ANNEX I

QUALITY CONDITIONS TO BE SATISFIED BY EACH PRODUCT FOR WHICH THERE IS NO COMMUNITY MARKETING STANDARD AS REGARDS SALES PACKAGES OF FRESH FRUIT AND VEGETABLES AS REFERRED TO IN ARTICLE 6 Minimum quality requirements

In all classes, and bearing in mind the permitted tolerances (see below), the products must be:

- intact,
- sound; products affected by rotting or deterioration such as to make them unfit for consumption are excluded,
- clean, practically free of any visible foreign matter,
- practically free from pests,
- practically free from damage caused by pests,
- free of abnormal external moisture,
- free of any foreign smell and/or taste.

‘Extra’ class

Products in this class must be of superior quality. They must be characteristic of the variety and/or commercial type.

They must be free from defects, with the exception of very slight superficial defects, provided these do not affect the general appearance of the product, its quality, keeping quality and presentation in the package.

Class I

Products in this class must be of good quality. They must be characteristic of the variety and/or commercial type.

Slight defects may be allowed, however, provided that they do not affect the general appearance of the product, its quality, keeping quality and presentation in the package.

Class II

This class includes products which do not qualify for inclusion in the higher classes but satisfy the minimum requirements required above.

They may present defects, provided they retain their essential characteristics as regards quality, keeping quality and presentation.

Quality tolerances

Quality tolerances shall be allowed in each package for products not satisfying the requirements of the class indicated.

- ‘Extra’ class

5 % by number or weight of products not satisfying the requirements of the class, but meeting those of Class I or, exceptionally, coming within the tolerances of that class.

- Class I

10 % by number or weight of products not satisfying the requirements of the class, but meeting those of Class II or, exceptionally, coming within the tolerances of that class.

- Class II

10 % by number or weight of products not satisfying the requirements of the class, nor the minimum requirements, with the exception of products affected by rotting or any other deterioration rendering them unfit for consumption.

Status: Point in time view as at 01/05/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Uniformity

All the products in the package must be of the same origin, variety or commercial class and quality.

METHODS OF INSPECTION MENTIONED IN ARTICLE 20(1)

Remark: the following methods of inspection are based on the provisions of the guide for the implementation of quality control of fresh fruit and vegetables adopted by the UN/ECE (United

Status: Point in time view as at 01/05/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Nations Economic Commission for Europe) Working Party for standardisation of perishable goods and improvement of quality.

1. DEFINITIONS

(a) Conformity check

Inspection carried out by an inspector in accordance with this Regulation to check that fruit and vegetables conform to the marketing standards laid down pursuant to Article 2 of Regulation (EC) No 1182/2007.

This inspection includes:

- where appropriate, an identity and documentary inspection: an inspection of the documents or certificates accompanying the lot and/or the registers referred to in the third indent of the second subparagraph of Article 10(3) and in Article 11(2)(d) of this Regulation, and an inspection of the goods and the particulars in these documents, to check that they match,
- a physical inspection, by means of sampling, of the goods in the lot to ensure that it satisfies all the conditions laid down by the marketing standard, including the provisions on the presentation and marking of packages and packaging.

(b) Inspector

Person authorised by the competent inspection body who has an appropriate and regular training enabling them to undertake conformity inspection.

(c) Consignment

Quantity of produce to be sold by a given trader found at the time of control and defined by a document. The consignment may consist of one or several types of produce: it may contain one or several lots of fresh fruit and vegetables.

(d) Lot

Quantity of produce which, at the time of control at one place, has similar characteristics with regard to:

- packer and/or dispatcher,
- country of origin,
- nature of produce,
- class of produce,
- size (if the produce is graded according to size),
- variety or commercial type (according to the relevant provisions of the standard),
- type of packaging and presentation.

