COUNCIL REGULATION (EC) No 1984/2003

of 8 April 2003

introducing a system for the statistical monitoring of trade in bluefin tuna, swordfish and bigeye tuna within the Community

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 37 thereof,

Having regard to the proposal from the Commission ⁽¹⁾,

Having regard to the opinion of the European Parliament ⁽²⁾,

Whereas:

- (1) Since 14 November 1997, and following the adoption of Council Decision 86/238/EEC ⁽³⁾, the Community has been a Contracting Party to the International Convention for the Conservation of Atlantic Tunas signed in Rio de Janeiro on 14 May 1966, as amended by the Protocol annexed to the Final Act of the Conference of Plenipotentiaries of the States Parties to the Convention signed at Paris on 10 July 1984 (hereinafter called the 'ICCAT Convention').
- (2) The ICCAT Convention provides a framework for regional cooperation in the conservation and management of tuna stocks and tuna-like species in the Atlantic Ocean and adjacent seas through the establishment of an International Commission for the Conservation of Atlantic Tunas, hereinafter called the 'ICCAT', and the adoption by the latter of conservation measures which become binding on the contracting parties.
- (3) As part of the measures to regulate stocks of bigeye tuna and swordfish, improve the quality and reliability of statistical data and control the spread of illegal fishing, the ICCAT has adopted recommendations on the introduction of statistical document programmes for bigeye tuna and Atlantic swordfish. Since these recommendations have become binding on the Community, they need to be put into effect.
- (4) Council Decision 95/399/EC ⁽⁴⁾ approved the accession of the Community to the Agreement for the establishment of the Indian Ocean Tuna Commission. This Agreement constitutes a framework for strengthening international cooperation for the purpose of conserving and making rational use of Indian Ocean tuna and related species through the establishment of the Indian

Ocean Tuna Commission, hereinafter called the 'IOTC' and the adoption by the latter of resolutions on conservation and management in the area of competence of the IOTC which become binding on the contracting parties.

- (5) The IOTC has adopted a resolution establishing a statistical document programme for bigeye tuna. As this resolution has become binding on the Community, it needs to be put into effect.
- (6) The recommendations and resolution on a statistical document programme for bluefin tuna adopted previously by the ICCAT have been incorporated in Community law by Council Regulation (EC) No 858/94 of 12 April 1994 introducing a system for the statistical monitoring of trade in bluefin tuna (*Thunnus thynnus*) within the Community ⁽⁵⁾. In order to ensure that the provisions on statistical documents are more easily readable and applied uniformly, Regulation (EC) No 858/94 should be repealed and all the relevant provisions brought together in this Regulation.
- (7) The measures necessary for the implementation of this Regulation should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission ⁽⁶⁾,

HAS ADOPTED THIS REGULATION:

BLUEFIN TUNA STATISTICAL DOCUMENT INSTRUCTION SHEET

Pursuant to the 1992 ICCAT Recommendations, bluefin tuna dealers who import bluefin tuna into the territory of an ICCAT Contracting Party or at the first entry into a regional economic organisation, will be required to complete the appropriate sections of the document. Only complete and valid documents will guarantee that shipments of bluefin tuna will be allowed to enter the territory of Contracting Parties. Shipments of bluefin tuna that are accompanied by improperly documented Bluefin Tuna Statistical Documents (i.e. improperly documented means that the Bluefin Tuna Statistical Document is either missing from the shipment, incomplete, invalid or falsified) will be considered illegitimate shipments of bluefin tuna, that are contrary to ICCAT conservation efforts, and their entry will be suspended (PENDING RECEIPT OF A PROPERLY COMPLETED DOCUMENT) into the territory of a Contracting Party or subject to administrative or other sanction.

Please use this instruction sheet as a guideline to complete that section of the Bluefin Tuna Statistical Document that applies to exporters, importers, and Government validation. If a language other than English is used in completing the form, please add the English translation on the document. **Note:** if a bluefin tuna product is exported directly to Japan, without first going through an intermediate country, all fish can be identified on one document. However, if the bluefin tuna product is exported through an intermediate country (i.e. a country other than the country which is the final destination of the product), separate documents must be prepared for different final destinations or each fish may be accompanied by a separate document to identify any possible separation of shipments by an intermediate country. The import of fish parts other than the meat (i.e. head, eyes, roe, guts, tails) may be allowed without the document.

INSTRUCTIONS

DOCUMENT No: Block for the issuing country to designate a country coded document number.

