ANNEX IX

Administrative arrangement with flag States pertaining to the implementation of the catch certification provisions (Article 12(4) of Regulation (EC) No 1005/2008)

[^{F1}]^{F2}Section 5

CANADA

CATCH CERTIFICATION SCHEME

In accordance with Article 12(4) of Council Regulation (EC) No 1005/2008, the catch certificate provided for in Article 12 and Annex II to that Regulation shall be replaced — for fisheries products obtained from catches made by fishing vessels flying the flag of Canada — by Canadian catch certificates based on the Canadian Fisheries Certificate System (FCS) (described in Appendix 3), which is an electronic traceability system under the control of the Canadian authorities ensuring the same level of control by authorities as required under the EU catch certification scheme.

Specimens of the Canadian catch certificates which shall replace the European Community Catch Certificate and Re-export Certificate as from 1 January 2010 are given in Appendices 1 and 2.

Catches stemming from aboriginal fishing techniques or from fishing vessels as defined in Article 6 of Commission Regulation (EC) No 1010/2009 shall be accompanied by a simplified Canadian catch certificate given in Appendix 2.

Documents referred to in Article 14(1) and (2) of Regulation (EC) No 1005/2008 may be communicated by electronic means.

MUTUAL ASSISTANCE

Mutual assistance pursuant to Article 51 of Regulation (EC) No 1005/2008 shall be developed to facilitate the exchange of information and administrative cooperation between respective competent authorities in Canada and Member States of the European Union, based on detailed rules on mutual assistance laid down in Commission Regulation (EC) No 1010/2009.

ATTESTATION

The signatory attests that the catch identified in this catch and re-export certificate is validated as non-IUU in accordance with the Agreed Record of fisheries consultations between the European Community and Canada on the European Community regulation (No. 1005/2008), signed in November 2009, to prevent, deter and eliminate illegal, unreported and unregulated fishing.

Le signataire affirme que la capture, identifiée sur ce certificat de capture et de réexportation, a été validée comme étant non-IUU conformément à l'entente de collaboration des consultations sur les pêches entre la Communauté européenne et le Canada pour le règlement de la Communauté européenne (No. 1005/2008), signée en novembre 2009, afin de prévenir, décourager et éradiquer la pêche illicite, non déclarée et non réglementée (IINN).

Appendix 3

The Canadian Fisheries Certificate System (FCS) is designed to issue standard and simplified catch certificates.

The FCS will be used to issue and to validate a catch certificate for export consignments from Canada to the European Union of conventional fishery products including live, fresh, frozen, salted, canned and/or smoked and dried fish, using raw material from non-vessel fisheries,

Status: Point in time view as at 01/01/2010.

Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1010/2009. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)

aboriginal fisheries, or small and large fishing vessels and/or involving production comprising several steps in the production process.

On simplified certificates, Canada will group certain vessels to maximise efficiency. However, the FCS will maintain a complete link to vessels contained in groupings and these vessels are further linked to their license or registration information and the declared catch on the certificate.

The grouping feature will be used for some product forms and, in particular, for fisheries using collector vessels which purchase from several fishing vessels and issue records of sales at sea, for non-vessel fisheries such as beach seine, beach clams, ice fishing, for some inshore fisheries, and for aboriginal fisheries where fisheries may occur at the community level. Groupings will be export company-specific and will be modified for each shipment, as required.

The grouping feature will enable Canada to produce a single certificate per shipment while keeping all the information behind the certificate (vessel license/registration) available in the database.

This information will be available to EU Member States authorities in importing countries through our website or through direct telephone line to our certificate office.

Third parties countries may also contact the certificate office for information on indirect exports.]]
