TABLES

1. INTRODUCTION
 - (1) The RIS guidelines describe the principles and general requirements for...
 - (2) They are equally applicable to the traffic of cargo vessels,...
 - (3) They should be used in conjunction with international regulations, recommendations...
 - (4) A number of concepts and standardisation proposals for river information...
 - (5) The concept for Inland ECDIS has been developed in the...
 - (6) The concept for a RIS architecture has been developed by...
 - (7) When reference is made in this document to Inland ECDIS...
2. DEFINITIONS
 - 2.1. River information services (RIS)
 - 2.2. RIS system
 - 2.3. RIS area
 - 2.4. RIS centre
 - 2.5. Inland VTS
 - 2.6. VTS area
 - 2.7. VTS centre
 - 2.8. Competent authority
 - 2.9. RIS authority
 - 2.10. RIS users
 - 2.11. Levels of RIS information
 - 2.12. Vessel tracking and tracing
3. PARTICIPATING VESSELS
 - (1) Vessels navigating in a RIS area shall make use of...

- (2) Decisions concerning the actual navigation and the manoeuvring of the...
- (3) Depending on the level of information available and on the...

4. RIS ARCHITECTURE

- 4.1. General
- 4.2. RIS stakeholders
 - 4.2.1. Policy makers
 - 4.2.2. Regional managers
 - 4.2.3. System engineers
 - 4.2.4. Service providers
 - 4.2.5. RIS users
- 4.3. RIS objectives
- 4.4. RIS tasks
- 4.5. River information services
 - Table 4. River information services
 - Mainly traffic related
 - 1. Fairway information service (FIS)
 - 2. Traffic information (TI)
 - 3. Traffic management (TM)
 - 4. Calamity abatement support (CAS)
 - Mainly transport related
 - 5. Information for transport logistics/management (ITL)
 - 6. Information for law enforcement (ILE)
 - 7. Statistics (ST)
 - 8. Waterway charges and harbour dues (CHD)
- 4.6. RIS functions and information needs
- 4.7. RIS applications
- 4.8. RIS systems

5. RECOMMENDATIONS FOR INDIVIDUAL SERVICES

- 5.1. Fairway information service (FIS)
 - 5.1.1. General
 - (1) Traditional means to supply FIS are e.g. visual aids to...
 - (2) Types of fairway information are listed in Table 4.6.
 - (3) Fairway information contains static and dynamic as well as urgent...
 - (4) Safety related fairway information should be provided by or on...
 - (5) Fairway information for an international river area should be given...
 - (6) Provided safety related data should be certified by the competent...
 - (7) Values should only be given with an indication of the...
 - (8) Fairway information services should be provided through the approved communication...
 - (9) In order to enable navigation in poor visibility by means...
 - 5.1.2. Radiotelephone service on inland waterways
 - (1) The radiotelephone service on inland waterways enables the establishment of...
 - (2) The radiotelephone service is based on the following rules and...
 - (3) In the service categories ship-to-ship, nautical information and ship-to-port authorities,...

- (4) Fairway information by voice in the nautical information (shore/ship) service...
 - (5) The urgent and dynamic information to be communicated by voice...
 - (6) The RIS area should be fully covered by the range...
 - (7) In the nautical information service category, information may be transmitted...
 - (8) It should be possible for the operator in the RIS...
 - 5.1.3. Internet service
 - (1) An Internet service is recommended to be established for the...
 - (2) A standard vocabulary should be used for the notices to...
 - (3) For a dense and/or extended waterway network, the dynamic information...
 - (4) In addition to the Internet presentation, the notices to skippers...
 - (5) In order to facilitate route planning by the skipper, all...
 - (6) Notices to skippers via the Internet or via data exchange...
 - (7) The requirements of the technical specifications for notices to skippers...
 - 5.1.4. Electronic navigational chart service (Inland ECDIS)
 - (1) Electronic navigational charts (ENC) as a means of presenting fairway...
 - (2) The chart information to be used in Inland ECDIS should...
 - (3) If the ENC is intended to be used in the...
 - (4) It is recommended to include all geo-objects of the object...
 - (5) It is recommended to include the water depths to the...
 - 5.2. Traffic information service
 - 5.2.1. General
 - 5.2.2. Tactical traffic information (TTI)
 - (1) Vessels should be equipped with radar in order to monitor...
 - (2) A tactical traffic image on board (Chapter 2.11 (2)) should be...
 - (3) The integrated display should be in accordance with the requirements...
 - (4) In the navigation mode of Inland ECDIS, the vessel's position...
 - (5) The use of a vessel tracking and tracing system (such...
 - (6) Tactical traffic information on shore is used also in local...
 - 5.2.3. Strategic traffic information (STI)
 - (1) Strategic traffic information (Chapter 2.11(3)) should be established, when a permanent...
 - (2) Strategic traffic information can be helpful to the following services:...
 - (3) For strategic information a ship reporting system (e.g. in connection...
 - (4) The STI should be delivered to RIS users (Chapter 2.10) on...
 - (5) Vessel and cargo data should be collected in a database....
 - (6) Reports from inland vessels should fulfil the requirements of the...
 - (7) A possible composition of data sets for different services like...
 - (8) A strategic traffic image on shore may be restricted to...
 - (9) Data interchange should be established between neighbouring authorities. In case...
 - 5.3. Traffic management

