COMMISSION REGULATION (EEC) No 3201/90

of 16 October 1990

laying down detailed rules for the description and presentation of wines and grape musts

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 822/87 of 16 March 1987 on the common organization of the market in wine (1), as last amended by Regulation (EEC) No 1325/90 (2), and in particular Articles 72 (5) and 81 thereof,

Whereas Council Regulation (EEC) No 2392/89 (3), as amended by Regulation (EEC) No 3886/89 (4), lays down general rules for the description and presentation of wines and grape musts; whereas implementing legislation must be adopted laying down specific and detailes rules in accordance with the principles defined therein and with those already established by Regulation (EEC) No 822/87 and Council Regulation (EEC) No 823/87 of 16 March 1987 laying down special provisions relating to quality wines produced in specified regions (5), as amended by Regulation (EEC) No 2043/89 (6);

Whereas Commission Regulation (EEC) No 997/81 of 26 March 1981 laying down detailed rules for the description and presentation of wines and grape musts (7), as last amended by Regulation (EEC) No 2776/90 (8), has

frequently been amended; whereas, in the interests of clarity, and on the occasion of further amendments, the rules in question should be consolidated;

Whereas, in applying rules concerning the description and presentation of wines, the traditional and customary practices of the Community wine-growing regions should be taken into account to the extent that the traditional and customary practices are compatible with the principles of a single market; whereas it is also necessary to avoid any confusion in the use of expressions employed in labelling and to ensure that the information on the label is as clear and complete as possible for the consumer;

Whereas, in order to allow the bottler some freedom as regards the manner in which he presents the mandatory information on wine labels, and to permit the use of additional labels for all the mandatory information required on imported wines, it should be laid down that such information may be grouped together in the same field of vision rather than on a single label;

Whereas certain terms and details have a commercial value or can contribute to the prestige of the product offered for sale without being absolutely necessary; whereas the use of such terms should be permitted provided that they are justified and are not misleading as regards the quality of the product; whereas, however, in view of the specific nature of certain of these terms, Member States should be empowered to limit the options offered by Community legislation to the parties concerned;

Whereas, to provide the consumer with better information on the origin of wines made from a mixture of grapes or by the coupage of products originating in several Member States, the height of the lettering to be used for the words 'blend of wines from various countries of the European

Communities' should be specified: whereas the same should apply to similar terms laid down for table wines which have been manufactured in a Member State other than that where the grapes were harvested; whereas appropriate provisions on the maximum height of the lettering should also be adopted to ensure that no confusion can arise between certain table wines entitled to a geographical ascription and quality wines produced in specific regions (quality wines psr);

Whereas in order to facilitate implementation of this Regulation, a list of terms denoting superior quality in imported wines and recognized by the Community in accordance with Article 26 (2) (c) of Regulation (EEC) No 2392/89 should be published;

Whereas, so that the consumer may not be misled as regards the origin of wine imported into the Community, it should no longer be possible to put on the label of an imported wine the translation of an expression designating a superior quality which is identicial to any designation in German used in accordance with Community rules;

Whereas the nominal volume of containers allowed for putting up wines and grape musts in intra-Community trade is governed by Council Directive 75/106/EEC of 19 December 1974 on the approximation of the laws of the Member States relating to the making-up by volume of certain prepackaged liquids (1), as last amended by Directive 88/316/EEC (2); whereas the rules for indicating the nominal volume of the product in question on the label should be specified; whereas, in order to enable products already put up in containers to be disposed of, it should be stipulated that such products may not be sold or put up for sale after the expiry of the transitional periods referred to in the said Directive;

Whereas, the better to inform the consumer, in the case of bottling under contract, the words 'bottled for . . .' should be followed by the name or business name of the bottler within the meaning of Article 4 of Commission Regulation (EEC) No 2202/89 of 20 July 1989 defining the terms 'coupage', 'the turning into wine', 'bottler' and 'bottling' (3); whereas, further, if a Member State has provided, in the case of bottling under contract, that the name of the person who actually bottled the wine for the account of the bottler must be shown, provision must be made to ensure that this is done in clear and express terms;