- (1) **FLAG COUNTRY:** Fill in the name of the country of the vessel that harvested the bluefin tuna in the shipment and issued this document. According to the ICCAT Recommendation, only the flag State of the vessel that harvested the bluefin tuna in the shipment can issue this document.
- (2) **NAME OF VESSEL AND REGISTRATION No (when available):** Fill in the name and registration number of the vessel that harvested the bluefin tuna in the shipment. When tag numbers are provided in section 5, this section need not be filled in.
- (3) **TRAPS (if applicable):** Fill in the name of the trap that harvested the bluefin tuna in the shipment.
- (4) **POINT OF EXPORT:** Identify the city, state or province, and country from which the bluefin tuna was exported.
- (5) **DESCRIPTION OF FISH:** The exporter must provide, to the highest degree of accuracy, the following information. **Note:** one row should describe one product type.

 - (2) *Gear code:* identify the gear type which was used to harvest the bluefin tuna using the list below. For OTHER type, describe the type of gear.
 - (3) *Area of catch:* identify the general area of the ocean in which the bluefin tuna was harvested (i.e. east, west Atlantic, Mediterranean (see map 4 below), Pacific).
 - (4) *Net product weight in kg.*
 - (5) *Country coded tag number (if applicable).*
- (6) **EXPORTER CERTIFICATION:** The person or company exporting the bluefin tuna shipment must provide his/her name, address, signature, date the shipment was exported, and dealer licence number (if applicable).
- (7) **GOVERNMENT VALIDATION:** Fill in the name and full title of the official signing the document. The official must be in the employment of the competent Government authority of the flag State of the vessel that harvested the bluefin tuna appearing on the document. This requirement may be waived according to the ICCAT RESOLUTION CONCERNING VALIDATION BY A GOVERNMENT OFFICIAL OF THE BLUEFIN TUNA STATISTICAL DOCUMENT.
- (8) **IMPORTER CERTIFICATION:** The person or company that imports the bluefin tuna must provide his/her name, address, signature, date the bluefin tuna was imported, licence number (if applicable) and final point of import. ICCAT SWORDFISH STATISTICAL DOCUMENT INSTRUCTION SHEET

Pursuant to the 2001 ICCAT Recommendation, swordfish imported into the territory of a Contracting Party or upon first entry into a regional economic organisation must be accompanied by an ICCAT Swordfish Statistical Document (SWD) beginning 1 January 2003. Swordfish dealers who export or import from all ocean areas will be required to complete the appropriate sections of the SWD. Only complete and valid documents will guarantee that shipments of swordfish will be allowed to enter the customs territory of Contracting Parties (e.g. Japan, Canada, United States, Spain, etc.). Improperly documented swordfish shipments (i.e. the SWD is either missing from the shipment, incomplete, invalid or falsified) will be considered illegitimate and contrary to ICCAT conservation efforts. Entry of improperly documented swordfish will be suspended (PENDING RECEIPT OF A PROPERLY COMPLETED DOCUMENT) into the customs territory of a Contracting Party or subject to administrative or other sanctions.

Please use the instructions below as a guide to complete the sections that apply to exporters, importers, and Government validation. If a language other than English is used for description, please add an English translation either on the SWD or on a separate paper. **Note:** If a swordfish product is exported directly from the harvesting country/entity/fishing entity to a Contracting Party without going through an intermediate country/entity/fishing entity all fish can be identified on one document. However, if the swordfish is exported through an intermediate country/entity/fishing entity (i.e. a country/entity/fishing entity other than the country/entity/fishing entity which is the final destination of the product), separate documents must be prepared for fish destined for different final destinations, or only one fish may be identified on a document to cope with any possible separation in an intermediate country/entity/fishing entity. Import of swordfish parts other than meat (i.e. head, eyes, roe, guts, tails) may be allowed entry without an accompanying SWD.

DOCUMENT No: This block is for the country/entity/fishing entity to designate a country coded document number.

