ANTARCTIC

Area of CCAMLR

These TACs, adopted by CCAMLR, are not allocated to the members of CCAMLR and hence the Community share is undetermined. Catches are monitored by the Secretariat of CCAMLR, who will communicate when fishing must cease due to TAC exhaustion.

Species:	Blackfin icefish <i>Chaenocephalus aceratus</i>	Zone:	FAO 48.3 AntarcticSSI/F483.
TAC	2 200 ^a		

a TAC to cover by-catches in any directed fishery. Wherever this by-catch TAC is exhausted, the directed fishery should be closed.

Species:	Unicorn icefish <i>Channichthys rhinoceratus</i>	Zone:	FAO 58.5.2 AntarcticLIC/ F5852.
TAC	150 ^a		

a TAC to cover by-catches in the fisheries for *Dissostichus eleginoides* and *Champscephalus gunnari*. Wherever this by-catch TAC is exhausted, the corresponding fisheries should be closed.

Species:	Antarctic icefish <i>Champscephalus gunnari</i>	Zone:	FAO 48.3 AntarcticANI/ F483.
TAC	2 887 ^a		

a This TAC is applicable for the period 1 December 2003 to 30 November 2004. Fishing for this stock during the period 1 March to 31 May 2004 shall be limited to 722 tonnes.

Species:	Antarctic icefish <i>Champscephalus gunnari</i>	Zone:	FAO 58.5.2 Antarctic^bANI/ F5852.
TAC	292 ^a		

a This TAC is applicable for the period 1 December 2003 to 30 November 2004.

b For the purpose of this TAC, the area open to the fishery is defined as that portion of FAO statistical division 58.5.2 that lies within the area enclosed by a line:

- (a) starting at the point where the meridian of longitude 72°15'E intersects the Australia-France Maritime Delimitation Agreement Boundary then south along the meridian to its intersection with the parallel of latitude 53°25'S;
- (b) then east along that parallel to its intersection with the meridian of longitude 74°E;
- (c) then northeasterly along the geodesic to the intersection of the parallel of latitude 52°40'S and the meridian of longitude 76°E;
- (d) then north along the meridian to its intersection with the parallel of latitude 52°S;
- (e) then northwesterly along the geodesic to the intersection of the parallel of latitude 51°S with the meridian of longitude 74°30'E; and
- (f) then southwesterly along the geodesic to the point of commencement.

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

Species:	Antarctic toothfish <i>Dissostichus eleginoides</i>	Zone:	FAO 48.3 AntarcticTOP/F483.
TAC	4 420 ^{ab}		

a This TAC is applicable for long-line fishery in the period 1 May to 31 August 2004 and for pot fishery 1 December 2003 to 30 November 2004.

b Including 221 tonnes of skates and rays and 221 tonnes of *Macrorus* spp. as by-catch.

Species:	Antarctic toothfish <i>Dissostichus eleginoides</i>	Zone:	FAO 48.4 AntarcticTOP/F484.
TAC	28 ^{ab}		

a To be fished only with long-lines.

b This TAC is applicable during a fishing season defined as that applied in Sub-area 48.3, or until the catch limit for *Dissostichus eleginoides* in Sub-area 48.4 is reached, or until the catch limit for *Dissostichus eleginoides* in Sub-area 48.3, as specified above, is reached, whichever is sooner.

Species:	Antarctic toothfish <i>Dissostichus eleginoides</i>	Zone:	FAO 58.5.2 AntarcticTOP/F5852.
TAC	2 873 ^{ab}		

a This TAC is applicable for the trawl fishery in the period 1 December 2003 to 30 November 2004 and for the long-line fishery in the period 1 May to 31 August 2004.

b This TAC is applicable for West of 79°20'E only. Fishing east of this meridian within this zone is prohibited (see Annex XIV).

Species:	Krill <i>Euphausia superba</i>	Zone:	FAO 48KRI/F48.
TAC	4 000 000 ^a		

a This TAC is applicable for the period 1 December 2003 to 30 November 2004.

Special conditions:

Within the limits of the abovementioned quota, no more than the quantities given below may be taken in the sub-areas specified:

Sub-area 48.1 (KRI/F481.)	1 008 000

TO BE LANDED UNSORTED FOR PURPOSES OTHER THAN
HUMAN CONSUMPTION (IN TONNES, LIVE WEIGHT)

All catch limitations set out in this Annex are considered as quotas for the purposes of Article 3 and shall, therefore, be subject to the rules set out in Regulation (EC) No 2847/93, in particular Articles 14 and 15 thereof.

ANNEX III

SPECIAL MEASURES CONCERNING NORTH SEA HERRING

1. Member States shall adopt special measures concerning the capture, sorting or landing of herring taken from the North Sea or from the Skagerrak and Kattegat with a view

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

- to ensuring the observance of catch limitations, in particular those set out in Annex II. These measures shall include, in particular:
- special control and inspection programmes;
 - fishing effort plans, including lists of authorised vessels and, where deemed necessary on the basis of quota exhaustion beyond the level of 70 %, limitations on the activity of authorised vessels;
 - control of trans-shipment and of practices which incur discarding;
 - where possible, temporary prohibition of fishing in areas where high by-catch rates of herring, in particular juveniles, are known to occur.
2. In the case of landings of herring unsorted from the remainder of the catch, Member States shall ensure that adequate sampling programmes are in place in order to monitor effectively all landings of by catches of herring. It shall be prohibited to land catches of fish containing unsorted herring in harbours where these sampling programmes are not in place.
 3. Commission inspectors shall, in accordance with Article 29 of Regulation (EEC) No 2847/93 and whenever the Commission deems it necessary for the purposes of points 1 and 2, carry out independent inspections to verify the implementation by the competent authorities of the sampling programmes and of the special measures mentioned in point 1.
 4. The Commission shall prohibit landings of herring if it is deemed that implementation of the measures mentioned in points 1 and 2 does not achieve a strict control of fishing mortality of herring in all fisheries.
 5. All landings of herring caught in ICES areas IIIa, IV and VIIId by vessels which carry on board only towed nets of mesh sizes equal to or greater than 32 mm, while taking these catches in these areas, will be counted against a relevant quota as defined in Annex I.
 6. All landings of herring caught in ICES areas IIIa, IV and VIIId by vessels which carry on board towed nets of mesh size less than 32 mm, while taking these catches in these areas, will be counted against a relevant quota as defined in Annex II. Herring landed by vessels operating within these conditions shall not be offered for sale for human consumption.

ANNEX IV

TRANSITIONAL TECHNICAL MEASURES

1. Type of gear authorised for cod fishery in the Baltic Sea
 - 1.1. Towed nets
 - 1.1.1. Without exit windows

Towed nets without an exit window shall be prohibited.

- 1.1.2. With exit windows

By way of derogation from the provisions of special selectivity devices in Annex V to Regulation (EC) No 88/98, the provisions in Appendix 1 to this Annex shall apply.

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

1.2. Gillnets

By way of derogation from the provisions of Annex IV to Regulation (EC) No 88/98, the minimum mesh size for gillnets shall be 110 mm.

The nets shall not exceed a maximum length of 12 km for vessels with an overall length of up to and including 12 m.

The nets shall not exceed a maximum length of 24 km for vessels with an overall length of more than 12 m.

The soaking time of the nets shall not exceed 48 hours counting from the time the nets are first put in the water to the time when the nets are fully recovered on board the fishing vessel.

2. By-catch of cod in the Baltic Sea

By way of derogation from the provisions of Article 3(4) of Regulation (EC) No 88/98, no undersized cod may be kept on board. However, by way of derogation from the provisions of Article 3(5) of that Regulation, the by-catch of cod taken when fishing for herring and sprat with mesh sizes of 32 mm or smaller shall not exceed 3 % by weight. Of this by-catch, no more than 5 % of undersized cod shall be kept on board.

By-catches of cod may not exceed 10 % when fishing for other species than herring and sprat with trawls and Danish seines other than those referred to in point 1.1.2.

3. Minimum size for cod

By way of derogation from the provisions laid down in Annex III to Regulation (EC) No 88/98, the minimum size for cod shall be 38 cm.

4. Summer ban for Baltic cod

Fishing for cod shall be prohibited in the Baltic Sea, the Belts and the Sound from 1 June to 31 August 2004 inclusive.

5. Closure of Bornholm Deep

Fishing shall be prohibited from 15 May to 31 August 2004 in the Bornholm Deep, in the maritime area defined by the lines connecting the following coordinates:

- latitude 55°30'N, longitude 15°30'E.
- latitude 55°30'N, longitude 16°30'E.
- latitude 55°00'N, longitude 16°30'E.
- latitude 55°00'N, longitude 16°00'E.
- latitude 55°15'N, longitude 16°00'E.
- latitude 55°15'N, longitude 15°30'E.
- latitude 55°30'N, longitude 15°30'E.

6. Technical conservation measures in the Skagerrak and in the Kattegat

Notwithstanding the conditions set out in Annex IV of Regulation (EC) No 850/98, the following rules shall apply in 2004:

- (a) A mesh size of 35 mm shall apply when fishing for prawns (*Pandalus borealis*);
- (b) A mesh size of 30 mm shall be used when fishing for argentine (*Argentina spp.*);

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

- (c) When fishing for whiting with a mesh size of 70 to 89 mm, the by-catches shall not exceed 30 % for the following species: cod, haddock, hake, plaice, witch, lemon sole, turbot, brill, flounder, megrim, dab, saithe and lobster;
- (d) When fishing for Norway lobster with a mesh size of 70 to 89 mm, the by-catches should not exceed 60 % for the following species: cod, haddock, hake, plaice, witch, lemon sole, turbot, brill, flounder, megrim, whiting, dab, saithe and lobster;
- (e) When fishing for prawns (*Pandalus borealis*) with a mesh size of 35 to 69 mm, the by-catches should not exceed 50 % for the following species: cod, haddock, hake, plaice, witch, lemon sole, turbot, brill, flounder, herring, mackerel, megrim, whiting, dab, saithe, Norway lobster and lobster;
- (f) In all fisheries other than those covered in (c), (d) and (e), using a mesh size below 90 mm, the by-catches should not exceed 10 % for the following species: cod, haddock, hake, plaice, witch, lemon sole, turbot, brill, flounder, mackerel, megrim, whiting, dab, saithe, Norway lobster and lobster.

7. Rockall Haddock box

All fishing, except with longlines, shall be prohibited in Community and in international waters in the box bounded by the following coordinates:

Point No	Latitude	Longitude
1	57°00'N	15°00'W
2	57°00'N	14°00'W
3	56°30'N	14°00'W
4	56°30'N	15°00'W

8. Fishing for herring in area IIa (EC waters)

Fishing with towed gear of a mesh size less than 54 mm or with purse seines in area IIa (EC waters) is allowed only between 1 March and 15 May.

9. Technical conservation measures in the Mediterranean

The fisheries currently operating under the derogations, provided for in Article 3(1) and (1a) and Article 6(1) and (1a) of Regulation (EC) No 1626/94, may temporarily continue their activity in 2004.

10. Closure of an area for sandeel fisheries

It shall be prohibited to land or retain on board sandeels caught within the geographical area bounded by the east coast of England and Scotland, and a line sequentially joining the following coordinates:

- the east coast of England at latitude 55°30'N,
- latitude 55°30'N, longitude 1°00'W,
- latitude 58°00'N, longitude 1°00'W,
- latitude 58°00'N, longitude 2°00'W,
- the east coast of Scotland at longitude 2°00'W,
- the east coast of Scotland at longitude 2°00'W,

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

However, a limited fishery will be allowed in order to monitor the sandeel stock in the area and the effects of the closure.

11. Specific provisions for the Gulf of Riga

11.1. Special fishing permit

1. In order to exercise fishing activities in the Gulf of Riga vessels shall hold a special fishing permit issued in accordance with Article 7 of Regulation (EC) No 1627/94.
2. Member States shall ensure that vessels to which a special fishing permit referred to in paragraph 1 has been issued are included in a list containing their name and internal registration number to be provided to the Commission by each Member State.

Vessels included in the list shall satisfy the following conditions:

- (a) the total engine power (kW) of the vessels within the lists must not exceed that observed for each Member State in the years 2000-2001 in the Gulf of Riga;
- (b) the engine power of a vessel must not exceed 221 kilowatts (kW) at any time.

11.2. Replacement of vessels or engines

1. Any individual vessel on the list referred to in point 11.1.2 may be replaced by another vessel or vessels, provided that:
 - (a) such replacement will not lead to an increase in the total engine power as indicated in point 11.1.2 (a) in the Member State concerned; and
 - (b) the engine power of any replacement vessel does not exceed 221 kW at any time.
2. An engine of any individual vessel included in the list referred to in point 11.1.2 may be replaced, provided that:
 - (a) the replacement of an engine does not lead to the vessel's engine power exceeding 221 kW at any time; and
 - (b) the power of the replacement engine is not such that replacement will lead to an increase in the total engine power as indicated in point 11.1.2 (a) for the Member State concerned.