Whereas the wording on the label relating to the name or business name of the bottler, the consignor or a natural or legal person or group of such persons where such wording refers to an agricultural holding should be specified;

Whereas, in order to prevent the consumer from being misled as to the country in which the product was bottled, it is advisable to specify the official language or languages in which the particulars preceding the name and business name of the bottler should be indicated on the label;

Whereas it is now compulsory for wine bottle labels to indicate the Member State in which bottling was carried out; whereas it should therefore be specified how this is to be done; whereas provision is made for certain information to be given in the form of a code; whereas in order to facilitate the updating and reading of these codes they should be determined by the Member State in which the bottler, consignor or importer has his registered place of business;

Whereas, to ensure that the information given to the consumer is objective, the actual alcoholic strength, the total alcoholic strength and the grape must density stated on the label must be made subject to the same rules throughout the Community;

Whereas, in the interest of consumers, it should be specified that the actual or total alcoholic strength stated on the labelling is that determined by analysis; whereas, for the sake of simplicity, however, it should be possible for the figure expressing this alcoholic strength to be rounded off within certain limits;

Whereas it is customary in Germany to indicate the density of grape musts in 'Oechsle degrees'; whereas, in the light of this traditional practice, no further alignment with the Community system for measuring the density of grape must is possible for the moment; whereas the transitional period should therefore be extended until 31 August 1991, during which Germany may provide, in respect of grape must put into circulation on its territory, that the density should be expressed in Oechsle degrees;

Whereas, to prevent any abuse of the only optional terms (1) OJ No L 42, 15. 2. 1975, p. 1. which are authorized, the cases where recommendations (2) OJ No L 143, 10. 6. 1988, p. 26. are permissible should be expressly stated;

⁽³⁾ OJ No L 209, 21. 7. 1989, p. 31.

Whereas, to ensure that a recommendation regarding the acceptability of a wine for religious purposes does not provide a pretext to use oenological practices that are not authorized by Community or national provisions, the conditions under which such a recommendation can be made should be clarified; whereas these conditions should take account of certain religious rites;

Whereas, to ensure control and protection of table wines qualifying for description as 'Landwein', 'vin de pays', 'vino típico', 'ονομασία κατά παράδοση', 'οινος τοπικός', 'vino de la tierra' or 'vinho regional' and to provide accurate information for the authorities in the Member States responsible for ensuring the observance of Community or national provisions in the wine sector, producer Member States should forward to the Commission all relevant information on the designation of such wines;

Whereas a list of imported wines for which the conditions of production have been recognized as being equivalent to those for a quality wine psr or for a table wine bearing geographical ascription should be published;

Whereas to facilitate implementation of this Regulation the synonyms of names of the vine varieties which may be used to describe wines originating in the Community should be published together with the names and, where appropriate, the synonyms of the vine varieties which may be used to describe imported wines;

Whereas the names of vine varieties which are identical with, or which refer to, the names of geographical units may give rise to confusion regarding the geographical origin of the wine designated by one of these names of varieties; whereas, with a view to reducing this risk, Member States should be allowed to prescribe that such names be shown on the label in lettering that does not exceed a certain size;

Whereas, in order to maintain traditional trade with some non-member countries, exceptions should be provided to Articles 31, 32 and 33 of Regulation (EEC) No 2392/89 for some wines from these countries; whereas, to facilitate Community exports to the United States of America, it should be laid down that the vintage year is to be indicated on the labels of the Community wines in question in accordance with the rules applicable to wine produced in the United States;

Whereas, in so far as the details concerning the method of production, the type of vine or a particular colour are not defined by the rules of the producer Member State or the exporting non-member country, certain rules should be laid

down in this Regulation; whereas the terms in which such information may be given should also be indicated;

Whereas, having regard to the importance of indicating the residual sugar content for the description of wine, the use of the descriptive terms indicating the residual sugar content should have to conform to analytical criteria;