However, if during the inspection of consignments, it is not possible to distinguish between different lots and/or presentation of individual lots is not possible, all lots of a specific consignment may be treated as one lot if they are similar in regard to type of produce, dispatcher, country of origin, class and variety or commercial type, if this is provided for in the standard.

(e) Sampling

Collective sample taken temporarily from a lot during conformity check inspection.

(f) Primary sample

Package taken from the lot, or in the case of bulk produce, a quantity taken from a point in the lot.

Status: Point in time view as at 01/05/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

(g) Bulk sample

Several representative primary samples taken from the lot whose quantity is sufficient to allow the assessment of the lot with regard to all criteria.

(h) Secondary sample

In the case of nuts, a secondary sample shall be a representative quantity of product taken from each primary sample in the bulk sample, weighing between 300 g and 1 kg. If the primary sample is made up of packaged foods, the secondary sample shall be one package.

(i) Composite sample

In the case of nuts a composite sample shall be a mix, weighing at least 3 kg, of all the secondary samples in a bulk sample. Nuts in the composite sample must be evenly mixed.

(j) Reduced samples

Representative quantity of produce taken from the bulk sample whose size is sufficient to allow the assessment of certain individual criteria.

In the case of nuts, the reduced sample shall include at least 100 nuts taken from the composite sample. Several reduced samples may be taken from a bulk sample.

(k) Packages

Individually packaged part of a lot, including contents. The packaging is conceived so as to facilitate handling and transport of a number of sales units or of products loose or arranged, in order to prevent damage by physical handling and transport. Road, rail, ship and air containers are not considered as packages. In some cases, the package constitutes a sales package.

(l) Sales packages

Individually packaged part of a lot, including contents. The packaging of sales packages is conceived so as to constitute a sales unit to the final user or consumer at the point of purchase. Among sales packages, pre-packages are such as the packaging encloses the foodstuff completely or only partially, but in such a way that the contents cannot be altered without opening or changing the packaging.

2. IMPLEMENTATION OF CONFORMITY CHECK

(a) General remark

A physical check shall be made by assessing bulk samples taken at random from different points in the lot to be controlled. It is based on the principle of presumption that the lot conforms to the bulk sample.

(b) Identification of lots and/or getting a general impression of the consignment

The identification of lots shall be carried out on the basis of their marking or other criteria, such as the indications laid down under Council Directive 89/396/EEC⁽¹⁾. In the case of consignments which are made up of several lots it is necessary for the inspector to get a general impression of the consignment with the aid of accompanying documents or declarations concerning the consignments. He then determines how far the lots presented comply with the information in these documents.

If the produce is to be or has been loaded onto a means of transport, the registration number of the latter shall be used for identification of the consignment.

Status: Point in time view as at 01/05/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

(c) Presentation of produce

The inspector decides which packages are to be controlled. The presentation shall be made by the operator or his representative. The procedure should include the presentation of the bulk sample.

If reduced or secondary samples are required, these are identified by the inspector himself from the bulk sample.

(d) Physical check

— Assessment of packaging and presentation on the basis of primary samples:

The packaging, including the material used within the package, shall be tested for suitability and cleanness according to the provisions of the marketing standards. If only certain types of packaging are permitted, the inspector checks whether these are being used.

— Verification of marking on the basis of primary samples: first, it is ascertained whether the produce is marked according to the marketing standards. During control a check is made on the accuracy of marking and/or the extent of amendment required.

Fruit and vegetables individually wrapped in plastic are not considered as pre-packed foodstuff in the meaning of European Parliament and Council Directive 2000/13/EC and do not necessarily need to be marked in accordance with the marketing standards. In such cases, the plastic wrapping can be considered a simple protection for fragile products.

— Verification of conformity of the produce using bulk sampling or composite and/or reduced sampling: The inspector shall determine the size of the bulk sample in such way as to be able to assess the lots. He shall at random select the packages to be inspected or in the case of bulk produce the points of the lot from which individual samples shall be taken.

