ANNEX I U.K.

CATCH LIMITS APPLICABLE TO EU VESSELS IN AREAS WHERE CATCH LIMITS EXIST AND FOR THIRD-COUNTRY VESSELS IN EU WATERS. BY SPECIES AND BY AREA (IN TONNES LIVE WEIGHT, EXCEPT WHERE OTHERWISE SPECIFIED)

All catch limits set out in this Annex shall be considered as quotas for the purposes of Article 5 of this Regulation and shall therefore be subject to the rules set out in Regulation (EC) No 1224/2009, and in particular Articles 33 and 34 thereof.

The references to fishing zones are references to ICES zones, unless otherwise specified.

Within each area, fish stocks are referred to following the alphabetical order of the Latin names of the species. The following table of correspondences of Latin names and common names is given for the purposes of this Regulation:

Scientific name	Alpha-3 code	Common name
Amblyraja radiata	RJR	Starry ray
Ammodytes spp.	SAN	Sandeels
Argentina silus	ARU	Greater silver smelt
Beryx spp.	ALF	Alfonsinos
Brosme brosme	USK	Tusk
Centrophorus squamosus	GUQ	Leafscale gulper shark
Centroscymnus coelolepis	CYO	Portuguese dogfish
Chaceon (Geryon) quinquedens	CRR	Deep sea red crab
Champsocephalus gunnari	ANI	Antarctic icefish
Chionoecetes spp.	PCR	Snow crab
Clupea harengus	HER	Herring
Coryphaenoides rupestris	RNG	Roundnose grenadier
Dalatias licha	SCK	Kitefin shark
Deania calcea	DCA	Birdbeak dogfish
Dipturus batis	RJB	Common skate
Dissostichus eleginoides	TOP	Patagonian toothfish
Engraulis encrasicolus	ANE	Anchovy
Etmopterus princeps	ETR	Great lanternshark
Etmopterus pusillus	ETP	Smooth lanternshark
Euphausia superba	KRI	Krill
Gadus morhua	COD	Cod
Galeorhinus galeus	GAG	Tope shark
Glyptocephalus cynoglossus	WIT	Witch flounder

- a In accordance with the Council and Commission Statement made at the meeting of the Council of Fisheries Ministers on 14 and 15 December 2009 concerning the fisheries in Norwegian waters, an amount of 7 352 tonnes, corresponding to the unutilised quota for 2009 in Norwegian waters of IV for this species, may be fished in addition to this quota in the EU waters of this TAC area.
- **b** Including 242 tonnes to be taken in Norwegian waters south of 62°N(MAC/*04N-).
- c When fishing in Norwegian waters, by-catches of cod, haddock, Pollack and whiting and saithe shall be counted against the quotas for this species.
- d May also be taken in Norwegian waters of IVa.
- e To be deducted from Norway's share of the TAC (access quota). This amount includes the Norwegian share in the North Sea TAC of the amount of 39 054 tonnes. This quota may be fished in IVa only, except for 3 000 tonnes that may be fished in IIIa.

Special condition:

Within the limits of the abovementioned quotas, no more than the quantities given below may be taken in the following zones:

	IIIa(MAC/ *03A.)	IIIa and IVbc(MAC/ *3A4BC)	IVb(MAC/ *04B.)	IVc(MAC/ *04C.)	VI; international waters of Ha from 1 January to 31 March 2010 and in December 2010(MAC/ *2A6.)

Appendix to annex I U.K.

- 1. Cod selectivity in the North Sea and Skagerrak U.K.
- 1.1. Member States shall take measures to distribute, in the course of the year 2010, the use of cod quotas by vessels flying their flag, operating in the North Sea and Skagerrak and using bottom trawls, Danish seines and similar towed gear, with the exception of beam trawls, and to limit cod discards by those vessels, in accordance with conditions set out in points 1.2 to 1.6.
- 1.2. Member States shall adapt the use of the gears mentioned in point 1.1 in respect of the utilisation of their cod quotas. For this purpose, Member States shall establish utilisation targets of their cod quotas by the end of each quarter of 2010, and communicate these to the Commission by 1 February 2010.
- 1.3. If, at the end of any of the first three quarters of 2010, the utilisation of the cod quota is more than 10 % above the target quantity, the Member State concerned shall put in place measures to ensure that its vessels referred to in point 1.1 apply technical changes to their fishing gears deployed which allow for a reduction in cod by-catches to such an extent as sufficient to meet the target for the utilisation of the quota at the end of the following quarter.
- 1.4. Within one month from the end of the quarter in which the target quantity has been exceeded, Member States shall inform the Commission of the measures referred to in point 1.3, outlining the technical changes that are to be introduced to the gears and the vessels that will be affected, together with supporting evidence of the likely effect on catch rates of cod.
- 1.5. Where the cod quota of a Member State has been utilised up to a level of 90 % at any time before 15 October 2010, it shall be obligatory for all vessels of that Member State referred to in point 1.1 using gears with a mesh size of 80 mm or greater, with the exception of vessels using Danish seines, to use for the remainder of the year the fishing gear described in Appendix 4 to Annex III of Regulation (EC) No 43/2009 or any other gear the technical attributes of which result in similar catch rates of cod, as confirmed by STECF, or, for vessels targeting Norway lobster, a sorting grid as described in Appendix 3 to that Annex or any other gear with a proven equivalent escapement capability.
- 1.6. Notwithstanding point 1.5, Member States may also apply the measures referred to in that point to individual vessels or to groups of vessels that, at any time before 15 November 2010, have used 90 % of the part of the national cod quota that was made available to them in accordance with the national method of allocating fishing opportunities.
- 1.7. Notwithstanding points 1.3 and 1.5, Member States may also apply the measures referred to in those points with respect to individual vessels or to groups of vessels to which part of the national cod quota has been made available in accordance with the national method of allocating fishing opportunities.
- 2. Cod selectivity in Eastern Channel U.K.
- 2.1. Member States shall take measures to distribute, in the course of the year 2010, the use of cod quotas by vessels flying their flag, operating in the Eastern Channel and using bottom trawls, Danish seines and similar towed gear, with the exception of beam trawls, and to limit cod discards by those vessels, in accordance with conditions set out in points 2.2, 2.3 and 2.4.

