Kingdom of the Netherlands and the Grand Duchy of Luxembourg are jointly represented by the Benelux Economic Union any measure concerning the administration of the shares allocated to that economic union may be carried out by one of its members,

HAS ADOPTED THIS REGULATION:
