► **B** REGULATION (EC) No 91/2003 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

of 16 December 2002
on rail transport statistics

(OJ L 14, 21.1.2003, p. 1)

Amended by:

	Official Journal		
	No	page	date
► <u>M1</u> Commission Regulation (EC) No 1192/2003 of 3 July 2003	L 167	13	4.7.2003

REGULATION (EC) No 91/2003 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 16 December 2002
on rail transport statistics

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 285 thereof,

Having regard to the proposal from the Commission ⁽¹⁾,

Having regard to the opinion of the Economic and Social Committee ⁽²⁾,

Having consulted the Committee of the Regions,

Acting in accordance with the procedure laid down in Article 251 of the Treaty ⁽³⁾,

Whereas:

- (1) Railways are an important part of the Community's transport networks.
- (2) The Commission needs statistics on the transport of goods and passengers by rail in order to monitor and develop the common transport policy, as well as the transport elements of policies on the regions and on trans-European networks.
- (3) Statistics on rail safety are required by the Commission in order to prepare and monitor Community actions in the field of transport safety.
- (4) Community statistics on rail transport are also required in order to fulfil the monitoring tasks provided for in Article 10b of Council Directive 91/440/EEC of 29 July 1991 on the development of the Community's railways ⁽⁴⁾.
- (5) Community statistics on all modes of transport should be collected according to common concepts and standards, with the aim of achieving the fullest practicable comparability between transport modes.
- (6) The restructuring of the rail industry under Directive 91/440/EEC, as well as changes in the type of information required by the Commission and by other users of Community statistics on rail transport, renders obsolete the provisions of Council Directive 80/1177/EEC of 4 December 1980 on statistical returns in respect of carriage of goods by rail, as part of regional statistics ⁽⁵⁾ in relation to the collection of statistics from specified administrations of main rail networks.
- (7) The coexistence of publicly and privately owned railway undertakings operating in a commercial rail transport market requires an explicit specification of the statistical information which should be provided by all railway undertakings and disseminated by Eurostat.
- (8) In accordance with the principle of subsidiarity laid down in Article 5 of the Treaty, the creation of common statistical stan-

⁽⁴⁾ OJ L 237, 24.8.1991, p. 25. Directive as last amended by Directive 2001/12/EC of the European Parliament and of the Council (OJ L 75, 15.3.2001, p. 1).

⁽⁵⁾ OJ L 350, 23.12.1980, p. 23. Directive as last amended by the 1994 Act of Accession.

▼B

dards which permit the production of harmonised data is an action which can only be undertaken efficiently at Community level. Such standards should be implemented in each Member State under the authority of the bodies and institutions in charge of producing official statistics.

- (9) Council Regulation (EC) No 322/97 of 17 February 1997 on Community statistics ⁽¹⁾ provides a reference framework for the provisions laid down by this Regulation.
- (10) The measures necessary for the implementation of this Regulation should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission ⁽²⁾.
- (11) The Statistical Programme Committee established by Council Decision 89/382/EEC, Euratom of 19 June 1989 establishing a Committee on the Statistical Programmes of the European Communities ⁽³⁾ has been consulted in accordance with Article 3 of the said Decision,

HAVE ADOPTED THIS REGULATION:

Article 1

Objective

The objective of this Regulation is to establish common rules for the production of Community rail transport statistics.

Article 2

Scope

This Regulation shall cover all railways in the Community. Each Member State shall report statistics which relate to rail transport on its national territory. Where a railway undertaking operates in more than one Member State, the national authorities concerned shall require the undertaking to provide data separately for each country in which it operates so as to enable national statistics to be compiled.

Member States may exclude from the scope of this Regulation:

- (a) railway undertakings which operate entirely or mainly within industrial and similar installations, including harbours;
- (b) railway undertakings which mainly provide local tourist services, such as preserved historical steam railways.