12. Weighing procedures for herring, mackerel and horse mackerel

- 12.1. The following procedures shall apply to landings in the European Community by Community and third country vessels of quantities per landing exceeding 10 tonnes of herring, mackerel, and horse mackerel, or a combination thereof, taken in:
for herring, ICES Sub-areas I, II and Divisions III a North, IV, Vb, VI and VII b, c, d,
for mackerel and horse mackerel, in ICES Sub-area IIa and Divisions III a, b, d, IV, VI and VII.

- 12.2. Landings referred to in point 12.1 are only permitted in designated ports.

- 12.3. Each Member State concerned shall transmit to the Commission before 15 January 2004 the list of designated ports in which landings of herring, mackerel and horse mackerel may take place and, within 30 days thereafter, inspection and surveillance procedures for those ports including the terms and conditions for recording and reporting the quantities of any of the species and stocks referred to in point 12.1

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

within each landing. The Commission shall transmit this information as well as ports designated by third countries to all Member States concerned.

12.4. The master of a fishing vessel referred to in point 12.1 shall inform the competent authorities of the Member State in which the landing is to be made, at least four hours in advance of entry to port of landing of the Member State concerned, of:

- (a) the port he intends to enter;
- (b) the estimated time of arrival at that port;
- (c) the quantities in kilograms live weight by species retained on board.

The competent authorities of the Member State concerned shall require that the discharge does not commence until authorised to do so.

12.5. By way of derogation from the provisions of point 4.2 of Annex IV to Regulation (EEC) No 2807/83 the master of a fishing vessel shall submit, immediately upon arrival to port, the relevant page or pages of the logbook as demanded by the competent authority at the port of landing.

The quantities retained on board, notified prior to landing as referred to in point 12.4(c), shall be equal to the quantities recorded in the logbook after its completion.

By way of derogation from the provisions of Article 5(2) of Regulation (EEC) No 2807/83 the permitted margin of tolerance in estimates recorded into the logbook of the quantities in kilograms of fish retained on board of vessels shall be 7 %.

12.6. All buyers purchasing fresh fish shall weigh all quantities received. The weighing shall be carried out prior to the fish being sorted, processed, held in cold storage, transported from the port of landing or resold.

When determining the weight any deduction for water shall not exceed 2 %.

In addition to the obligations set out in Article 9(1) and (2) of Regulation (EC) No 2847/93 the processor or buyer of the quantities landed shall submit to the competent authorities of the Member State concerned a copy of the invoice or a document replacing it, as referred to in Article 22(3) of the sixth Council Directive 77/388/EEC on the harmonisation of the laws of the Member States relating to turnover taxes — Common system of value added tax: uniform basis of assessment⁽¹⁾. Any such invoice or document shall include the information required by the provisions of Article 9(3) of Regulation (EC) No 2847/93 and shall be submitted on demand or within 48 hours of the completion on the weighing.

12.7. All buyers or holders of frozen fish shall weigh the quantities landed prior to the fish being processed, held in cold storage, transported from the port of landing or resold. Any tare weight equal to the weight of boxes, plastic or other containers in which the fish to be weighed is packed may be deducted from the weight of any quantities landed.

Alternatively, the weight of frozen fish packed in boxes may be determined by multiplying the average weight of a representative sample based on weighing the contents removed from the box and without plastic packaging whether or not after the thawing of any ice on the surface of the fish. Member States shall notify before 31 January 2004 their sampling methodology, which shall be approved by the Commission.

12.8. The competent authorities of a Member State shall ensure that the fish is weighed in the presence of a controller.

13. Restrictions on fishing for Cod in West of Scotland

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

Until 31 December 2004, it shall be prohibited to conduct any fishing activity within the area enclosed by sequentially joining with straight lines the following geographical coordinates:

59°05'N, 06°45'W
 59°30'N, 06°00'W
 59°40'N, 05°00'W
 60°00'N, 04°00'W
 59°30'N, 04°00'W
 59°05'N, 06°45'W.

14. Mesh size ranges, target species and required catch percentages applicable to the use of a single mesh size range in towed gears in the Skagerrak and the Kattegat

By way of derogation from the provisions of towed gears in Skagerrak and Kattegat as laid down in Annex IV to Regulation (EC) No 850/98, the provisions in Appendix 2 to this Annex shall apply from 1 March 2004.

15. Purse seines in the Eastern Pacific Ocean (Regulatory Area of the Inter-American Tropical Tuna Commission (IATTC))

The fishing by purse-seine vessels for Yellowfin Tuna (*Thunnus albacares*), Bigeye Tuna (*Thunnus obesus*) and Skipjack Tunas (*Katsuwonus pelamis*) shall be prohibited from 1 August to 11 September 2004, in the area defined by the following limits:

the Pacific coastlines of the Americas,
 longitude 150° W,
 latitude 40° N,
 latitude 40° S.

As of the date of application of this Regulation purse seiners fishing for tuna in the Regulatory Area of the Inter-American Tropical Tuna Commission shall retain on board all the bigeye, skipjack and yellowfin tuna caught, except fish considered unfit for human consumption for reasons other than size. However, this provision shall not apply to the final set of a trip.

Purse seine vessels shall promptly release unharmed, to the extent practicable, all sea turtles, sharks, billfishes, rays, mahi-mahi and other non-target species. Fishermen are encouraged to develop, and use techniques, and equipment to facilitate the rapid and safe release of any such animals.

The following specific measures to encircled or entangled sea turtles shall apply:

whenever a sea turtle is sighted in the net, all reasonable efforts should be made to rescue the turtle before it becomes entangled in the net, including, if necessary, the deployment of a speedboat,
 if a turtle is entangled in the net, net roll should stop as soon as the turtle comes out of the water and should not start again until the turtle has been disentangled and released,
 if a turtle is brought on board a vessel, all appropriate methods to assist in the recovery of the turtle should be made before returning it to the water,
 tuna-fishing vessels shall be prohibited from disposing of salt bags or any other type of plastic rubbish at sea.

16. Technical conservation measures in the Irish Sea

The technical conservation measures referred to in Articles 2, 3 and 4 of Regulation (EC) No 254/2002 shall temporarily apply in 2004.

