Commission Regulation (EC) No 555/2008 of 27 June 2008 laying down detailed rules for implementing Council Regulation (EC) No 479/2008 on the common organisation of the market in wine as regards support programmes, trade with third countries, production potential and on controls in the wine sector

Status: Point in time view as at 27/06/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 555/2008. (See end of Document for details)

ANNEX I U.K.

WINE CMOSubmission of support programme

		Member State^a: ...
Period^b: ...	Date of submission: ...	Revision number: ...
a OPOCE acronym to be used.		
b Wine years.		

If modification requested by the Commission/modification requested by the Member State⁽¹⁾

A. Description of the measures proposed as well as their quantified objectives U.K.

(a) Single Payment Scheme support in accordance with Article 9⁽²⁾ U.K.

Introduced in the support programme: yes/no:

(b) Promotion in accordance with Article 10 U.K.

Introduced in the support programme: yes/no, if yes:

Description of the measures proposed:

Quantified objectives:

State aid:

(c) Restructuring and conversion of vineyard in accordance with Article 11 U.K.

Introduced in the support programme: yes/no, if yes:

Description of the measures proposed⁽³⁾:

Quantified objectives:

(d) Green harvesting in accordance with Article 12 U.K.

Introduced in the support programme: yes/no, if yes:

Description of the measures proposed:

Quantified objectives:

(e) Mutual funds in accordance with Article 13 U.K.

Introduced in the support programme: yes/no, if yes:

Description of the measures proposed:

Quantified objectives:

(f) Harvest insurance in accordance with Article 14 U.K.

Introduced in the support programme: yes/no, if yes:

Description of the measures proposed:

Quantified objectives:

Status: Point in time view as at 27/06/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 555/2008. (See end of Document for details)

State aid:

(g) Investments in enterprises in accordance with Article 15 **U.K.**

Introduced in the support programme: yes/no, if yes:

Description of the measures proposed:

Quantified objectives:

State aid:

(h) By-product distillation in accordance with Article 16 **U.K.**

Introduced in the support programme: yes/no, if yes:

Description of the measures proposed (including level of the aid):

Quantified objectives:

(i) Potable alcohol distillation in accordance with Article 17 **U.K.**

Introduced in the support programme: yes/no, if yes:

Length of transitional period (wine years):

Description of the measures proposed (including level of the aid):

Quantified objectives:

(j) Crisis distillation in accordance with Article 18 **U.K.**

Introduced in the support programme: yes/no, if yes:

Length of transitional period (wine years):

Description of the measures proposed (including level of the aid):

Quantified objectives:

State aid:

(k) Use of concentrated grape must in accordance with Article 19 **U.K.**

Introduced in the support programme: yes/no, if yes:

Length of transitional period (wine years):

Description of the measures proposed (including level of the aid):

Quantified objectives:

B. Results of consultations held: ...

C. Appraisal showing the expected technical, economic, environmental and social impact⁽⁴⁾: ...

D. Schedule for implementing the measures: ...

E. General financing table given in the format of Annex II (revision number to be specified): ...

F. Criteria and quantitative indicators to be used for monitoring and evaluation: ...

Status: Point in time view as at 27/06/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 555/2008. (See end of Document for details)

Steps taken to ensure that the programmes are implemented appropriately and effectively:

...

G. Designation of competent authorities and bodies responsible for implementing the programme: ...

ANNEX II **U.K.**

FIRST SUBMISSION OF THE FINANCIAL TABLE OF THE NATIONAL SUPPORT PROGRAMMES ACCORDING TO ARTICLE 6(E) OF REGULATION (EC) NO 479/2008

(in EUR 1 000)

Member State^a:

Date of communication, due by **30 June 2008 at the latest:**

ANNEX XI **U.K.**

Technical rules on V I 1 and V I 2 forms provided for in Articles 43 and 44

A. Printing of forms

1. The size of the forms is to be approximately 210 by 297 mm.
2. The forms are to be printed in one of the official Community languages; in the case of V I 2 forms, the language of the form is to be designated by the competent authorities of the Member State where the form is to be stamped.

B. Completing the forms **U.K.**

The forms are to be completed in the language in which they are printed.

Each form is to bear a serial number allocated:

- in the case of V I 1 forms, by the official agency signing the 'certificate' part,
- in the case of V I 2 forms, by the customs office stamping them.