Article 3

Definitions

▼M1

1. For the purposes of this Regulation the following definitions shall apply:

1. 'reporting country' means the Member State transmitting data to Eurostat;
2. 'national authorities' means national statistical institutes and other bodies responsible in each Member State for producing Community statistics;
3. 'railway' means line of communication made up by rail exclusively for the use of railway vehicles;
4. 'railway vehicle' means mobile equipment running exclusively on rails, moving either under its own power (tractive vehicles) or

⁽¹⁾ OJ L 52, 22.2.1997, p. 1.

⁽²⁾ OJ L 184, 17.7.1999, p. 23.

⁽³⁾ OJ L 181, 28.6.1989, p. 47.

▼M1

- hauled by another vehicle (coaches, railcar trailers, vans and wagons);
5. 'railway undertaking' means any public or private undertaking which provides services for the transport of goods and/or passengers by rail. Undertakings whose only business is to provide services for the transport of passengers by metro, tram and/or light rail are excluded;
 6. 'transport of goods by rail' means the movement of goods using railway vehicles between the place of loading and the place of unloading;
 7. 'transport of passengers by rail' means the movement of passengers using railway vehicles between the place of embarkation and the place of disembarkation. The transport of passengers by metro, tram and/or light rail is excluded;
 8. 'metro' (also known as 'subway', 'metropolitan railway' or 'underground') means an electric railway for the transport of passengers with the capacity for a heavy volume of traffic and characterised by exclusive rights-of-way, multi-car trains, high speed and rapid acceleration, sophisticated signalling as well as the absence of level crossings to allow a high frequency of trains and high platform load. Metros are also characterised by closely spaced stations, normally meaning a distance of 700 to 1 200 m between the stations. 'High speed' refers to the comparison with trams and light rail, and means here approximately 30 to 40 km/h on shorter distances, 40 to 70 km/h on longer distances;
 9. 'tram (streetcar)' means a passenger road vehicle designed to seat more than nine persons (including the driver), which is connected to electric conductors or powered by diesel engine and which is rail-borne;
 10. 'light rail' means a railway for the transport of passengers that often uses electrically powered rail-borne cars operating singly or in short trains on fixed duo-rail lines. There is generally a distance of less than 1 200 m between stations/stops. In comparison to metros, light rail is more lightly constructed, is designed for lower traffic volumes and usually travels at lower speeds. It is sometimes difficult to make a precise distinction between light rail and trams; trams are generally not separated from road traffic, whereas light rail may be separated from other systems;
 11. 'national transport' means rail transport between two places (a place of loading/embarkation and a place of unloading/disembarkation) located in the reporting country. It may involve transit through a second country;
 12. 'international transport' means rail transport between a place (of loading/embarkation or unloading/disembarkation) in the reporting country and a place (of loading/embarkation or unloading/disembarkation) in another country;
 13. 'transit' means rail transport through the reporting country between two places (a place of loading/embarkation and a place of unloading/disembarkation) outside the reporting country. Transport operations involving loading/embarkation or unloading/disembarkation of goods/passengers at the border of the reporting country from/onto another mode of transport are not considered as transit;
 14. 'rail passenger' means any person, excluding members of the train crew, who makes a trip by rail. For accident statistics, passengers trying to embark/disembark onto/from a moving train are included;
 15. 'number of passengers' means the number of trips by rail passengers, where each trip is defined as the movement from the place of embarkation to the place of disembarkation, with or without transfers from one rail vehicle to another. If passengers use the services of more than one railway undertaking, when possible they should not be counted more than once;
 16. 'passenger-km' means the unit of measure representing the transport of one passenger by rail over a distance of one kilometre.