17. Special Conditions for fishing for Haddock in the North Sea

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

- (a) For the purposes of this point, ‘cod protection area’ means that part of ICES Divisions IV included in the following ICES rectangles that lies further than 12 nautical miles from coastal baselines:
- 49E6, 48E6, 47E6, 46E6, 50E7, 49E7, 48E7, 50E8, 49E8, 51E9, 50E9, 49E9, 48E9, 47E9, 50F0, 49F0, 48F0, 47F0, 51F1, 50F1, 49F1, 50F2, 49F2, 46F3, 45F3, 45F4, 44F4, 43F5, 43F6, 43F7, 42F7, 38E9, 37E9, 37F0, 46E8, 45E8, 47E9, 46E9, 45E9, 44E9, 47F0, 46F0, 45F0, 44F0, 47F1, 46F1, 45F1, 44F1.
- (b) Vessels to which a Member State has issued a special fishing permit for directed fishing for haddock in accordance with Article 7 of Regulation (EC) No 1627/94 shall comply with the following conditions:
- (i) notify national authorities of the place and time at which any landing of fish will be made at least four hours before such a landing occurs unless landings are made within the periods specified by the Member State;
 - (ii) make such landings exclusively at ports that shall be designated by the flag Member State;
 - (iii) submit the relevant logbooksheet(s) to the national authorities prior to the commencement of the discharge of the catches retained on board;
 - (iv) not discharge any fish retained on board until permission to do so has been given by the relevant national authorities;
 - (v) retain on board no more than 5 % of cod as a proportion of the live weight of marine organisms on the vessel;
 - (vi) not trans-ship any fish at sea;
 - (vii) fish exclusively outside the cod protection area;
 - (viii) not transit within the cod protection area unless the fishing gear on board is securely lashed and stowed;
 - (ix) not to carry on board or deploy trawl gear of less than 100 mm mesh size.
- (c) Special fishing permits referred to in sub-point (b) shall not be issued for a period longer than three months.
- (d) No special fishing permit shall be issued that is valid in the period of three months subsequent to the date of expiry of a previous special fishing permit held by the same vessel if any of the following events have occurred in the period of validity of the permit:
- (i) upon inspection by the national fisheries inspection service, the vessel is found to have more than 5 % of cod on board, measured in live weight as a percentage of all fish on board the vessel;
 - (ii) the vessel fails to provide a VMS report or, in the event of a failure of the VMS system, a manual position report or provides a false position report;
 - (iii) upon inspection of a landing by the national fisheries inspection service, the vessel is found to have landed or to have retained on board more than 10 % more fish of any species (in live weight) than the quantity of that species declared in the logbooksheet(s) submitted under paragraph 17(b)(iii);

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

- (iv) the vessel is observed by a national fisheries inspection service to be transshipping to another vessel at sea;
- (v) the vessel is observed by a national fisheries inspection service to be landing fish without having received the permission to do so referred to in paragraph 17(b)(iv);
- (vi) the vessel is observed by a national fisheries inspection service to be within the cod protection area when its gear is not lashed and stowed;
- (vii) upon inspection by a national fisheries inspection service, the vessel is found to be in contravention of the provisions of Council Regulation (EC) No 850/98;
- (viii) the vessel is observed by a national fisheries inspection service to be discharging fish without having previously submitted the logbooksheet(s) as specified in paragraph 17(b)(iii).

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

Appendix 1 to Annex IV

Specifications of top window codend 'BACOMA'

Specification of 110 mm, measured as inner diameter opening, square mesh window in a codend with a 105 mm or larger mesh size in trawls, Danish seines or similar towed nets.

The window shall be a rectangular section of netting in the codend. There shall be only one window. The window shall not be obstructed in any way by either internal or external attachments.

Size of the codend, extension piece and the rear end of the trawl

The codend shall be constructed of two panels of equal size, joined together by selvages one on each side.

The carrying on board of a net having more than 100 open diamond meshes in any circumference of the codend, excluding the joining or the selvages shall be prohibited.

The number of open diamond meshes, excluding those in the selvages, at any point on any circumference of any extension or lengthening piece shall not be less or more than the maximum number of meshes on the circumference of the front end of the codend *stricto sensu* and the rear end of the tapered section of the trawl excluding meshes in the selvages (*Figure 1*).

Location of the window

The window shall be inserted into the top panel of the codend. The window shall terminate not more than 4 meshes from the codline, inclusive of the hand braided row of meshes through which the codline is passed (*Figure 2*).

Size of the window

The width of the window, expressed in number of mesh bars, shall be equal to the number of open diamond meshes in the top panel divided by two. If necessary, it will be allowed to maintain at the most 20 % of the number of open diamond meshes in the top panel divided evenly on the both sides of the window panel (*Figure 3*).

Length of the window shall be at least 3,5 metres.

The netting of the window

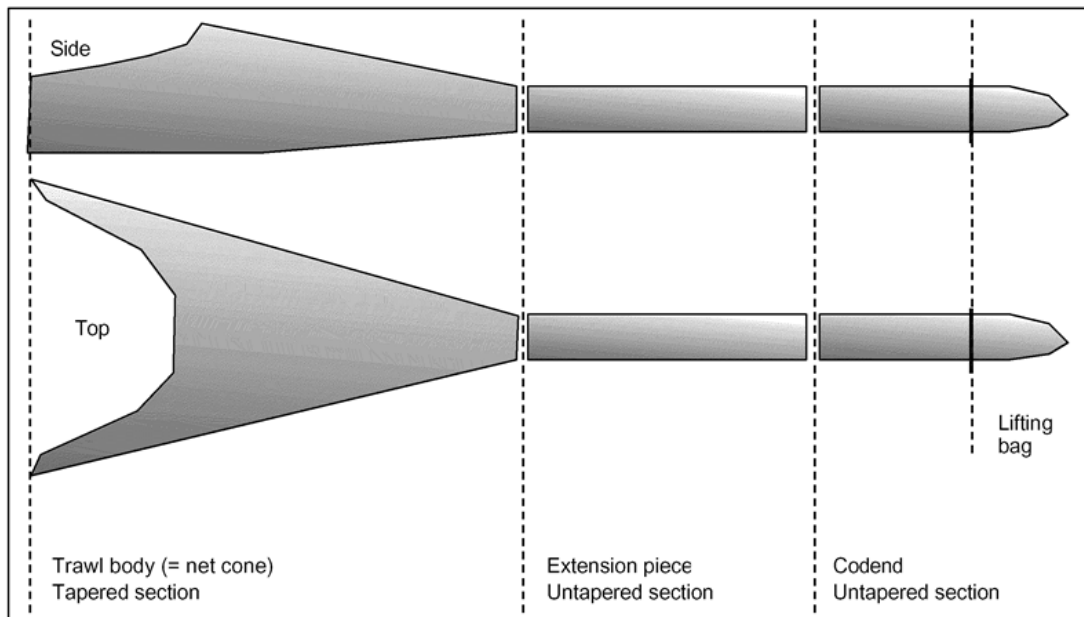

The meshes shall have a minimum mesh opening of 110 millimetres. The meshes shall be square meshes i.e. all four sides of the window netting will be cut all bars. The netting shall be mounted such that the bars run parallel and perpendicular to the length of the codend. The netting shall be knotless braided single twine or a netting with similar proven selective properties. The diameter of the single yarn shall be at least 4,9 millimetres.

