

Commission Regulation (EC) No 1580/2007 of 21 December 2007 laying down implementing rules of Council Regulations (EC) No 2200/96, (EC) No 2201/96 and (EC) No 1182/2007 in the fruit and vegetable sector (repealed)

COMMISSION REGULATION (EC) No 1580/2007

of 21 December 2007

laying down implementing rules of Council Regulations (EC) No 2200/96, (EC) No 2201/96 and (EC) No 1182/2007 in the fruit and vegetable sector (repealed)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 2200/96 of 28 October 1996 on the common organisation of the market in fruit and vegetables⁽¹⁾, and in particular Article 1(3) thereof,

Having regard to Council Regulation (EC) No 2201/96 of 28 October 1996 on the common organisation of the markets in processed fruit and vegetable products⁽²⁾, and in particular Article 1(3) thereof,

Having regard to Council Regulation (EC) No 1182/2007 of 26 September 2007 laying down specific rules as regards the fruit and vegetable sector amending Directives 2001/112/EC and 2001/113/EC and Regulations (EEC) No 827/68, (EC) No 2200/96, (EC) No 2201/96, (EC) No 2826/2000, (EC) No 1782/2003 and (EC) No 318/2006 and repealing Regulation (EC) No 2202/96⁽³⁾, and in particular Article 42 thereof,

Whereas:

- (1) Regulation (EC) No 1182/2007 has modified the previous regime for the fruit and vegetables sector as laid down in Regulation (EC) No 2200/96, Regulation (EC) No 2201/96 and Council Regulation (EC) No 2202/96 of 28 October 1996 introducing a Community aid scheme for producers of certain citrus fruits⁽⁴⁾.
- (2) The existing implementing rules covering the fruit and vegetables sector are contained in a large number of regulations, many of which have been amended many times. Those implementing rules need to be changed as a result of the modifications made to the fruit and vegetables regime by Regulation (EC) No 1182/2007, as well as in the light of experience. The scope of the changes makes it necessary, in the interests of clarity, to incorporate all the implementing rules in a new, separate Regulation.
- (3) The following Commission Regulations should therefore be repealed:
 - Regulation (EC) No 3223/94 of 21 December 1994 on detailed rules for the application of the import arrangements for fruit and vegetables⁽⁵⁾,
 - Regulation (EC) No 1555/96 of 30 July 1996 on rules of application for additional import duties on fruit and vegetables⁽⁶⁾,

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- Regulation (EC) No 1557/2004 of 1 September 2004 approving operations to check conformity to the marketing standards applicable to certain fresh fruit carried out in New Zealand prior to import into the Community⁽²⁰⁾,
 - Regulation (EC) No 179/2006 of 1 February 2006 introducing a system of import licences for apples imported from third countries⁽²¹⁾,
 - Regulation (EC) No 430/2006 of 15 March 2006 approving operations to check conformity with the marketing standards applicable to fresh fruit and vegetables carried out in Senegal prior to import into the Community⁽²²⁾,
 - Regulation (EC) No 431/2006 of 15 March 2006 approving operations to check conformity to the marketing standards applicable to fresh fruit and vegetables carried out in Kenya prior to import into the Community⁽²³⁾,
 - Regulation (EC) No 1790/2006 of 5 December 2006 approving operations to check conformity to the marketing standards applicable to fresh fruit and vegetables carried out in Turkey prior to import into the Community⁽²⁴⁾.
- (4) Detailed rules for the implementation of Regulation (EC) No 1182/2007 should be adopted.
 - (5) Marketing years should be set for fruit and vegetable products. Since there are no longer any aid schemes in the sector which follow the harvesting cycle of the products concerned, all marketing years may be harmonised to fit the calendar year.
 - (6) Regulation (EC) No 1182/2007 authorises the Commission to provide for marketing standards for fruit and vegetable products and its Article 2(7) provides that the existing individual regulations providing for such standards should continue to apply until new standards are adopted.
 - (7) Exceptions and exemptions from the application of marketing standards should be provided in the case of certain operations which are either very marginal and/or specific, or take place at the start of the distribution chain, or in the case of products intended for processing.
 - (8) The information particulars required by marketing standards should be clearly displayed on the packaging/label.
 - (9) Packages containing different types of fresh fruit and vegetables are becoming more common on the market in response to demand from certain consumers. Fair trading requires that fresh fruit and vegetables sold in the same package are of uniform quality. For products for which Community standards have not been adopted this can be ensured by recourse to general provisions. Labelling requirements should be laid down for mixes of different types of fruit and vegetables in the same package. They should be less strict than those laid down by the marketing standards in order to take into account, in particular, the space available on the label.
 - (10) Each Member State should designate the inspection bodies responsible for carrying out checks on conformity at each stage of marketing. One of those bodies should be responsible for contacts and coordination between all other designated bodies.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- (11) Since knowledge of traders and their main characteristics is an indispensable tool in Member States' analysis, it is essential to set up a database on traders of fresh fruit and vegetables in each Member State.
- (12) Conformity checks should be carried out by sampling and should concentrate on traders most likely to have goods which do not comply with the standards. Taking into account the characteristics of their national markets, Member States should lay down rules prioritising checks on particular categories of traders. To ensure transparency, these rules should be notified to the Commission.
- (13) Member States should ensure that exports of fresh fruits and vegetables to third countries conform to the marketing standards and should certify conformity, in accordance with the Geneva Protocol on standardisation of fresh fruit and vegetables and dry and dried fruit concluded within the United Nations Economical Commission for Europe and the OECD scheme for the application of international standards for fruit and vegetables.
- (14) Imports of fresh fruit and vegetables from third countries should conform to the marketing standards or to standards equivalent to them. Checks on conformity must therefore be carried out before these goods enter Community customs territory, except in the case of small lots which the inspection authorities/bodies consider to be low risk. In certain third countries which provide satisfactory guarantees of conformity, pre-export checks may be carried out by the inspection bodies of these third countries. Where this option is applied, the Member States should regularly verify the effectiveness/quality of the pre-export checks carried out by third country inspection bodies and inform the Commission of the results of these verifications.
- (15) Products intended for processing are not required to conform to marketing standards, so it should be ensured that they are not sold on the market for fresh products. Such products should be appropriately labelled and, in certain cases/when possible, accompanied by a processing certificate stating the end-use of the product which would allow checks to be made.
- (16) Fruit and vegetables checked for conformity with the marketing standards should be subject to the same type of check at all stages of marketing. The inspection guidelines recommended by the United Nations Economic Commission for Europe in line with the relevant OECD recommendations, should be applied to this end. Specific arrangements should however be laid down for checks at the retail sale stage.
- (17) Provision should be made for recognition of producer organisations for the products they request. Where the recognition is requested for products solely for processing, it should be ensured that they are indeed delivered for processing.
- (18) In order to help achieve the goals of the fruit and vegetables regime and to ensure that producer organisations carry out their work in a sustainable and effective way, there should be the utmost stability within producer organisations. Membership of a producer in the producer organisation should therefore be for a minimum period. It should be left up to the Member States to lay down the notice periods and the dates on which resignation from membership are to take effect.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- (19) The main and essential activities of a producer organisation should relate to the concentration of supply and marketing. However, producer organisations should be allowed to engage in other activities, whether or not of a commercial nature. Cooperation between producer organisations should be encouraged by allowing the marketing of fruit and vegetables bought exclusively from another recognised producer organisation to be left out of the calculations both for the purposes of the main activity and for other activities. As regards the provision of technical means it is appropriate to widen the scope of how this may be done to include provision via members of a producer organisation.
- (20) Producer organisations may hold shares in subsidiaries which help to increase the added value of the production of their members. Rules should be fixed for calculating the value of such marketed production. The main activities of such subsidiaries should be the same as those of the producer organisation, after allowing for a transitional period for adaptation.
- (21) Detailed rules should be laid down on the recognition and functioning of the associations of producer organisations, transnational producer organisations and transnational associations of producer organisations provided for in Regulation (EC) No 1182/2007. For the sake of consistency, they should as far as possible reflect the rules laid down for producer organisations.
- (22) In order to facilitate the concentration of supply, the merger of existing producer organisations to form new ones should be encouraged by providing rules for the merger of operational programmes of the merged organisations.
- (23) While respecting the principles whereby a producer organisation must be formed on the own initiative of producers and scrutinised by the producers, it should be left up to the Member States to lay down the conditions whereby other natural or legal persons are accepted as members of a producer organisation and/or an association of producer organisations.
- (24) In order to ensure that producer organisations genuinely represent a minimum number of producers, Member States should take measures to ensure that a minority of members who may account for the bulk of production in the producer organisation do not unduly dominate its management and operation.
- (25) In order to take account of different production and marketing circumstances in the Community, the Member States should lay down certain conditions for the grant of preliminary recognition to producer groups which submit a recognition plan.
- (26) To promote the setting-up of stable producer organisations capable of making a lasting contribution to the attainment of the objectives of the fruit and vegetable regime, preliminary recognition should be granted only to producer groups which can demonstrate their ability to meet all the requirements for recognition within a specified time limit.
- (27) Information which the producer groups must provide in the recognition plan should be laid down. To enable producer groups to better meet the recognition conditions, there is

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

a need to authorise changes to recognition plans. To that end, provision should be made enabling Member States to request from producer organisation to take corrective action in order to ensure that their plan is implemented.

- (28) The producer group may satisfy the conditions for recognition before the recognition plan is completed. Provision should be made to allow such groups to submit applications for recognition along with draft operational programmes. For the sake of consistency, the grant of such recognition to a producer group must signify the termination of its recognition plan, and the aid provided for should be discontinued. However, to take account of the multiannual financing of investments, investments qualifying for investment aid should be able to be carried over to operational programmes.
- (29) To facilitate the correct application of the system of aid to cover the costs of formation and administrative operation of producer groups, that aid should be granted at a flat-rate. That flat-rate aid should be subject to a ceiling in order to comply with budgetary constraints. Moreover, taking into account the differing financial needs of producer groups of different sizes, that ceiling should be adjusted in line with the value of marketable production of the producer groups.
- (30) For the sake of consistency and a smooth transition to the status of a recognised producer group, the same rules on main activities of producer organisations and their value of marketed production should apply to producer groups.
- (31) In the event of mergers, the possibility should be given for the aid to be granted to the producer groups resulting from the merger, in order to take into account the financial needs of the new producers groups and to ensure the correct application of the aid scheme.
- (32) To facilitate the use of the scheme of support to operational programmes, the marketed production of producer organisations should be clearly defined, including the specification of which products may be taken into account and the marketing stage at which the value of production is to be calculated. Additional methods of calculation of marketable production should also be made possible in case of yearly fluctuations or insufficient data. To prevent misuse of the scheme, producer organisations should not in general be permitted to change reference periods within the duration of a programme.
- (33) To ensure correct use of aid, rules should be laid down for the management of operational funds and members' financial contributions, allowing for as much flexibility as possible on condition that all producers may take advantage of the operational fund and may democratically participate in decisions on its use.
- (34) Provisions should be laid down establishing the scope and structure of the national strategy for sustainable operational programmes and the national framework for environmental actions. Its aim shall be to optimise the allocation of financial resources and to improve the quality of the strategy.
- (35) In the interests of sound management, procedures for the presentation and approval of operational programmes, including deadlines, should be laid down in order to allow appropriate evaluation of the information by the competent authorities, and measures and activities to be included in, or excluded from, the programmes. Since the

programmes are managed on an annual basis, it should be provided that programmes not approved before a given date are postponed for a year.

- (36) There should be a procedure for annually amending operational programmes for the following year, so that they can be adjusted to take account of any new conditions which could not have been foreseen when they were initially presented. In addition, it should be possible for measures and amounts of the operational fund to be changed during each year of execution of a programme. All such changes should be subject to certain limits and conditions, to be defined by Member States and including obligatory notification of changes to the competent authorities, to ensure the approved programmes maintain their overall objectives.
- (37) For reasons of financial security and legal certainty, a list of operations and expenditure which may not be covered by operational programmes should be drawn up.
- (38) In the case of investments on individual holdings, so as to prevent the unjustified enrichment of a private party who has severed links with the organisation during the useful life of the investment, provisions should be laid down to allow the organisation to recover the residual value of the investment, whether such an investment is owned by a member or by the organisation.
- (39) To ensure correct application of the scheme, information to be included in the applications for aid as well as procedures for the payment of aid should be laid down. To prevent cash-flow difficulties, a system of advance payments accompanied by appropriate securities should be available to producer organisations. For similar reasons, an alternative system should be available for the reimbursement of expenditure already incurred.
- (40) Detailed provisions on the scope and application of crisis management and prevention measures should be laid down. As far as possible these rules should provide for flexibility and for rapid application in crises and therefore should allow decisions to be taken by Member States and producer organisations themselves. Nevertheless the rules should prevent abuses and provide for limits on the use of certain measures, including in financial terms. They should also ensure that phytosanitary and environmental requirements are duly respected.
- (41) As regards withdrawals from the market, detailed rules should be adopted taking into account the potential importance of that measure. In particular, rules should be drawn up concerning the system of increased support for fruit and vegetables withdrawn from the market which are distributed free of charge as humanitarian aid by charitable organisations and certain other establishments and institutions. In addition, maximum levels of support for market withdrawals should be fixed in order to ensure that they do not become a permanent alternative outlet for products compared to placing them on the market. In this context, for those products for which maximum levels of Community withdrawal compensation were set in Annex V to Regulation (EC) No 2200/96, it is appropriate to continue using such levels, subject to a certain degree of increase to reflect the fact that these withdrawals are now co-financed. For other products, where experience has not yet shown any risk of excessive withdrawals, it is appropriate to allow Member States to fix maximum levels of support. In all cases, however, for

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

similar reasons, it is appropriate to set a quantitative limit of withdrawals per product per producer organisation.

- (42) Detailed rules should be adopted concerning the national financial assistance which Member States may grant in regions of the Community where the degree of organisation of producers is particularly low, including defining such low degree of organisations. Procedures for the approval of such national aid as well as for the approval and amount of Community reimbursement of the aid should be provided for, as well as for proportion of reimbursement which should reflect those currently applicable.
- (43) Detailed rules, in particular procedural provisions, should be adopted concerning the conditions under which the rules issued by producer organisations or associations of such organisations in the fruit and vegetables sector may be extended to all producers established in a specific economic area. Also, where produce is sold on the tree, it should be made clear which rules are to be extended to the producers and the buyers respectively.
- (44) Apple producers in the Community have recently found themselves in a difficult situation, due, among other things, to a significant increase in imports of apples from certain third countries of the Southern hemisphere. The monitoring of the import of apples should therefore be improved. The appropriate instrument for achieving that objective is a mechanism based on issuing import licences subject to the provision of a security to ensure that the operations for which an import licence has been applied for are actually performed. Commission Regulations (EC) No 1291/2000 laying down common detailed rules for the application of the system of import and export licences and advance fixing certificates for agricultural products⁽²⁵⁾ and (EEC) No 2220/85 laying down common detailed rules for the application of the system of securities for agricultural products⁽²⁶⁾ should apply.
- (45) Detailed rules should be adopted concerning the entry price system for fruit and vegetables. Since most of the perishable fruit and vegetables concerned are supplied on consignment, this creates special difficulties for determining their value. The possible methods for calculation of the entry price on the basis of which imported products are classified in the Common Customs Tariff should be set. In particular, standard import values should be established on the basis of the weighted average of the average prices for the products and special provision must be made for cases in which no prices are available for products of a given origin. There should be provision for the lodging of a security in certain circumstances to ensure that the system is correctly applied.
- (46) Detailed rules should be adopted concerning the import duty which can be imposed on certain products in addition to that provided for in the Common Customs Tariff. The additional duty may be imposed if import volumes of the products concerned exceed trigger levels determined for the product and the period of application. Goods en route to the Community are exempt from additional duty and, therefore, specific provisions for such goods should be adopted.
- (47) Provision should be made for appropriate monitoring and evaluation of ongoing programmes and schemes in order to assess their effectiveness and efficiency by both producer organisations and Member States.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- (48) Measures/provisions should be laid down concerning the type, format and means of communications necessary to implement this Regulation. These should include communications from producers and producer organisations to the Member States and from the Member States to the Commission, as well as the consequences resulting from late or inaccurate communications.
- (49) Measures should be laid down for the checks necessary in order to ensure to proper application of this Regulation and Regulation (EC) No 1182/2007, and the appropriate sanctions applicable to irregularities found. Those measures should involve both specific checks and sanctions laid down at the Community level as well as additional national checks and sanctions. The checks and sanctions should be dissuasive, effective and proportionate. Rules should be provided for resolving cases of obvious error, *force majeure* and other exceptional circumstances to ensure fair treatment of producers. Rules for artificially created situations should be provided for in order to avoid any benefit being derived from such situations.
- (50) Provisions should be made for a smooth transition from the previous system to the new system set out in this Regulation and the implementation of the transitional provisions set out in Article 55 of Regulation (EC) No 1182/2007.
- (51) The measures provided for in this Regulation are in accordance with the opinion of the Management Committee for Fruit and Vegetables,

2 The risk analysis shall be based on the information contained in the traders' database referred to in Article 9 and shall classify traders in risk categories.