▼M1

- Only the distance on the national territory of the reporting country shall be taken into account;
17. 'weight' means the quantity of goods in tonnes (1 000 kilograms). The weight to be taken into consideration includes, in addition to the weight of the goods transported, the weight of packaging and the tare weight of containers, swap bodies, pallets as well as road vehicles transported by rail in the course of combined transport operations. If the goods are transported using the services of more than one railway undertaking, when possible the weight of goods should not be counted more than once;
 18. 'tonne-km' means the unit of measure of goods transport which represents the transport of one tonne (1 000 kilograms) of goods by rail over a distance of one kilometre. Only the distance on the national territory of the reporting country shall be taken into account;
 19. 'train' means one or more railway vehicles hauled by one or more locomotives or railcars, or one railcar travelling alone, running under a given number or specific designation from an initial fixed point to a terminal fixed point. A light engine, i.e. a locomotive travelling on its own, is not considered to be a train;
 20. 'train-km' means the unit of measure representing the movement of a train over one kilometre. The distance used is the distance actually run, if available, otherwise the standard network distance between the origin and destination shall be used. Only the distance on the national territory of the reporting country shall be taken into account;
 21. 'full trainload' means any consignment comprising one or more wagonloads transported at the same time by the same sender at the same station and forwarded with no change in train composition to the address of the same consignee at the same destination station;
 22. 'full wagonload' means any consignment of goods for which the exclusive use of a wagon is required, whether the total loading capacity is utilised or not;
 23. 'TEU (Twenty-foot Equivalent Unit)' means a standard unit based on an ISO container of 20 feet length (6,10 m), used as a statistical measure of traffic flows or capacities. One standard 40' ISO Series 1 container equals 2 TEUs. Swap bodies under 20 feet correspond to 0,75 TEU, between 20 feet and 40 feet to 1,5 TEU and over 40 feet to 2,25 TEU;
 24. 'significant accident' means any accident involving at least one rail vehicle in motion, resulting in at least one killed or seriously injured person, or in significant damage to stock, track, other installations or environment, or extensive disruptions to traffic. Accidents in workshops, warehouses and depots are excluded;
 25. 'serious injury accident' means any accident involving at least one rail vehicle in motion, resulting in at least one killed or seriously injured person. Accidents in workshops, warehouses and depots are excluded;
 26. 'person killed' means any person killed immediately or dying within 30 days as a result of an accident, excluding suicides;
 27. 'person seriously injured' means any person injured who was hospitalised for more than 24 hours as a result of an accident, excluding attempted suicides;
 28. 'accident involving the transport of dangerous goods' means any accident or incident that is subject to reporting in accordance with RID/ADR section 1.8.5.
 29. 'suicide' means an act to deliberately injure oneself resulting in death, as recorded and classified by the competent national authority;
 30. 'attempted suicide' means an act to deliberately injure oneself resulting in serious injury, but not in death, as recorded and classified by the competent national authority.

▼B

2. The definitions referred to in paragraph 1 may be adapted, and additional definitions needed to ensure harmonisation of statistics may be adopted, in accordance with the procedure referred to in Article 11(2).

*Article 4***Data collection**

1. The statistics to be collected are set out in the Annexes to this Regulation. They shall cover the following types of data:

- (a) annual statistics on goods transport — detailed reporting (Annex A);
- (b) annual statistics on goods transport — simplified reporting (Annex B);
- (c) annual statistics on passenger transport — detailed reporting (Annex C);
- (d) annual statistics on passenger transport — simplified reporting (Annex D);
- (e) quarterly statistics on goods and passenger transport (Annex E);
- (f) regional statistics on goods and passenger transport (Annex F);
- (g) statistics on traffic flows on the rail network (Annex G);
- (h) statistics on accidents (Annex H).

2. Annexes B and D set out simplified reporting requirements, which may be used by Member States as alternatives to the normal detailed reporting set out in Annexes A and C, for undertakings for which the total volume of goods or passenger transport is less than 500 million tonne-km or 200 million passenger-km respectively. These thresholds may be adapted in accordance with the procedure laid down in Article 11(2).

3. Member States shall also provide a list of the railway undertakings for which statistics are provided, as specified in Annex I.

4. For the purposes of this Regulation, goods shall be classified in accordance with Annex J. Dangerous goods shall additionally be classified in accordance with Annex K.

5. The contents of the Annexes may be adapted, in accordance with the procedure referred to in Article 11(2).

*Article 5***Data sources**

1. Member States shall designate a public or private organisation to participate in collecting the data required under this Regulation.

2. The necessary data may be obtained using any combination of the following sources:

- (a) compulsory surveys;
- (b) administrative data, including data collected by regulatory authorities;
- (c) statistical estimation procedures;
- (d) data supplied by professional organisations in the rail industry;
- (e) ad hoc studies.

