Article 25

The tariff classification of bolting cloth, not made up, falling within CN code 5911 20 00 shall be subject to the condition that it is marked as indicated below.

A mark consisting of a rectangle and its diagonals must be reproduced at regular intervals along both edges of the fabric without encroaching on the selvages, in such a way that the distance between two consecutive marks, measured between the adjacent ends of the rectangles, is not more than one metre and that the marks on one edge are staggered so as to be half way between those on the other edge (the centre of each mark must be equidistant from the centre of the two nearest marks on the opposite edge). Each mark is to be so positioned that the long sides of the rectangle are parallel to the warp of the fabric (see sketch below).

The thickness of the lines forming the sides of the rectangle must be 5 mm, and that of the diagonals 7 mm. The rectangle from the outer edge of the lines must be at least 8 cm in length and 5 cm in width.

The marks must be printed in a single colour contrasting with the colour of the fabric and must be indelible.