- 2.2. Member States shall adapt the use of the gears mentioned in point 2.1 in respect of the utilisation of its cod quota. For this purpose, Member States shall establish utilisation targets of its cod quotas by the end of each quarter of 2010, and communicate these to the Commission by 1 February 2010.
- 2.3. If, at the end of any of the second and third quarters of 2010, the utilisation of the cod quota is more than 10 % above the target quantity, the Member State concerned shall put in place measures, including real time closures, to ensure that the vessels referred to in point 2.1 flying their flag avoid cod by-catches and target non quota species, to such an extent as sufficient to meet the target for the utilisation of the cod quota at the end of the following quarter.
- 2.4. On request from the Commission, Member States shall inform the Commission of the measures referred to in point 2.3.

ANNEX IIA U.K.

FISHING EFFORT FOR VESSELS IN THE CONTEXT OF THE MANAGEMENT OF CERTAIN STOCKS IN ICES ZONES IIIa, IV, VIa, VIIa, VIId, AND EU WATERS OF ICES ZONES IIa AND Vb

- 1. Scope U.K.
- 1.1. This Annex shall apply to EU vessels carrying on board or deploying any of the gears referred to in point 1 of Annex I to Regulation (EC) No 1342/2008 and present in any of the geographical areas referred to in point 2 of that Annex.
- 1.2. This Annex shall not apply to vessels of less than 10 metres' length overall. These vessels shall not be required to carry special fishing permits issued in accordance with Article 7 of Regulation (EC) No 1627/94. Member States concerned shall assess the fishing effort of those vessels by effort groups to which they belong, using appropriate sampling methods. During 2010, the Commission shall seek scientific advice for evaluating the effort deployment of those vessels, with a view to their future inclusion into the effort regime.
- 2. Regulated gears and geographical areas U.K.

For the purposes of this Annex, the regulated gears referred to in point 1 of Annex I to Regulation (EC) No 1342/2008 and geographical areas referred to in point 2 of that Annex shall apply.

- 3. Maximum allowable fishing effort U.K.
- 3.1. The maximum allowable effort referred to in Article 12(1) of Regulation (EC) No 1342/2008 and in Article 9(2) of Regulation (EC) No 676/2007 for the 2010 management period, from 1 February 2010 to 31 January 2011, for each of the effort groups of each Member State is set out in Appendix 1.
- 3.2. The maximum levels of annual fishing effort set in accordance with Regulation (EC) No 1954/2003 shall not affect the maximum allowable fishing effort set in this Annex.
- 4. Member States' obligations U.K.
- 4.1. Member States shall manage the maximum allowable effort in accordance with the conditions laid down in Article 9 of Regulation (EC) No 676/2007, Articles 4 and 13

- to 17 of Regulation (EC) No 1342/2008 and Articles 26 to 34 of Regulation (EC) No 1224/2009.
- 4.2. Article 28 of Regulation (EC) No 1224/2009 shall apply to vessels falling under the scope of this Annex. The geographical area referred to in that Article shall be understood, for the purpose of cod management, as each of the geographical areas referred to in point 2 and, for the purpose of sole and plaice management, as ICES zone IV.
- 5. Allocation of fishing effort U.K.
- 5.1. If a Member State deems so appropriate in order to reinforce the sustainable implementation of this effort regime, it shall not permit fishing with a regulated gear in any of the geographical areas to which this Annex applies by any of its vessels which has no record of such fishing activity, unless it ensures that equivalent capacity, measured in kilowatts, is prevented from fishing in the regulated area.
- 5.2. A Member State may establish management periods for allocating all or parts of the maximum allowable effort to individual vessels or groups of vessels. In such case, the number of days or hours for which a vessel may be present within the area during a management period shall be fixed at the discretion of the Member State concerned. During any such management periods, the Member State may reallocate effort between individual vessels or groups of vessels.
- 5.3. If a Member State authorises vessels to be present within an area by hours, the Member State shall continue measuring the consumption of days in accordance with the conditions referred to in point 4. Upon request by the Commission, the Member State shall demonstrate its precautionary measures taken to avoid an excessive consumption of effort within the area due to a vessel terminating presences in the area before the end of a 24-hour period.
- 6. Communication of relevant data U.K.
- 6.1. Without prejudice to Articles 33 and 34 of Regulation (EC) No 1224/2009, Member States shall transmit to the Commission on its request the data on fishing effort deployed by their fishing vessels in the previous month and the months before, using the reporting format set out in Appendix 2.
- 6.2. The data shall be sent to the appropriate electronic mailbox address, which the Commission shall communicate to the Member States. When a data transfer to the Fisheries Data Exchange System (or any future data system decided by the Commission) will become operational, the Member State shall transmit the data to the system before the fifteenth of each month, referring to the effort deployed up to the end of the previous month. The Commission shall notify Member States the date at which the system shall be used for transmission at least two months in advance of the first due date. The first fishing effort declaration that will be sent to the system shall include the effort deployed since 1 February 2010. Member States shall transmit to the Commission on its request the data on fishing effort deployed by their fishing vessels during the month of January 2010.