1. Exporter: **U.K.**
 - Full name and address in the third country concerned.
2. Consignee: **U.K.**
 - Full name and address in the Community.

Status: Point in time view as at 27/06/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 555/2008. (See end of Document for details)

4. Means of transport and transport details: **U.K.**
- Only refer to transport used for delivery to EC port of entry:
 - Specify mode of transport (ship, air, etc); state name of ship, etc.
6. (5 for V I 2) Description of the imported product: **U.K.**
- Sale designation (e.g. as appears on label, such as name of producer and viticultural area; brandname; etc.),
 - Name of the country of origin (e.g. 'Chile'),
 - Name of the geographical indication, provided the wine qualifies for such a geographical indication,
 - Actual alcohol strength by volume,
 - Colour of the product (state 'red', 'rosé', 'pink' or 'white' only),
 - Combined Nomenclature code.

ANNEX XII **U.K.**

List of countries as referred to in Article 43(2) and Article 45

- Australia.

ANNEX XIII **U.K.**

ANNEX XVI U.K.

Instructions for taking samples of fresh grapes and processing them into wine for analysis by the isotopic methods referred to in Article 88(1)

I. SAMPLING OF GRAPES

- A. Each sample must consist of at least 10 kg of ripe grapes of the same variety. They are to be taken in the condition in which they are found. Sampling must be carried out during the period when the plot in question is harvested. The grapes collected must be representative of the whole plot. The fresh grape samples, or the derived pressed must, may be preserved by freezing until further usage. Only in the case that oxygen-18 measurement of the water of the must is foreseen, an aliquot of must may be taken separately and preserved after pressing the whole grape sample.
- B. When the samples are taken, a description sheet is to be drawn up. This sheet must include a first part concerning the sampling of the grapes and a second part concerning vinification. It must be kept with the sample and must accompany it during all transportation. It must be kept up to date by means of an entry regarding each type of treatment undergone by the sample. The description sheet concerning the sampling is to be drawn up in accordance with Part I of the questionnaire in Annex XVIII.

II. VINIFICATION U.K.

- A. Vinification must be carried out by the competent body or by a department authorised to do so by that body, wherever possible under conditions comparable with the normal conditions in the production area of which the sample is representative. Vinification should result in the total transformation of the sugar into alcohol, i.e. in less than 2 g/l of residual sugar. However, in certain cases, e.g. for ensuring a better representativity, higher amounts of residual sugars can be accepted. As soon as the wine has clarified and stabilised by means of SO₂, it must be put in 75 cl bottles and labelled.
- B. The description sheet for vinification is to be drawn up in accordance with Part II of the questionnaire in Annex XVIII.

ANNEX XVII U.K.

Number of samples to be taken by Member States each year for the analytical databank as referred in Article 88(3)

- 30 samples in Bulgaria,
- 20 samples in the Czech Republic,
- 200 samples in Germany,

Status: Point in time view as at 27/06/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 555/2008. (See end of Document for details)

- 50 samples in Greece,
- 200 samples in Spain,
- 400 samples in France,
- 400 samples in Italy,
- 10 samples in Cyprus,
- 4 samples in Luxembourg,
- 50 samples in Hungary,
- 4 samples in Malta,
- 50 samples in Austria,
- 50 samples in Portugal,
- 70 samples in Romania,
- 20 samples in Slovenia,
- 15 samples in Slovakia,
- 4 samples in the United Kingdom.

ANNEX XVIII U.K.

Questionnaire on the collection and vinification of samples of grapes intended for analysis by isotopic methods as referred in Article 88(5)

The analytical methods and the expression of results (units) to be used are those of Article 31 of Regulation (EC) No 479/2008 (or proved equivalent by the laboratories involved in the analysis).

PART I U.K.

1. General information U.K.
 - 1.1. Sample number:
 - 1.2. Name and function of the official or authorised person who took the sample:
 - 1.3. Name and address of the competent body responsible for taking the sample:
 - 1.4. Name and address of the competent body responsible for vinification and dispatch of the sample, if other than the body referred to at 1.3:
2. General description of the samples U.K.
 - 2.1. Origin (country, region):
 - 2.2. Year of harvest:
 - 2.3. Vine variety:
 - 2.4. Colour of the grapes:
3. Description of the vineyard U.K.
 - 3.1. Name and address of person farming the plot:
 - 3.2. Location of the plot U.K.

