ANNEX

Description of the goods (1)	Classification(CN code) (2)	Reasons (3)
<p>A machine for use with lifts, with dimensions of approximately 83 × 70 × 30 cm and a weight of 418 kg (so-called ‘gearless traction machine’), consisting of:</p> <ul style="list-style-type: none"> — a permanent magnet synchronous electric motor with a power of 3,4 kW, — a pulley on the shaft of the motor, — a braking system, and — a signal generator for determining the correct position of the cables (safety monitoring system). <p>The machine is installed in a lift shaft for lifting and lowering the cabin.</p>	<p>8425 31 00</p>	<p>Classification is determined by General Rules 1 and 6 for the interpretation of the Combined Nomenclature, Note 2(a) to Section XVI and the wording of CN codes 8425 and 8425 31 00.</p> <p>The machine consists of an electric motor and a pulley on the shaft of the motor. Given its characteristics, it is to be considered to be a winch of heading 8425.</p> <p>The presence of a braking system or the absence of a cable or belt does not exclude classification as a winch (see also the HS classification opinion 8425.31/1). The presence of the safety monitoring system does not alter the characteristics of a winch.</p> <p>Classification as a part of a lift under heading 8431 is therefore excluded.</p> <p>The machine is therefore to be classified under CN code 8425 31 00 as a winch powered by an electric motor.</p>