Damaged packages shall not be used as part of the bulk sample. They should be set-aside and may, if necessary, be subject to a separate examination and report. The bulk sample should comprise the following quantities whenever a consignment is declared unsatisfactory:

PACKED PRODUCE

Number of packages in the lot	Number of packages to be taken (primary samples)
Up to 100	5
From 101 to 300	7
From 301 to 500	9
From 501 to 1 000	10
More than 1 000	15 (minimum)

BULK PRODUCE

Quantity of lot in kg or number of bundles in the lot	Quantity of primary samples in kg or number of bundles
---	--

Status: Point in time view as at 01/05/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Up to 200	10
From 201 to 500	20
From 501 to 1 000	30
From 1 001 to 5 000	60
More than 5 000	100 (minimum)

In the case of bulky fruit and vegetables (over 2 kg per unit), the primary samples should be made up of at least five units. In the case of lots comprising fewer than 5 packages or weighing less than 10 kg, the check shall cover the entire lot.

If the inspector discovers, after an inspection, that a decision cannot be reached, he may carry out another inspection and express the overall result as an average of the two checks.

Certain criteria on the degree of development and/or ripeness or on the presence or absence of internal defects may be checked on the basis of reduced samples; this applies in particular to control which destroys the trade value of the produce. The size of the reduced sample shall be restricted to the minimum quantity absolutely necessary for the assessment of the lot. If, however, defects are ascertained or suspected the size of the reduced sample shall not exceed 10 per cent of the size of the bulk sample initially taken for the inspection.

(e) Control of produce

The produce has to be removed entirely from its packaging for the control; the inspector may only dispense with this in the case of nuts or if the type of packaging and form of presentation allow an inspection without unpacking the produce. The inspection of uniformity, minimum requirements, quality classes and size shall be carried out on the basis of the bulk sample, or on the basis of the composite sample in the case of nuts. When defects are detected, the inspector shall ascertain the respective percentage of the produce not in conformity with the standard by number or weight.

The criteria on the degree of development and/or ripeness can be checked using the instruments and methods laid down to this end in the marketing standards or in accordance with accepted practice.

(f) Report of control results

Documents mentioned in Article 20 are issued where appropriate.

If defects are found, the trader or his representative must be informed in writing about the reasons for complaint. If the compliance of produce with the standard is possible by a change in marking, the trader or his representative must be informed about it.

If defects are found in a product, the percentage found not to be in conformity with the standard must be indicated.

(g) Decline in value by conformity check

After the control, the bulk sample is put at the disposal of the operator or his representative.

The inspection body is not bound to hand back the elements of the bulk sample destroyed during the control.

Status: Point in time view as at 01/05/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

ANNEX VII

STRUCTURE AND CONTENT OF A NATIONAL STRATEGY FOR SUSTAINABLE OPERATIONAL PROGRAMMES REFERRED TO IN ARTICLE 57(1)

1. Duration of the national strategy

To be indicated by the Member State.

2. Analysis of the situation in terms of strengths and weaknesses and potential for development, the strategy chosen to meet them and the justification of the priorities chosen.

(Article 12(2)(a) and (b) of Regulation (EC) No 1182/2007)

2.1. Analysis of the situation

Describe the current situation of the fruit and vegetable sector using quantified data, highlighting strengths and weaknesses, disparities, needs and gaps and potential for development on the basis of the relevant baseline indicators defined in Annex XIV and of other relevant additional indicators. This description shall concern at least:

- the performances of the fruit and vegetable sector, including key trends: strengths and weaknesses of the sector, including in terms of competitiveness, and the potential for development of the producer organisations,
- the environmental effects (impacts/pressures and benefits) of the fruit and vegetable production, including key trends.