Other specification

The mounting specifications are defined in Figures 4a, 4b and 4c. The length of the lifting strap shall not be less than 4 m.

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

Trawl gear can be divided into three different sections according to shape and function. The trawl body is always a tapered section often between 10 and 40 m long. The extension piece is an untapered section normally manufactured of either one or two pieces of 49,5 mesh long nets giving a stretched length between 6 or 12 m. The codend is also an untapered section often made of double twine in order to have a better resistance against heavy wearing. The codend length is often 49,5 meshes i.e. *circa* 6 metres although shorter codends (2-4) exists in smaller vessels. The part below the lifting strap is called a lifting bag.

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

The distance of the window panel from the codline is 4 meshes. There are 3,5 diamond meshes in the upper panel and one 0,5 mesh deep hand-braided 'codline' row.

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

Twenty percent of diamond meshes in the upper panel along a perpendicular row running from one selvedge to another may be maintained. For example (as in *Figure 3*) if the upper panel were 30 open meshes wide, 20 % of that would be 6 meshes. Then three open meshes are divided on both sides of the window panel. Consequently the width of the window panel then becomes 12 mesh bars ($30 - 6 = 24$ diamond meshes divided by two is 12 mesh bars).

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

ANNEX V

INTERIM FISHING EFFORT LIMITATION AND ADDITIONAL CONDITIONS FOR MONITORING, INSPECTION AND SURVEILLANCE IN THE CONTEXT OF CERTAIN FISH STOCKS RECOVERY

General provisions

1. The conditions laid down in this Annex shall apply to Community fishing vessels of length overall equal to or greater than 10 metres.
2. For the purposes of this Annex, the following geographical area shall apply:
 - (a) Kattegat (ICES Division IIIa south),
Skagerrak and North Sea (ICES Divisions IVa,b,c, IIIa north and IIa EC),
West of Scotland (ICES Division VIa),
Eastern Channel (ICES Divisions VIId), and
Irish Sea (ICES Division VIIa).
 - (b) For vessels notified to the Commission as being equipped with appropriate vessel monitoring systems, the following definition for the area West of Scotland, ICES Division VIa shall apply:

ICES Division VIa excluding that part which lies to the west of a line drawn by sequentially joining with straight lines the following geographical coordinates:

60°00'N, 04°00'W
 59°45'N, 05°00'W
 59°30'N, 06°00'W
 59°00'N, 07°00'W
 58°30'N, 08°00'W

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

58°00'N, 08°00'W
58°00'N, 08°30'W
56°00'N, 08°30'W
56°00'N, 09°00'W
55°00'N, 09°00'W
55°00'N, 10°00'W
54°30'N, 10°00'W.

3. For the purposes of this Annex, a day present within the area and absent from port shall be:
- (a) the 24-hour period between 00:00 Hrs of a calendar day and 24:00 Hrs of the same calendar day or any part of such a period during which a vessel is present within either of the areas defined in point 2 and absent from port; or
 - (b) any continuous period of 24 hours as recorded in the EC logbook during which a vessel is present within either of the areas defined in point 2 and absent from port or any part of any such time period.

A Member State which wishes to employ the definition of a day present within the area and absent from port laid down under subpoint (b) shall notify the Commission of the means of monitoring the activities of a vessel to ensure compliance with the conditions laid down in subpoint (b).

4. For the purpose of this Annex, the following groupings of fishing gears shall apply:
- (a) demersal trawls, seines or similar towed gears of mesh size equal to or greater than 100 mm except beam trawls;
 - (b) beam trawls of mesh size equal to or greater than 80 mm;
 - (c) static demersal nets including gill nets, trammel nets and tangle nets;
 - (d) demersal longlines;
 - (e) demersal trawls, seines or similar towed gears of mesh size between 70 mm and 99 mm except beam trawls with mesh size between 80 mm and 99 mm;
 - (f) demersal trawls, seines or similar towed gears of mesh size between 16 mm and 31 mm except beam trawls.

Fishing effort

5. Each Member State shall ensure that, when carrying on board any of the fishing gears referred to in point 4, fishing vessels flying its flag and registered in the Community shall be present within the area and absent from port for no more than the number of days specified in point 6.
- 6.
- (a) The maximum number of days in any calendar month for which a vessel may be present within the area and absent from port having carried on board any one of the fishing gears referred to in point 4 is shown in Table I.

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

- (b) A Member State may aggregate the days present within the area and absent from port in Table I within management periods of up to eleven calendar months. Member States shall notify the Commission of their intention to aggregate management periods before the beginning of any aggregated period.
- (c) An additional number of days on which a vessel may be present within the area and absent from port when carrying on board any of the gears referred to in point 4 may be allocated to Member States by the Commission on the basis of the achieved results of decommissioning programmes that have taken place since 1 January 2002.

Member States wishing to benefit from such allocations shall submit a request to the Commission with reports containing the details of their completed decommissioning programmes.

On the basis of such a request the Commission, following consultation with Member States, may amend the number of days defined in point (a) for that Member State.

- (d) Derogations from the number of days present within the area and absent from port shown in Table I may be allocated to vessels by Member States under the conditions shown in Table II.

Member States wishing to allocate these additional days shall notify the Commission with details of the vessels that will benefit and with details of their track records at least two weeks before the additional days are to be granted.

^b Notwithstanding this provision, the derogation shall also apply to a maximum of six vessels flying the flag of France and registered in the Community of length overall equal to or greater than 15 metres. A list of such vessels shall be submitted to the Commission before 1 February 2004.

Status: Point in time view as at 19/12/2003.

2(a) Kattegat (ICES Division IIIa south), North Sea	4(c) gear of mesh size equal to or greater than 220 mm	Less than 5 % cod and more than 5 % of turbot and lumpfish	Up to 16 days
2(a) Eastern channel ICES Division VIII	4(c) gear of mesh size equal to or less than 110 mm	Vessels of less than 15 m in length with landings of over 35 % unregulated species and absent from port for no more than 24 hours ^b	Up to 20 days

a As verified by the EC logbook — average annual landing in live weight.

b Notwithstanding this provision, the derogation shall also apply to a maximum of six vessels flying the flag of France and registered in the Community of length overall equal to or greater than 15 metres. A list of such vessels shall be submitted to the Commission before 1 February 2004.

If this higher allocation of days is given to a vessel, as a result of its low percentage track record of catch of certain species, that vessel shall not at any time retain more than the percentage of those species on board as shown in Table II. When this condition is not met by a vessel, that vessel shall with immediate effect no longer be entitled to the additional days.