3. The national authorities shall take measures for the coordination of the data sources used and to ensure the quality of the statistics transmitted to Eurostat.

▼B*Article 6***Transmission of statistics to Eurostat**

1. Member States shall transmit to Eurostat the statistics referred to in Article 4.
2. The arrangements for transmission of the statistics referred to in Article 4 shall be laid down in accordance with the procedure referred to in Article 11(2).

*Article 7***Dissemination**

1. Community statistics based on the data specified in Annexes A to H to this Regulation shall be disseminated by Eurostat. In this context, and in view of the characteristics of the European railway market, data deemed to be confidential under Article 13(1) of Council Regulation (EC) No 322/97 may be disclosed only if:
 - (a) the data are already available to the public in the Member States; or
 - (b) the explicit approval for such disclosure has been given in advance by the undertakings concerned.

The national authorities shall make a request to such undertakings for permission to disclose the required data and shall inform Eurostat of the result of this request when the data are transmitted to Eurostat.

2. The information reported under Annex I shall not be disseminated.

*Article 8***Quality of statistics**

1. In order to assist Member States in maintaining the quality of statistics in the domain of rail transport, Eurostat shall develop and publish methodological recommendations. These recommendations shall take account of the best practices of national authorities, of railway undertakings and of professional organisations for the railway industry.
2. The quality of the statistical data shall be evaluated by Eurostat. To this end, on request by Eurostat, Member States shall supply information on the methods used in producing the statistics.

*Article 9***Report**

After data have been collected over three years, the Commission shall send a report to the European Parliament and to the Council on experience acquired in the work carried out under this Regulation accompanied, if necessary, by appropriate proposals. That report shall include the results of the quality evaluation referred to in Article 8. It shall evaluate the impact on the quality of rail transport statistics of the application to this Regulation of the provisions on the confidentiality of statistics laid down in Regulation (EC) No 322/97. It shall also evaluate the benefits of the availability of statistics in this domain, the costs of obtaining such statistics and the burden on enterprises.

*Article 10***Implementing procedures**

The following implementing measures shall be taken in accordance with the procedure specified in Article 11(2):

- (a) adaptation of the thresholds for simplified reporting (Article 4);
- (b) adaptation of the definitions and adoption of additional definitions (Article 3);

▼B

- (c) adaptation of the contents of the annexes (Article 4);
- (d) arrangements for transmitting data to Eurostat (Article 6);
- (e) definition of the guidelines for the reports on the quality and comparability of the results (Articles 8 and 9).

*Article 11***Procedure**

1. The Commission shall be assisted by the Statistical Programme Committee instituted by Article 1 of Decision 89/382/EEC, Euratom.
2. Where reference is made to this paragraph, Articles 5 and 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

The period laid down in Article 5(6) of Decision 1999/468/EC shall be set at three months.
3. The Committee shall adopt its rules of procedure.

*Article 12***Directive 80/1177/EEC**

1. Member States shall provide results for the year 2002 in accordance with Directive 80/1177/EEC.
2. Directive 80/1177/EEC is hereby repealed with effect from 1 January 2003.

*Article 13***Entry into force**

This Regulation shall enter into force on the 20th day following that of its publication in the *Official Journal of the European Communities*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

First reference period	2004
Notes	<ol style="list-style-type: none"> 1. Type of transport is broken down as follows: <ul style="list-style-type: none"> — national — international 2. For Tables C1 and C2, Member States may report provisional data based on ticket sales in the reporting country or any other available source. For Tables C3 and C4, Member States shall report final consolidated data including information from ticket sales outside the reporting country. This information may be obtained either directly from the national authorities of other countries or through international compensation arrangements for tickets.

ANNEX D

ANNUAL STATISTICS ON PASSENGER TRANSPORT — SIMPLIFIED REPORTING

List of variables and units of measurement	Passengers transported in: — number of passengers — passenger-km Passenger train movements in: — train-km
Reference period	Year
Frequency	Every year
List of tables with the breakdown for each table	Table D1: passengers transported Table D2: passenger train movements
Deadline for transmission of data	Eight months after end of reference period
First reference period	2004
Notes	1. For Table D1, Member States may report data based on ticket sales in the reporting country or any other available source.