2.2. The strategy chosen to meet strengths and weaknesses

Describe the key areas where intervention is expected to bring the maximum value added:

- relevance of the objectives set for the operational programmes and of the related expected results and targets to the (priority) needs identified, and the extent to which they can be realistically achieved,
- internal coherence of the strategy, and existence of mutually reinforcing interactions and absence of possible conflicts and contradictions between the operational objectives of different actions selected,
- complementarity and consistency of the actions selected, and with other national/regional actions, and in particular with activities supported through European Community funds, and in particular with the rural development measures,
- expected results and impact against the baseline situation, and their contribution to Community objectives.

2.3. Impact from the previous operational programmes (when available)

Describe, where appropriate, the impact of operational programmes implemented in the recent past. Present a summary of the available results.

3. Objectives of operational programmes and instruments, performance indicators

(Article 12(2)(c) of Regulation (EC) No 1182/2007)

Describe the types of actions selected as eligible for support (non exhaustive list) and indicate what are the objectives pursued, verifiable targets and the indicators that allow the progress towards achievement of the objectives, efficiency and effectiveness to be assessed.

3.1. Requirements concerning all or several types of actions

Status: Point in time view as at 01/05/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Criteria and administrative rules adopted for ensuring that certain actions selected as eligible for support are not also supported by other relevant instruments of the common agricultural policy, and in particular by rural development support.

Effective safeguards in place, in application of Article 9(5) of Regulation (EC) No 1182/2007, to protect the environment from possible increased pressures coming from investments supported under operational programmes and criteria adopted, in application of Article 12(1) of that Regulation, for ensuring that investments on individual holdings supported under operational programmes respect the objectives set out in Article 174 of the Treaty and in the Sixth Community Environment Action Programme.

3.2. Specific information required for types of actions (to be filled only for the types of actions selected)

The following specific information is required for the actions envisaged:

3.2.1. Actions aimed at planning of production (non exhaustive list)

4. Designation of competent authorities and bodies responsible

Designation by the Member State of the national authority responsible for the management, monitoring and evaluation of the national strategy.

5. A description of the monitoring and evaluation systems

These shall be constructed on the basis of the common list of performance indicators indicated in Annex XIV. Where deemed appropriate, the national strategy shall specify additional indicators reflecting national and/or regional needs, conditions and objectives specific to the national operational programmes.

5.1. Assessment of the operational programmes and reporting obligations for producer organisations

(Article 12(2)(d) and (e) of Regulation (EC) No 1182/2007)

Describe the monitoring and evaluation requirements and procedures in relation to operational programmes, including the reporting obligations for producer organisations.

5.2. Monitoring and evaluation of the national strategy

Describe the monitoring and evaluation requirements and procedures in relation to the national strategy.

ANNEX VIII

LIST OF OPERATIONS AND EXPENDITURE NOT ELIGIBLE UNDER OPERATIONAL PROGRAMMES REFERRED TO IN ARTICLE 61

1. General production costs and in particular; plant protection products, including integrated control materials, fertilisers and other inputs; packing costs, storage costs, packaging costs, even as part of new processes, costs of packages; costs of collection or transport (internal or external); operating costs (in particular electricity, fuel and maintenance), except:
 - Specific costs for quality improvement measures. In all cases costs for (even certified) mycelium, seeds and non perennial plants shall not be eligible;
 - Specific costs for organic plant protection materials (such as pheromones and predators) whether used in organic, integrated or conventional production;
 - Specific cost for environmental measures, including costs generated by the environmental management of packaging. The environmental management of packaging shall be properly justified and follow the criteria of Annex II to Directive 94/62/EC of the European Parliament and of the Council on Packaging and Packaging waste (OJ L 365, 31.12.1994, p. 10);
 - Specific cost for organic, integrated or experimental production. The competent national authority shall lay down the eligibility criteria for an experimental production taking account of the newness of the procedure or concept and the risk involved;
 - Specific costs to ensure the monitoring of compliance with the standards referred to in Title II of this regulation, with plant-health rules and with maximum level of residues.