Member States shall lay down in advance:

- a the criteria for assessing the risk of non-conformity of lots;
- b on the basis of a risk analysis for each risk category, the minimum proportions of traders or lots and/or quantities which will be subject to a conformity check.

- c the competent inspection body has informed the customs authority that it has not issued a conformity certificate for the lots concerned because they do not need to be checked in the light of the risk assessment referred to in Article 10(1).

This shall be without prejudice to any conformity checks the Member State may carry out pursuant to Article 10

2 Paragraph 1 shall also apply to products subject to the general marketing standard set out in Annex I and products referred to in Article 3(1)(a) if the Member State concerned considers it necessary in the light of the risk analysis referred to in Article 10(1).

Mergers

1 Aid as provided for in Article 7(3) of Regulation (EC) No 1182/2007 may be given, or may continue to be given, to producer groups which have been granted preliminary recognition and which result from the merger between two or more producer group granted preliminary recognition.

The resulting entity shall continue to be treated as the recognised producer organisation, provided that it respects the applicable requirements. 4 Member States shall fix the period, starting after implementation of the recognition plan, within which the producer group shall be required to be recognised as a producer organisation. The period shall not exceed four months.

CHAPTER II

Operational funds and operational programmes

Section 1

Value of marketed production

Article 52

Basis for calculation

1 For the purposes of this Chapter, the value of marketed production for a producer organisation shall be calculated on the basis of the production of members of producer organisations, for which the producer organisation is recognised.

2 The value of the marketed production shall include the production of members who leave or join the producer organisation. The Member States shall determine the conditions to avoid duplicate counting.

[^{F10}2a The value of the marketed production shall not include the value of processed fruit and vegetables or any other product that is not a product of the fruit and vegetables sector.

However, the value of the marketed production of fruit and vegetables intended for processing, which have been transformed into one of the processed fruit and vegetables listed in Part X of Annex I to Regulation (EC) No 1234/2007 or any other agricultural product referred to in this Article and described further in Annex VIa to this Regulation, by either a producer organisation, an association of producer organisations or their members, who are producers or their cooperatives, or subsidiaries as referred to in paragraph 7 of this Article, either by themselves or through outsourcing, shall be calculated as a flat rate in percentage applied to the invoiced value of those processed products.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

That flat rate shall be:

- a 53 % for fruit juices;
- b 73 % for concentrated juices;
- c 77 % for tomato concentrate;
- d 62 % for frozen fruit and vegetables;
- e 48 % for canned fruit and vegetables;
- f 70 % for canned mushrooms of the genus *Agaricus*;
- g 81 % for fruits provisionally preserved in brine;
- h 81 % for dried fruits;
- i 27 % for other processed fruit and vegetables;
- j 12 % for processed aromatic herbs;
- k 41 % for paprika powder.]

3 Member States may allow producer organisations to include the value of the by-products in the value of the marketed production.

4 The value of the marketed production shall include the value of market withdrawal disposed of as provided for in points (a) and (b) of Article 10(4) of Regulation (EC) No 1182/2007, estimated at the average price of those products marketed by the producer organisation in the previous year.

[^{F95} Only the production of the members of the producer organisation marketed by the producer organisation itself shall be counted in the value of marketed production. The production of the members of the producer organisation marketed by another producer organisation designated by their own organisation, pursuant to Article 125a(2)(b) and (c) of Council Regulation (EC) No 1234/2007⁽²⁹⁾ shall be counted in the value of marketed production of the second producer organisation.]

[^{F56} The marketed production of fruit and vegetables shall be invoiced at the 'ex-producer organisation' stage where applicable, as product listed in Part IX of Annex I to Regulation (EC) No 1234/2007 which is prepared and packaged excluding:

- a VAT;
- b internal transport costs, where the distance between the centralised collection or packing points of the producer organisation and the point of distribution of the producer organisation is significant.

For the purposes of point (b) of the first subparagraph, Member States shall provide for reductions to be applied to the invoiced value for products invoiced at different stages of delivery or transport.]

7 The value of the marketed production may also be calculated at the ex-subsiary stage, on the same basis as set out in paragraph 6, provided that at least 90 % of the capital of the subsidiary is owned:

- a by the producer organisations or association of producer organisations; or
- b subject to Member State approval, by members, which are cooperatives, of the producer organisations or associations of producer organisations if doing so contributes to the objectives listed in Article 3(1)(b) and (c) of Regulation (EC) No 1182/2007.

8 Where a reduction in production occurs due to a climatic event or animal or plant diseases or pest infestations, any insurance indemnification received in respect of harvest insurance measures covered by Section 6 of Chapter III, or equivalent measures managed by the producer organisation, due to these causes may be included in the value of marketed production.

Article 53

Reference period

1 The annual ceiling on aid referred to in Article 10(2) of Regulation (EC) No 1182/2007 shall be calculated each year on the basis of the value of marketed production during a 12-month reference period to be determined by the Member States.

2 The reference period shall be fixed by the Member States for each producer organisation as:

- a a 12-month period, starting no earlier than 1 January three years preceding the year in which the operational programme is implemented and ending no later than 1 August of the same year; or
- b the average value of three subsequent 12-month periods starting no earlier than 1 January five years preceding the year in which the operational programme is implemented and ending no later than 1 August of the same year.

3 The 12-month period shall be the accounting period of the producer organisation concerned.

The reference period shall not vary during an operational programme except in duly justified situations.

4 Where a reduction in the value of a product has occurred due to reasons, duly justified to the satisfaction of a Member State, falling outside the responsibility and control of the producer organisation, the value of the marketed production referred to in paragraph 1 shall not be less than 65 % of the value of the product concerned in the previous reference period.

The reasons referred to in the first subparagraph shall be duly justified.

[^{F115} Where recently recognised producer organisations have insufficient historical data on marketed production for the application of paragraph 2 the value of marketed production may be considered to be the value of marketable production provided by the producer organisation for the purposes of recognition. This shall be calculated as the average value of the marketed production for the period during those three years in which the producers who are members of the producer organisation when the application for recognition is submitted were actually producing.]

6 Member States shall take the measures necessary to gather information on the value of marketed production of producer organisations which have not submitted operational programmes.

2 Non-harvesting shall be where no commercial production is taken from the area concerned during the normal production cycle. However destruction of products due to climatic event or disease shall not be considered as non-harvesting.

3 Green harvesting and non-harvesting shall be additional to and different from normal cultivation practices.

- 2 Producer organisations and associations of producer organisations shall notify in advance the competent national authorities, by written telecommunication or electronic message, of each green harvesting or non-harvesting operation they intend to undertake.

They shall include in the first notification of any given year and for a given product, an analysis based on the expected market situation which justifies green harvesting as a crisis prevention measure.

- 3 Green harvesting and non-harvesting shall not both be applied for the same product and the same given area in any given year, or in any two consecutive years.

- 4 Compensation amounts, comprising both the Community contribution and the producer organisation contribution, for green harvesting and non-harvesting shall be per hectare payments set by the Member State under paragraph 1(a):

- a at the level to cover only additional costs generated by the application of the measure, taking into account the environmental and phytosanitary management needed to comply with the provisions adopted pursuant to paragraph 1(b); or
- b at a level to cover not more than 90 % of the maximum support level for market withdrawals as referred to in Article 80.

Section 1

Communications

Article 98

Producer organisations' reports

1 Producer organisations shall submit annual reports, accompanying applications for aid, on the implementation of operational programmes.

Those reports shall concern the following:

- a operational programmes implemented during the preceding year;
- b main amendments to operational programmes; and
- c variances between estimated aid and aid applied for.

2 For each operational programme implemented, the annual report shall indicate:

- a the achievements and results of the operational programme, based on, where relevant, the common output and result indicators set out in Annex XIV and, where appropriate, additional output and result indicators set out in the national strategy; and
- b a summary of the major problems encountered in managing the programme and any measures taken to ensure the quality and effectiveness of programme implementation.

Where relevant, the annual report shall specify what effective safeguards are in place, in accordance with the national strategy and in application of Article 9(5) of Regulation (EC) No 1182/2007, to protect the environment from possible increased pressures coming from investments supported under the operational programme.

3 For the final year of application of an operational programme, a final report shall replace the annual report referred to in paragraph 1.

Final reports shall show to what extent the objectives pursued by the programmes have been achieved. They shall explain changes to actions and/or methods and identify factors which contributed to the success or failure of the programme's implementation, which have been or will be considered when subsequent operational programmes are drawn up, or when existing operational programmes are amended.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

4 Without prejudice to specific provisions in this Regulation, where a producer organisation fails to make a communication to the Member State as required under this Regulation or Regulation (EC) No 1182/2007 or if the communication appears incorrect in the light of objective facts in the Member State's possession, the Member State shall suspend approval for the relevant operational programme for the following year until the communication is correctly made.

The Member State shall include in its annual report referred to in Article 99(3) of this Regulation details of such cases.

Article 99

Required communications from Member States

1 Member States shall designate a single competent authority responsible for communications between the Commission and the Member State which concern producer organisations, producer groups and associations of producer organisations. They shall notify the Commission of this designation and the contact details of the authority.

2 Member States shall communicate to the Commission not later than 31 January the total amount of the operational fund approved that year for all operational programmes. This communication shall make clear both the total amount of the operational fund and also the total amount of Community financing of that operational fund. These figures shall be further broken down between amounts for crisis prevention and management measures and other measures.

3 Member States shall communicate to the Commission not later than 15 November in any given year an annual report on producer organisations and producer groups and operational funds, operational programmes and recognition plans running in the previous year. The annual report shall contain in particular the information set out in Annex XIII.

Section 2

Checks

Article 100

Unique identification system

Member States shall ensure that a unique identification system applies with regard to all aid applications submitted by the same producer organisation or producer group. This identification shall be compatible with the system to record identity referred to in Article 18(1)(f) of Council Regulation (EC) No 1782/2003⁽³²⁾.

Article 101

Aid applications

Without prejudice to specific provisions of this Regulation, Member States shall provide for appropriate procedures for the submission of applications for support, for requests for recognition or approval of operational programme, as well as for payment claims.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Article 102

Sampling

Where it is appropriate to carry out checks by sampling, Member States shall ensure, by their nature and frequency and on the basis of a risk analysis, that the checks are appropriate to the measure concerned.

Article 103

Administrative checks

Administrative checks shall be carried out on all applications for support or payment claims, and shall cover all possible and appropriate elements to be checked by administrative means. The procedures shall require the recording of undertaken operations, the results of the verification and the measures taken in respect of discrepancies.

Article 104

On-the-spot checks

1 Every on-the-spot check shall be the subject of a monitoring report in order to make it possible to review the details of the checks carried out. The report shall indicate in particular:

- a the aid scheme and the application checked;
- b the persons present;
- c the actions, measures and documents checked; and
- d the results of the check.

2 The beneficiary may be given the opportunity to sign the report to attest his presence at the check and to add observations. Where irregularities are found the beneficiary may receive a copy of the monitoring report.

3 Advance notice of on-the-spot checks may be given, provided that the purpose of the check is not jeopardised. The advance notice should be limited to the minimum time necessary.

4 Where possible, on-the-spot checks provided for in this Regulation and other checks provided for in Community rules regarding agricultural subsidies shall be carried out at the same time. However, in 2008, where necessary, on-the-spot checks may be carried out by different bodies at different times.

Article 105

Approval of requests for recognition and approval of operational programmes

1 Before recognising a producer organisation under Article 4(2)(a) of Regulation (EC) No 1182/2007, Member States shall conduct an on-the-spot visit to the producer organisation prior to granting recognition to verify compliance with the conditions for recognition.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

2 Before approving an operational programme under Article 65, the competent national authority shall verify by all appropriate means, including on-the-spot checks, the operational programme submitted for approval and, if applicable, the requests for modification. These checks shall in particular concern:

- a the accuracy of information provided pursuant to Article 61(1)(a), (b) and (e);
- b compliance of the programmes with Article 9 of Regulation (EC) No 1182/2007 as well as with the national framework and the national strategy;
- c the eligibility of the actions and the eligibility of the expenditure proposed;
- d the consistency and technical quality of programmes, the soundness of the estimates and the aid plan, and the planning of its implementation. Checks shall verify whether measurable targets have been set, so that their achievement can be monitored, and whether the targets set are achievable through implementing the proposed actions; and
- e the compliance of the operations for which support is requested with applicable national and Community rules on, in particular, and where relevant, public procurement, State aid and the other appropriate obligatory standards established by national legislation or established in the national framework or the national strategy.

Article 106

Checks on applications for aid for operational programmes

Prior to granting the payment, Member States carry out administrative checks on all applications for aid as well as on-the-spot checks by sampling.

Article 107

Administrative checks on applications for aid for operational programmes

1 Administrative checks on applications for aid shall include in particular, and as far as this is appropriate for the claiming question, a verification of:

- a the annual or, where applicable, the final report transmitted together with the application on the execution of the operational programme;
- b the value of marketed production, the contributions to the operational fund and the expenditure incurred;
- c the delivery of the products and services and the genuineness of expenditure claimed;
- d the conformity of the actions executed with those included in the operational programme as approved; and
- e the respect of financial or other limits and ceilings imposed.

2 Payments financed under the operational programme shall be supported by invoices and documents proving that payment has been made. Where this cannot be done, payments shall be supported by documents of equivalent probative value. Invoices used must be established in the name of the producer organisation, association of producer organisations, producer group or subsidiary as foreseen in Article 52(7) or, subject to Member State approval, in the name of one or more of its members.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Article 108

On-the-spot checks on applications for aid for operational programmes

1 In the context of the verification of the application for aid referred to in Article 70(1), Member States shall carry out on-the-spot checks on the producer organisations so as to ensure compliance with the conditions for grant of aid or the balance thereof for the year in question.

Such checks shall in particular concern:

- a compliance with the recognition criteria for the year in question;
- b the use of the operational fund in the given year including expenditure declared in claims for advance payments or partial payments; and
- c second level checks for the expenses of market withdrawals and green harvesting and non-harvesting.

2 The checks referred to in paragraph 1 shall relate to a significant sample of applications each year. The sample shall represent at least 30 % of the total aid amount, in Member States which have more than 10 recognised producer organisations. In other cases, each producer organisation shall be visited at least once every three years.

At least one check shall be made on each producer organisation before the payment of the aid or the balance thereof relating to the final year of its operational programme.

3 The results of the on-the-spot checks shall be evaluated to establish whether any problems encountered are of a systemic character, entailing a risk for other similar actions, beneficiaries or bodies. The evaluation shall also identify the causes of such situations, any further examination which may be required and the necessary corrective and preventive action.

If the checks reveal significant irregularities in a region or part of a region or for a specific producer organisation, the Member State shall carry out additional checks during the year in question and shall increase the percentage of corresponding applications to be checked the following year.

4 The Member State shall determine which producer organisations to check on the basis of a risk analysis.

The risk analysis shall in particular take account of:

- a the amount of aid;
- b the findings of the checks in previous years;
- c a random element; and
- d other parameters to be determined by Member States, in particular whether producer organisations are involved in a quality assurance programme officially recognised by the Member States or by independent certifying bodies.

Article 109

On-the-spot checks on measures of operational programmes

1 Through the on-the-spot checks concerning the measures of operational programmes, Member States shall verify in particular the following:

- a the implementation of the actions contained in the operational programme;

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- b that the implementation or intended implementation of the action is consistent with the use described in the operational programme as approved;
- c for an adequate number of expenditure items, that the nature and timing of the relevant expenditure comply with Community provisions and correspond to the approved specifications;
- d that the expenditure incurred can be supported by accounting or other documents; and
- e the value of marketed production.

2 The value of marketed production shall be verified on the basis of data of the accounting system required under national law.

To that end, the Member States may decide that the declaration of the value of marketed production shall be certified in the same way as the accounting data required under national law.

The check on the declaration of the value of marketed production may be carried out before the relevant application for aid is transmitted.

3 Except in exceptional circumstances, the on-the-spot check shall include a visit to the action or, if the action is intangible, to the action promoter. In particular actions on individual holdings covered by the sample referred to in Article 108(2) shall be subject of at least one visit to verify their execution.

However, Member States may decide not to carry out such visits for smaller operations, or where they consider that the risk is low that the conditions for receiving aid are not fulfilled, or that the reality of the operation has not been respected. That decision and its justification shall be recorded.

4 The on-the-spot check shall cover all the commitments and obligations of the producer organisation or its members which can be checked at the time of the visit.

5 Only checks meeting all the requirements of this Article may be counted towards the fulfilment of the checking rate set out in Article 108(2).

Article 110

First-level checks on withdrawal operations

1 Member States shall make first-level checks on withdrawal operations in each producer organisation, comprising a documentary and identity check and a physical check, where appropriate by sampling, of the weight of the products withdrawn from the market and a check on compliance with the rules in Article 77, in accordance with the procedures laid down in Chapter II of Title II. The check shall take place following receipt of the notification referred to in Article 79(1), within the deadlines provided for in Article 79(2).

