

Commission Regulation (EC) No 903/2009 of 28 September 2009 concerning the authorisation of the preparation of *Clostridium butyricum* FERM-BP 2789 as a feed additive for chickens for fattening (holder of authorisation Miyarisan Pharmaceutical Co. Ltd represented by Huvepharma NV Belgium) (Text with EEA relevance)

COMMISSION REGULATION (EC) No 903/2009

of 28 September 2009

concerning the authorisation of the preparation of [<sup>F1</sup>*Clostridium butyricum* FERM-BP 2789] as a feed additive for chickens for fattening ([<sup>F2</sup>holder of authorisation Miyarisan Pharmaceutical Co. Ltd represented by Huvepharma NV Belgium])

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Regulation (EC) No 1831/2003 of the European Parliament and of the Council of 22 September 2003 on additives for use in animal nutrition<sup>(1)</sup>, and in particular Article 9(2) thereof,

Whereas:

- (1) Regulation (EC) No 1831/2003 provides for the authorisation of additives for use in animal nutrition and for the grounds and procedures for granting such authorisation.
- (2) In accordance with Article 7 of Regulation (EC) No 1831/2003, an application was submitted for the authorisation of the preparation set out in the Annex to this Regulation. That application was accompanied by the particulars and documents required under Article 7(3) of Regulation (EC) No 1831/2003.
- (3) The application concerns the authorisation of the preparation of [<sup>F1</sup>*Clostridium butyricum* FERM-BP 2789] as a feed additive for chickens for fattening, to be classified in the additive category ‘zootechnical additives’.
- (4) From the opinion of the European Food Safety Authority (the Authority) of 2 April 2009<sup>(2)</sup> it results that the preparation of [<sup>F1</sup>*Clostridium butyricum* FERM-BP 2789] does not have an adverse effect on animal health, human health or the environment and that the use of that preparation can have a significant benefit on feed to gain ratio. The Authority does not consider that there is a need for specific requirements of post-market monitoring. It also verified the report on the method of analysis of the feed additive in feed submitted by the Community Reference Laboratory set up by Regulation (EC) No 1831/2003.
- (5) The assessment of that preparation shows that the conditions for authorisation, provided for in Article 5 of Regulation (EC) No 1831/2003, are satisfied. Accordingly, the use of that preparation should be authorised, as specified in the Annex to this Regulation.

*Status: Point in time view as at 14/07/2017.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 903/2009. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

---

- (6) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

HAS ADOPTED THIS REGULATION:

**Textual Amendments**

- F1** Substituted by Commission Implementing Regulation (EU) No 373/2011 of 15 April 2011 concerning the authorisation of the preparation of *Clostridium butyricum* FERM-BP 2789 as a feed additive for minor avian species except laying birds, weaned piglets and minor porcine species (weaned) and amending Regulation (EC) No 903/2009 (holder of authorisation Miyarisan Pharmaceutical Co. Ltd, represented by Miyarisan Pharmaceutical Europe S.L.U.) (Text with EEA relevance).
- F2** Substituted by Commission Implementing Regulation (EU) 2017/1126 of 23 June 2017 amending Regulation (EC) No 903/2009 and Implementing Regulations (EU) No 373/2011, (EU) No 374/2013 and (EU) No 1108/2014 as regards the name of the EU representative of the holder of the authorisation of a preparation of *Clostridium butyricum* (FERM-BP 2789) (Text with EEA relevance).

*Article 1*

The preparation specified in the Annex, belonging to the additive category ‘zootechnical additives’ and to the functional group ‘gut flora stabilisers’, is authorised as an additive in animal nutrition subject to the conditions laid down in that Annex.

*Article 2*

This Regulation shall enter into force on the 20th day following its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

*Status: Point in time view as at 14/07/2017.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 903/2009. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

				the additive and premixtures and selective [ <sup>F1</sup> Clostridium butyricum FERM-BP 2789] agar for feedingsuffs Identification: pulsed-field gel electrophoresis (PFGE) method		3.	narasin/nicarbazin, semduramycin, decoquinat <sup>F4</sup> , <sup>F4</sup> monensin sodium or lasalocid].  For safety reasons: breathing protection shall be used during handling.