Status: Point in time view as at 01/05/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

Specific costs shall mean the additional costs, calculated as the difference between the conventional costs and the costs actually incurred.

For each category of eligible specific costs referred to above, in order to calculate additional costs compared with conventional ones, Member States may fix standard flat rates in a duly justified way.

2. Administrative and personnel costs with the exception of expenditure relating to the implementation of operational funds and operational programmes which shall include:

(a) overheads specifically related to the operational fund or operational programme, including management and personnel costs, reports and evaluation studies, and the costs of keeping accounts and the management of accounts, by means of the payment of a standard flat rate equal to 2 % of the approved operational fund and up to a maximum of EUR 180 000. The 2 % shall consist of 1 % of Community aid plus 1 % from the producer organisation.

In the case of a recognised association of producer organisations, the standard flat rate may be multiplied by the number member of producer organisations of the association, up to a maximum of EUR 1 250 000.

Member States may restrict funding to the real costs, in which case they should define the eligible costs;

(b) personnel costs (including charges linked to wages and salaries, if these are borne by the producer organisation) resulting from measures:

- (i) to improve or maintain a high level of quality or environmental protection;
- (ii) to improve the level of marketing.

The implementation of these measures shall essentially involve the use of qualified personnel. If, in such cases, the producer organisation uses its own employees or member producers, the time worked shall be documented.

If a Member State wishes to provide an alternative to restricting funding to the real costs, for all the eligible personnel costs referred to above, it shall fix, ex ante and in a duly justified way, standard flat rates up to a maximum of 20 % of the approved operational fund. This percentage may be increased in duly justified cases.

In order to request those standard flat rates, producer organisations shall furnish proof of the implementation of the action to the satisfaction of the Member State.

(c) legal and administrative costs of mergers of producer organisations or their acquisition, as well as legal and administrative costs related to creating transnational producer organisations or transnational associations of producer organisations; feasibility studies and proposals commissioned by producer organisations in this respect.

3. Income or price supplements outside crisis prevention and management.

4. Insurance costs outside crisis prevention and management.

5. Reimbursement of loans taken out for an operation carried out before the beginning of the operational programme other than those refer to in Article 75.

6. Purchase of land (costing more than 10 % of all the eligible expenditure on the operation concerned. In exceptional and duly justified cases, a higher percentage can

be fixed for operations concerning environmental conservation) not built on except where purchase is necessary to carry out an investment included in the operational programme.

7. Cost of meetings and training programmes except where they are related to the operational programme, including daily allowances, transport and accommodation costs (where appropriate on a flat-rate basis).
8. Operations or costs relating to the quantities produced by the members of the producer organisation outside the Community.
9. Operations that could distort competition in the other economic activities of the producer organisation.
10. Second hand equipment which has been purchased with Community or national support within the seven previous years.
11. Investments in means of transport to be used for marketing or distribution by the producer organisation except additional on-the-truck facilities for cold-storage or controlled atmosphere transport.
12. Hire except where economically justified as an alternative to purchase at the satisfaction of the Member State.
13. Operating cost of goods hired.
14. Expenditure linked to leasing contracts (taxes, interest, insurance costs, etc.) and operating costs except the leasing itself within the limits of the net market value of the item and within the conditions laid down in point (b) of the first subparagraph of Article 55(1) of Commission Regulation (EC) No 1974/2006⁽²⁾.
15. Promotion of individual commercial labels or containing geographic references except:
 - producer organisation, associations of producer organisations and subsidiaries as foreseen in Article 52(7) brands/trade marks,
 - generic promotion and promotion of quality labels. Geographical names are allowed only:
 - (a) if they are a protected designation of origin or a protected geographical indication, covered by Council Regulation (EC) No 510/2006⁽³⁾; or
 - (b) if, in all cases where the provision of point (a) does not apply, these geographical names are secondary to the principal message.