2 The first-level checks provided for in paragraph 1 shall cover 100 % of the quantity of products withdrawn from the market. At the end of this check, the withdrawn products other than those for free distribution shall be denatured or disposed of to the processing industry under the supervision of the competent authorities under the terms and conditions laid down by the Member State under Article 81.

However, where the products are for free distribution, Member States may check a smaller percentage than that set out in paragraph 2 of this Article, provided it is not less than 10 % of the quantities concerned during the marketing year. The check may take place at the producer organisation and/or at the sites of the recipients of the products.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

In the event that the checks reveal significant irregularities, the competent authorities shall carry out additional checks.

Article III

Second-level checks on withdrawal operations

1 In the framework of the checks referred to in Article 108, Member States shall make second-level checks.

Member States shall lay down criteria for analysing and evaluating the risk of any given producer organisation carrying out non-compliant withdrawal operations. Such criteria shall relate, among other things, to the findings of previous first- and second-level checks, and whether or not a producer organisation has some form of quality-assurance procedure. They shall use these criteria to determine for each producer organisation a minimum frequency of second-level checks.

2 The checks referred to in paragraph 1 shall comprise on-the-spot checks at the premises of producer organisations and the recipients of withdrawn products, in order to ensure that the requisite conditions for payment of Community support have been complied with. These checks shall include:

- a the specific stock and accounting records to be kept by all producer organisations which carry out one or more withdrawal operations during the marketing year concerned;
- b verification of the quantities marketed as declared in the applications for aid, checking in particular the stock and accounting records, the invoices and, where necessary, their veracity and ensuring that the declarations tally with the accounting and/or tax data of the producer organisations concerned;
- c checks that the accounts are correct, in particular the veracity of net receipts by the producer organisations as declared in their payment applications, the proportionality of any withdrawal costs, the entries in the accounts regarding the receipt by the producer organisations of the Community support and any amounts thereof paid on to members, ensuring that these tally; and
- d checks on the destination of withdrawn products as declared in the payment application and checks on the appropriate denaturing to ensure that the producer organisations and recipients have complied with this Regulation.

3 The checks referred to in paragraph 2 shall be carried out on the producer organisations concerned and the recipients associated with those organisations. Each check shall include a sample representing at least 5 % of the quantities withdrawn during the marketing year by the producer organisation.

4 The stock and accounting records referred to in point (a) of paragraph 2 shall show, for each product withdrawn, the amounts moved, expressed in volume, of:

- a the production delivered by members of the producer organisation and by members of other producer organisations in accordance with Article 3(3)(b) and (c) of Regulation (EC) No 1182/2007;
- b sales by the producer organisation, broken down by products prepared for the fresh market and other types of products including raw materials for processing; and
- c products withdrawn from the market.

5 The checks on the destination of products referred to in point (c) of paragraph 4 shall include, in particular:

- a a sample check on the separate accounts to be kept by recipients and, where necessary, verification that these tally with the accounts required under national law; and
- b checks on compliance with the relevant environmental requirements;

6 If the second-level checks reveal significant irregularities, the competent authorities shall carry out more detailed second-level checks for the marketing year concerned and shall increase the frequency of second-level checks on the producer organisations or their associations concerned during the following marketing year.

After the end of the harvest period, Member States shall verify the reliability of the analysis based on the expected market situation referred to in Article 86(2). They shall also analyse any differences between the expected market situation and the real market situation.

2 Before a non-harvesting operation takes place, Member States shall verify by an on-the-spot check that the given area has been well maintained, that no partial harvest has already taken place and that the product is well developed and would in general be sound, fair and of marketable quality.

Member States shall ensure that the production is denatured. If this is not possible, they shall ensure, by an on-the-spot visit or visits during the harvest season, that no harvest takes place.

3 Paragraphs 1, 2, 3 and 6 of Article 111 shall apply *mutatis mutandis*.

All producer groups shall be checked at least once every five years.

During the period of suspension, no aid shall be paid. The suspension shall take effect from the day where the check has taken place and shall end on the day of the check which shows that the criteria concerned have been fulfilled.

The period of suspension shall not exceed 12 months. If the criteria concerned are subsequently not fulfilled after 12 months, recognition shall be withdrawn.

[^{F12}Member States may make payments after the deadline set out in Article 71 where this is necessary in order to apply this paragraph. However, these later payments may not in any case be made later than 15 October of the second year following the year of implementation of the programme.]

CHAPTER II

Import duties and entry price system

Section 1

Entry price system

Article 135

Scope and definitions

1 This Section lays down the rules for the application of Article 34 of Regulation (EC) No 1182/2007.

2 For the purposes of this Section:

- a 'lot' means the goods presented under a declaration of release for free circulation, covering only goods of the same origin falling within one single combined nomenclature code; and
- b 'importer' means the declarant within the meaning of Article 4(18) of Regulation (EEC) No 2913/92⁽³⁷⁾.

Article 136

Reporting of prices

1 For each product and for the periods set out in Part A of Annex XV, for each market day and each origin, the Member States shall communicate to the Commission, by 12 noon (Brussels time) the following working day at the latest:

- a the average representative prices of the products imported from third countries sold on the representative import markets referred to in Article 137(1), and significant prices recorded on other markets for large quantities of imported products, or, where no prices for the representative markets are available, significant prices for imported products recorded on other markets; and
- b the total quantities relating to the prices referred to in point (a).

Where the total quantities referred to in point (b) are less than one tonne, the corresponding prices shall not be communicated to the Commission.

2 The prices referred to in paragraph 1(a) shall be recorded:

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- a for each of the products listed in Part A of Annex XV;
- b for all of the available varieties and sizes; and
- c at the importer/wholesaler stage or the wholesaler/retailer stage where no prices at the importer/wholesaler stage are available.

They shall be reduced by the following amounts:

- a a marketing margin of 15 % for the marketing centres of London, Milan and Rungis and of 8 % for other marketing centres; and
- b costs of transport and insurance within the customs territory of the Community.

For the costs of freight and insurance to be deducted pursuant to the second subparagraph, the Member States may fix standard amounts for deduction. Such standard amounts and the methods for calculating them shall be reported to the Commission without delay.

3 The prices recorded in accordance with paragraph 2 shall, where they are established at the wholesaler/retailer stage, first be reduced by an amount equal to 9 % to take account of the wholesaler's trade margin, and then by an amount equal to EUR 0,7245 per 100 kilograms to take account of the costs of handling and market taxes and charges.

4 The following shall be deemed to be representative:

- a the prices of Class I products, provided that the quantities in that class account for at least 50 % of the total quantities marketed;
- b the prices of Class I products plus, where products in that class account for less than 50 % of the total quantities, the prices as established of Class II products for quantities enabling 50 % of the total quantities marketed to be covered;
- c the prices as established for Class II products, where Class I products are not available, unless it is decided to apply an adjustment coefficient to them if, as a result of the production conditions for products of the origin in question, those products are not normally and traditionally marketed in Class I as a result of their quality characteristics.

The adjustment coefficient referred to in point (c) of the first subparagraph shall be applied to prices after deduction of the amounts referred to in paragraph 2.

Article 137

Representative markets

Member States shall inform the Commission of the customary market days for the markets listed in Annex XVI which shall be deemed to be representative markets.

Article 138

Standard import values

1 For each product and for the periods set out in Part A of Annex XV, the Commission shall fix, each working day and for each origin, a standard import value equal to the weighted average of the representative prices referred to in Article 136, less a standard amount of EUR 5/100 kg and the *ad valorem* customs duties.

2 Where a standard import value is established for the products and for the periods of application listed in Part A of Annex XV, in accordance with this Section, the unit price as

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

referred to in Article 152(1)(a) of Commission Regulation (EEC) No 2454/93⁽³⁸⁾ shall not apply. It shall be replaced by the standard import value referred to in paragraph 1.

3 Where no standard import value is in force for a product of a given origin, the average of standard import values in force for that product shall apply.

4 During the periods of application set out in Part A of Annex XV, the standard import values shall remain applicable until they are changed. They shall cease to apply, however, where no average representative price has been communicated to the Commission for seven consecutive market days.

Where, pursuant to the first subparagraph, no standard import value applies to a given product, the standard import value applicable to that product shall be equal to the last average standard import value.

5 By way of derogation from paragraph 1, where it has not been possible to calculate a standard import value, no standard import value shall be applicable from the first day of the periods of application set out in Part A of Annex XV.

6 The representative prices in euro shall be converted using the representative market rate calculated for the day in question.

7 The standard import values expressed in euro shall be made publicly available by the Commission by the methods it considers appropriate.

Article 139

Entry price basis

1 The entry price on the basis of which the products listed in Part A of Annex XV are classified in the Customs Tariff of the European Communities shall be equal, as the importer chooses:

- a the fob price of the products in their country of origin plus the costs of insurance and freight up to the borders of the Community customs territory, where that price and those costs are known at the time the declaration of release of the products for free circulation is made. Where the aforementioned prices are higher by more than 8 % than the standard value applicable to the product in question at the time the declaration of release for free circulation is made, the importer must lodge the security referred to in Article 248(1) of Regulation (EEC) No 2454/93. For this purpose, the amount of import duty for which the products may finally be liable shall be the amount of duty which he would have paid if the product in question had been classified on the basis of the standard value concerned; or
- b the customs value calculated in accordance with Article 30(2)(c) of Regulation (EEC) No 2913/92 applied only to the imported products in question. In that case, the duty shall be deducted as provided for in Article 138(1). In that case the importer shall lodge the security referred to in Article 248(1) of Regulation (EEC) No 2454/93, equal to the amount of duty which he would have paid if the classification of the products had been made on the basis of the standard import value applicable to the lot in question; or
- c the standard import value calculated in accordance with Article 138 of this Regulation.

2 The entry price on the basis of which the products listed in part B of Annex XV are classified in the customs tariff of the European Communities must be equal to, as the importer chooses:

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- a the fob price of the products in their country of origin plus the costs of insurance and freight up to the borders of the Community customs territory, where that price and those costs are known at the time the customs declaration is made. If the customs authorities deem that a security is required pursuant to Article 248 of Regulation (EEC) No 2454/93, the importer must lodge a security equal to the maximum amount of duty applicable to the product in question; or
- b the customs value calculated in accordance with Article 30(2)(c) of Regulation (EEC) No 2913/92 applied only to the imported products in question. In that case, the duty shall be deducted as provided for in Article 138(1). In that case the importer must lodge the security referred to in Article 248 of Regulation (EEC) No 2454/93, equal to the maximum amount of duty applicable to the product in question.

3 Where the entry price is calculated on the basis of the fob price of the products in the country of origin, the customs value shall be calculated on the basis of the relevant sale at that price.

When the entry price is calculated in accordance with one of the procedures provided for in paragraph 1(b) or (c) or paragraph 2(b), the customs value shall be calculated on the same basis as the entry price.

4 The importer shall have one month from the sale of the products in question, subject to a limit of four months from the date of acceptance of the declaration of release for free circulation, to prove that the lot was disposed of under the conditions confirming the correctness of the prices referred to in the second subparagraph of paragraph 1(a) or paragraph 2(a), or to determine the customs value referred to in paragraph 1(b) and paragraph 2(a). Failure to meet one of these deadlines shall entail the loss of the security lodged, without prejudice to the application of paragraph 5.

The security lodged shall be released to the extent that proof of the conditions of disposal is provided to the satisfaction of the customs authorities.

Otherwise the security shall be forfeit by way of payment of the import duties.

5 The time limit of four months referred to in paragraph 4 may be extended by the competent authorities by a maximum of three months at the request of the importer, which must be duly justified.

6 If on verification the competent authorities establish that the requirements of this Article have not been met, they shall recover the duty due in accordance with Article 220 of Regulation (EEC) No 2913/92. The amount of the duty to be recovered or remaining to be recovered shall include interest from the date the goods were released for free circulation up to the date of recovery. The interest rate applied shall be that in force for recovery operations under national law.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Section 2

Additional import duties

Article 140

Scope and definitions

1 Additional import duty as referred to in Article 35(1) of Regulation (EC) No 1182/2007, hereinafter ‘additional duty’, may be applied to the products and during the periods listed in Annex XVII on the conditions set out in this Section.

2 Trigger levels for the additional duties are listed in Annex XVII.

Article 141

Reporting of volumes

1 For each of the products listed in Annex XVII and during the periods indicated Member States shall notify the Commission of details of the volumes put into free circulation using the method for the surveillance of preferential imports set out in Article 308d of Regulation (EEC) No 2454/93.

Such notification shall take place no later than 12 noon Brussels time each Wednesday for the volumes put into free circulation during the preceding week.

2 Declarations for release for free circulation of products covered by this Section which the customs authorities may accept at the declarant's request without their containing certain particulars referred to in Annex 37 of Regulation (EEC) No 2454/93 shall contain, in addition to the particulars referred to in Article 254 of that Regulation, an indication of the net mass (kg) of the products concerned.

Where the simplified declaration procedure referred to in Article 260 of Regulation (EEC) No 2454/93 is used to put into free circulation products covered by this Section, the simplified declarations shall contain, in addition to other requirements, an indication of the net mass (kg) of the products concerned.

Where the local clearance procedure referred to in Article 263 of Regulation (EEC) No 2454/93 is used to put into free circulation products covered by this Section, the notification to the customs authorities referred to in Article 266(1) of that Regulation shall contain all necessary data for the identification of the goods, as well as an indication of the net mass (kg) of the products concerned.

Article 266(2b) shall not apply to imports of the products covered by this Section.

Article 142

Levying of additional duty

1 If it is found that, for one of the products and one of the periods listed in Annex XVII, the quantity put into free circulation exceeds the corresponding triggering volume the Commission shall levy an additional duty unless the imports are unlikely to disturb the Community market, or the effects would be disproportionate to the intended objective.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

2 The additional duty shall be levied on quantities put into free circulation after the date of application of that duty, provided that:

- a their tariff classification determined in accordance with Article 139 entails application of the highest specific duties applicable to imports of the origin in question;
- b importation is effected during the period of application of the additional duty.

Article 143

Amount of additional duty

The additional duty imposed under Article 142 shall be one third of the customs duty applicable to the given product in accordance with the Common Customs Tariff.

However, for imports benefiting from a tariff preference as to *ad valorem* duty the additional duty shall be one third of the specific duty on the product in so far as Article 142(2) applies.

Article 144

Exemptions from additional duty

1 The following are exempt from additional duty:

- a goods imported against the tariff quotas listed in Annex VII to the combined nomenclature;
- b goods *en route* to the Community as defined in paragraph 2.

2 Goods shall be considered to be *en route* to the Community if they:

- a left the country of origin before the decision to impose additional duty; and
- b are being transported under cover of a transport document valid from the place of loading in the country of origin to the place of unloading in the Community, drawn up before imposition of additional duty.

3 Interested parties shall provide evidence to the satisfaction of the customs authorities that the requirements of paragraph 2 are met.

However, these authorities may deem that goods left their country of origin before the date of imposition of additional duty if one of the following documents is provided:

- a for sea transport, the bill of lading showing that loading took place before that date;
- b for rail transport, the waybill accepted by the rail authorities of the country of origin before that date;
- c for road transport, the road carriage contract (CMR) or another transit document made out in the country of origin before that date, if the conditions laid down in bilateral or multilateral arrangements concluded in the context of Community transit or common transit are observed;
- d for air transport, the air way bill showing that the airline accepted the goods before that date.

2 The rules for the approval of all operational programmes submitted in 2007 shall be those applicable immediately prior to the date of application of this Regulation.

Operational programmes to which benefit from point (a) of Article 55(3) of Regulation (EC) No 1182/2007 may continue to run until their end provided they comply with the rules applicable prior to the date of application of this Regulation.

By way of derogation from Articles 66 and 67 of this Regulation, Member States may adopt any necessary provisions to permit producer organisations to amend their operational programmes as soon as possible after the entry into force of this Regulation in order to apply points (b) and (c) of Article 55(3) of Regulation (EC) No 1182/2007.

[^{F18}Member States may provide that the expenditure on one or more of the crisis prevention and management measures on market withdrawal, promotion and communication and training which are carried out in 2008 by a producer organisation shall be eligible even if the operational programme has not yet been amended to cover the measures concerned. In order for such expenditure to be eligible:

- b in 2008 the operational programme shall be amended in accordance with this Regulation to cover the measures concerned before an application is made for payment of the related aid; and
- c the measures and any checks on those measures shall comply with this Regulation.

Member States may provide that an amendment to a measure in an existing operational programme made under Article 55(3)(b) of Regulation (EC) No 1182/2007 covers the expenditure on operations which are carried out in 2008 even before that amendment is made, provided that the requirements of points (a), (b) and (c) of the fourth subparagraph are respected.]

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

[^{F14} By way of derogation from Article 47(2) of this Regulation, producers groups which are implementing recognition plans to which Article 55(4) of Regulation (EC) No 1182/2007 applies and which are not broken into semestrial periods may submit applications for aid covering semestrial periods. Such applications may cover only semestrial periods corresponding to the yearly segments which started before 2008.