ANNEX E

QUARTERLY STATISTICS ON GOODS AND PASSENGER TRANSPORT

List of variables and units of measurement	Goods transported in: — tonnes — tonne-km Passengers transported in: — number of passengers — passenger-km
Reference period	Quarter
Frequency	Every quarter
List of tables with the breakdown for each table	Table E1: goods transported Table E2: passengers transported
Deadline for transmission of data	Three months after end of reference period
First reference period	First quarter of 2004
Notes	<ol style="list-style-type: none"> 1. Tables E1 and E2 may be reported on the basis of provisional data, including estimates. For Table E2, Member States may report data based on ticket sales in the reporting country or any other available source. 2. These statistics shall be supplied for the undertakings covered by Annexes A and C.

ANNEX F

REGIONAL STATISTICS ON GOODS AND PASSENGER TRANSPORT

List of variables and units of measurement	Goods transported in: — tonnes Passengers transported in: — number of passengers
Reference period	One year
Frequency	Every five years
List of tables with the breakdown for each table	Table F1: national goods transport by region of loading and region of unloading (NUTS 2) Table F2: international goods transport by region of loading and unloading (NUTS 2) Table F3: national passenger transport by region of embarkation and region of disembarkation (NUTS 2) Table F4: international passenger transport by region of embarkation and region of disembarkation (NUTS 2)
Deadline for transmission of data	12 months after end of reference period
First reference period	2005
Notes	<ol style="list-style-type: none"> 1. Where the place of loading or unloading (Tables F1, F2) or embarkation or disembarkation (Tables F3, F4) is outside the European Economic Area, Member States shall report only the country. 2. In order to assist Member States in the preparation of these tables, Eurostat shall provide Member States with a list of UIC station codes and the corresponding NUTS codes. 3. For Tables F3 and F4, Member States may report data based on ticket sales or any other available source. 4. These statistics shall be supplied for the undertakings covered by Annexes A and C.

ANNEX G

STATISTICS ON TRAFFIC FLOWS ON THE RAIL NETWORK

List of variables and units of measurement	<p>Goods transport:</p> <ul style="list-style-type: none"> — number of trains <p>Passenger transport:</p> <ul style="list-style-type: none"> — number of trains <p>Other (service trains, etc.) (optional):</p> <ul style="list-style-type: none"> — number of trains
Reference period	One year
Frequency	Every five years
List of tables with the breakdown for each table	<p>Table G1: goods transport, by network segment</p> <p>Table G2: passenger transport, by network segment</p> <p>Table G3: other (service trains, etc.), by network segment (optional)</p>
Deadline for transmission of data	18 months after end of reference period
First reference period	2005
Notes	<ol style="list-style-type: none"> 1. Member States shall define a set of network segments to include at least the rail TEN on their national territory. They shall communicate to Eurostat: <ul style="list-style-type: none"> — the geographical coordinates and other data needed to identify and map each network segment as well as the links between segments, — information on the characteristics (including the capacity) of the trains using each network segment. 2. Each network segment which is part of the rail trans-European network (TEN) shall be identified by means of an additional attribute in the data record, in order to enable traffic on the rail TEN to be quantified.