Promotional material shall bear the emblem of the European Community (in the case of visual media only) and include the following legend: ‘Campaign financed with the aid of the European Community’

16. Subcontracting or outsourcing contracts relating to the operations or expenditure mentioned as not eligible in this list.
17. VAT except non-recoverable VAT as referred to in Article 71(3)(a) of Regulation (EC) No 1698/2005.
18. Interest on debt except where the contribution is made in a form other than a non-repayable direct assistance.

Status: Point in time view as at 01/05/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

19. Real estate purchase which has been purchased with Community or national support within the 10 previous years.
20. Investments in shares of companies if the investment represents a financial investment except investments contributing directly to the achievement of the goals of the operational programme.
21. Costs incurred by parties other than the producer organisation or its members.
22. Investments or similar types of actions not on the holdings of the producer organisation, association of producer organisations, subsidiary as referred to in Article 52(7) or its members.
23. Measures outsourced by the producer organisation outside the Community.

ANNEX IX

MINIMUM REQUIREMENTS FOR WITHDRAWN PRODUCTS REFERRED TO IN ARTICLE 77(2)

1. Products shall be:
 - whole,
 - sound; products affected by rotting or deterioration such as to make them unfit for consumption are excluded,
 - clean, practically free from any visible foreign matter,
 - practically free from pests and damage caused by pests,
 - free of abnormal external moisture,
 - free of any foreign taste and/or smell.

INFORMATION TO BE INCLUDED IN THE ANNUAL REPORT OF MEMBER STATES AS REFERRED TO IN ARTICLE 99(3)

All information shall be that related to the year being reported on. It shall include information on expenditure paid after the end of the year being reported on. It shall cover information on checks executed and sanctions applied in respect of that year including those executed or applied after that year. Information (which varies during the year) shall be that valid on 31 December of the year reported on.

PART A —

INFORMATION FOR MARKET MANAGEMENT

1. Administrative information
 - (a) National legislation adopted in order to implement Titles III and IV of Regulation (EC) No 1182/2007.
 - (b) The Member States contact point for communications.
 - (c) Information on producer organisations and associations of producer organisations and producer groups:
 - code number;
 - name and contact details;
 - date of recognition (preliminary recognition in case of producer groups);
 - all the legal entities or clearly defined parts of legal entities involved and all subsidiaries involved;
 - number of members (broken down between producers and non-producers). Changes in membership during the year;
 - product coverage and description of the final products sold;

Status: Point in time view as at 01/05/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- changes in structures during the year, in particular: newly recognised or formed bodies, withdrawals and suspensions of recognitions, mergers with dates of these events.
- (d) Information on interbranch organisations:
 - name of the organisation and contact details;
 - date of recognition;
 - product coverage.
- 2. Information related to expenditures
- (a) Producer organisations. Financial data per beneficiary (producer organisation or association of producer organisations):
 - Operational fund. Total amount, contributions from Community, Member State (national assistance) and producer organisation and members;
 - description of the level of Community financial assistance under Article 10 of Regulation (EC) No 1182/2007;
 - financial data of the operational program, broken out between producer organisations and associations of producer organisations;
 - value of the marketed production. Total and broken down into the different legal entities composing the producer organisation or association of producer organisations;
 - expenditure on the operational program, broken down by measures and types of action selected as eligible for support;
 - information on the volume of products withdrawn broken down by products and by months;
 - list of the approved bodies for the purposes of Article 10(4)(a) and (b) of Regulation (EC) No 1182/2007.
- (b) Producer groups. Financial data per beneficiary:
 - total amount, contributions from Community, Member State and producer group and members;
 - description of the Community financial assistance under Article 7(5) of Regulation (EC) No 1182/2007 and Member State contribution, showing sub-totals for producer groups in the first, second, third, fourth and fifth years of transition period;
 - expenditure on investments required to attain recognition under Article 7(3) (b) of Regulation (EC) No 1182/2007 with breakdown on Community, Member State and producer group contribution;
 - value of the marketed production, with sub-totals for produce groups in the first, second, third, fourth and fifth years of transition period.
- 3. Information on the implementation of the national strategy:
 - summary description of progress made in the implementation of the operational programmes, broken down between each type of measure as referred to in Article 21(1)(f). The description shall be based on financial and common output and result indicators and summarise the information provided in the annual progress reports transmitted by the producer organisations concerning the operational programmes;
 - if the Member State is applying point (c) of the second subparagraph of Article 43 of Regulation (EC) No 1182/2007, the state aid concerned shall be described;