5 By way of derogation from Article 96, in respect of operational programmes implemented in 2007, additional financial assistance to operational funds shall be financed by EAGF at a level of 50 % of the financial assistance granted to the producer organisation.

6 Recognition plans accepted under Regulation (EC) No 2200/96 which continue to benefit from acceptance pursuant to Article 55(4) of Regulation (EC) No 1182/2007 for producer groups not in Member States which acceded to the Community on 1 May 2004 or after that date and not in the outermost regions of the Community as referred to in Article 299(2) of the Treaty or in the smaller Aegean islands as referred to in Article 1(2) of Regulation (EC) No 1405/2006 shall be financed at the rates set out in Article 7(5)(b) of Regulation (EC) No 1182/2007.

Recognition plans accepted under Regulation (EC) No 2200/96 which benefitted from Article 14(7) of that Regulation and continue to benefit from acceptance pursuant to Article 55(4) of Regulation (EC) No 1182/2007 shall be financed at the rates set out in Article 7(5)(a) of Regulation (EC) No 1182/2007.

7 Payments of Community withdrawal compensation and related checks which concern 2007 withdrawals but which were not yet made by 31 December 2007 may nevertheless be made after that date in accordance with Title IV of Regulation (EC) No 2200/96 as it existed at that date.

8 Where, in respect of an application for aid submitted for operational programmes implemented in 2007 or before, and in relation to acts or omissions which occurred in that period, a sanction would apply under Section 3 of Chapter V of Title III but a less severe sanction or no sanction would have applied under the legislation in force at the time, then that less severe sanction, or as the case may be, no sanction, shall apply.]

[^{F69} By way of derogation from the third subparagraph of Article 65(2) of this Regulation, the Member States may, for duly justified reasons, take a decision on the 2009 operational programmes and funds by 1 March 2009 at the latest. The approval decision may stipulate that expenditure is eligible from 1 January 2009 onwards.

10 By way of derogation from Article 99(2) of this Regulation, Member States, who postponed decisions on the 2009 operational programmes, pursuant to the previous paragraph, shall communicate to the Commission by 31 January 2009 an estimate of the amount of the operational fund for the year 2009 for all operational programmes. This communication shall make clear both the total amount of the operational fund and also the total amount of Community financing of that operational fund. These figures shall be further broken down between amounts for crisis prevention and management measures and other measures.

The Member States referred to in the previous subparagraph shall communicate to the Commission the final approved amount of the operational fund for the year 2009 for all operational programmes, including the breakdown as indicated above, by 15 March 2009.]

As regards producer groups in Member States which acceded to the European Union on 1 May 2004 or thereafter with annual segments of recognition plans that started in 2007 and end in 2008, the annual support referred to in Article 103a(1)(a) of Regulation (EC) No 1234/2007 is calculated as the sum of the value of sales invoiced in the relevant part of 2007 multiplied by the rate relevant for the annual segment considered and the value of sales invoiced in 2008 multiplied by the new rate relevant for the annual segment considered.

12 By way of derogation from Article 47(1) of this Regulation, the producer groups referred to in Article 203a(4) of 1234/2007 may submit a separate application for the aid referred to in Article 103a(1)(a) of that Regulation for the processing aids received on the basis of Regulations (EC) No 1621/1999, (EC) No 1622/1999, (EC) No 1535/2003 and (EC) No 2111/2003 for marketing years 2006/2007 and 2007/2008 if they were not taken into account in earlier applications.

MARKETING STANDARDS REFERRED TO IN ARTICLE 2a

PART A

GENERAL MARKETING STANDARD

1. Minimum quality requirements

Subject to the tolerances allowed, the products shall be:

- intact,
- sound; products affected by rotting or deterioration such as to make them unfit for consumption are excluded,
- clean, practically free of any visible foreign matter,
- practically free from pests,
- practically free from damage caused by pests affecting the flesh,
- free of abnormal external moisture,
- free of any foreign smell and/or taste.

The condition of the products must be such as to enable them:

- to withstand transport and handling,
- to arrive in satisfactory condition at the place of destination.

2. Minimum maturity requirements

The products must be sufficiently developed and display satisfactory ripeness.

The development and state of maturity of the products must be such as to enable them to continue their ripening process and to reach a satisfactory degree of ripeness.

3. Tolerance

A tolerance of 10 % by number or weight of product not satisfying the minimum quality requirements shall be permitted in each lot. This tolerance shall not however cover product affected by rotting or any other deterioration rendering it unfit for consumption.

4. Marking of origin of produce

Full name of the country of origin. For products originating in a Member State this shall be in the language of the country of origin or any other language understandable by the consumers of the country of destination. For other products, this shall be in any language understandable by the consumers of the country of destination.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

PART B

SPECIFIC MARKETING STANDARDS

PART 1:

MARKETING STANDARD FOR APPLES

I. DEFINITION OF PRODUCE

This standard applies to apples of varieties (cultivars) grown from *Malus domestica* Borkh., to be supplied fresh to the consumer, apples for industrial processing being excluded.

II. PROVISIONS CONCERNING QUALITY

The purpose of the standard is to define the quality requirements of apples, after preparation and packaging.

A. Minimum requirements

In all classes, subject to the special provisions for each class and the tolerances allowed, apples must be:

- intact,
- sound, produce affected by rotting or deterioration such as to make it unfit for consumption is excluded,
- clean, practically free of any visible foreign matter,
- practically free from pests,
- practically free from damage caused by pests,
- free of abnormal external moisture,
- free of any foreign smell and/or taste.

In addition, they must have been carefully picked.

The development and condition of the apples must be such as to enable them:

- to continue their maturing process and to reach the degree of maturity required in relation to the varietal characteristics⁽⁴⁴⁾⁽⁴⁵⁾,
- to withstand transport and handling, and
- to arrive in satisfactory condition at the place of destination.

B. Classification

Apples are classified in three classes defined below.

(i) 'Extra' class

Apples in this class must be of superior quality. In shape, size and colouring, they must be characteristic of the variety⁽⁴⁶⁾ and with the stalk which must be intact.

The flesh must be perfectly sound.

They must be free from defects with the exception of very slight superficial defects provided these do not affect the general appearance of the produce, the quality, the keeping quality and presentation in the package.

(ii) Class I

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Apples in this class must be of good quality. In shape, size and colouring, they must be characteristic of the variety⁽⁴⁶⁾.

The flesh must be perfectly sound.

The following slight defects, however, may be allowed provided these do not affect the general appearance of the produce, the quality, the keeping quality and presentation in the package:

- a slight defect in shape,
- a slight defect in development,
- a slight defect in colouring,
- slight skin defects which must not extend over more than:
 - 2 cm in length for defects of elongated shape,
 - 1 cm² of total surface area for other defects, with the exception of scab (*Venturia inaequalis*), which must not extend over more than 0,25 cm² of total surface area,
 - slight bruising not exceeding 1 cm² of total surface area and not discoloured.

The stalk may be missing, provided the break is clean and the adjacent skin is not damaged.

(iii) Class II

This class includes apples which do not qualify for inclusion in the higher classes but satisfy the minimum requirements specified above⁽⁴⁶⁾.

The flesh must be free from major defects.

The following defects are allowed provided the fruit retains its essential characteristics as regards the quality, the keeping quality and presentation:

- defects in shape,
- defects in development,
- defects in colouring,
- skin defects which must not extend over more than:
 - 4 cm in length for defects of elongated shape,
 - 2,5 cm² of total surface area for other defects, with the exception of scab (*Venturia inaequalis*), which must not extend over more than 1 cm² of total surface area,
 - slight bruising not exceeding 1,5 cm² of total surface area which may be slightly discoloured.

III. PROVISIONS CONCERNING SIZING

Size is determined either by the maximum diameter of the equatorial section or by weight.

For all varieties and for all classes the minimum size is 60 mm, if measured by diameter or 90 g, if measured by weight. Fruit of smaller sizes may be accepted, if the Brix level of the produce is greater than or equal to 10,5° Brix and the size is not smaller than 50 mm or 70 g.

To ensure there is uniformity of size within the package:

- (a) for fruit sized according to the diameter, the difference in diameter between fruit in the same package shall be limited to:
 - 5 mm for 'Extra' Class fruit and for Classes I and II fruit packed in rows and layers. However, for apples of the varieties Bramley's Seedling (Bramley,

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- Triomphe de Kiel) and Horneburger, the difference in diameter may amount to 10 mm, and
 - 10 mm for Class I fruit packed loose in the package or sales packages. However, for apples of the varieties Bramley's Seedling (Bramley, Triomphe de Kiel) and Horneburger, the difference in diameter may amount to 20 mm, or
- (b) for fruit sized according to weight, the difference in weight between fruit in the same package shall be limited to:
- 20 % of the average individual fruit weight in the package for 'Extra' Class fruit and for Classes I and II fruit packed in rows and layers, and
 - 25 % of the average individual fruit weight in the package for Class I fruit packed loose in the package or in consumer packages.

There is no sizing uniformity requirement for Class II fruit packed loose in the package or in consumer packages.

IV. PROVISIONS CONCERNING TOLERANCES

Tolerances in respect of quality and size shall be allowed in each package for produce not satisfying the requirements of the class indicated.

A. Quality tolerances

(i) 'Extra' class

5 % by number or weight of apples not satisfying the requirements of the class, but meeting those of Class I or, exceptionally, coming within the tolerances of that class.

(ii) Class I

10 % by number or weight of apples not satisfying the requirements of the class, but meeting those of Class II, or exceptionally, coming within the tolerances of that class.

(iii) Class II

10 % by number or weight of apples satisfying neither the requirements of the class nor the minimum requirements, with the exception of produce affected by rotting or any other deterioration rendering it unfit for consumption.

Within this tolerance, a maximum of 2 % number or weight of fruit is allowed which shows the following defects:

- serious attacks of cork (bitter pit) or water-core,
- slight damage or unhealed cracks,
- very slight traces of rot,
- presence of internal feeding pests and/or damage to the flesh caused by pests.

B. Size tolerances

For all classes:

For all classes: a total tolerance of 10 per cent, by number or weight, of fruit not satisfying the requirements as regards sizing is allowed. This tolerance may not be extended to include produce with a size:

- 5 mm or more below the minimum diameter when size is determined by diameter,
- 10 g or more below the minimum weight when size is determined by weight.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

V. PROVISIONS CONCERNING PRESENTATION

A. Uniformity

The contents of each package must be uniform and contain only apples of the same origin, variety, quality and size (if sized) and the same degree of ripeness.

In the case of the 'Extra' class, uniformity also applies to colouring.

Sales packages of a net weight not exceeding 5 kg may contain mixtures of apples of different varieties, provided they are uniform in quality and, for each variety concerned, in origin, size (if sized) and degree of ripeness.

The visible part of the contents of the package must be representative of the entire contents.

B. Packaging

The apples must be packed in such a way as to protect the produce properly. In particular, sales packages of a net weight exceeding 3 kg shall be sufficiently rigid to ensure proper protection of the produce.

The materials used inside the package must be new, clean and of a quality such as to avoid causing any external or internal damage to the produce. The use of materials, particularly of paper or stamps bearing trade specifications is allowed provided the printing or labelling has been done with non-toxic ink or glue.

Packages must be free of all foreign matter.

Stickers individually affixed on product shall be such as, when removed, neither to leave visible traces of glue, nor to lead to skin defects.

C. Presentation

For 'Extra' class, fruit must be packed in layers.

VI. PROVISIONS CONCERNING MARKING

Each package must bear the following particulars, in letters grouped on the same side, legibly and indelibly marked, and visible from the outside.

A. Identification

The name and the address of the packer and/or the dispatcher

This mention may be replaced:

- for all packages with the exception of pre-packages, by the officially issued or accepted code mark representing the packer and/or the dispatcher, indicated in close connection with the reference 'Packer and/or Dispatcher' (or equivalent abbreviations);
- for pre-packages only, by the name and the address of a seller established within the Community indicated in close connection with the mention 'Packed for:' or an equivalent mention. In this case, the labelling shall also include a code representing the packer and/or the dispatcher. The seller shall give all information deemed necessary by the inspection body as to the meaning of this code.

B. Nature of produce

- 'Apples' if the contents are not visible from the outside
- Name of the variety or varieties where appropriate.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

— In the case of sales packages containing a mixture of apples of different varieties, names of each of the different varieties in the package.

C. Origin of produce

Country of origin and, optionally, district where grown, or national, regional or local place name

— In the case of sales packages containing a mixture of varieties of apples of different origins, the indication of each country of origin shall appear next to the name of the variety concerned.

D. Commercial specifications

— Class

— Size or, for fruit packed in layers, number of units.

If identification is by the size, this should be expressed:

(a) for produce subject to the uniformity rules, as minimum and maximum diameters or minimum and maximum weight;

(b) for produce not subject to the uniformity rules, the diameter or the weight of the smallest fruit in the package followed by ‘and over’ or ‘+’ or equivalent denomination or, where applicable, followed by the diameter or weight of the largest fruit.

Packages need not to bear the particulars mentioned in the first subparagraph, when they contain sales packages, clearly visible from the outside, and all bearing these particulars. These packages shall be free from any indications such as could mislead. When these packages are palletised, the particulars shall be given on a notice placed in an obvious position on at least two sides of the pallet.

PART 2:

MARKETING STANDARD FOR CITRUS FRUITS

I. DEFINITION OF PRODUCE

This standard applies to the following fruit, classified as ‘citrus fruit’, to be supplied fresh to the consumer, citrus fruit for industrial processing being excluded:

- lemons of varieties (cultivars) grown from the species *Citrus limon* (L.) Burm. f.,
- mandarins of varieties (cultivars) grown from the species *Citrus reticulata* Blanco, including satsumas (*Citrus unshiu* Marcow.), clementines (*Citrus clementina* Hort. ex Tan.), common mandarins (*Citrus deliciosa* Ten.) and tangerines (*Citrus tangerina* Hort. ex Tan.) grown from these species and its hybrids, hereinafter called ‘mandarins’,
- oranges of varieties (cultivars) grown from the species *Citrus sinensis* (L.) Osb.

II. PROVISIONS CONCERNING QUALITY

The purpose of the standard is to define the quality requirements of the citrus fruit after preparation and packaging.

A. Minimum requirements

In all classes, subject to the special provisions for each class and the tolerances allowed, the citrus fruit must be:

- intact,
- free of bruising and/or extensive healed over cuts,
- sound; produce affected by rotting or deterioration such as to make it unfit for consumption is excluded,
- clean practically free of any visible foreign matter,
- practically free from pests,
- practically free from damage caused by pests,
- free of signs of internal shrivelling,
- free of damage caused by low temperature or frost,
- free of all abnormal external moisture,
- free of any foreign smell and/or taste.

The citrus fruit must have been carefully picked and have reached an appropriate degree of development and ripeness account being taken of criteria proper to the variety, the time of picking and the growing area.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

The development and state of ripeness of the citrus fruit must be such as to enable them:

- to withstand transport and handling, and
- to arrive in satisfactory condition at the place of destination.

Citrus fruit meeting the ripeness requirements of this Annex may be 'degreened'. This treatment is permitted only if the other natural organoleptic characteristics are not modified.

B. Maturity requirements

Maturity of citrus fruit is defined by the following parameters specified for each specie below:

1. Minimum juice content
2. Colouring

The degree of colouring shall be such that, following normal development the citrus fruit reach the colour typical of the variety at their destination point.

(i) Lemons

— Minimum juice content:

—	Verdelli and Primofiore lemons:	20 %
—	Other lemons:	25 %

— Colouring: must be typical of the variety. However fruits with a green (but not dark green) colour are allowed provided they satisfy the minimum requirements as to juice content.

(ii) Mandarins

— Minimum juice content:

—	Mandarins, excluding Clementines:	33 %
—	Clementines:	40 %

— Colouring: must be typical of the variety on at least one third of the surface of the fruit.

(iii) Oranges

Colouring must be typical of the variety. Fruits with light green colour are allowed, provided it does not exceed one fifth of the total surface of the fruit. Fruits must show the following minimum juice content:

—	Blood oranges:	30 %
—	Navels group:	33 %
—	Other varieties:	35 %

However, oranges produced in areas with high air temperatures and high relative humidity conditions during the developing period can be of a green colour exceeding one fifth of the total surface area, provided they satisfy the following minimum juice content:

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

—	Varieties Mosambi, Sathgudi and Pacitan:	33 %
—	Other varieties:	45 %

C. Classification

Citrus fruit are classified in three classes defined below:

(i) 'Extra' Class

Citrus fruit in this class must be of superior quality. In shape, external appearance, development and colouring they must be characteristic of the variety and/or commercial type.

They must be free from defects with the exception of very slight superficial defects, provided these do not affect the general appearance of the produce, the quality, the keeping quality and presentation in the package.

(ii) Class I

Citrus fruit in this class must be of good quality. They must be characteristic of the variety and/or commercial type.

The following slight defects, however, may be allowed provided these do not affect the general appearance of the produce, the quality, the keeping quality and presentation in the package:

- slight defect in shape,
- slight defect in colouring,
- slight skin defects occurring during the formation of the fruit, such as silver scurfs, russets, etc.,
- slight healed defects due to a mechanical cause such as hail damage, rubbing, damage from handling, etc.