▼ **M1**

ANNEX H

STATISTICS ON ACCIDENTS

List of variables and units of measurement	<ul style="list-style-type: none"> — number of accidents (Tables H1, H2) — number of persons killed (Table H3) — number of persons seriously injured (Table H4)
Reference period	Year
Frequency	Every year
List of tables with the breakdown for each table	<p>Table H1: number of significant accidents and number of serious injury accidents (optional), by type of accident</p> <p>Table H2: number of accidents involving the transport of dangerous goods</p> <p>Table H3: number of persons killed, by type of accident and by category of person</p> <p>Table H4: number of persons seriously injured, by type of accident and by category of person</p>
Deadline for transmission of data	Five months after end of reference period
First reference period	2004
Note	<p>1. Type of accident is broken down as follows:</p> <ul style="list-style-type: none"> — collisions (excluding level crossing accidents) — derailments — accidents involving level crossings — accidents to persons caused by rolling stock in motion — fires in rolling stock — others — total <p>The type of accident refers to the primary accident.</p> <p>2. Table H2 has the following breakdown:</p> <ul style="list-style-type: none"> — total number of accidents involving at least one railway vehicle transporting dangerous goods, as defined by the list of goods covered by Annex K — number of such accidents in which dangerous goods are released <p>3. Category of person is broken down as follows:</p> <ul style="list-style-type: none"> — passengers — employees (including contractors) — others — total <p>4. The data in Tables H1 to H4 shall be provided for all railways covered by this Regulation.</p> <p>5. During the first five years of application of this Regulation, Member States may report these statistics according to national definitions, if data conforming to harmonised definitions (adopted according to the procedure of Article 11(2)) are not available.</p>

ANNEX I

List of variables and units of measurement	See below
Reference period	One year
Frequency	Every year
List of tables with the breakdown for each table	See below
Deadline for transmission of data	Five months after end of reference period
First reference period	2003
Note	<p>The information listed below (Table I1) shall be supplied for each railway undertaking for which data are provided according to Annexes A to H.</p> <p>This information shall be used,</p> <ul style="list-style-type: none"> — to check which undertakings are covered by the tables in Annexes A to H — to validate the coverage of Annexes A and C in relation to total rail transport activity.

ANNEX J

CLASSIFICATION OF GOODS

The following groups of goods shall be used until such time as a new classification is laid down according to the procedure specified in Article 11(2).

Groups of goods	NST/R chapter	NST/R groups	Description
1	0	01	Cereals
2		02, 03	Potatoes, other fresh or frozen fruits and vegetables
3		00, 06	Live animals, sugar beet
4		05	Wood and cork
5		04, 09	Textiles, textile articles and man-made fibres, other raw animal and vegetable materials
6	1	11, 12, 13, 14, 16, 17	Foodstuff and animal fodder
7		18	Oil seeds and oleaginous fruits and fats
8	2	21, 22, 23	Solid mineral fuels
9	3	31	Crude petroleum
10		32, 33, 34	Petroleum products
11	4	41, 46	Iron ore, iron and steel waste and blast furnace dust
12		45	Non-ferrous ores and waste
13	5	51, 52, 53, 54, 55, 56	Metal products
14	6	64, 69	Cement, lime, manufactured building materials
15		61, 62, 63, 65	Crude and manufactured minerals
16	7	71, 72	Natural and chemical fertilisers
17	8	83	Coal chemicals, tar
18		81, 82, 89	Chemicals other than coal chemicals and tar
19		84	Paper pulp and waste paper
20	9	91, 92, 93	Transport equipment, machinery, apparatus, engines, whether or not assembled, and parts thereof
21		94	Manufactures of metal
22		95	Glass, glassware, ceramic products
23		96, 97	Leather, textile, clothing, other manufactured articles
24		99	Miscellaneous articles

ANNEX K

CLASSIFICATION OF DANGEROUS GOODS

1. Explosives
2. Gases, compressed, liquefied or dissolved under pressure
3. Flammable liquids
- 4.1. Flammable solids
- 4.2. Substances liable to spontaneous combustion
- 4.3. Substances which, in contact with water, emit flammable gases
- 5.1. Oxidising substances
- 5.2. Organic peroxides
- 6.1. Toxic substances
- 6.2. Substances liable to cause infections
7. Radioactive material
8. Corrosives
9. Miscellaneous dangerous substances

Note: these categories are those defined in the regulations concerning the international carriage of dangerous goods by rail, usually known as the RID, as adopted under Council Directive 96/49/EC of 23 July 1996 on the approximation of the laws of the Member States with regard to the transport of dangerous goods by rail and subsequent amendments ⁽¹⁾.

⁽¹⁾ OJ L 235, 17.9.1996, p. 25. Directive as last amended by Commission Directive 2001/6/EC (OJ L 30, 1.2.2001, p. 42).