Status: Point in time view as at 01/05/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 1580/2007 (repealed). (See end of Document for details)

- a summary of the results of the mid-term evaluations of the operational programmes, as transmitted by the producer organisations including, where appropriate, the qualitative assessments of the results and impact of environmental actions aimed at the prevention of soil erosion, reductions in the use and/or better management of plant protection products, the protection of habitats and biodiversity or landscape conservation;
- a summary of the major problems encountered in the implementation of the national strategy and its management and any measure taken including, where appropriate, an indication of whether the national strategy has been updated and the reason for the updating. A copy of the updated strategy shall be annexed to the annual report;
- a summary of the analyses made pursuant to the second subparagraph of Article 112(1).

In 2012, the annual report shall also include the 2012 evaluation report referred to in Article 128(4).

4. The list of approved first processors and collectors broken down by product, for the Member States which make use of the transitional arrangement under Articles 68b or Article 143bc of Regulation (EC) No 1782/2003.

PART B —

INFORMATION FOR THE CLEARANCE OF ACCOUNTS

5. Information on checks and sanctions:
 - checks carried out by the Member State: details of bodies visited and dates of visiting;
 - checking rates;
 - results of checks;
 - sanctions applied.

ANNEX XIV

LIST OF COMMON PERFORMANCE INDICATORS REFERRED TO IN ARTICLE 126(3)

The system of common performance indicators related to actions undertaken by producer organisations, associations of producer organisations and their members under an operational programme does not necessarily capture all the factors that may intervene and affect the outputs, results and impact of an operational programme. In this context, the information provided by performance indicators should be interpreted in the light of quantitative and qualitative information relating to other key factors contributing to the success or failure of the programme's implementation.

a Only in the case where the acquisition of fixed assets is implemented on individual holdings of members of the producer organisation.

b To be filled in only for the year when the investment is made.

c Each day of a promotion campaign counts as one action.

d Only in case of actions relating to experimental production in plots belonging to member holdings.

e Only in case of actions relating to experimental production in plots belonging to member holdings and/or to the producer organisation.

f Each training activity counts as one action, whatever its specific content and the number of days of training received by participants.

g Each activity aimed at promoting the access of OP members to advisory services counts as one action, whatever the source of the advice (i.e. through an advisory service developed by the OP or by external services), the issue covered by the advice and the number of holdings using the advice provided.

h Market withdrawal of the same product in different periods of the year and market withdrawal of different products count as different actions. Each market withdrawal operation for a given product counts as one action.

i Green-harvesting and non-harvesting of different products count as different actions.

j Including non-productive investments linked to the achievement of commitments undertaken under other environmental actions.

k Including other forms of acquisitions of fixed assets linked to the achievement of commitments undertaken under other environmental actions.

5.COMMON BASELINE INDICATORS

Nota bene: Baseline indicators are needed in the analysis of the situation at the start of the programming period. Certain common baseline indicators are only relevant for the individual operational programmes at the level of producer organisations (e.g., volume of the production marketed at less than 80 % of the average price received by the PO/APO). Other common baseline indicators are also relevant for the national strategies at the level of the Member States (e.g., value of the marketed production).

As a general rule, baseline indicators are to be calculated as three year averages. If data are not available, they should be calculated at least with data related to one year.