(iii) Class II

This class includes citrus fruit which do not qualify for inclusion in the higher classes but satisfy the minimum requirements specified above.

The following defects may be allowed, provided the citrus fruit retain their essential characteristics as regards the quality, the keeping quality and presentation:

- defect in shape,
- defect in colouring,
- rough skin,
- skin defects occurring during the formation of the fruit, such as silver scurfs, russets, etc.,
- healed defects due to a mechanical cause such as hail damage, rubbing, damage from handling, etc.,
- superficial healed skin alterations,
- slight and partial detachment of the pericarp for oranges (which is allowed for mandarins).

III. PROVISIONS CONCERNING SIZING

Size is determined by the maximum diameter of the equatorial section of the fruit.

A. Minimum size

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Fruits of less than the following minimum sizes are excluded:

Lemons:	45 mm
Mandarins, excluding clementines:	45 mm
Clementines:	35 mm
Oranges:	53 mm

B. Size scales

The scales of sizes are as follows:

Oranges		Lemons		Mandarins	
Size code	Diameter(mm)	Size code	Diameter(mm)	Size code	Diameter(mm)
0	92-110	0	79-90	1-XXX	78 and above
1	87-100	1	72-83	1-XX	67-78
2	84-96	2	68-78	1 or 1-X	63-74
3	81-92	3	63-72	2	58-69
4	77-88	4	58-67	3	54-64
5	73-84	5	53-62	4	50-60
6	70-80	6	48-57	5	46-56
7	67-76	7	45-52	6 ^a	43-52
8	64-73			7	41-48
9	62-70			8	39-46
10	60-68			9	37-44
11	58-66			10	35-42
12	56-63				
13	53-60				

^a Sizes below 45 mm refer only to clementines.

Citrus fruit may be packed by count. In this case, provided the size uniformity required in Title III, point C, is retained, the size range in the package may fall outside a single size code, but within two adjacent codes.

C. Uniformity

Uniformity in size is achieved by the abovementioned size scales, unless otherwise stated as follows:

- (i) for fruit arranged in regular layers, in packages or in unit consumer packages, the difference between the smallest and the largest fruit in the same package, within a single size code or, in the case of citrus fruit packed by count, within two adjacent codes, must not exceed the following maxima:

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

	Size codes	Maximum difference between fruit in the same package(in mm)
Lemons	0 to 7	7
Mandarins	1-XXX-4	9
	5 to 6	8
	7 to 10	7
Oranges	0 to 2	11
	3 to 6	9
	7 to 13	7

- (ii) for fruit not arranged in regular layers, in packages or in rigid unit consumer packages, the difference between the smallest and the largest fruit in the same package must not exceed the range of the appropriate size grade in the size scale, or, in the case of citrus fruit packed by count, the range in mm of one of the two adjacent codes concerned;
- (iii) for fruit in bulk bins and fruit in non-rigid (nets, bags, etc.) unit consumer packages, the maximum size difference between the smallest and the largest fruit in the same lot or package must not exceed the range obtained by grouping three consecutive sizes in the size scale.

IV. PROVISIONS CONCERNING TOLERANCES

Tolerances in respect of quality and size shall be allowed in each package for produce not satisfying the requirements of the class indicated.

A. Quality tolerances

(i) 'Extra' Class

5 % by number or weight of citrus fruit not satisfying the requirements of the class, but meeting those of Class I or, exceptionally, coming within the tolerances of that class.

(ii) Class I

10 % by number or weight of citrus fruit not satisfying the requirements of the class, but meeting those of Class II, or exceptionally, coming within the tolerances of that class.

(iii) Class II

10 % by number or weight of citrus fruit satisfying neither the requirements of the class, nor the minimum requirements, with the exception of produce affected by rotting or any other deterioration rendering it unfit for consumption. Within this tolerance, a maximum of 5 % is allowed of fruit showing slight superficial unhealed damage, dry cuts or soft and shrivelled fruit.

B. Size tolerances

For all classes and types of presentation: 10 % by number or weight of citrus fruit corresponding to the size immediately below and/or above that (or those, in the case of the combination of three sizes) mentioned on the packages is allowed.

In any case, the tolerance of 10 % applies only to fruit not smaller than the following minima:

Lemons:	43 mm
---------	-------

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Mandarins, excluding clementines:	43 mm
Clementines:	34 mm
Oranges:	50 mm

V. PROVISIONS CONCERNING PRESENTATION

A. Uniformity

The contents of each package must be uniform and contain only citrus fruit of the same origin, variety or commercial type, quality, and size, and appreciably of the same degree of ripeness and development.

In addition, for the 'Extra' Class, uniformity in colouring is required.

The visible part of the contents of the package must be representative of the entire contents.

B. Packaging

The citrus fruit must be packed in such a way as to protect the produce properly.

The materials used inside the package must be new, clean and of a quality such as to avoid causing any external or internal damage to the produce. The use of materials, particularly of paper or stamps bearing trade specifications is allowed provided the printing or labelling has been done with non-toxic ink or glue.

If the fruit are wrapped, thin, dry, new and odourless⁽⁴⁷⁾ paper must be used.

The use of any substance tending to modify the natural characteristics of the citrus fruit, especially its taste or smell⁽⁴⁷⁾, is prohibited.

Packages must be free of all foreign matter. However, a presentation where a short (not wooden) twig with some green leaves adheres to the fruit is allowed.

Stickers individually affixed on product shall be such as, when removed, neither to leave visible traces of glue, nor to lead to skin defects.

C. Presentation

The citrus fruit may be presented:

- (a) arranged in regular layers in packages;
- (b) not arranged in regular layers in packages or in bulk bins. This presentation is only allowed for Classes I and II;
- (c) in individual packages for direct sale to the consumer of a weight less than 5 kg either
 - made up by number of fruit, or
 - made up by net weight of the package.

VI. PROVISIONS CONCERNING MARKING

Each package must bear the following particulars, in letters grouped on the same side, legibly and indelibly marked, and visible from the outside.

A. Identification

The name and the address of the packer and/or the dispatcher

Status: Point in time view as at 01/01/2011.

- for pre-packages only, by the name and the address of a seller established within the Community indicated in close connection with the mention ‘Packed for:’ or an equivalent mention. In this case, the labelling shall also include a code representing the packer and/or the dispatcher. The seller shall give all information deemed necessary by the inspection body as to the meaning of this code.

B. Nature of produce

- Name of the species if the produce is not visible from the outside, except for mandarins for which the name of the specie or variety (where applicable) is compulsory,

 - for clementines: the indication ‘Clementines, pipless’, ‘Clementines’ (1 to 10 pips), ‘Clementines with pips’ (more than 10 pips) where appropriate.

C. Origin of produce

Country of origin and, optionally, district where grown, or national, regional or local place name.

D. Commercial specifications

- When used, mention of the preserving agent or other chemical substances used at post-harvest stage.

Packages need not to bear the particulars mentioned in the first subparagraph, when they contain sales packages, clearly visible from the outside, and all bearing these particulars. These packages shall be free from any indications such as could mislead. When these packages are palletised, the particulars shall be given on a notice placed in an obvious position on at least two sides of the pallet.

PART 3:

I. DEFINITION OF PRODUCE

This standard applies to kiwifruit of varieties (cultivars) grown from *Actinidia chinensis* (Planch.) and *Actinidia deliciosa* (A. Chev., C.F. Liang and A.R. Ferguson) to be supplied fresh to the consumer, kiwifruit for industrial processing being excluded.

II. PROVISIONS CONCERNING QUALITY

The purpose of the standard is to define the quality requirements of kiwifruit, after preparation and packaging.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

A. Minimum quality requirements

In all classes, subject to the special provisions for each class and the tolerances allowed, the kiwifruit must be:

- intact (but free of peduncle),
- sound; produce affected by rotting or deterioration such as to make it unfit for consumption is excluded,
- clean, practically free of any visible foreign matter,
- practically free from pests,
- practically free from damage caused by pests,
- adequately firm; not soft, shrivelled or water-soaked,
- well formed, double/multiple fruit being excluded,
- free of abnormal external moisture,
- free of any foreign smell and/or taste.

The development and condition of the kiwifruit must be such as to enable them:

- to withstand transport and handling, and
- to arrive in satisfactory condition at the place of destination.

B. Minimum maturity requirements

The kiwifruit must be sufficiently developed and display satisfactory ripeness. In order to satisfy this requirement, the fruit must have attained a degree of ripeness:

III. PROVISIONS CONCERNING SIZING

Size is determined by the weight of the fruit.

The minimum weight for ‘Extra’ Class is 90 g, for Class I is 70 g and for Class II is 65 g.

The difference in weight between the largest and the smallest fruit in each package must not exceed:

- 10 g for fruit weighing up to 85 g,

[^{F4}PART 4:

**MARKETING STANDARD FOR LETTUCES, CURLED-LEAVED
ENDIVES AND BROAD-LEAVED (BATAVIAN) ENDIVES**

I. **DEFINITION OF PRODUCE**

This standard applies to:

- lettuces of varieties (cultivars) grown from:

to be supplied fresh to the consumer.

This standard does not apply to produce for industrial processing, produce presented as individual leaves, lettuces with root ball or lettuces in pots.

II. **PROVISIONS CONCERNING QUALITY**

The purpose of the standard is to define the quality requirements for produce after preparation and packaging.

A. **Minimum requirements**

In all classes, subject to the special provisions for each class and the tolerances allowed, the produce must be:

- intact

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- fresh in appearance
- practically free from pests
- practically free from damage caused by pests
- turgescient
- not running to seed
- free of abnormal external moisture
- free of any foreign smell and/or taste.

In the case of lettuce, a reddish discolouration, caused by low temperature during growth, is allowed, unless it seriously affects the appearance of the lettuce.

The roots must be cut close to the base of the outer leaves and the cut must be neat.

The produce must be of normal development. The development and condition of the produce must be such as to enable it:

- to withstand transportation and handling
- to arrive in a satisfactory condition at the place of destination.

B. **Classification**

The produce is classified in two classes, as defined below:

(i) *Class I*

Produce in this class must be of good quality. It must be characteristic of the variety or commercial type, especially the colour.

The produce must also be:

- well formed
- firm, taking into account the cultivation methods and the type of produce
- free from damage or deterioration impairing edibility
- free from frost damage.

Head lettuces must have a single well-formed heart. However, in the case of head lettuces grown under protection, the heart may be small.

Cos lettuces must have a heart, which may be small.

The centre of curled-leaved endives and broad-leaved (Batavian) endives must be yellow in colour.

(ii) *Class II*

This class includes produce which do not qualify for inclusion in Class I, but satisfy the minimum requirements specified above.

The produce must be:

- reasonably well formed
- free from damage and deterioration which may seriously impair edibility.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

The following defects may be allowed provided the produce retains its essential characteristics as regards the quality, the keeping quality and presentation:

- slight discolouration
- slight damage caused by pests.

Head lettuces must have a heart, which may be small. However, in the case of head lettuces grown under protection, absence of heart is permissible.

Cos lettuces may show no heart.

III. PROVISIONS CONCERNING SIZING

Size is determined by the weight of one unit.

A. Minimum weight

The minimum weight for Classes I and II is:

	Open grown	Grown under protection
Head lettuces (excluding crisphead and 'Iceberg' type lettuces) and Cos or romaine lettuces (excluding 'Little Gem' type lettuces)	150 g	100 g
Crisphead and 'Iceberg' type lettuces	300 g	200 g
Leaf lettuces and 'Little Gem' type lettuces	100 g	100 g
Curled-leaved endives and broad-leaved endives	200 g	150 g

B. Uniformity

(a) Lettuces

In all classes, the difference between the lightest and heaviest units in each package must not exceed:

- 40 g when the lightest unit weighs less than 150 g per unit
- 100 g when the lightest unit weighs between 150 g and 300 g per unit
- 150 g when the lightest unit weighs between 300 g and 450 g per unit
- 300 g when the lightest unit weighs more than 450 g per unit.

(b) Curled-leaved and broad-leaved (Batavian) endives

In all classes, the difference between the lightest and heaviest units in each package must not exceed 300g.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

(i) *Class I*

A total tolerance of 10 %, by number of units, not satisfying the requirements of the class, but meeting those of Class II is allowed. Within this tolerance not more than 1 % in total may consist of produce neither satisfying the requirements of Class II quality nor the minimum requirements. Produce affected by rotting or any other deterioration rendering it unfit for consumption is excluded.

(ii) *Class II*

A total tolerance of 10 %, by number of units, satisfying neither the requirements of the class nor the minimum requirements is allowed. Produce affected by rotting or any other deterioration rendering it unfit for consumption is excluded.

B. Size tolerances

For all classes: a total tolerance of 10 %, by number of units, not satisfying the requirements as regards sizing, but weighing no more than 10 % over or under the size in question, is allowed.

V. PROVISIONS CONCERNING PRESENTATION

A. Uniformity

The contents of each package must be uniform and contain only produce of the same origin, variety or commercial type, quality and size.

However, a mixture of produce of distinctly different colours, varieties and/or commercial types may be packed together in a sales unit⁽⁴⁸⁾, provided they are uniform in quality and, for each colour, variety and/or commercial type concerned, in origin.

The visible part of the contents of the package must be representative of the entire contents.

PART 5:

MARKETING STANDARD FOR PEACHES AND NECTARINES

I. DEFINITION OF PRODUCE

This standard applies to peaches and nectarines⁽⁶¹⁾ grown from varieties (cultivars) of *Prunus persica* Sieb. and Zucc., to be supplied fresh to the consumer, peaches and nectarines for industrial processing being excluded.

II. PROVISIONS CONCERNING QUALITY

The purpose of the standard is to define the quality requirements for peaches and nectarines after preparation and packaging.

A. Minimum quality requirements

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

In all classes, subject to the special provisions for each class and the tolerances allowed, peaches and nectarines must be:

- intact,
- sound; produce affected by rotting or deterioration such as to make it unfit for consumption is excluded,
- clean, practically free of any visible foreign matter,
- practically free from pests,
- practically free from damage caused by pests,
- free of abnormal external moisture,
- free of any foreign smell and/or taste.

Peaches and nectarines must have been carefully picked.

The development and state of peaches and nectarines must be such as to enable them:

- to withstand transport and handling, and
- to arrive in satisfactory condition at the place of destination.

B. Minimum maturity requirements

The peaches and nectarines must be sufficiently developed and display satisfactory ripeness.

The development and state of maturity of the peaches and nectarines must be such as to enable them to continue their ripening process and to reach a satisfactory degree of ripeness. In order to satisfy this requirement the refractometric index of the flesh, measured at the middle point of the fruit pulp at the equatorial section must be greater than or equal to 8° Brix and the firmness must be lower than 6,5 kg measured with a plunger of 8 mm diameter (0,5 cm² at two points of the equatorial section of the fruit).

C. Classification

Peaches and nectarines are classified into three classes as defined below:

(i) 'Extra' class

Peaches and nectarines in this class must be of a superior quality. In shape, development and colouring they must be typical of the variety allowing for the district in which they are grown. They must be free from defects with the exception of very slight superficial defects, provided that these do not affect the general appearance of the produce, its quality, keeping quality and presentation in the package.

(ii) Class I

Peaches and nectarines in this class must be of good quality. They must be characteristic of the variety, allowing for the district in which they are grown. However, a slight defect in shape, development or colouring may be allowed.

The flesh must be perfectly sound.

Peaches and nectarines split where the stem is joined to the fruit are excluded.

Slight skin defects, however, may be allowed provided these do not affect the general appearance of the produce, the quality, the keeping quality and presentation in the package and do not exceed:

- 1 cm in length for defects of elongated shape,
- 0,5 cm² in total area for other defects.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

(iii) Class II

This class includes peaches and nectarines which do not qualify for inclusion in the higher classes, but which satisfy the minimum requirements specified above.

The flesh should not show any serious defects. Fruits split where the stem is joined to the fruit are allowed only in connection with quality tolerances.

The following skin defects may be allowed provided the peaches and nectarines retain their essential characteristics as regards the quality, the keeping quality and presentation and do not exceed:

- 2 cm in length for defects of elongated shape,
- 1,5 cm² in total area for other defects.

III. PROVISIONS CONCERNING SIZING

Size is determined by:

- circumference, or
- maximum diameter of the equatorial section.

Peaches and nectarines must be graded according to the following scale:

Diameter	Sizing(code)	Circumference
90 mm and above	AAAA	28 cm and above
80 mm and over but under 90 mm	AAA	25 cm and over but under 28 cm
73 mm and over but under 80 mm	AA	23 cm and over but under 25 cm
67 mm and over but under 73 mm	A	21 cm and over but under 23 cm
61 mm and over but under 67 mm	B	19 cm and over but under 21 cm
56 mm and over but under 61 mm	C	17,5 cm and over but under 19 cm
51 mm and over but under 56 mm	D	16 cm and over but under 17,5 cm

The minimum size allowed for the 'Extra' class is 17,5 cm (circumference) or 56 mm (diameter).