ANNEX IIB U.K.

FISHING EFFORT FOR VESSELS IN THE CONTEXT OF THE RECOVERY OF CERTAIN SOUTHERN HAKE AND NORWAY LOBSTER STOCKS IN ICES DIVISIONS VIIIC AND IXa EXCLUDING THE GULF OF CADIZ

1. Scope U.K.

This Annex shall apply to EU vessels of 10 metres' length overall or more carrying on board or deploying trawls, Danish seines or similar gears of mesh size equal to or larger than 32 mm and gill-nets of mesh size equal to or larger than 60 mm or bottom longlines, and present in ICES divisions VIIIc and IXa excluding the Gulf of Cadiz.

2. Definitions U.K.

For the purposes of this Annex:

- (a) 'gear grouping' means the grouping of trawls, Danish seines and similar gears of mesh size equal to or larger than 32 mm and gill-nets of mesh size equal to or larger than 60 mm and bottom longlines;
- (b) 'regulated gear' means any of the two gear categories belonging to the gear grouping;
- (c) 'area' means ICES divisions VIIIc and IXa excluding the Gulf of Cadiz;
- (d) '2010 management period' means the period from 1 February 2010 to 31 January 2011;
- (e) 'special conditions' means the special conditions set out in point 5.2;
- 3. Vessels concerned by fishing effort limitations U.K.
- 3.1. A Member State shall not authorise fishing with a regulated gear in the area by any of its vessels which have no record of such fishing activity in the years 2002, 2003, 2004, 2005, 2006, 2007, 2008 or 2009 in the area, excluding the record of fishing activities as a result of transfer of days between fishing vessels, unless it ensures that equivalent capacity, measured in kilowatts, is prevented from fishing in the area.
- 3.2. A vessel flying the flag of a Member State having no quotas in the area shall not be authorised to fish in the area with a regulated gear, unless the vessel is allocated a quota after a transfer as permitted according to the Article 20(5) of Regulation (EC) No 2371/2002 and is allocated days at sea according to point 10 or 11 of this Annex.
- 4. General obligations and limitation in activity U.K.
- 4.1. Member States shall manage the maximum allowable effort in accordance with the conditions laid down in Article 8 of Regulation (EC) No 2166/2005 and Articles 26 to 34 of Regulation (EC) No 1224/2009.

- 4.2. Each Member State shall ensure that, when carrying on board any regulated gear, EU vessels flying its flag shall be present within the area for no more than the number of days specified in point 5.
- 4.3. Article 28 of Regulation (EC) No 1224/2009 shall apply to vessels falling under the scope of this Annex. The geographical area referred to in that Article shall be understood as the area defined in point 2.

NUMBER OF DAYS PRESENT WITHIN THE AREA ALLOCATED TO EU VESSELS

- 5. Maximum number of days U.K.
- 5.1. During the 2010 management period, the maximum number of days at sea for which a Member State may authorise a vessel flying its flag to be present within the area having carried on board any regulated gear is shown in Table I.
- 5.2. For the purposes of fixing the maximum number of days at sea an EU vessel may be authorised by its flag Member State to be present within the area, the following special conditions shall apply in accordance with Table I:
- (a) the total landings of hake in the year 2007 or 2008 made by the vessel shall represent less than 5 tonnes according to the landings in live weight consigned in the fishing logbook, and
- (b) the total landings of Norway lobster in the year 2007 or 2008 made by the vessel shall represent less than 2,5 tonnes according to the landings in live weight consigned in the fishing logbook.
- 5.3. The special condition referred to in point 5.2 might be transferred from one vessel to one or more other vessels which replace that vessel in the fleet, provided that the replacing vessel uses similar gear and does not have in any year of its operation a record of landings of hake and Norway lobster higher than the weights specified in point 5.2.
- 5.4. A Member State may manage its fishing effort allocations according to a kilowatt days system. By that system it may authorise any vessel concerned for any regulated gear and special conditions as set out in Table I to be present within the area for a maximum number of days which is different from that set out in that Table, provided that the overall amount of kilowatt days corresponding to the regulated gear and to the special condition referred to in point 5.2 is respected.

This overall amount of kilowatt days shall be the sum of all individual fishing efforts allocated to the vessels flying the flag of that Member State and qualified for the regulated gear and, where applicable, the special condition. Such individual fishing efforts shall be calculated in kilowatt days by multiplying the engine power of each vessel by the number of days at sea it would benefit from, according to Table I, if this point were not applied. For as long as the number of days is unlimited according to Table I, the relevant number of days the vessel would benefit from is 360.