-
- 5.3.1. Local traffic management (vessel traffic services — VTS)
 - (1) Reference is made to the Inland VTS Guidelines of IALA...
 - (2) A VTS centre for local traffic management by means of...
 - (3) The tactical traffic image (TTI) is produced by collecting shore-based...
 - 5.3.2. Navigational support
 - 5.3.3. Lock and bridge management
 - (1) RIS should optimise the traffic flow by:
 - (2) A vessel tracking and tracing system with a database and...
 - 5.4. Calamity abatement support
 - (1) Calamity abatement support registers the vessel and transport data at...
 - (2) Depending on the risk assessment (Table 6.4 point B.2.a), a...
 - (3) It should be the responsibility of the skipper to report...
 - (4) A ship reporting system with a database and appropriate means...
 - (5) Position and sailing direction of the vessel should be reported:...
 - 5.5. Information for transport logistics
 - (1) Logistic applications of RIS comprise:
 - (2) Voyage planning is the task of the skipper and the...
 - (3) Transport management means the management of the transport chain beyond...
 - (4) The competent authorities should design their information systems in a...
 - (5) Communication and information exchange between private and public partners in...
 - (6) The competent authorities should provide ample room for logistics applications...
 - (7) Confidentiality of data exchange in a RIS needs to be...
 - 5.6. Information for law enforcement
 - 6. PLANNING OF RIS
 - 6.1. General
 - 6.2. Responsibilities
 - (1) The competent authority has the responsibility — as far as...
 - (2) Where two or more governments or competent authorities have a...
 - (3) Attention should be paid to the possibilities of monitoring and...
 - (4) During the planning of RIS, the concerned competent authority should:...
 - 6.3. Liability
 - 6.4. Planning process
 - Table 6.4 The planning process for RIS
 - A. PRELIMINARY INVESTIGATION
 - 1. Description and analysis of the existing and future situation in...
 - 2. Objectives see Chapter 4.3
 - 3. Tasks see Chapter 4.4
 - 4. Services and functions to be provided see Chapter 4.5 and 4.6...
 - 5. Regulations required
 - 6. Requirements for the applications
 - 7. Proposal for decision on further procedure
 - B. APPLICATION DESIGN
 - 1. Design of one or more future RIS applications
 - 2. Evaluation of future RIS applications

3. Organisational structure of the future RIS applications
- 6.5. Training
7. STEPWISE DEVELOPMENT OF RIS
 - (1) An overview of the possible step by step development of...
 - (2) Because of the widely varying parameters, it is not possible...
8. RIS STANDARDISATION PROCEDURES
 - (1) Standardisation of RIS is needed because:
 - (2) RIS shall be developed and operated, following agreed standards and...
 - (3) Technical specifications should be developed in compatibility with the maritime...
 - (4) International organisations being already involved in maritime standardisation should be...
 - (5) Those organisations should be invited to participate and cooperate in...
 - (6) The international bodies like UN/ECE; the Central Commission for the...
 - (7) The national governments are asked to certify the equipment produced...
 - (8) National governments are requested to cooperate in a bilateral or...