Size D (51 mm and over but under 56 mm in diameter or 16 cm and over but under 17,5 cm in circumference) is not allowed in the period from 1 July to 31 October.

Sizing is compulsory for all classes.

IV. PROVISIONS CONCERNING TOLERANCES

Tolerances in respect of quality and size shall be allowed in each package for produce not satisfying the requirements for the class indicated.

A. Quality tolerances

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

(i) 'Extra' class

5 % by number or weight of peaches or nectarines not satisfying the requirements of the class, but meeting those of class I or, exceptionally, coming within the tolerances of that class.

(ii) Class I

10 % by number or weight of peaches or nectarines not satisfying the requirements of the class, but meeting those of class II or, exceptionally, coming within the tolerances for that class.

(iii) Class II

10 % by number or weight of peaches or nectarines satisfying neither the requirements of the class nor the minimum requirements, with the exception of fruit affected by rotting, marked bruising or any other deterioration rendering it unfit for consumption.

B. Size tolerances

For all classes, 10 % by number or weight of peaches or nectarines up to 1 cm more or less than the size stated on the package in the case of sizing by circumference and up to 3 mm more or less in the case of sizing by diameter. However, for fruit in the smallest size, this tolerance shall apply only to peaches or nectarines of a size smaller by not more than 6 mm (circumference) or 2 mm (diameter) than the specified minimum size.

V. PROVISIONS CONCERNING PRESENTATION

A. Uniformity

The contents of each package must be uniform and contain only peaches or nectarines of the same origin, variety, quality, degree of ripeness and size, and for the 'Extra' class, the contents must also be uniform in colour.

The visible part of the contents of each package must be representative of the entire contents.

B. Packaging

The peaches or nectarines must be packed in such a way as to protect the produce properly.

The materials used inside the package must be new, clean and of a quality such as to avoid causing any external or internal damage to the produce. The use of materials, particularly of paper or stamps bearing trade specifications is allowed provided the printing or labelling has been done with non-toxic ink or glue.

Stickers individually affixed on product shall be such as, when removed, neither to leave visible traces of glue, nor to lead to skin defects

Packages must be free of all foreign matter.

C. Presentation

The peaches and nectarines may be presented:

- in small unit packages,
- in a single layer, in the case of 'Extra' class; each individual fruit in this class must be separated from its neighbours.

In classes I and II:

- in one or two layers, or

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- in no more than four layers when the fruit is placed in rigid pockets so arranged that they do not rest on the fruit in the layer immediately below.

VI. PROVISIONS CONCERNING MARKING

Each package must bear the following particulars in letters grouped on the same side, legibly and indelibly marked and visible from the outside:

A. Identification

The name and the address of the packer and/or the dispatcher

This mention may be replaced:

- for all packages with the exception of pre-packages, by the officially issued or accepted code mark representing the packer and/or the dispatcher, indicated in close connection with the reference 'Packer and/or dispatcher' (or equivalent abbreviations);
- for pre-packages only, by the name and the address of a seller established within the Community indicated in close connection with the mention 'Packed for:' or an equivalent mention. In this case, the labelling shall also include a code representing the packer and/or the dispatcher. The seller shall give all information deemed necessary by the inspection body as to the meaning of this code.

B. Nature of produce

- 'Peaches' or 'nectarines', if the contents are not visible from the outside,
- colour of the flesh,
- name of the variety (optional).

C. Origin of produce

Country of origin and, optionally, district where grown, or national, regional or local place name.

D. Commercial specifications

- class,

- number of units (optional),
- minimum sugar content, measured by refractometer and expressed in Brix degrees (optional),
- maximum firmness, measured by penetrometer and expressed in kg/0,5 cm² (optional),

Packages need not to bear the particulars mentioned in the first subparagraph, when they contain sales packages, clearly visible from the outside, and all bearing these particulars. These packages shall be free from any indications such as could mislead. When these packages are palletised, the particulars shall be given on a notice placed in an obvious position on at least two sides of the pallet.

[^{F4}PART 6:

MARKETING STANDARD FOR PEARS

I. DEFINITION OF PRODUCE

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

This standard applies to pears of varieties (cultivars) grown from *Pyrus communis L.* to be supplied fresh to the consumer, pears for industrial processing being excluded.

II. PROVISIONS CONCERNING QUALITY

The purpose of the standard is to define the quality requirements of pears, after preparation and packaging.

A. Minimum requirements

In all classes, subject to the special provisions for each class and the tolerances allowed, pears must be:

- intact
- sound; produce affected by rotting or deterioration such as to make it unfit for consumption is excluded
- clean, practically free of any visible foreign matter
- practically free from pests
- free from damage caused by pests affecting the flesh
- free of abnormal external moisture
- free of any foreign smell and/or taste.

The development and condition of the pears must be such as to enable them:

- to continue their ripening process and to reach the degree of ripeness required in relation to the varietal characteristics
- to withstand transportation and handling
- to arrive in satisfactory condition at the place of destination.

B. Classification

Pears are classified in three classes defined below:

(i) 'Extra' Class

Pears in this class must be of superior quality. In shape, size and colouring they must be characteristic of the variety and the stalk must be intact.

The flesh must be perfectly sound, and the skin free from rough russetting.

They must be free from defects with the exception of very slight superficial defects provided these do not affect the general appearance of the fruit, the quality, the keeping quality and presentation in the package.

Pears must not be gritty.

(ii) Class I

Pears in this class must be of good quality. In shape, size and colouring they must be characteristic of the variety⁽⁵²⁾.

The flesh must be perfectly sound, and the skin free from rough russetting.

The following slight defects, however, may be allowed, on individual fruit provided these do not affect the general appearance of the produce, the quality, the keeping quality and presentation in the package:

- a slight defect in shape
- a slight defect in development

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- slight defects in colouring
- slight skin defects which must not extend over more than:
 - 2 cm in length for defects of elongated shape
 - 1 cm² of total surface area for other defects, with the exception of scab (*Venturia pirina* and *V. inaequalis*), which must not extend over more than 0,25 cm² cumulative in area
- slight bruising not exceeding 1 cm² in area.

The stalk may be slightly damaged.

Pears must not be gritty.

(iii) *Class II*

This class includes pears which do not qualify for inclusion in the higher classes but satisfy the minimum requirements specified above.

The flesh must be free from major defects.

The following defects may be allowed provided the pears retain its essential characteristics as regards the quality, the keeping quality and presentation:

- defects in shape
- defects in development
- defects in colouring
- slight rough russeting
- skin defects which must not extend over more than:
 - 4 cm in length for defects of elongated shape
 - 2,5 cm² total surface area for other defects, with the exception of scab (*Venturia pirina* and *V. inaequalis*), which must not extend over more than 1 cm² cumulative in area
- slight bruising not exceeding 2 cm² in area.

III. PROVISIONS CONCERNING SIZING

Size is determined by maximum diameter of the equatorial section.

A minimum size is required for each class as follows:

	‘Extra’	Class I	Class II
Large fruited varieties	60 mm	55 mm	55 mm
Other varieties	55 mm	50 mm	45 mm

Summer pears included in the Annex to this standard do not have to respect the minimum size.

To ensure there is uniformity of size within a package, the difference in diameter between fruit in the same package shall be limited to:

- 5 mm for ‘Extra’ Class fruit and for Class I and II fruit packed in rows and layers
- 10 mm for Class I fruit packed loose in the package or in consumer packages.

There is no sizing uniformity limit for Class II fruit packed loose in the package or in consumer packages.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

IV. PROVISIONS CONCERNING TOLERANCES

Tolerances in respect of quality and size shall be allowed in each lot for produce not satisfying the requirements of the class indicated.

A. Quality tolerances

(i) 'Extra' Class

A total tolerance of 5 %, by number or weight, of pears not satisfying the requirements of the class but meeting those of Class I is allowed. Within this tolerance not more than 0,5 % in total may consist of produce satisfying the requirements of Class II quality.

(ii) Class I

A total tolerance of 10 %, by number or weight, of pears not satisfying the requirements of the class but meeting those of Class II is allowed. Within this tolerance not more than 1 % in total may consist of produce neither satisfying the requirements of Class II quality nor the minimum requirements. Produce affected by rotting or any other deterioration rendering it unfit for consumption is excluded. Pears without stalks are not included in this tolerance.

(iii) Class II

A total tolerance of 10 %, by number or weight, of pears satisfying neither the requirements of the class nor the minimum requirements is allowed. Produce affected by rotting or any other deterioration rendering it unfit for consumption is excluded.

Within this tolerance, a maximum of 2 % by number or weight of fruit is allowed which shows the following defects:

- slight damage or unhealed cracks
- very slight traces of rot
- presence of internal feeding pests and/or damage to the flesh caused by pests.

B. Size tolerances

For all classes:

- (a) for fruit which is subject to the rules of uniformity, 10 %, by number or weight, of fruit corresponding to the size immediately above or below that marked on the package, with, for fruit classified in the smallest grade allowed a maximum variation of 5 mm below the minimum;
- (b) for fruit which is not subject to the rules of uniformity, 10 %, by number or weight, of fruit below the minimum size laid down, with a maximum variation of 5 mm below the minimum size.

V. PROVISIONS CONCERNING PRESENTATION

A. Uniformity

The contents of each package must be uniform and contain only pears of the same origin, variety, quality, and size (if sized) and the same degree of ripeness.

In the case of the 'Extra' Class, uniformity also applies to colouring.

However, a mixture of pears of distinctly different varieties may be packed together in a sales unit⁽⁵³⁾, provided they are uniform in quality and, for each variety concerned, in origin.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

The visible part of the contents of the package must be representative of the entire contents.

B. Packaging

Pears must be packed in such a way as to protect the produce properly.

The materials used inside the package must be clean and of a quality such as to avoid causing any external or internal damage to the produce. The use of materials, particularly of paper or stamps bearing trade specifications is allowed provided the printing or labelling has been done with non-toxic ink or glue.

Stickers individually affixed on the produce shall be such that, when removed, they neither leave visible traces of glue, nor lead to skin defects.

Packages must be free of all foreign matter.

VI. PROVISIONS CONCERNING MARKING

Each package⁽⁵⁴⁾ must bear the following particulars, in letters grouped on the same side, legibly and indelibly marked, and visible from the outside.

A. Identification

Packer and/or dispatcher/shipper:

— name and physical address (e.g. street/city/region/postal code and, if different from the country of origin, the country)

or

— a code mark officially recognised by the national authority⁽⁵⁵⁾.

B. Nature of produce

— ‘Pears’, if the contents are not visible from the outside.

— Name of the variety. In the case of sales units containing a mixture of pears of different varieties, names of the different varieties.

C. Origin of produce

— Country of origin and, optionally, district where grown, or national, regional or local place name. In the case of sales units containing a mixture of distinctly different varieties of pears of different origins, the indication of each country of origin shall appear next to the name of the variety concerned.

D. Commercial specifications

— Class

— Size, or for fruit packed in rows and layers, number of units. If identification is by the size, this should be expressed:

(a) for produce subject to the uniformity rules, as minimum and maximum diameters

(b) for produce not subject to the uniformity rules, the diameter of the smallest fruit in the package followed by ‘and over’ or equivalent denomination or, if appropriate, the diameter of the largest fruit in the package.

E. Official control mark (optional)

Packages need not bear the particulars mentioned in the first subparagraph, when they contain sales packages, clearly visible from the outside, and all bearing these particulars. These packages

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

The purpose of the standard is to define the quality requirements of strawberries after preparation and packaging.

A. Minimum requirements

In all classes, subject to the special provisions for each class and the tolerances allowed, the strawberries must be:

- intact,
- sound; produce affected by rotting or deterioration such as to make it unfit for consumption is excluded,
- clean, practically free of any visible foreign matter,
- fresh in appearance, but not washed,

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- practically free from pests,
- practically free from damage caused by pests,
- with the calyx (except in the case of wild strawberries); the calyx and the stalk (if present) must be fresh and green,
- free of abnormal external moisture,
- free of any foreign smell and/or taste.

The strawberries must have been carefully picked.

They must be sufficiently developed and display satisfactory ripeness. The development and the condition must be such as to enable them:

- to withstand transport and handling, and
- to arrive in satisfactory condition at the place of destination.

B. Classification

The strawberries are classified in three classes defined below:

(i) 'Extra' Class

The strawberries in this class must be of superior quality. They must be characteristic of the variety.

They must be bright in appearance, allowing for the characteristics of the variety.

They must be free from soil.

They must be free from defects with the exception of very slight superficial defects provided these do not affect the general appearance of the produce, the quality, the keeping quality and presentation in the package.

(ii) Class I

Strawberries in this class must be of good quality. In colouring and shape, they must be characteristic of the variety.

The following slight defects, however, may be allowed provided these do not affect the general appearance of the produce, the quality, the keeping quality and presentation in the package:

- slight defect of shape,
- a white patch, not exceeding one tenth of the surface area of the fruit,
- slight superficial pressure marks.

They must be practically free from soil.

(iii) Class II

This class includes strawberries which do not qualify for inclusion in the higher classes, but satisfy the minimum requirements specified above.

The following defects may be allowed provided the strawberries retain their essential characteristics as regards the quality, the keeping quality and presentation:

- defects of shape,
- a white patch not exceeding one fifth of the surface area of the fruit,
- slight dry bruising not likely to spread,
- slight traces of soil.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

III. PROVISIONS CONCERNING SIZING

Size is determined by the maximum diameter of the equatorial section.

Strawberries must be of the following minimum sizes:

- ‘Extra’ Class: 25 mm,
- Classes I and II: 18 mm.

There is no minimum size for wild strawberries.

IV. PROVISIONS CONCERNING TOLERANCES

Tolerances in respect of quality and size shall be allowed in each package for produce not satisfying the requirements of the class indicated.

A. Quality tolerances

(i) ‘Extra’ Class

5 % by number or weight of strawberries not satisfying the requirements of the class but meeting those of Class I or, exceptionally, coming within the tolerances of that class. Of these 5 % not more than 2 % in total may consist of spoilt fruit.

(ii) Class I

10 % by number or weight of strawberries not satisfying the requirements of the class but meeting those of Class II or, exceptionally, coming within the tolerances of that class. Of these 10 %, not more than 2 % in total may consist of spoilt fruit.

(iii) Class II

10 % by number or weight of strawberries satisfying neither the requirements of the class nor the minimum requirements, with the exception of produce affected by rotting, severe bruising or any other deterioration rendering it unfit for consumption. Of these 10 %, not more than 2 % in total may consist of spoilt fruit.

B. Size tolerances

For all classes: 10 % by number or weight of strawberries not conforming to the minimum size.

V. PROVISIONS CONCERNING PRESENTATION

A. Uniformity

The contents of each package must be uniform and contain only strawberries of the same origin, variety and quality.

In the ‘Extra’ Class, strawberries — with the exception of wood strawberries — must be particularly uniform and regular with respect to degree of ripeness, colour and size. In Class I, strawberries may be less uniform in size.

The visible part of the contents of the package must be representative of the entire contents.

B. Packaging

The strawberries must be packed in such a way as to protect the produce properly.

The materials used inside the package must be new, clean and of a quality such as to avoid causing any external or internal damage to the produce. The use of materials, particularly of

paper or stamps bearing trade specifications is allowed provided the printing or labelling has been done with non-toxic ink or glue.

Fruit in the 'Extra' Class must be particularly well presented.

Packages must be free of all foreign matter.

Stickers individually affixed on product shall be such as, when removed, neither to leave visible traces of glue, nor to lead to skin defects.

VI. PROVISIONS CONCERNING MARKING

Each package must bear the following particulars, in letters grouped on the same side, legibly and indelibly marked, and visible from the outside:

A. Identification

The name and the address of the packer and/or the dispatcher

This mention may be replaced:

- for all packages with the exception of pre-packages, by the officially issued or accepted code mark representing the packer and/or the dispatcher, indicated in close connection with the reference 'Packer and/or Dispatcher' (or equivalent abbreviations);
- for pre-packages only, by the name and the address of a seller established within the Community indicated in close connection with the mention 'Packed for:' or an equivalent mention. In this case, the labelling shall also include a code representing the packer and/or the dispatcher. The seller shall give all information deemed necessary by the inspection body as to the meaning of this code.

B. Nature of produce

- Name of the variety (optional).

C. Origin of produce

Country of origin and, optionally, district where grown or national, regional or local place name.

D. Commercial specifications

- Class.

Packages need not to bear the particulars mentioned in the first subparagraph, when they contain sales packages, clearly visible from the outside, and all bearing these particulars. These packages shall be free from any indications such as could mislead. When these packages are palletised, the particulars shall be given on a notice placed in an obvious position on at least two sides of the pallet.

PART 8:

X1 Substituted by [Corrigendum to Commission Regulation \(EC\) No 1221/2008 of 5 December 2008 amending Regulation \(EC\) No 1580/2007 laying down implementing rules of Council Regulations \(EC\) No 2200/96, \(EC\) No 2201/96 and \(EC\) No 1182/2007 in the fruit and vegetable sector as regards marketing standards \(Official Journal of the European Union L 336 of 13 December 2008\)](#).