- 5.5. A Member State wishing to benefit from point 5.4 shall submit a request to the Commission with reports in electronic format containing for the gear grouping and special condition as laid down in Table I the details of the calculation based on:
- list of vessels authorised to fish by indicating their EU fishing fleet register number (CFR) and their engine power,

Changes to legislation: There are outstanding changes not yet made to Council Regulation (EU) No 53/2010. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

- track records of 2007, 2008 and 2009 for such vessels reflecting the catch composition defined in special conditions 5.2(a) or (b), if these vessels are qualified for such special condition,
- the number of days at sea for which each vessel would have initially been authorised to fish according to Table I and the number of days at sea which each vessel would benefit from in application of point 5.4.

On the basis of that description, the Commission may authorise that Member State to benefit from point 5.4.

- 6. Management periods U.K.
- 6.1. A Member State may divide the days present within the area given in Table I into management periods of durations of one or more calendar months.
- 6.2. The number of days or hours for which a vessel may be present within the area during a management period shall be fixed by the Member State concerned.

In case that a Member State authorises vessels to be present within the area by hours, the Member State shall continue measuring the consumption of days as specified in point 4.1. Upon request by the Commission, the Member State shall demonstrate its precautionary measures taken to avoid an excessive consumption of days within the area due to a vessel terminating presences in the area that do not coincide with the end of a 24-hour period.

- 7. Allocation of additional days for permanent cessation of fishing activities U.K.
- 7.1. An additional number of days at sea on which a vessel may be authorised by its flag Member State to be present within the area when carrying on board any regulated gear may be allocated to Member States by the Commission on the basis of permanent cessations of fishing activities that have taken place since 1 January 2004 either in accordance with Article 7 of Regulation (EC) No 2792/1999, Article 23 of Regulation (EC) No 1198/2006 or Council Regulation (EC) No 744/2008 of 24 July 2008 instituting a temporary specific action aiming to promote the restructuring of the European Community fishing fleets affected by the economic crisis⁽¹⁾, or resulting from other circumstances duly motivated by Member States. Any vessels that can be shown to have been definitively withdrawn from the area may also be considered.

The effort expended in 2003 measured in kilowatt days of the withdrawn vessels using the gears in question shall be divided by the effort expended by all vessels using those gears during 2003. The additional number of days at sea shall be then calculated by multiplying the ratio so obtained by the number of days that would have been allocated according to Table I. Any part of a day resulting from this calculation shall be rounded to the nearest whole day.

This point shall not apply where a vessel has been replaced in accordance with point 3 or 5.3, or when the withdrawal has already been used in previous years to obtain additional days at sea.

- 7.2. Member States wishing to benefit from the allocations referred to in point 7.1 shall submit a request to the Commission with reports in electronic format containing, for the gear grouping and special condition as laid down in Table I, the details of the calculation based on:
- lists of withdrawn vessels with their EU fishing fleet register number (CFR) and their engine power,
- the fishing activity deployed by such vessels in 2003 calculated in days at sea according to the grouping of fishing gears and if necessary special condition.

- 7.3. On the basis of such a request the Commission may amend the number of days defined in point 5.1 for that Member State in accordance with the procedure referred to in Article 30(2) of Regulation (EC) No 2371/2002.
- 7.4. During the 2010 management period, a Member State may re-allocate those additional numbers of days at sea to all or part of the vessels remaining in fleet and qualified for the regulated gears. Additional days stemming from a withdrawn vessel that benefited from a special condition 5.2(a) or (b) may not be allocated to a vessel remaining active that does not benefit from a special condition.
- 7.5. A Member State may not reallocate in the 2010 management period any additional number of days resulting from a permanent cessation of activity previously allocated by the Commission, unless the Commission has taken a decision that reassesses those additional numbers of days on the basis of the current gear groupings and limitations in days at sea. Upon the Member State's request to reassess the number of days, the Member State is provisionally authorised to reallocate 50 % of the additional number of days, until the Commission's decision is taken.
- 8. Allocation of additional days for enhanced observer coverage U.K.
- 8.1. Three additional days on which a vessel may be present within the area when carrying onboard any regulated gear may be allocated to Member States by the Commission on the basis of an enhanced programme of observer coverage in partnership between scientists and the fishing industry. Such a programme shall focus in particular on levels of discarding and on catch composition and go beyond the requirements on data collection, as laid down in Council Regulation (EC) No 199/2008 of 25 February 2008 concerning the establishment of a Community framework for the collection, management and use of data in the fisheries sector and support for scientific advice regarding the Common Fisheries Policy⁽²⁾ and its implementing rules for national programmes.

Observers shall be independent from the owner, the master of the vessel and any crew member.