- (e) Upon the request of a Member State the Commission may allocate a derogation under the first line in Table II in respect of the saithe fishery without the requirement for a track record in previous years of fishing with less than 5 % by catch. Along with its request the Member State shall submit details of the vessels that would benefit, with evidence of their quota holding and planned activity. The request shall be submitted to the Commission at least four weeks before the beginning of the first management period in which the days are to be allocated.

Any vessel allocated extra days under this provision may not at any time retain on board more than 5 % of each of the following species: cod, sole and plaice.

Inspection and surveillance at sea and in port by the competent authorities shall be undertaken for verification of compliance with the above requirement. Any vessel found to be not complying with the requirement shall with immediate effect no longer be entitled to the additional days.

- (f) In recognition of the area closure in the Irish Sea for the protection of spawning fish and the assumed reduction in fishing mortality on cod, an additional two days will be available for vessels in groupings of fishing gears 4a and 4b which spend more

- (f) In recognition of the area closure in the Irish Sea for the protection of spawning fish and the assumed reduction in fishing mortality on cod, an additional two days will be available for vessels in groupings of fishing gears 4a and 4b which spend more than half of their allocated days in a given management period fishing in the Irish Sea (ICES Division VIIa).
7. Before the first day of each management period the master of a vessel or his representative shall notify to the authorities of the flag Member State which gear or gears he intends to use during the forthcoming management period. Until such notification is provided the vessel will not be entitled to fish within the areas defined in point 2.

Where the master of a vessel or his representative notifies the use of two of the groupings of fishing gears defined under point 4, the total number of days available during the forthcoming management period shall be no more than half the sum of the days to which the vessel is eligible for each gear, rounded down to the nearest whole day. It shall not be permitted to deploy either of the gears concerned for more days than the number of days laid down for that gear in Table I.

The option to use two gears shall only be available if the following additional monitoring arrangements are met:

- During a given trip the fishing vessel may carry on board only one fishing gear;
- Before any trip the master of a vessel or his representative shall give prior notice to the competent authorities of the type of fishing gear that is to be carried on board.

Inspection and surveillance at sea and in port by the competent authorities shall be undertaken for verification of compliance with the above two requirements. Any vessel found to be not complying with these requirements shall with immediate effect no longer be permitted to use two groupings of fishing gears.

8. A vessel which is present within any of the areas defined in point 2 and carrying on board any one of the fishing gears referred to in point 4 may not simultaneously carry on board any of the other gears referred to in point 4.
- 9.
- (a) In any given management period a vessel that has used the number of days present within the area and absent from port to which it is eligible shall remain in port or out of any area referred to in point 2 for the remainder of the management period.
- (b) In any given management period a vessel may undertake non-fishing related activities, without that time being counted against its days allocated under point 6, provided that the vessel first notifies the Member State of its intention to do so, the nature of its activity and that it surrenders its fishing licence for this time. Such vessels shall not carry any fishing gear or fish on board during that time.
- (a) In any given management period a vessel that has used the number of days present within the area and absent from port to which it is eligible shall remain in port or out of any area referred to in point 2 for the remainder of the management period.
- (b) In any given management period a vessel may undertake non-fishing related activities, without that time being counted against its days allocated under point 6, provided that the vessel first notifies the Member State of its intention to do so, the nature of its activity and that it surrenders its fishing licence for this time. Such vessels shall not carry any fishing gear or fish on board during that time.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

- (a) A Member State may permit any of its fishing vessels to transfer days present within the area and absent from port to which it is eligible to another of its vessels for the same management period and within the same area provided that the product of the days received by a vessel multiplied by its engine power in kilowatts (kilowatt days) is equal to or less than the product of the days transferred by the donor vessel multiplied by the engine power in kilowatts of that vessel. The engine power in kilowatts of the vessels shall be that recorded for each vessel in the Community fishing fleet register.
- (b) The total number of days present within the area and absent from port transferred under sub-point (a) multiplied by the engine power in kilowatts of the donor vessel shall not be higher than the donor vessel's average annual days as verified by the EC logbook in the years 2001, 2002 and 2003, multiplied by the engine power in kilowatts of that vessel.
- (c) The transfer of days as described in sub-point (a) shall only be permitted between vessels operating within the same gear grouping and area categories referred to in point 6(a) and during the same management period.
- (d) No transfer of days from vessels benefiting from the allocation referred to in points 6(d), 6(e) and 7 is permitted.
- (e) On request from the Commission, Member States shall provide reports on the transfers that have taken place.
- (a) A Member State may permit any of its fishing vessels to transfer days present within the area and absent from port to which it is eligible to another of its vessels for the same management period and within the same area provided that the product of the days received by a vessel multiplied by its engine power in kilowatts (kilowatt days) is equal to or less than the product of the days transferred by the donor vessel multiplied by the engine power in kilowatts of that vessel. The engine power in kilowatts of the vessels shall be that recorded for each vessel in the Community fishing fleet register.
- (b) The total number of days present within the area and absent from port transferred under sub-point (a) multiplied by the engine power in kilowatts of the donor vessel shall not be higher than the donor vessel's average annual days as verified by the EC logbook in the years 2001, 2002 and 2003, multiplied by the engine power in kilowatts of that vessel.
- (c) The transfer of days as described in sub-point (a) shall only be permitted between vessels operating within the same gear grouping and area categories referred to in point 6(a) and during the same management period.
- (d) No transfer of days from vessels benefiting from the allocation referred to in points 6(d), 6(e) and 7 is permitted.
- (e) On request from the Commission, Member States shall provide reports on the transfers that have taken place.
- 11. A vessel with no track record of fishing in one of the areas defined in point 2 is allowed to transit across these areas provided that it has first notified its authorities of its intention to do so. While that vessel is within any of the areas defined in point 2 any fishing gears carried on board must be lashed and stowed in accordance with conditions laid down in Article 20(1) of Regulation (EEC) No 2847/93.
- 12. A Member State shall not permit fishing with any of the gears defined in point 4 in any area defined in point 2 by any of its vessels which have no record of such fishing

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

activity in the years 2001, 2002 or 2003 in that area unless it ensures that equivalent capacity, measured in kilowatts, is prevented from fishing in the regulated area.