The development and condition of the sweet peppers must be such as to enable them to:

- withstand transport and handling, and
- arrive in satisfactory condition at the place of destination.

B. Classification

Sweet peppers are classified in two classes, defined below:

(i) Class I

Sweet peppers in this class must be of good quality. They must be characteristic of the variety and/or commercial type as regards development, shape and colour with due regard to the degree of ripeness.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

They must be:

- firm,
- practically free of blemishes.

The peduncle may be slightly damaged or cut with the calyx intact.

(ii) Class II

This class includes sweet peppers which do not qualify for inclusion in Class I but satisfy the minimum requirements specified above.

The following defects may be allowed provided the peppers retain their essential characteristics as regards the quality, keeping quality and presentation:

- defects in shape and development,
- sunburn or slight healed injuries, with a limit of 2 cm in length for defects of elongated shape, and 1 cm² of the total area for other defects,
- slight dry superficial cracks not exceeding an overall cumulative length of 3 cm.

They may be less firm without being withered.

The peduncle may be damaged or cut.

III. PROVISIONS CONCERNING SIZING

Size is determined by the shoulder diameter (width) of the sweet peppers. In the case of flat sweet peppers (tomato peppers) the term 'width' means the maximum equatorial diameter.

For sized sweet peppers, the difference in diameter between the largest and smallest sweet pepper in the same package may not exceed 20 mm.

The width of sweet peppers may not be less than:

- elongated sweet peppers (pointed): 20 mm
- square sweet peppers (blunt) and square tapering sweet peppers (peg-top): 40 mm
- flat sweet peppers (tomato peppers): 55 mm

Sizing is not compulsory for Class II, subject to the minimum sizes.

The size requirements shall not apply to miniature produce⁽⁵⁶⁾.

IV. PROVISIONS CONCERNING TOLERANCES

Tolerances in respect of quality and size shall be allowed in each package for produce not satisfying the requirements of the class indicated.

A. Quality tolerances

(i) Class I

10 % by number or weight of sweet peppers not satisfying the requirements of the class, but meeting those of Class II or, exceptionally, coming within the tolerances of that class.

(ii) Class II

10 % by number or weight of sweet peppers satisfying neither the requirements of the class nor the minimum requirements, with the exception of produce affected by rotting or any other deterioration rendering it unfit for consumption.

B. Size tolerances

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

(i) Class I

10 % by number or weight of sweet peppers not conforming to the sizes identified within a margin of ± 5 mm including no more than 5 % of sweet peppers below the minimum size laid down.

(ii) Class II

— *Sized sweet peppers*

10 % by number or weight of sweet peppers not conforming to the sizes identified within a margin of ± 5 mm including no more than 5 % of sweet peppers below the minimum size laid down.

— *Unsized sweet peppers*

5 % by number or weight of sweet peppers up to 5 mm smaller than the minimum size laid down.

V. PROVISIONS CONCERNING PRESENTATION

A. Uniformity

The contents of each package must be uniform and contain only sweet peppers of the same origin, variety or commercial type, quality, size (if sized) and, in the case of Class I, of appreciably the same degree of ripeness and colouring.

However, a mixture of sweet peppers of different colours may be packed together, provided they are uniform in origin, quality, commercial type and size (if sized).

Consumer packages of a net weight not exceeding one kilo, may contain mixtures of sweet peppers of different colours and/or commercial types, provided they are uniform in quality, and for each colour and/or commercial type concerned, in origin.

In the case of sized produce, elongated sweet peppers should be sufficiently uniform in length.

Miniature sweet peppers must be reasonably uniform in size. They may be mixed with other miniature products of a different type and origin.

The visible part of the contents of the package must be representative of the entire contents.

B. Packaging

The sweet peppers must be packed in such a way as to protect the produce properly.

The materials used inside the package must be new, clean and of a quality such as to avoid causing any external or internal damage to the produce. The use of materials, particularly paper or stamps bearing trade specifications is allowed, provided the printing or labelling has been done with non-toxic ink or glue.

packages must be free of all foreign matter.

Stickers individually affixed on product shall be such as, when removed, neither to leave visible traces of glue, nor to lead to skin defects.

VI. PROVISIONS CONCERNING MARKING

Each package must bear the following particulars, in letters grouped on the same side, legibly and indelibly marked, and visible from the outside:

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

A. Identification

The name and the address of the packer and/or the dispatcher

This mention may be replaced:

- for all packages with the exception of pre-packages, by the officially issued or accepted code mark representing the packer and/or the dispatcher, indicated in close connection with the reference ‘Packer and/or Dispatcher’ (or equivalent abbreviations),
- for pre-packages only, by the name and the address of a seller established within the Community indicated in close connection with the mention ‘Packed for:’ or an equivalent mention. In this case, the labelling shall also include a code representing the packer and/or the dispatcher. The seller shall give all information deemed necessary by the inspection body as to the meaning of this code.

B. Nature of produce

If the contents are not visible from the outside:

- ‘Sweet peppers’,
- colour,
- commercial type (‘elongated’, ‘square blunt’, ‘square tapering’, ‘flat’) or name of the variety.

In the case of packages or consumer packages containing a mixture of different colours and/or commercial types of sweet pepper:

- ‘Mixed peppers’, or equivalent denomination,
- if the contents are not visible from the outside, colours and/or commercial types of the sweet peppers and number of pieces of each of the colours and/or commercial types concerned.

C. Origin of produce

Country of origin and, optionally, district where grown or national, regional or local place name.

In the case of consumer packages containing a mixture of sweet peppers of different colours and/or commercial types of different origins, the indication of each country of origin shall appear next to the name of the colour and/or commercial type concerned.

D. Commercial specifications

- Class
- Size (if sized) expressed as minimum and maximum diameters or the mark ‘unsized’ where appropriate
- Where appropriate, ‘Mini peppers’, ‘Baby peppers’, or other appropriate term for miniature produce. Where several types of miniature produce are mixed in the same package, all products and their respective origins must be mentioned.

Packages need not to bear the particulars mentioned in the first subparagraph, when they contain sales packages, clearly visible from the outside, and all bearing these particulars. These packages shall be free from any indications such as could mislead. When these packages are palletised, the particulars shall be given on a notice placed in an obvious position on at least two sides of the pallet.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

PART 9:

MARKETING STANDARD FOR TABLE GRAPES

I. DEFINITION OF PRODUCE

This standard applies to table grapes of varieties (cultivars) grown from *Vitis vinifera* L. to be supplied fresh to the consumer, table grapes for industrial processing being excluded.

II. PROVISIONS CONCERNING QUALITY

The purpose of the standard is to define the quality requirements for table grapes after preparation and packaging.

A. Minimum requirements

In all classes, subject to the special provisions for each class and the tolerances allowed, bunches and berries must be:

- sound; produce affected by rotting or deterioration such as to make it unfit for consumption is excluded,
- clean, practically free of any visible foreign matter,
- practically free from pests,
- practically free from damage caused by pests,
- free of abnormal external moisture,
- free of any foreign smell and/or taste.

In addition, berries must be:

- intact,
- well formed,
- normally developed.

Pigmentation due to sun is not a defect.

Bunches must have been carefully picked.

The juice of the berries shall have a refractometric index of at least:

- 12° Brix for the Alphonse Lavallée, Cardinal and Victoria varieties,
- 13° Brix for all other seeded varieties,
- 14° Brix for all seedless varieties.

In addition, all varieties must have satisfactory sugar/acidity ratio levels.

The development and condition of the table grapes must be such as to enable them:

- to withstand transport and handling, and
- to arrive in satisfactory condition at the place of destination.

B. Classification

The table grapes are classified into three classes defined below:

i) 'Extra' class

Table grapes in this class must be of superior quality. In shape, development and colouring the bunches must be typical of the variety, allowing for the district in which they are grown, and have no defects. Berries must be firm, firmly attached, evenly spaced along the stalk and have their bloom virtually intact.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

ii) Class I

Table grapes in this class must be of good quality. In shape, development and colouring the bunches must be typical of the variety, allowing for the district in which they are grown. Berries must be firm, firmly attached and, as far as possible, have their bloom intact. They may, however, be less evenly spaced along the stalk than in the 'Extra' class.

The following slight defects, however; may be allowed, provided these do not affect the general appearance of the produce, the quality, the keeping quality, and presentation in the package:

- slight defects in shape,
- slight defects in colouring,
- very slight sun-scorch affecting the skin only.

iii) Class II

This class includes table grapes which do not qualify for inclusion in the higher classes, but satisfy the minimum requirements specified above.

The bunches may show slight defects in shape, development and colouring, provided these do not impair the essential characteristics of the variety, allowing for the district in which they are grown.

The berries must be sufficiently firm and sufficiently attached, and, where possible, still have their bloom. They may be less evenly spaced along the stalk than in Class I.

The following defects are allowed provided the table grapes retain their essential characteristics as regards the quality, the keeping quality and presentation:

- defects in shape,
- defects in colouring,
- slight sun-scorch affecting the skin only,
- slight bruising,
- slight skin defects.

III. PROVISIONS CONCERNING SIZING

Size is determined by the weight of the bunch.

The following minimum size requirements per bunch are defined for table grapes grown under glass and for open-grown table grapes, large-berry or small-berry varieties respectively.

	Table grapes grown under glass(if mentioned on the label)	Open grown table grapes	
		All varieties except small-berry varieties listed in the Appendix	Small-berry varieties listed in the Appendix
Extra class	300 g	200 g	150 g
Class I	250 g	150 g	100 g
Class II	150 g	100 g	75 g

IV. PROVISIONS CONCERNING TOLERANCES

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Tolerances in respect of quality and size shall be allowed in each package for produce not satisfying the requirements of the class indicated.

A. Quality tolerances

i) 'Extra' class

5 % by weight of bunches not satisfying the requirements of the class, but meeting those for Class I or, exceptionally, coming within the tolerances of that class.

ii) Class I

10 % by weight of bunches not satisfying the requirements of the class, but meeting those of Class II or, exceptionally, coming within the tolerances for that class.

iii) Class II

10 % by weight of bunches satisfying neither the requirements of the class nor the minimum requirements, with the exception of produce affected by rotting or any other deterioration rendering it unfit for consumption.

B. Size tolerances

i) 'Extra' Class and Class I

10 % by weight of bunches not satisfying the size requirements of the class, but meeting those of the class immediately below.

ii) Class II

10 % by weight of bunches not satisfying the size requirements of the class but weighing not less than 75 g.

iii) 'Extra' class and Classes I and II

In each consumer package not exceeding 1 kg net weight, one bunch weighing less than 75 g is allowed to adjust the weight, provided the bunch meets all other requirements of the specified class.

V. PROVISIONS CONCERNING PRESENTATION

A. Uniformity

The contents of each package must be uniform and contain only bunches of the same origin, variety, quality and degree of ripeness.

In the case of grapes packed in small consumer packages of a net weight not exceeding 1 kg, uniformity of variety and origin is not required.

In the case of the 'Extra' Class, the bunches must be of more or less identical size and colouring.

The inclusion in each package of bunches of different colours for decorative purposes shall be allowed in the case of the variety Chasselas.

The visible part of the contents of the package must be representative of the entire contents.

B. Packaging

The table grapes must be packed in such a way as to protect the produce properly.

In the case of the 'Extra' Class, the bunches must be packed in a single layer.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

The materials used inside the package must be new, clean and of a quality such as to avoid causing any external or internal damage to the produce. The use of materials, particularly paper or stamps, bearing trade specifications is allowed provided the printing or labelling has been done with non-toxic ink or glue.

Packages must be free of all foreign matter, although a fragment of vine shoot no more than 5 cm in length may be left on the stem of the bunch as a form of special presentation.

Stickers individually affixed on product shall be such as, when removed, neither to leave visible traces of glue, nor to lead to skin defects.

VI. PROVISIONS CONCERNING MARKING

Each package must bear the following particulars in letters grouped on the same side, legibly and indelibly marked, and visible from the outside:

A. Identification

The name and the address of the packer and/or the dispatcher

This mention may be replaced:

- for all packages with the exception of pre-packages, by the officially issued or accepted code mark representing the packer and/or the dispatcher, indicated in close connection with the reference 'Packer and/or Dispatcher' (or equivalent abbreviations);
- for pre-packages only, by the name and the address of a seller established within the Community indicated in close connection with the mention 'Packed for:' or an equivalent mention. In this case, the labelling shall also include a code representing the packer and/or the dispatcher. The seller shall give all information deemed necessary by the inspection body as to the meaning of this code.

B. Nature of produce

- 'Table Grapes', if the contents are not visible from the outside,
- name of the variety or, where applicable, varieties,
- 'under glass', where applicable.

C. Origin of produce

Country (or, where applicable, countries) of origin and, optionally, district where grown, or national, regional or local place name.

D. Commercial specifications

- Class.

Packages need not to bear the particulars mentioned in the first subparagraph, when they contain sales packages, clearly visible from the outside, and all bearing these particulars. These packages shall be free from any indications such as could mislead. When these packages are palletised, the particulars shall be given on a notice placed in an obvious position on at least two sides of the pallet.

MARKETING STANDARD FOR TOMATOES

I. DEFINITION OF PRODUCE

This standard applies to tomatoes of varieties (cultivars) grown from *Lycopersicum esculentum* Mill to be supplied fresh to the consumer, tomatoes for industrial processing being excluded.

Tomatoes may be classified into four commercial types:

- ‘round’
- ‘ribbed’
- ‘oblong’ or ‘elongated’
- ‘cherry’ tomatoes (including ‘cocktail’ tomatoes)

II. PROVISIONS CONCERNING QUALITY

The purpose of the standard is to define the quality requirements of tomatoes, after preparation and packaging.

A. Minimum requirements

In all classes, subject to the special provisions for each class and the tolerances allowed, the tomatoes must be:

- intact

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- sound, produce affected by rotting or deterioration such as to make it unfit for consumption is excluded
- clean, practically free of any visible foreign matter
- fresh in appearance
- practically free from pests
- free from damage caused by pests affecting the flesh
- free of abnormal external moisture
- free of any foreign smell and/or taste.

In the case of trusses of tomatoes, the stalks must be fresh, healthy, clean and free from all leaves and any visible foreign matter.

The development and condition of the tomatoes must be such as to enable them:

- to withstand transportation and handling
- to arrive in satisfactory condition at the place of destination.

B. Classification

Tomatoes are classified in three classes, as defined below:

(i) *'Extra' Class*

Tomatoes in this class must be of superior quality. They must have firm flesh and must be characteristic of the variety as regards shape, appearance and development.

Their colouring, according to their state of ripeness, must be such as to satisfy the requirements set out in the last subparagraph of paragraph A above.

They must be free from greenbacks and other defects, with the exception of very slight superficial defects, provided these do not affect the general appearance of the produce, the quality, the keeping quality and presentation in the package.

(ii) *Class I*

Tomatoes in this class must be of good quality. They must be reasonably firm and characteristic of the variety.

They must be free of cracks and visible greenback. The following slight defects, however, may be allowed provided these do not affect the general appearance of the produce, the quality, the keeping quality and presentation in the package:

- a slight defect in shape
- slight defects in colouring
- slight skin defects
- very slight bruises.

Furthermore, 'ribbed' tomatoes may show:

- healed cracks not more than 1 cm long
- no excessive protuberances
- small umbilicus, but no suberisation
- suberisation of the stigma up to 1 cm²
- fine blossom scar in elongated form (like a seam), but not longer than two-thirds of the greatest diameter of the fruit.

(iii) *Class II*

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

This class includes tomatoes which do not qualify for inclusion in the higher classes, but satisfy the minimum requirements specified above.

They must be reasonably firm (but may be slightly less firm than in Class I) and must not show unhealed cracks.

The following defects may be allowed provided the tomatoes retain their essential characteristics as regards the quality, the keeping quality and presentation:

- defects in shape, development and colouring
- skin defects or bruises, provided the fruit is not seriously affected
- healed cracks not more than 3 cm in length for round, ribbed or oblong tomatoes.

Furthermore, ‘ribbed’ tomatoes may show:

- more pronounced protuberances than allowed under Class I, but without being misshapen
- an umbilicus
- suberisation of the stigma up to 2 cm²
- fine blossom scar in elongated form (like a seam).

III. PROVISIONS CONCERNING SIZING

Size is determined by the maximum diameter of the equatorial section, by weight or by count.

The following provisions shall not apply to trusses of tomatoes, and are optional for Class II.

To ensure there is uniformity in size:

- (a) The maximum difference in diameter between tomatoes in the same package shall be limited to:
- 10 mm, if the diameter of the smallest fruit (as indicated on the package) is under 50 mm
 - 15 mm, if the diameter of the smallest fruit (as indicated on the package) is 50 mm and over but under 70 mm
 - 20 mm, if the diameter of the smallest fruit (as indicated on the package) is 70 mm and over but under 100 mm
 - there is no limitation of difference in diameter for fruit equal or over 100 mm.