Status: Point in time view as at 27/06/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 555/2008. (See end of Document for details)

- wine village:
- locality:
- cadastral reference:
- latitude and longitude:
- 3.3. Soil type (e.g. limey, clayey, lime-clay, sandy):
- 3.4. Situation (e.g. slope, plain, exposed to sun):
- 3.5. Number of vines per hectare:
- 3.6. Approximate age of vineyard (less than 10 years/between 10 and 25 years/more than 25 years):
- 3.7. Altitude:
- 3.8. Method of training and pruning:
- 3.9. Type of wine into which the grapes are normally made (see definitions of Regulation (EC) No 479/2008, Annex IV):
- 4. Crop and must characteristics **U.K.**
- 4.1. Estimated yield per hectare for the plot harvested: (kg/ha):
- 4.2. State of health of the grapes (e.g. sound, rotten), specifying whether the grapes were dry or wet when the sample was taken:
- 4.3. Date on which sample was taken:
- 5. Weather conditions preceding harvest **U.K.**
- 5.1. Precipitation in the ten days preceding harvest: yes/no. If yes, additional information where available:
- 6. Irrigated vineyards: **U.K.**

If the crop is irrigated, date of last watering:

(Stamp of the competent body responsible for taking the sample, and name, position and signature of official taking the sample)

PART II **U.K.**

- 1. Microvinification **U.K.**
- 1.1. Weight of the sample of grapes, in kg:
- 1.2. Method of pressing:
- 1.3. Volume of must obtained:
- 1.4. Characteristics of the must: **U.K.**
- sugar concentration expressed in g/l by refractometry:
- total acidity expressed in g/l of tartaric acid: (optional):
- 1.5. Method of treating the must (e.g. settling, centrifugation):

Status: Point in time view as at 27/06/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 555/2008. (See end of Document for details)

- 1.6. Yeasting (variety of yeast used). Indicate whether or not there was spontaneous fermentation:
- 1.7. Temperature during fermentation:
- 1.8. Method for determining end of fermentation:
- 1.9. Method of treating the wine (e.g. racking.):
- 1.10. Addition of sulphur dioxide in mg/l:
- 1.11. Analysis of the wine obtained **U.K.**
 - actual alcoholic strength in % vol:
 - total dry extract:
 - reducing sugars expressed as g/l of invert sugar:
2. Chronological table of vinification of the sample **U.K.**

Date:

- on which sample was taken: (same date as date of harvest, part I — 4.3)
- of pressing:
- of commencement of fermentation:
- of end of fermentation:
- of bottling:

Date on which Part II was completed:

(Stamp of the competent body which carried out vinification and signature of competent official of that body)

ANNEX XIX **U.K.**

ANALYSIS REPORT Wine and wine product samples analysed by an isotopic method referred to in Article 31 of Regulation (EC) No 479/2008, to be entered in the JRC isotope databank

- I. GENERAL INFORMATION **U.K.**
 1. Country:
 2. Sample number:
 3. Year:
 4. Vine variety:
 5. Type of wine:
 6. Region/district:
 7. Name, address, telephone, fax and e-mail of laboratory responsible for the results:
 8. Sample for control analysis by the JRC: yes/no
- II. METHODS AND RESULTS **U.K.**

Status: Point in time view as at 27/06/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 555/2008. (See end of Document for details)

1. Wine (carried over from Annex XVIII) U.K.
 - 1.1. Alcoholic strength by volume: % vol
 - 1.2. Total dry extract: g/l
 - 1.3. Reducing sugars: g/l
 - 1.4. Total acidity expressed as tartaric acid: g/l
 - 1.5. Total sulphur dioxide: mg/l
 2. Distillation of wine for SNIF-NMR U.K.
 - 2.1. Description of distillation apparatus:
 - 2.2. Volume of wine distilled/weight of distillate obtained:
 3. Analysis of distillate U.K.
 - 3.1. Alcoholic strength of the distillate % (m/m):
 4. Result of deuterium isotope ratios of ethanol measured by NMR U.K.
 - 4.1. $(D/H)_I = \text{ppm}$
 - 4.2. $(D/H)_{II} = \text{ppm}$
 - 4.3. 'R' =
 5. NMR parameters U.K.
- Observed frequency:
6. Result of isotopic ratio $^{18}\text{O}/^{16}\text{O}$ of wine U.K.
- $$\delta^{18}\text{O} [\text{‰}] = \text{‰ V. SMOW} - \text{SLAP}$$
7. Result of isotopic ratio $^{18}\text{O}/^{16}\text{O}$ of must (when applicable) U.K.
- $$\delta^{18}\text{O} [\text{‰}] = \text{‰ V. SMOW} - \text{SLAP}$$
8. Result of isotopic ratio $^{13}\text{C}/^{12}\text{C}$ of wine ethanol U.K.
- $$\delta^{13}\text{C} [\text{‰}] = \text{‰ V-PDB.}$$

ANNEX XX U.K.