- 8.2. Member States wishing to benefit from the allocations referred to in point 8.1 shall submit a description of their enhanced observer coverage programme to the Commission for approval.
- 8.3. On the basis of this description, and after consultation with STECF, the Commission may amend the number of days defined in point 5.1 for that Member State and for the vessels, the area and gear concerned by the enhanced programme of observers in accordance with the procedure referred to in Article 30(2) of Regulation (EC) No 2371/2002.
- 8.4. If an enhanced observer coverage programme submitted by a Member State has been approved by the Commission in the past and the Member State wishes to continue its application without changes, the Member State shall inform the Commission of the continuation of that programme four weeks before the beginning of the period for which the programme applies.
- 9. Special conditions for the allocation of days U.K.
- 9.1. If a vessel has received an unlimited number of days resulting from compliance with the special conditions, the vessel's landings in the 2010 management period shall not exceed 5 tonnes live weight of hake and 2,5 tonnes live weight of Norway lobster.
- 9.2. The vessel shall not tranship any fish at sea to another vessel.

9.3. When either of these conditions is not met by a vessel, that vessel shall with immediate effect no longer be entitled to the allocation of days corresponding to the given special condition.

TABLE I

Maximum number of days a vessel may be present within the area by fishing gear per year

Special condition	Regulated gear	Maximum number of days
	Bottom trawls, Danish seines and similar trawls of mesh size ≥32 mm, gill-nets of mesh size ≥60 mm and bottom longlines	158
5.2(a) and 5.2(b)	Bottom trawls, Danish seines and similar trawls of mesh size ≥32 mm, gill-nets of mesh size ≥60 mm and bottom longlines	Unlimited

EXCHANGES OF FISHING EFFORT ALLOCATIONS

- 10. Transfer of days between vessels flying the flag of a Member State U.K.
- 10.1. A Member State may permit any fishing vessel flying its flag to transfer days present within the area for which it has been authorised to another vessel flying its flag within the area provided that the product of the days received by a vessel multiplied by its engine power in kilowatts (kilowatt days) is equal to or less than the product of the days transferred by the donor vessel and the engine power in kilowatts of that vessel. The engine power in kilowatts of the vessels shall be that recorded for each vessel in the EU fishing fleet register.
- 10.2. The total number of days present within the area transferred under point 10.1 multiplied by the engine power in kilowatts of the donor vessel shall not be higher than the donor vessel's average annual days track record in the area as verified by the fishing logbook in the years 2001, 2002, 2003, 2004 and 2005 multiplied by the engine power in kilowatts of that vessel.
- 10.3. The transfer of days as described in point 10.1 shall be permitted only between vessels operating with any regulated gear and during the same management period.
- 10.4. Transfer of days is only permitted for vessels benefiting from an allocation of fishing days without special condition.
- 10.5. On request from the Commission, Member States shall provide information on the transfers that have taken place. Formats of spreadsheet for the collection and transmission of information referred to in the present point may be adopted in accordance with the procedure referred to in Article 30(2) of Regulation (EC) No 2371/2002.
- 11. Transfer of days between fishing vessels flying the flag of different Member States U.K.

Member States may permit transfer of days present within the area for the same management period and within the area between any fishing vessels flying their flags provided that points 3.1,

3.2, and 10 apply mutatis mutandis. Where Member States decide to authorise such a transfer, they shall notify the Commission, before the transfer takes place, the details of the transfer, including the number of days, the fishing effort and, where applicable, the fishing quotas relating thereto

REPORTING OBLIGATIONS

12. Collection of relevant data U.K.

Member States, on the basis of information used for the management of fishing days present within the area as set out in this Annex, shall collect on a quarterly basis the information about total fishing effort deployed within the area for towed gears and static gears, effort deployed by vessels using different types of gear in the area, and the engine power of those vessels in kW.

13. Communication of relevant data U.K.

Upon request from the Commission, Member States shall make available to the Commission a spreadsheet with the data referred to in point 12 in the format specified in Tables II and III by sending it to the appropriate electronic mailbox address, which shall be communicated to the Member States by the Commission. Member States shall, upon the Commission's request, also send to the Commission detailed information on effort allocated and consumed covering all or parts of the 2009 and 2010 management periods, using the data format specified in Tables IV and V.

ANNEX IIC U.K.

FISHING EFFORT FOR VESSELS IN THE CONTEXT OF THE MANAGEMENT OF WESTERN CHANNEL SOLE STOCKS ICES ZONE VIIE GENERAL PROVISIONS

- 1. Scope U.K.
- 1.1. This Annex shall apply to EU vessels of 10 metres' length overall or more carrying on board or deploying any of the gears defined in point 3, and present in zone VIIe. For the purposes of this Annex, a reference to the 2010 management period means the period from 1 February 2010 to 31 January 2011.
- 1.2. Vessels fishing with static nets with mesh size equal to or larger than 120 mm and with track records of less than 300 kg live weight of sole according to the fishing logbook in 2004 shall be exempt from the provisions of this Annex on the conditions that:
- such vessels catch less than 300 kg live weight of sole during the 2010 management period;
- (b) such vessels shall not tranship any fish at sea to another vessel; and
- (c) each Member State concerned makes a report to the Commission by 31 July 2010 and 31 January 2011 on these vessels' track records for sole in 2004 and catches of sole in 2010.

When either of these conditions is not met, the vessels concerned shall with immediate effect cease to be exempted from the provisions of this Annex.