In case size codes are applied, the codes and ranges in the following table have to be respected:

Size code	Diameter (mm)
0	≤ 20
1	> 20 ≤ 25
2	> 25 ≤ 30
3	> 30 ≤ 35
4	> 35 ≤ 40
5	> 40 ≤ 47
6	> 47 ≤ 57
7	> 57 ≤ 67

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

8	$> 67 \leq 82$
9	$> 82 \leq 102$
10	> 102

- (b) For tomatoes sized by weight or by count, the difference in size should be consistent with (a).

IV. PROVISIONS CONCERNING TOLERANCES

Tolerances in respect of quality and size shall be allowed in each lot for produce not satisfying the requirements of the class indicated.

A. Quality tolerances

(i) 'Extra' Class

A total tolerance of 5 %, by number or weight, of tomatoes not satisfying the requirements of the class but meeting those of Class I is allowed. Within this tolerance not more than 0,5 % in total may consist of produce satisfying the requirements of Class II quality.

(ii) Class I

A total tolerance of 10 %, by number or weight, of tomatoes not satisfying the requirements of the class but meeting those of Class II is allowed. Within this tolerance not more than 1 % in total may consist of produce neither satisfying the requirements of Class II quality nor the minimum requirements. Produce affected by rotting or any other deterioration rendering it unfit for consumption is excluded. In the case of trusses of tomatoes, 5 %, by number or weight, of tomatoes detached from the stalk.

(iii) Class II

A total tolerance of 10 %, by number or weight, of tomatoes satisfying neither the requirements of the class nor the minimum requirements is allowed. Produce affected by rotting or any other deterioration rendering it unfit for consumption is excluded. In the case of trusses of tomatoes, 10 %, by number or weight, of tomatoes detached from the stalk.

B. Size tolerances

For all classes: 10 %, by number or weight, of tomatoes conforming to the size immediately above or below that specified.

V. PROVISIONS CONCERNING PRESENTATION

A. Uniformity

The contents of each package must be uniform and contain only tomatoes of the same origin, variety or commercial type, quality and size (if sized).

The ripeness and colouring of tomatoes in 'Extra' Class and Class I must be practically uniform. In addition, the length of 'oblong' tomatoes must be sufficiently uniform.

However, a mixture of tomatoes of distinctly different colours, varieties and/or commercial types may be packed together in a sales unit⁽⁵⁷⁾, provided they are uniform in quality and, for each colour, variety and/or commercial type concerned, in origin.

The visible part of the contents of the package must be representative of the entire contents.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

B. Packaging

The tomatoes must be packed in such a way as to protect the produce properly.

The materials used inside the package must be clean and of a quality such as to avoid causing any external or internal damage to the produce. The use of materials, particularly paper or stamps bearing trade specifications is allowed provided the printing or labelling has been done with non-toxic ink or glue.

Packages must be free of all foreign matter.

VI. PROVISIONS CONCERNING MARKING

Each package⁽⁵⁸⁾ must bear the following particulars in letters grouped on the same side, legibly and indelibly marked and visible from the outside:

A. Identification

Packer and/or dispatcher/shipper:

- name and physical address (e.g. street/city/region/postal code and, if different from the country of origin, the country)
- or
- a code mark officially recognised by the national authority⁽⁵⁹⁾.

B. Nature of produce

‘Tomatoes’ or ‘trusses of tomatoes’ and the commercial type if the contents are not visible from the outside. These details must always be provided for ‘cherry’ (or ‘cocktail’) tomatoes, whether in trusses or not.

- ‘Mixture of tomatoes’, or equivalent denomination, in the case of sales units containing a mixture of distinctly different colours, varieties and/or commercial types of tomatoes. If the produce is not visible from the outside, the colours, varieties or commercial types of the sales unit must be indicated.
- Name of the variety (optional).

C. Origin of produce

Country of origin and, optionally, district where grown, or national, regional or local place name.

In the case of sales units containing a mixture of distinctly different colours, varieties and/or commercial types of tomatoes of different origins, the indication of each country of origin shall appear next to the name of the colour, variety and/or commercial type concerned.

D. Commercial specifications

- Class
- Size (if sized) expressed as minimum and maximum diameters.

E. Official control mark (optional)

- Packages need not to bear the particulars mentioned in the first subparagraph, when they contain sales packages, clearly visible from the outside, and all bearing these particulars. These packages shall be free from any indications such as could mislead. When these packages are palletised, the particulars shall be given on a notice placed in an obvious position on at least two sides of the pallet.]]

Methods of inspection mentioned in Article 20(1)

Remark: the following methods of inspection are based on the provisions of the guide for the implementation of quality control of fresh fruit and vegetables adopted by the OECD Scheme for the Application of International Standards for Fruit and Vegetables.

1. DEFINITIONS

1.1. Package

Individually packaged part of a lot, including contents so as to facilitate handling and transport of a number of sales units or of products loose or arranged, in order to prevent damage by physical handling and transport. Road, rail, ship and air containers are not considered as packages.

1.2. Sales package

Individually packaged part of a lot, including contents which is so as to constitute a sales unit to the final user or consumer at the point of purchase.

1.2a. Pre-packages

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Pre-packages are sales packages such as the packaging encloses the foodstuff completely or only partially, but in such a way that the contents cannot be altered without opening or changing the packaging. Protective films covering single produce are not considered as a pre-package.

1.3. Consignment

Quantity of produce to be sold by a given trader found at the time of inspection and defined by a document. A consignment may consist of one or several types of produce; it may contain one or several lots of fresh, dry or dried fruit and vegetables.

1.4. Lot

Quantity of produce which, at the time of inspection at one place, has similar characteristics with regard to:

- packer and/or dispatcher
- country of origin
- nature of produce
- class of produce
- size (if the produce is graded according to size)
- variety or commercial type (according to the relevant provisions of the standard)
- type of packaging and presentation.

However, if during the conformity check of consignments (as defined in point 1.3), it is difficult to distinguish between different lots and/or presentation of individual lots is not possible, all lots of a specific consignment may be treated as one lot if they are similar in regard to type of produce, dispatcher, country of origin, class and variety or commercial type, if this is provided for in the relevant marketing standard.

1.5. Sampling

Collective samples taken temporarily from a lot during conformity check.

1.6. Primary sample

Package taken at random from the lot, in case of packed produce or, in case of bulk produce (direct loading into a transport vehicle or compartment thereof), a quantity taken at random from a point in the lot.

1.7. Bulk sample

Several primary samples supposed to be representative for the lot so that the total quantity is sufficient to allow the assessment of the lot with regard to all criteria.

1.8. Secondary sample

An equal quantity of produce taken at random from the primary sample.

In the case of packed nuts, the secondary sample shall weigh between 300 g and 1 kg. If the primary sample is made up of packages containing sales packages, the secondary sample shall be one or more sales packages that in aggregate are at least 300 g.

In the case of other packed produce, the secondary sample shall comprise 30 units, in case the net weight of the package is 25 kg or less and the package does not contain any sales packages. In certain cases this means that the whole content of the package has to be checked, if the primary sample contains not more than 30 units.

1.9. Composite sample (dry and dried produce only)

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

A composite sample is a mix, weighing at least 3 kg, of all the secondary samples taken from the bulk sample. Produce in the composite sample shall be evenly mixed.

1.10. Reduced sample

Quantity of produce taken at random from the bulk or composite sample whose size is restricted to the minimum quantity necessary but sufficient to allow the assessment of certain individual criteria.

If the inspection method would destroy the produce, the size of the reduced sample shall not exceed 10 % of the bulk sample or, in the case of nuts in shell, 100 nuts taken from the composite sample. In the case of small dry or dried products (i.e. 100 g include more than 100 units) the reduced sample shall not exceed 300 g.

For the assessment of criteria on the degree of the development and/or ripeness, the constitution of the sampling shall be done according to the objective methods described in the Guidance on Objective Tests to Determine Quality of Fruit and Vegetables and Dry and Dried Produce (<http://www.oecd.org/agr/fv>).

Several reduced samples may be taken from a bulk or composite sample in order to check the conformity of the lot against different criteria.

2. IMPLEMENTATION OF CONFORMITY CHECK

2.1. General remark

A conformity check shall be made by assessing samples taken at random from different points in the lot to be controlled. It is based on the principle of presumption that the quality of the samples is representative of the quality of the lot.

2.2. Place of control

A conformity check may be carried out during packing operation, at the point of dispatch, during transport, at the point of reception, at whole sale and retail level.

In cases where the inspection body does not carry out the conformity check in their own premises, the holder shall provide facilities enabling the conduct of a conformity check.

2.3. Identification of lots and/or getting a general impression of the consignment

The identification of lots shall be carried out on the basis of their marking or other criteria, such as the indications laid down under Council Directive 89/396/EEC⁽⁶⁰⁾. In the case of consignments which are made up of several lots it is necessary for the inspector to get a general impression of the consignment with the aid of accompanying documents or declarations concerning the consignments. The inspector shall then determine how far the lots presented comply with the information in these documents.

If the produce is to be or has been loaded onto a means of transport, the registration number of the latter shall be used for identification of the consignment.

2.4. Presentation of produce

The inspector shall decide which packages are to be checked. The presentation shall be made by the operator and shall include the presentation of the bulk sample as well as the supply of all information necessary for the identification of the consignment or lot.

If reduced or secondary samples are required, these shall be identified by the inspector from the bulk sample.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

2.5. Physical check

— Assessment of packaging and presentation:

The packaging, including the material used within the package, shall be tested for suitability and cleanness according to the provisions of the relevant marketing standard. This shall be done on the basis of primary samples, in case of packed produce and in all other cases on the basis of the transport vehicle. If only certain types of packaging or presentation are permitted, the inspector shall check whether these are being used.

— Verification of marking:

The inspector shall check whether the produce is marked according to the relevant marketing standard. This shall include a check on the accuracy of marking and/or the extent of any amendments required.

In case of packed produce, this check shall be carried out on the basis of the primary samples, in all other cases on the basis of the documents attached to the pallet or the transport vehicle.

Fruit and vegetables individually wrapped in plastic shall not be considered as pre-packed foodstuff in the meaning of European Parliament and Council Directive 2000/13/EC and shall not necessarily need to be marked in accordance with the marketing standards. In such cases, the plastic wrapping may be considered as a simple protection for fragile products.

— Verification of conformity of the produce:

The inspector shall determine the size of the bulk sample in such way as to be able to assess the lot. The inspector selects at random the packages to be inspected or in the case of bulk produce the points of the lot from which individual samples shall be taken.

Care shall be taken to ensure that the removal of samples does not adversely affect the quality of the produce.

Damaged packages shall not be used as part of the bulk sample. They shall be set aside and may, if necessary, be subject to a separate examination and report.

The bulk sample shall comprise the following minimum quantities whenever a lot is declared unsatisfactory or the risk of a produce not conforming to the marketing standard has to be examined:

Packed produce	
Number of packages in the lot	Number of packages to be taken (primary samples)
Up to 100	5
From 101 to 300	7
From 301 to 500	9
From 501 to 1 000	10
More than 1 000	15 (minimum)

Produce in bulk(direct loading into a transport vehicle or compartment thereof)

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Quantity of lot in kg or number of bundles in the lot	Quantity of primary samples in kg or number of bundles
Up to 200	10
From 201 to 500	20
From 501 to 1 000	30
From 1 001 to 5 000	60
More than 5 000	100 (minimum)

In the case of bulky fruit and vegetables (over 2 kg per unit), the primary samples shall be made up of at least five units. In the case of lots comprising fewer than 5 packages or weighing less than 10 kg, the check shall cover the entire lot.

If the inspector discovers, after an inspection, that a decision cannot be reached, another physical check shall be undertaken and the overall result reported as an average of the two checks.

2.6. Control of produce

In case of packed produce, the primary samples shall be used to check the general appearance of the produce, the presentation, the cleanliness of the packages and the labelling. In all other cases, these checks shall be done on basis of the lot or transport vehicle.

The produce shall be removed entirely from its packaging for the conformity check. The inspector may only dispense with this where the sampling is based on composite samples.

The inspection of uniformity, minimum requirements, quality classes and size shall be carried out on the basis of the bulk sample, or on the basis of the composite sample taking into account the explanatory brochures published by the OECD Scheme for the Application of International Standards for Fruit and Vegetables (<http://www.oecd.org/agr/fv>).

When defects are detected, the inspector shall ascertain the respective percentage of the produce not in conformity with the standard by number or weight.

External defects shall be checked on the basis of the bulk or composite sample. Certain criteria on the degree of development and/or ripeness or on the presence or absence of internal defects may be checked on the basis of reduced samples. The check based on the reduced sample applies in particular to checks which destroy the trade value of the produce.

The criteria on the degree of development and/or ripeness shall be checked using the instruments and methods laid down to this end in the relevant marketing standard or in accordance with the Guidance on Objective Tests to Determine Quality of Fruit and Vegetables and Dry and Dried Produce (<http://www.oecd.org/agr/fv>).

2.7. Report of control results

Documents mentioned in Article 12a shall be issued where appropriate.

If defects are found leading to non conformity, the trader or his representative shall be informed in writing about these defects and the percentage found as well as the reasons for non-conformity. If the compliance of produce with the standard is possible by a change in marking, the trader or his representative shall be informed.

If defects are found in a product, the percentage found not to be in conformity with the standard shall be indicated.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

2.8. Decline in value by conformity check

After the conformity check, the bulk/composite sample is put at the disposal of the operator or his representative.

The inspection body shall not be bound to hand back the elements of the bulk/composite sample destroyed during the conformity check.]

ANNEX VIII

LIST OF OPERATIONS AND EXPENDITURE NOT ELIGIBLE UNDER OPERATIONAL PROGRAMMES REFERRED TO IN ARTICLE 61

1. General production costs and in particular; plant protection products, including integrated control materials, fertilisers and other inputs; packing costs, storage costs, packaging costs, even as part of new processes, costs of packages; costs of collection or transport (internal or external); operating costs (in particular electricity, fuel and maintenance), except:
 - Specific costs for quality improvement measures. In all cases costs for (even certified) mycelium, seeds and non perennial plants shall not be eligible;
 - Specific costs for organic plant protection materials (such as pheromones and predators) whether used in organic, integrated or conventional production;
 - Specific cost for environmental measures, including costs generated by the environmental management of packaging. The environmental management of packaging shall be properly justified and follow the criteria of Annex II to Directive 94/62/EC of the European Parliament and of the Council on Packaging and Packaging waste (OJ L 365, 31.12.1994, p. 10);
 - Specific cost for organic, integrated or experimental production. The competent national authority shall lay down the eligibility criteria for an experimental production taking account of the newness of the procedure or concept and the risk involved;
 - Specific costs to ensure the monitoring of compliance with the standards referred to in Title II of this regulation, with plant-health rules and with maximum level of residues.

Specific costs shall mean the additional costs, calculated as the difference between the conventional costs and the costs actually incurred.

For each category of eligible specific costs referred to above, in order to calculate additional costs compared with conventional ones, Member States may fix standard flat rates in a duly justified way.

2. Administrative and personnel costs with the exception of expenditure relating to the implementation of operational funds and operational programmes which shall include:
 - (a) overheads specifically related to the operational fund or operational programme, including management and personnel costs, reports and evaluation studies, and the costs of keeping accounts and the management of accounts, by means of the payment of a standard flat rate equal to 2 % of the approved operational fund and up to a maximum of EUR 180 000. The 2 % shall consist of 1 % of Community aid plus 1 % from the producer organisation.

In the case of a recognised association of producer organisations, the standard flat rate may be multiplied by the number member of producer organisations of the association, up to a maximum of EUR 1 250 000.

Status: Point in time view as at 01/01/2011.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Member States may restrict funding to the real costs, in which case they should define the eligible costs;

- (b) personnel costs (including charges linked to wages and salaries, if these are borne by the producer organisation) resulting from measures:
- (i) to improve or maintain a high level of quality or environmental protection;
 - (ii) to improve the level of marketing.

The implementation of these measures shall essentially involve the use of qualified personnel. If, in such cases, the producer organisation uses its own employees or member producers, the time worked shall be documented.

If a Member State wishes to provide an alternative to restricting funding to the real costs, for all the eligible personnel costs referred to above, it shall fix, ex ante and in a duly justified way, standard flat rates up to a maximum of 20 % of the approved operational fund. This percentage may be increased in duly justified cases.

In order to request those standard flat rates, producer organisations shall furnish proof of the implementation of the action to the satisfaction of the Member State.

- (c) legal and administrative costs of mergers of producer organisations or their acquisition, as well as legal and administrative costs related to creating transnational producer organisations or transnational associations of producer organisations; feasibility studies and proposals commissioned by producer organisations in this respect.
3. Income or price supplements outside crisis prevention and management.
 4. Insurance costs outside crisis prevention and management.
 5. Reimbursement of loans taken out for an operation carried out before the beginning of the operational programme other than those refer to in Article 75.

Other common baseline indicators are also relevant for the national strategies at the level of the Member States (e.g., value of the marketed production).

As a general rule, baseline indicators are to be calculated as three year averages. If data are not available, they should be calculated at least with data related to one year.