Whereas, where the object is to make a wine better known, information concerning the history of the wine in question, of the bottler's firm or of a firm belonging to a natural or legal person involved in the distribution of the wine should be allowed to be shown on a part of the label that is separate from the part bearing the mandatory information;

Whereas the organization of competitions is an effective way of encouraging wine producers and dealers to endeavour to achieve distinction in competition by the quality of the wine which they market; whereas the awards granted to the best wines in such competitions provide valuable information for the consumer; whereas, with a view to ensuring that such competitions take place objectively, certain Community rules which must be complied with by competition organizers should be laid down;

Whereas the information that a wine has been bottled at the wine-growing holding where the grapes from which it was made were harvested and turned into wine, or under equivalent conditions, expresses the idea that all the stages of production have been carried out under the supervision and responsibility of the same natural or legal person, thereby enhancing the prestige of the wine thus obtained in the estimation of some purchasers; whereas the terms which may be used to convey such information should therefore be specified;

Whereas the use of the bottle known as the 'flûte d'Alsace' has traditionally been restricted in France to certain quality wines psr; whereas it would seem appropriate to maintain this restriction without, however, restricting the use of this bottle in the case of wines from other countries;

Whereas bottles of the 'Bocksbeutel' or 'Cantil' type and bottles of a similar type have been in use for a very long time in certain Community regions and in certain third countries; whereas those types of bottles may recall certain characteristics or a particular origin of the wine in question; whereas, owing to the traditional character of such bottle shapes, they should be used exclusively for wines where such use is a fair practice established for a certain number of years and is considered traditional without however jeopardizing the sale of wine marketed in such types of bottle; whereas the list of wines which may be put up in such bottles should be published; whereas, in

order to facilitate the switch-over from the arrangements existing in Portugal to those in the Community, Portuguese wines dispatched to other Member States must be exempted from the application of the rules on the use of bottles of the types in question;

Whereas there is a risk of rectified concentrated grape must being used fraudulently to enrich or sweeten wines or other food products; whereas provision should therefore be made that this product may be put into circulation only under strictly defined conditions ensuring effective monitoring of its transport and use;

Whereas, for reasons of hygiene and the protection of public health, certain terms should be prescribed for use on containers for the transport of wines and musts;

Whereas, in order to facilitate checks on the bottling of wines and grape musts, Member States should be authorized, pursuant to the third indent of the second subparagraph of Article 38 (1) of Regulation (EEC) No 2392/89, to prescribe or to permit a statement of the date of bottling;

Whereas under Article 43 (2) of Regulation (EEC) No 2392/89 Member States may allow the use of the word 'wine' accompanied by the name of a fruit and in the form of a composite name to describe products obtained by the fermentation of fruits other than grapes and by other composite names including the word 'wine'; whereas provisions should be made to avoid any confusion with other wine products;

Whereas, in order to avoid difficulty as regards exports of wine to the United States of America, a rule should be laid down about the vintage year which may be printed on the label:

Whereas transitional measures are required to cover products of which the description and presentation does not comply with the relevant provisions;

Whereas, for the sake of simplicity, certain provisions of Regulation (EEC) No 2392/89 and of this Regulation should not apply to small quantities of wine as defined under Council Regulation (EEC) No 2390/89 of 24 July 1989 laying down general rules for the import of wines, grape juice and grape must (1), as last amended by Regulation (EEC) No 1772/90 (2);

(1) OJ No L 232, 9. 8. 1989, p. 7. (2) OJ No L 163, 29. 6. 1990, p. 3. Whereas the measures provided for in this Regulation are in accordance with the opinion of the Management Committee for Wine,

HAS ADOPTED THIS REGULATION:

- (b) limit the use of one or more of those terms to certain categories of wine obtained on their territory;
- (c) reserve the use of other similar terms for wines made entirely from grapes harvested from vines belonging to a wine-growing holding or a group of wine-growing holdings thus described, provided that the making process was carried out in that vineyard or by that group;