2. Fishing gear U.K.

For the purposes of this Annex, the following groupings of fishing gears shall apply:

- (a) beam trawls of mesh size equal to or greater than 80 mm;
- (b) static nets including gill-nets, trammel-nets and tangle-nets with mesh size less than 220 mm.
- 3. General obligations and limitation in activity U.K.
- 3.1. Member States shall manage the maximum allowable effort in accordance with Articles 26 to 34 of Regulation (EC) No 1224/2009.
- 3.2. Article 28 of Regulation (EC) No 1224/2009 shall apply to vessels falling under the scope of this Annex. The geographical area referred to in that Article shall be understood as the ICES zone VIIe.

IMPLEMENTATION OF FISHING EFFORT LIMITATIONS

- 4. Vessels concerned by fishing effort limitations U.K.
- 4.1. Vessels using gear types identified in point 2 and fishing in areas defined in point 1 shall hold a special fishing permit issued in accordance with Article 7 of Regulation (EC) No 1627/94.
- 4.2. A Member State shall not permit fishing with a gear belonging to a grouping of fishing gears defined in point 2 in the area by any of its vessels which have no record of such fishing activity in the years 2002, 2003, 2004, 2005, 2006, 2007, 2008 or 2009 in that area unless it ensures that equivalent capacity, measured in kilowatts, is prevented from fishing in the regulated area.
- 4.3. However, a vessel with a track record of using a gear belonging to a grouping of fishing gears defined in point 2 may be authorised to use a different fishing gear, provided that the number of days allocated to this latter gear is greater than or equal to the number of days allocated to the first gear.

- 4.4. A vessel flying the flag of a Member State having no quotas in the area defined in point 1 shall not be permitted to fish in that area with a gear belonging to a grouping of fishing gear defined in point 2, unless the vessel is allocated a quota after a transfer as permitted according to the Article 20(5) of Regulation (EC) No 2371/2002 and is allocated days at sea according to point 10 or 11 of this Annex.
- 5. Limitations in activity U.K.

Each Member State shall ensure that, when carrying on board any of the groupings of fishing gears referred to in point 2, fishing vessels flying its flag and registered in the Union shall be present within the area for no more than the number of days set out in point 6.

NUMBER OF DAYS PRESENT WITHIN THE AREA ALLOCATED TO EU VESSELS

- 6. Maximum number of days U.K.
- 6.1. During the 2010 management period, the maximum number of days at sea for which a Member State may authorise a vessel flying its flag to be present within the area having carried on board and used any one of the fishing gears referred to in point 2 is shown in Table I.
- 6.2. During the 2010 management period, the number of days at sea for which a vessel is present within the total area covered by this Annex and Annex IIA shall not exceed the number shown in Table I of this Annex. However, where the vessel is subject to allocations of maximum effort for its presence in areas covered by Annex IIA alone, it shall comply with the maximum effort thus fixed.
- 6.3. During the 2010 management period, a Member State may manage its fishing effort allocation according to a kilowatt days system. By that system it may authorise any vessel concerned to be present within the area for a maximum number of days which is different from that set out in Table I for any one of the groupings of fishing gears laid down in that Table, provided that the overall amount of kilowatt days corresponding to such a grouping is respected.

For a specific grouping of fishing gears, the overall amount of kilowatt days shall be the sum of all individual fishing efforts allocated to the vessels flying the flag of the Member State concerned and qualified for that specific grouping. Such individual fishing efforts shall be calculated in kilowatt days by multiplying the engine power of each vessel by the number of days at sea it would benefit from, according to Table I, if this point were not applied.

- 6.4. A Member State wishing to benefit from point 6.3 shall submit a request to the Commission with reports in electronic format containing for each grouping of fishing gears the details of the calculation based on:
- list of vessels authorised to fish by indicating their EU fishing fleet register number (CFR) and their engine power,
- the number of days at sea for which each vessel would have initially been authorised to fish according to Table I and the number of days at sea which each vessel would benefit from in application of point 6.3.

On the basis of that description, the Commission may authorise that Member State to benefit from point 6.3.

- 7. Management periods U.K.
- 7.1. A Member State may divide the days present within the area given in Table I into management periods of durations of one or more calendar months.

7.2. The number of days or hours for which a vessel may be present within the area during a management period shall be fixed at the discretion of the Member State concerned.

In case that a Member State authorises vessels to be present within the area by hours, the Member State shall continue measuring the consumption of days as specified in point 3. Upon request by the Commission, the Member State shall demonstrate its precautionary measures taken to avoid an excessive consumption of days within the area due to a vessel terminating presences in the area that do not coincide with the end of a 24-hours-period.

- 8. Allocation of additional days for permanent cessations of fishing activities U.K.
- 8.1. An additional number of days at sea on which a vessel may be authorised by its flag Member State to be present within the geographical area when carrying on board any of the gears referred to in point 2 may be allocated to Member States by the Commission on the basis of permanent cessations of fishing activities that have taken place since 1 January 2004 either in accordance with Article 7 of Regulation (EC) No 2792/1999 or Article 23 of Regulation (EC) No 1198/2006 or Regulation (EC) No 744/2008, or resulting from other circumstances duly motivated by Member States.

The effort expended in 2003 measured in kilowatt days of the withdrawn vessels using the gear in question shall be divided by the effort expended by all vessels using that gear during 2003. The additional number of days at sea shall be then calculated by multiplying the ratio so obtained by the number of days that would have been allocated according to Table I. Any part of a day resulting from this calculation shall be rounded to the nearest whole day.

