
Changes to legislation: There are currently no known outstanding effects for the Regulation (EC) No 1831/2003 of the European Parliament and of the Council, REQUIREMENTS FOR STABLE AND FEEDING EQUIPMENT. (See end of Document for details)

ANNEX III

GOOD ANIMAL FEEDING PRACTICE REQUIREMENTS FOR STABLE AND FEEDING EQUIPMENT

The animal production unit shall be designed so that it can be adequately cleaned. The animal production unit and feeding equipment shall be cleaned thoroughly and regularly to prevent any build-up of hazards. Chemicals used for cleaning and sanitising shall be used according to instructions and stored away from feed and feeding areas.

A pest control system shall be put in place to control the access of pests to the animal production unit with a view to minimising the possibility of contamination of feed and bedding materials or animal units.

Buildings and feeding equipment shall be kept clean. Systems shall be put in place to regularly remove manure, waste material and other possible sources of contamination of feed.

Feed and bedding material used in the animal production unit shall be frequently changed and not allowed to become mouldy.

Changes to legislation:

There are currently no known outstanding effects for the Regulation (EC) No 183/2005 of the European Parliament and of the Council, REQUIREMENTS FOR STABLE AND FEEDING EQUIPMENT.