- (1) **FLAG COUNTRY/ENTITY/FISHING ENTITY:** Fill in the name of the country/entity/fishing entity of the vessel that harvested the swordfish in the shipment and issued this document. According to the ICCAT Recommendation, only the flag State of the vessel that harvested the swordfish in the shipment or, if the vessel is operating under a chartering arrangement, the exporting State, can issue this document.
- (2) **POINT OF EXPORT:** Enter the city and state or province, and country/entity/fishing entity from which the swordfish was exported.
- (3) **AREA OF CATCH:** Check the area of catch. (In case of (d) or (e) checked, items 4 and 5 need not be completed).
- (4) **DESCRIPTION OF FISH:** The exporter must provide, to the highest degree of accuracy, the following information. (**Note:** one row should describe one product type.) (1) Product type: identify the type of product being shipped as either FRESH or FROZEN, and in ROUND, GILLED AND GUTTED, DRESSED, FILLET, STEAK or OTHER form. For OTHER, describe the type of products in the shipment. (2) Name of vessel and registration No: fill in the name and registration number (if available) of the vessel that harvested the swordfish. If product in shipment is from more than one vessel, list all vessels whose products are included in the shipment. (3) Gear code: identify the gear type which was used to harvest the swordfish using the listed codes. (4) Net product weight in kg.
- (5) **EXPORTER CERTIFICATION:** The person or company exporting the swordfish shipment must provide his/her name, signature, address, date the shipment was exported, and dealer licence number (if applicable). (The net weight of the shipment must also be entered in kg in this session).
- (7) **IMPORTER CERTIFICATION:** The person or company that imports swordfish must provide his/her name, signature, address, date the swordfish was imported, licence number (if applicable), and the final point of import. ICCAT BLUEFIN TUNA RE-EXPORT CERTIFICATE INSTRUCTION SHEET

Under the framework of the ICCAT Bluefin Tuna Statistical Document Programme, a request for the establishment of a system enabling re-export was growing recently. In 1997 a Recommendation was adopted to implement the ICCAT Bluefin Tuna Statistical Document Programme for Re-export. Pursuant to this Recommendation, bluefin tuna dealers who import re-exported*1 bluefin tuna to Japan will be required to submit an ICCAT bluefin tuna re-export certificate*2 to be validated by a Government official of the intermediate country or area*3 or by a recognised institution, such as a chamber of commerce and industry, accredited by the Government of the intermediate country or area. A copy of the original Bluefin Tuna Statistical Document (BTSD) accompanying the bluefin tuna at the time of importation must be attached to the re-export certificate. The copy of the original BTSD so attached must be verified by a Government official of the intermediate country or area, or by a recognised institution, such as a chamber of commerce and industry, accredited by the Government of the intermediate country or area. When re-exported bluefin tuna are again re-exported*4, all copies of documents, including a verified copy of a BTSD and the re-export certificate which accompanied that bluefin tuna, must be attached to a new re-export certificate to be validated by a Government official of the last intermediate country or area, or by a recognised institution, such as a chamber of commerce and industry, accredited by the Government of the last intermediate country or area. Only bluefin tuna accompanied by a complete and valid re-export certificate will be allowed to enter Japan. Shipments of re-exported bluefin tuna accompanied by an improperly documented*5 re-export certificate will be considered illegitimate shipments of re-exported bluefin tuna that are contrary to ICCAT conservation efforts, and their entry into Japan will be suspended pending receipt of a properly documented re-export certificate.

NOTE:

(*1) 'Re-exported' means that bluefin tuna passes through a country or an area (tax-exempted areas are excluded) after being exported from the flagship country or the area (tax-exempted areas are excluded) of the fishing vessel which has caught that bluefin tuna.

(*2) Hereinafter called 're-export certificate'.

(*3) 'An intermediate country or area' means a country or an area through which bluefin tuna pass after being exported from the flagship country or the area (tax-exempted areas are excluded) of the fishing vessel which has caught that bluefin tuna.

(*4) Re-export of bluefin tuna from one Member State of the European Union to another is exempted.

(*5) 'Improperly documented' means that the re-export certificate is either missing from the shipment, incomplete, invalid or falsified.

Please use this instruction sheet as a guideline to complete that section of the Bluefin Tuna Re-export Certificate that applies to exporters, importers, and Government validation. If a language other than English is used in completing the form, please add the English translation on the certificate. **Note:** if a bluefin tuna product is re-exported directly to Japan, without first going through an intermediate country/entity/fishing entity, all fish can be identified on one certificate. However, if the bluefin tuna product is re-exported through an intermediate country/entity/fishing entity (i.e. a country/entity/fishing entity other than the country/entity/fishing entity which is the final destination of the product), a separate certificate must be prepared for different final destinations or each fish may be accompanied by a separate certificate to identify any possible separation of shipments by an intermediate country/entity/fishing entity. The import of fish parts other than the meat (i.e. head, eyes, roe, guts, tails) may be allowed without the certificate.

INSTRUCTIONS