This point shall not apply where a vessel has been replaced in accordance with point 4.2 or when the withdrawal has already been used in previous years to obtain additional days at sea.

- 8.2. Member States wishing to benefit from the allocations referred to in point 8.1 shall submit a request to the Commission with reports in electronic format containing for each grouping of fishing gears the details of the calculation based on:
- lists of withdrawn vessels with their EU fishing fleet register number (CFR) and their engine power,
- the fishing activity deployed by such vessels in 2003 calculated in days at sea by concerned grouping of fishing gears.
- 8.3. On the basis of such a request the Commission may amend the number of days defined in point 6.2 for that Member State in accordance with the procedure referred to in Article 30(2) of Regulation (EC) No 2371/2002.
- 8.4. During the 2010 management period, a Member State may re-allocate those additional numbers of days at sea to all or parts of the vessels remaining in fleet and qualified for the relevant grouping of fishing gears.
- 8.5. A Member State may not reallocate in the 2010 management period any additional number of days resulting from a permanent cessation of activity previously allocated by the Commission, unless the Commission has taken a decision that reassesses those additional numbers of days on the basis of the current gear groupings and limitations in days at sea. Upon the Member State's request to reassess the number of days, the Member State is provisionally authorised to reallocate 50 % of the additional number of days, until the Commission's decision is taken.
- 9. Allocation of additional days for enhanced observer coverage U.K.

Changes to legislation: There are outstanding changes not yet made to Council Regulation (EU) No 53/2010. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

9.1. Three additional days on which a vessel may be present within the area when carrying onboard any of the groupings of fishing gear referred to in point 2 may be allocated between 1 February 2010 and 31 January 2011 to Member States by the Commission on the basis of an enhanced programme of observer coverage in partnership between scientists and the fishing industry. Such a programme shall focus in particular on levels of discarding and on catch composition and go beyond the requirements on data collection, as laid down in Regulation (EC) No 199/2008 and Regulation (EC) No 665/2008 for national programmes.

Observers shall be independent from the owner, the master of the fishing vessel and any crew member.

- 9.2. Member States wishing to benefit from the allocations referred to in point 9.1 shall submit a description of their enhanced observer coverage programme to the Commission for approval.
- 9.3. On the basis of this description, and after consultation with STECF, the Commission may amend the number of days defined in point 6.1 for that Member State and for the vessels, the area and gear concerned by the enhanced programme of observers in accordance with the procedure referred to in Article 30(2) of Regulation (EC) No 2371/2002.
- 9.4. If an enhanced observer coverage programme submitted by a Member State has been approved by the Commission in the past and the Member State wishes to continue its application without changes, the Member State shall inform the Commission of the continuation of that programme four weeks before the beginning of the period for which the programme applies.

TABLE I

Maximum number of days a vessel may be present within the area by gear grouping per year

Gearpoint 3	DenominationOnly the gear groupings as defined in point 3 are used	Western Channel
3(a)	Beam trawls of mesh size ≥ 80 mm	164
3(b)	Static nets with mesh size < 220 mm	164

EXCHANGES OF FISHING EFFORT ALLOCATIONS

- 10. Transfer of days between fishing vessels flying the flag of a Member State U.K.
- 10.1. A Member State may permit any of its fishing vessels flying its flag to transfer days present within the area for which it has been authorised to another of its vessels flying its flag within the area provided that the product of the days received by a vessel and its engine power in kilowatts (kilowatt days) is equal to or less than the product of the days transferred by the donor vessel and the engine power in kilowatts of that vessel. The engine power in kilowatts of the vessels shall be that recorded for each vessel in the EU fishing fleet register.
- 10.2. The total number of days present within the area, multiplied by the engine power in kilowatts of the donor vessel, shall not be higher than the donor vessel's average annual

- days track record in the area as verified by the fishing logbook in the years 2001, 2002, 2003, 2004 and 2005 multiplied by the engine power in kilowatts of that vessel.
- 10.3. The transfer of days as described in point 10.1 shall be permitted only between vessels operating within the same gear grouping referred to in point 2 and during the same management period.
- 10.4. On request from the Commission, Member States shall provide reports on the transfers that have taken place. A detailed format of spreadsheet for making these reports available to the Commission may be adopted in accordance with the procedure referred to in Article 30(2) of Regulation (EC) No 2371/2002.
- 11. Transfer of days between fishing vessels flying the flag of different Member States U.K.

Member States may permit transfer of days present within the area for the same management period and within the area between any fishing vessels flying their flags provided that points 4.2, 4.4, 6 and 10 apply mutatis mutandis. Where Member States decide to authorise such a transfer, as a preliminary they shall notify the Commission before the transfer takes place, the details of the transfer, including the number of days transferred, the fishing effort and, where applicable, the fishing quotas relating thereto, as agreed between them.

REPORTING OBLIGATIONS

12. Collection of relevant data U.K.

Member States, on the basis of information used for the management of fishing days present within the area as set out in this Annex, shall collect for each annual quarter the information about total fishing effort deployed within the area for towed gears and static gears and effort deployed by vessels using different types of gear in the area concerned by this Annex.