Monitoring, inspection and surveillance

13. Notwithstanding Article 19a of Regulation (EEC) No 2847/93, Articles 19b, 19c, 19d, 19e and 19j of that Regulation shall apply to vessels deploying the fishing gears defined in point 4 and operating in the areas defined in point 2.
14. Member States may implement alternative control measures to ensure compliance with reporting obligations referred in point 13 of this Annex which are as effective and transparent as these reporting obligations. Such alternative measures shall be notified to the Commission before being implemented.
15. The master of a fishing vessel, or his representative, prior to any entry to port of a Member State after having been present in an area referred to in Table III with more than the quantities of any species indicated on that table, shall inform, at least four hours in advance of such entry, the competent authorities of that Member State of:
 - the name of the port,
 - the estimated time of arrival at that port,
 - the quantities in kilograms live weight for each species of which more than 50 kg is retained on board.
16. The competent authorities of a Member State in which a landing requiring pre-notification is to be made may require that the discharge does not commence until authorised by those authorities.

Table III — Landing quantities in tonnes by area and species above which special condition apply

PN

— Prior Notification as referred to in point 16.

DP

— Designated Port as referred to in point 17.

17. It is not permitted to land in excess of the quantities of any species referred to in Table III (under the DP heading) for a fishing vessel having been in the area defined in the table outside a designated port.

Each Member State shall transmit to the Commission within 15 days of the date of entry into force of this Regulation the list of designated ports and, within 30 days thereafter, inspection and surveillance procedures including, for those ports, the terms and conditions for recording and reporting the quantities of any of the species and stocks referred to in Article 12 of this Regulation within each landing. The Commission shall transmit this information to all Member States.

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

18. By way of derogation from Article 5(2) of Commission Regulation (EEC) No 2807/83 of 22 September 1983 laying down detailed rules for recording information on Member States' catches of fish⁽²⁾, the permitted margin of tolerance, when estimating quantities, in kilograms retained on board of vessels referred to in point 13 shall be 8 % of the logbook figure.
19. It shall be prohibited to retain on board a fishing vessel in any container any quantity of cod mixed with any other species of marine organism. Containers with cod shall be stowed in the hold in such a way that they are kept separate from other containers.
20. The competent authorities of a Member State may require that any quantity of cod caught in any of the areas specified in point 2 and first landed in that Member State is weighed in the presence of controllers before being transported from the port of first landing. For cod first landed in a port designated under point 17, representative samples, amounting to at least 20 % of the landings, shall be weighed in the presence of controllers authorised by the Member States before they are offered for first sale and sold. To this end, the Member States shall submit to the Commission, within one month of the date of entry into force of this Regulation, details of the sampling regime to be employed.
21. By way of derogation from Article 13 of Regulation (EEC) No 2847/93, quantities greater than 50 kg of any species referred to in Article 12 of this Regulation which are transported to a place other than that of landing or import shall be accompanied by a copy of one of the declarations provided for in Article 8(1) of Regulation (EEC) No 2847/93 pertaining to the quantities of these species transported. The exemption provided for in Article 13(4)(b) of Regulation (EEC) No 2847/93 shall not apply.
22. By way of derogation from Article 34(c)(1) of Regulation (EEC) No 2847/93, the specific monitoring programme for any of the stocks referred to in Article 12 may last more than two years from their date of entry into force.

ANNEX VI

FISHING EFFORT FOR VESSELS FISHING FOR SANDEEL IN THE NORTH SEA AND THE SKAGERRAK

1. From 1 January to 31 December 2004, the conditions laid down in this Annex shall apply to Community fishing vessels fishing in the North Sea and the Skagerrak with demersal trawl, seine or similar towed gears with a mesh size of less than 16 mm.
2. For the purposes of this Annex a day absent from port shall be:
 - (a) the 24-hour period between 00:00 Hrs of a calendar day and 24:00 Hrs of the same calendar day or any part of such a period or;
 - (b) any continuous period of 24 hours as recorded in the EC logbook between the date and time of departure and the date and time of arrival or any part of any such time period.
3. Each Member State shall not later than 1 March 2004 establish a data base containing for the North Sea and Skagerrak, for each of the years 2001, 2002 and 2003 and for each vessel flying its flag or registered within the Community which have been fishing with demersal trawl, seine or similar towed gears with a mesh size of less than 16 mm, the following information:

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

- (a) the name and internal registration number of the vessel;
 - (b) the installed engine power of the vessel in kilowatts measured in accordance with Article 5 of Council Regulation (EEC) No 2930/86 of 22 September 1986 defining characteristics for fishing vessels⁽⁹⁾;
 - (c) the number of days absent from port when fishing with demersal trawl, seine or similar towed gear with a mesh size of less than 16 mm;
 - (d) the kilowatt-days as the product of the number of days absent from port and the installed engine power in kilowatts.
4. The following quantities shall be calculated by each Member State:
- (a) the total kilowatt-days for each year as the sum of the kilowatt-days calculated in paragraph 3(d);
 - (b) the average kilowatt-days for the period 2001 to 2003.
5. Each Member State shall ensure that the number of kilowatt-days in 2004 for vessels flying its flag or registered in the Community does not exceed the number in 2003 as calculated in point 4(a).
6. The maximum number of kilowatt-days referred to in point 5 shall be revised by the Commission as early as possible and not later than 15 June 2004, based on advice from the Scientific Technical and Economic Committee for Fisheries (STECF) on the size of the 2003 year class of North Sea sandeel, in accordance with the following rules:
- (a) where STECF estimates the size of the 2003 year class of North Sea sandeel to be at or above 500 000 million individuals at age 0, no restrictions in kilowatt-days shall apply for the remaining of 2004;
 - (b) where STECF estimates the size of the 2003 year class of North Sea sandeel to be between 300 000 million and 500 000 million individuals at age 0, the number of kilowatt-days shall not exceed the level in 2003 as calculated in point 4(a);
 - (c) where STECF estimates the size of the 2003 year class of North Sea sandeel to be below 300 000 million individuals at age 0, fishing with demersal trawl, seine or similar towed gears with a mesh size of less than 16 mm shall be prohibited for the remaining of 2004. However, a limited fishery will be allowed in order to monitor the sandeel stocks in the North Sea and the Skagerrak and the effects of the closure. To this end the Member States concerned shall in cooperation with the Commission develop a plan for the monitoring fishery.

c Of which at any given time a maximum of 10 for vessels fishing cod with gillnets.

d The licences concerning fishing for shrimp in the waters of the French Department of Guyana shall be issued on the basis of a fishing plan submitted by the authorities of the third country concerned, approved by the Commission. The period of validity of each of these licences shall be limited to the fishing period provided for in the fishing plan on the basis of which the licence was issued.

e The annual number of days at sea is limited to 200.

f To be fished exclusively with long lines or traps (snappers) or long lines or mesh nets having a minimum mesh of 100 mm, at depths greater than 30 m (sharks). To issue these licences, proof must be produced that a valid contract exists between the shipowner applying for the licence and a processing undertaking situated in the French Department of Guyana, and that it includes an obligation to land at least 75 % of all snapper catches, or 50 % of all shark catches from the vessel concerned in that department so that they may be processed in that undertaking's plant.

