

Council Regulation (EEC) No 3037/90 of 9 October 1990 on the statistical classification of economic activities in the European Community

COUNCIL REGULATION (EEC) No 3037/90  
of 9 October 1990

on the statistical classification of economic activities in the European Community

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 100a thereof,

Having regard to the proposal from the Commission<sup>(1)</sup>,

In cooperation with the European Parliament<sup>(2)</sup>,

Having regard to the opinion of the Economic and Social Committee<sup>(3)</sup>,

Whereas, in order to function, the internal market requires statistical standards applicable to the collection, transmission and publication of national and Community statistics so that undertakings, financial institutions, governments and all other operators in the single market can be provided with reliable and comparable statistical data;

Whereas such information is necessary to enable undertakings to assess their competitiveness, and useful to the Community institutions in preventing distortions of competition;

Whereas only if the Member States use classifications of activities linked to the Community classification will it be possible to provide integrated information with the reliability, speed, flexibility and degree of detail required for the management of the internal market;

Whereas provision should be made for the Member States to be able, in order to meet national requirements, to retain or to insert in their national classifications additional subdivisions based on the statistical classification of economic activities in the European Community;

Whereas the international compatibility of economic statistics requires that the Member States and the Community institutions use classifications of economic activities which are directly linked to the United Nations International Standard Industrial Classification (ISIC);

Whereas use of the classification of economic activities in the Community requires that the Commission be assisted by the Statistical Programme Committee set up by Decision 89/382/EEC, Euratom<sup>(4)</sup> on any issue relating to the application of this Regulation, in particular as regards interpretation of that classification, minor amendments thereto, the drafting and updating of explanatory notes and the establishment of guidelines for the classification of statistical units in accordance with the said classification;

Whereas it is vital that the contents of the various categories of the classification of activities in the European Community be interpreted uniformly in all the Member States;

*Status: Point in time view as at 01/01/2008.**Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EEC) No 3037/90. (See end of Document for details)*

Whereas the introduction of a new classification requires a transitional period,

HAS ADOPTED THIS REGULATION:

*Article 1*

1 The purpose of this Regulation is to establish a common statistical classification of economic activities within the European Community in order to ensure comparability between national and Community classifications and hence national and Community statistics.

2 This Regulation shall apply only to the use of classifications for statistical purposes.

3 This Regulation does not *per se* oblige Member States to collect, publish or supply data and is not concerned with obligations as regards the degree of detail and type of statistical units to be used in statistical surveys and analyses.

*Article 2*

1 A common basis for statistical classifications of economic activities within the European Community, hereinafter referred to as 'NACE Rev. 1', is hereby established, comprising:

- an intermediate level consisting of headings identified by a two-character alphabetical code (subsections),
- a second level consisting of headings identified by a two-digit numerical code (divisions),
- a third level consisting of headings identified by a three-digit numerical code (groups),
- a fourth level consisting of headings identified by a four-digit numerical code (classes).

*Article 4*

In addition to the provisions referred to in Article 3, in the event of incompatibility between certain NACE Rev. 1 positions and the national economic structure, the Commission may authorize a Member State to use at a given level an aggregation of NACE Rev. 1 positions in a specific sector.

To obtain such an authorization, the Member State concerned must provide the Commission with all the necessary information to consider its request.

However, notwithstanding the provisions of Article 3 (2) (a), this authorization shall not entitle the Member State concerned to subdivide the aggregated headings in a way different from NACE Rev. 1.