13. Communication of relevant data U.K.

Upon request from the Commission, Member States shall make available to the Commission a spreadsheet with the data referred to in point 12 in the format specified in Tables II and III by sending it to the appropriate electronic mailbox address, which shall be communicated to the Member States by the Commission. Member States shall, upon the Commission's request, also send to the Commission detailed information on effort allocated and consumed covering all or parts of the 2009 and 2010 management periods, using the data format specified in Tables IV and V.

ANNEX IID U.K.

FISHING OPPORTUNITIES FOR VESSELS FISHING FOR SANDEEL IN ICES ZONES IIa, IIIa AND IV

- 1. The conditions laid down in this Annex shall apply to EU vessels fishing in EU waters of ICES zones IIa, IIIa and IV with demersal trawl, seine or similar towed gears with a mesh size of less than 16 mm.
- 2. The conditions laid down in this Annex shall apply to third-country vessels authorised to fish for sandeel in EU waters of ICES zone IV unless otherwise specified, or as a consequence of consultations between the Union and Norway as set out in the Agreed Record of conclusions between the European Union and Norway.
- 3. For the purposes of this Annex, a day present within the area shall be:
- (a) the 24-hour period between 00:00 hours of a calendar day and 24:00 hours of the same calendar day or any part of such a period; or
- (b) any continuous period of 24 hours as recorded in the fishing logbook between the date and time of departure and the date and time of arrival or any part of any such time period.
- 4. Each Member State concerned shall maintain a data base containing for EU waters of ICES zones IIa, IIIa and IV and for each vessel flying its flag or registered within the Union which have been fishing with demersal trawl, seine or similar towed gears with a mesh size of less than 16 mm, the following information:
- (a) the name and internal registration number of the vessel;
- (b) the installed engine power of the vessel in kilowatts measured in accordance with Article 5 of Regulation (EEC) No 2930/86;
- (c) the number of days present within the area when fishing with demersal trawl, seine or similar towed gear with a mesh size of less than 16 mm;
- (d) the kilowatt-days as the product of the number of days present within the area and the installed engine power in kilowatts.
- 5. Exploratory fishery relating to sandeel abundance shall start no earlier than 1 April 2010 and end no later than 6 May 2010.

The total ceiling of fishing effort allowed in the exploratory fishery relating to sandeel abundance in 2010 shall be determined on the basis of the total fishing effort deployed by EU vessels in 2007 established in accordance with point 4 and shall be divided among Member States in accordance with the quota allocations for this TAC.

6. The TAC and quotas for sandeel in EU waters of ICES zones IIa, IIIa and IV as laid down in Annex I shall be revised by the Commission as early as possible based on advice from ICES and the STECF on the size of the 2009 year class of North Sea

sandeel, taking into account the following principles as well as other relevant elements contained in the scientific advice:

The TAC for EU waters of ICES zones IIa and IV shall be established according to the following function:

TAC $_{2010} = -333 + R1,2010*3,692$

where R1,2010 is the stock size of age 1 sandeel in billions on 1 January 2010 and the TAC is expressed in 1 000 tonnes.

- 7. If the TAC calculated in point 6 exceeds 400 000 tonnes, the TAC shall be set at 400 000 tonnes.
- 8. Commercial fishing with demersal trawl, seine or similar towed gears with a mesh size of less than 16 mm shall be prohibited from 1 August 2010 until 31 December 2010.

[F4ANNEX III] U.K.

QUANTITATIVE LIMITATIONS OF FISHING AUTHORISATIONS FOR EU VESSELS FISHING IN THIRD-COUNTRY WATERS

Area of fishing	Fishery	Number of fishing authori- sations	Allocation of fishing authorisations amongst Member States	Maximum number of vessels present at any time

	Herring, IIIa	4	4
	Industrial fishing for Norway pout and sprat, IV, VIa (north of 56° 30' N); sandeel, IV (including unavoidable bycatches of blue whiting)	15	15
	Ling and tusk	20	10
	Blue whiting, II, VIa (north of 56° 30' N), VIb, VII (west of 12° 00' W)	20	20
	Blue ling	16	16
Venezuela	Snappers ^c (French Guyana waters)	41	pm
	Sharks ^c (French Guyana waters)	4	pm

a The fishing authorisations for fishing vessels flying the flag of Norway may only be granted as from the date of conclusion of the bilateral fisheries arrangement with Norway for 2010.

b The fishing authorisations for fishing vessels flying the flag of Faroe Islands may only be granted as from the date of conclusion of the bilateral fisheries arrangement with the Faroe Islands for 2010.

c To issue these licences, proof must be produced that a valid contract exists between the vessel owner applying for the licence and a processing undertaking situated in the Department of French Guyana and that it includes an obligation to land at least 75 % of all snapper catches or 50 % of all shark catches from the vessel concerned in that department so that they may be processed in that undertaking's plant. The contract referred to above must be endorsed by the French authorities, which shall ensure that it is consistent both with the actual capacity of the contracting processing undertaking and with the objectives for the development of the Guyanese economy. A copy of the duly endorsed contract shall be appended to the licence application. Where the endorsement referred to above is refused, the French authorities shall notify this refusal and state their reasons for it to the party concerned and to the Commission.