Collection of samples in the context of assistance between control bodies as referred in Article 92

1. When samples of wine, grape must or another liquid wine product are taken in the context of assistance between control bodies, the competent body shall ensure that: U.K.
- in the case of products in containers of not more than 60 litres warehoused in one lot, the samples are representative of the entire lot,

Status: Point in time view as at 27/06/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 555/2008. (See end of Document for details)

- in the case of products in containers with a nominal capacity of more than 60 litres, the samples are representative of the contents of the container from which the samples are taken.
- 2. Samples shall be taken by pouring the product in question into at least five clean containers each having a nominal capacity of not less than 75 cl. In the case of products as referred to in the first indent of paragraph 1, sampling may also take the form of removing at least five containers having a nominal capacity of not less than 75 cl from the lot to be examined. **U.K.**

Where samples of wine distillate are to be analysed by nuclear magnetic resonance of deuterium, the samples shall be placed in containers having a nominal capacity of 25 cl, or even 5 cl where they are to be sent from one official laboratory to another.

The samples shall be taken, closed where appropriate, and sealed in the presence of a representative of the establishment where the sample is taken or of a representative of the carrier if the sample is taken during transport. If no representative is present, the report referred to in paragraph 4 shall mention this fact.

Each sample shall be fitted with an inert and non-reusable closure.

- 3. Each sample shall bear a label which complies with part A of Annex XXI. **U.K.**

Where the container is too small for the prescribed label to be attached thereto, the container shall be marked with an indelible number and the required information shall be indicated on a separate sheet.

The representative of the establishment where the sample is taken or the representative of the carrier shall be requested to sign the label or, as applicable, the sheet.

- 4. The official of the competent body authorised to take samples shall draw up a written report in which he shall note any observations he considers important for assessing the samples. In the report he shall note, where necessary, any statements by the carrier's representative or the representative of the establishment where the sample was taken, and shall request such representative to affix his signature. He shall note the amount of the product from which the sample was taken. If the signatures referred to above and in the third subparagraph of paragraph 3 have been refused, the report shall mention this fact.
- 5. Wherever samples are taken, one of the samples shall remain as a control sample in the establishment where the sample was taken, and another with the competent body whose official took the sample. Three of the samples shall be sent to an official laboratory, which will carry out the analytical or organoleptic examination. There one of the samples shall be analysed. Another shall be kept as a control sample. Control samples shall be kept for a minimum period of three years after sampling.
- 6. Consignments of samples shall bear on the external packaging a red label complying with the model in part B of Annex XXI. The label shall be 50 mm by 25 mm. **U.K.**

When dispatching samples, the competent body of the Member State from which the samples are sent shall affix its stamp partially on the outer packaging of the parcel and partially on the red label.

Status: Point in time view as at 27/06/2008.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 555/2008. (See end of Document for details)

ANNEX XXI U.K.

A. Label describing the sample, in accordance with paragraph 3 of Annex XX

1. Required information: U.K.
- (a) name, address, including Member State, telephone, fax and e-mail of the competent body on whose instructions sampling was carried out;
 - (b) serial number of the sample;
 - (c) date on which sample was taken;
 - (d) name of the official of the competent body authorised to take the sample;
 - (e) name, address, telephone, fax, e-mail of the undertaking in which the sample was taken;
 - (f) identity of the container from which the sample was taken (e.g. number of the container, number of the lot of bottles, etc.);
 - (g) description of the product, including production area, year of harvest, actual or potential alcoholic strength and, if possible, vine variety;
 - (h) the words: ‘The reserved control sample may be examined only by a laboratory authorised to carry out control analyses. Breaking the seal is a punishable offence.’
- .
2. Remarks:
3. Minimum size: 100 mm by 100 mm.

B. Model of the red label referred to in paragraph 6 of Annex XX U.K.