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

The contract referred to above must be endorsed by the French authorities, which shall ensure that it is consistent both with the actual capacity of the contracting processing undertaking and with the objectives for the development of the Guyanese economy. A copy of the duly endorsed contract shall be appended to the licence application.

Where the endorsement referred to above is refused, the French authorities shall give notification of this refusal and state their reasons for it to the party concerned and to the Commission.

g The annual number of days at sea is limited to pm.

h The annual number of days at sea is limited to 350.

i To be fished exclusively with longlines.

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

ANNEX VIII

PART I

INFORMATION TO BE RECORDED IN THE LOGBOOK

When fishing within the 200-nautical-mile zone off the coasts of the Member States of the Community which is covered by Community rules on fisheries, the following details are to be entered in the logbook immediately after the following events:

After each haul:

- 1.1. the quantity (in kilograms live-weight) of each species caught;
- 1.2. the date and the time of the haul;
- 1.3. the geographical position in which the catches were made;
- 1.4. the fishing method used.

After each trans-shipment to or from another vessel:

- 2.1. the indication 'received from' or 'transferred to';
- 2.2. the quantity (in kilograms live-weight) of each species trans-shipped;
- 2.3. the name, external identifications letters and numbers of the vessel to or from which the trans-shipment occurred.
- 2.4. trans-shipment of cod is not allowed.

After each landing in a port of the Community:

- 3.1. name of the port;
- 3.2. the quantity (in kilograms live-weight) of each species landed.

After each transmission of information to the Commission of the European Communities:

- 4.1. date and time of the transmission;
- 4.2. type of message: IN, OUT, ICES, WKL or 2 WKL;
- 4.3. in the case of radio transmission: name of the radio station.

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

ANNEX IX

CONTENT AND MODALITIES OF THE TRANSMISSION OF INFORMATION TO THE COMMISSION

The information to be transmitted to the Commission of the European Communities and the timetable for its transmission are as follows:

- 1.1. On each occasion the vessel enters the 200-nautical-mile zone off the coasts of the Member States of the Community which is covered by Community rules on fisheries:
 - (a) the information specified under 1.5;
 - (b) the quantity (in kilograms) of each species of fish in the hold;
 - (c) the date and ICES division within which the master intends to commence fishing.

Where the fishing operations necessitate more than one entry into the zones referred to under 1.1 on a given day, one communication shall suffice on first entry.

- 1.2. On each occasion the vessel leaves the zone referred to under 1.1:
 - (a) the information specified under 1.5;
 - (b) the quantity (in kilograms live-weight) of each species of fish in the hold;
 - (c) the quantity (in kilograms live-weight) of each species caught since the previous transmission;
 - (d) the ICES division in which the catches were taken;
 - (e) the quantity (in kilograms live-weight) of each species transferred to and/or from other vessels since the vessel entered the zone and the identification of the vessel to which the transfer was made;
 - (f) the quantity (in kilograms live-weight) of each species landed in a port of the Community since the vessel entered the zone.

Where the fishing operations necessitate more than one entry into the zones referred to under 1.1 on a given day, one single communication on the last exit will be sufficient.

- 1.3. At three-day intervals, commencing on the third day after the vessel first enters the zones referred to under 1.1 when fishing for herring and mackerel, and at weekly intervals, commencing on the seventh day after the vessel first enters the zones referred to under 1.1 when fishing for all species other than herring and mackerel:
 - (a) the information specified under 1.5;
 - (b) the quantity (in kilograms live-weight) of each species caught since the previous transmission;
 - (c) the ICES division in which the catches were made.
- 1.4. On each occasion the vessel moves from one ICES division to another:
 - (a) the information specified under 1.5;
 - (b) the quantity (in kilograms live-weight) of each species caught since the previous transmission;

Status: Point in time view as at 19/12/2003.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EC) No 2287/2003 (repealed). (See end of Document for details)

(c) the ICES division in which the catches have been taken.

1.5.

(a) The name, call sign, external identification letters and numbers of the vessel and the name of its master;

(b) the licence number if the vessel is under licence;

(c) the serial number of the message for the voyage concerned;

(d) identification of the type of message;

(e) the date, the time and the geographical position of the vessel.

2.1. The information specified under point 1 shall be transmitted to the Commission of the European Communities in Brussels (telex 24189 FISEU-B) via one of the radio stations listed under point 3 below and in the form specified under point 4.

2.2. If it is impossible for reasons of force majeure for the message to be transmitted by the vessel, it may be transmitted on the vessel's behalf by another vessel.

ANNEX XI

AUTHORISED TOPSIDE CHAFERS

1. ICNAF-type topside chafer

The ICNAF-type topside chafer is a rectangular piece of netting to be attached to the upper side of the codend of the trawl net to reduce and prevent damage so long as such netting conforms to the following conditions:

- (a) this netting shall have a mesh size not less than that specified for the codend in Article 10;
- (b) this netting may be fastened to the codend only along the forward and lateral edges of the netting and at no other place in it, and shall be fastened in such a manner that it extends forward of the splitting strap no more than four meshes and ends not less than four meshes in front of the cod line mesh; where a splitting strap is not used, the netting shall not extend to more than one-third of the codend measured from not less than four meshes in front of the cod line mesh;
- (c) the width of this netting shall be at least one and a half times the width of the area of the codend which is covered, such widths to be measured at right angles to the long axis of the codend.

2. Multiple flap-type topside chafer

The multiple flap-type topside chafer is defined as pieces of netting having in all their parts meshes the size of which, whether the pieces of netting are wet or dry, is not less than that of the codend, provided that:

- (i) each piece of netting:
- (a) is fastened by its forward edge only across the codend at right angles to its long axis;
 - (b) is of a width of at least the width of the codend (such width being measured at right angles to the long axis of the codend at the point of attachment); and
 - (c) is not more than 10 meshes long; and
- (ii) the aggregate length of all the pieces of netting so attached does not exceed two-thirds of the length of the codend.

POLISH CHAFER

3. Large-mesh (modified Polish-type) topside chafer

The large-mesh topside chafer consists of a rectangular piece of netting made of the same twine material as the codend, or of a single, thick, knotless twine material, attached to the rear portion of the upper side of the codend and extending over all or any part of the upper side of the codend and having in all its parts a mesh size twice that of the codend when measured wet and fastened to the codend along the forward, lateral and rear edges only of the netting in such a way that each mesh of the netting coincides with four meshes of the codend.
